## **Project Details**

### **1. Describe the commodity/service that the agency/institution is seeking to procure:**

TraumaCad provides orthopedic surgeons with digital tools to preoperatively plan procedures and simulate the expected surgical outcome, as well as quickly assess clinical measurements, prostheses size, and visualize osteotomies and fracture reductions. The server template subscription is required to allow access to the template library database that is essential for effective preoperative planning.

### **2. Explain why the commodity/service is the only one (1) that can meet the needs of the agency/institution:**

These templates allow our surgeons to plan their procedures and know which size implants are required for purchase.

### **3. Explain why the source is the only person or entity that can provide the required commodity/service:**

UMMC holds a perpetual license for the TraumaCAD software, but the template library requires an annual subscription. The software is not usable without the templates. While TraumaCad is available through resellers, since the original purchase was made from Brainlab, the service contract must be purchased from Brainlab and is not available through any other reseller.

They are not available from any other distributor. See supporting letter from Brainlab, Inc. Attachment A.

### **4. Explain why the amount to be expended for the commodity/service is reasonable:**

The estimated amount to be expended is for the purchase of the TraumaCAD is **\$18,785.07**. This amount is within the expected price range for these products.

### **5. Describe the efforts that the agency/institution went through to obtain the best possible price for the commodity/service:**

Through market intelligence, UMMC was able to negotiate best pricing for these products. All applicable discounts were explored and applied.
