

ISI AS1 Single

Air Supply Unit

The Versatile Mobile Air Supply System

- Portability and versatility air supply system
- Works with any air cylinder and can have a second cylinder added to it without interrupting the air supply
- Available in 2216, 3000, 4500 or 5000 psi configurations
- Easily connects to ISI ARAP Escape Type C respirators or one of ISI's SCBA systems
- Operates by connecting the respirator to the AS1 Single, turn on the AS1 cylinder valve and the system is fully operational. Once the whistle starts to sound, turn on the second cylinder for continuous breathing to allow for changing out the first cylinder for additional time in use
- Cylinders may be changed without being removed from the carrier
- Standard service and repair easy for the end user

Features

Pneumatics & Frame

- Standard with universal pressure reducer, coupled with two airline connections, with two additional ports for added users
- Connections are available in Hansen HK, Foster Brass, Foster, or Schrader
- Metal frame includes adjustable straps that will fit up to two breathing air cylinders
- Will power pneumatic tools and lift bags
- Works with standard cascade systems
