DAYMORA™ SEATING & TABLES

Modular Lounge | Overview

Planning

Statement of Line	➤ See page DA.3
Planning	DA.6
Pricing	DA.11
Surface Materials	DA.30

Arm and back frames are constructed of $\frac{5}{8}$ "-thick plywood and covered with 3" sculpted, high-grade polyurethane foam and wrapped with 1" polyester batting. Arms feature a sewn slipcover that is stapled into place.

Back, seat, and arms have decorative 20mm flat piping. Piping may show more movement with pliable textiles and a more crisp line with more rigid textiles.

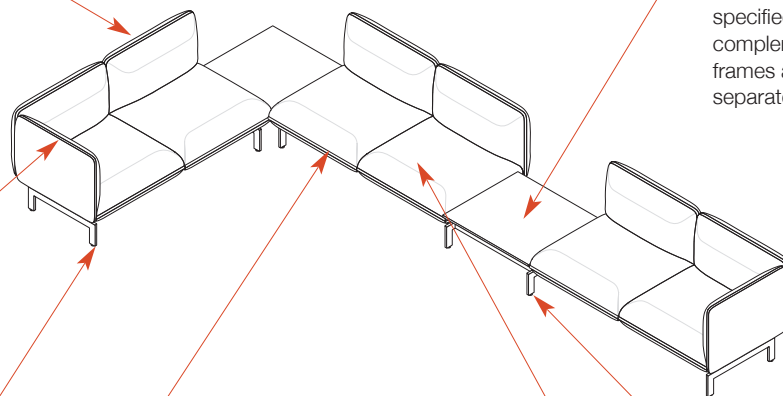

Leg frames are welded $\frac{3}{4}$ " x 2" structural steel tube. Support rails are made from $\frac{3}{4}$ " x 3" steel tube, fastened to leg frames with hardware. Available in a variety of powdercoat colors.

Seat frames are constructed with $\frac{5}{8}$ "-thick plywood that supports 4 $\frac{1}{2}$ " of high-grade, high-resiliency foam and wrapped with a 1" polyester batting. Seat upholstery features a wrap-around upholstery method and is stapled into place.

In-line and corner tables available in a variety of top materials and colors with a flat edge profile, can be specified in modular configurations to complement lounge pieces. Metal frames are fully welded and ship separately from the table top.

Non-skid, adjustable black glides are 1" in diameter with 1" adjustability. Soft glides available at an upcharge.

Billowing, plush upholstery may show comfort wrinkles depending on the textile characteristics and is inherent to the design.

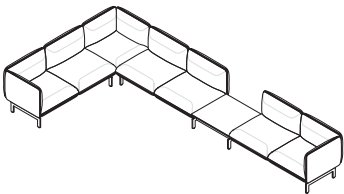

DAYMORA™ SEATING & TABLES

Modular Lounge | Configurations

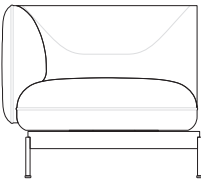

Planning

Statement of Line	➤ See page DA.3
Planning	DA.6
Pricing	DA.11
Surface Materials	DA.30

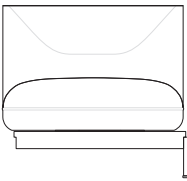

Daymora modular lounge allows the flexibility to create arrangements in a mix of arm and armless lounges, benches, and in-line and corner tables.

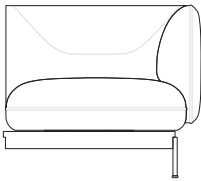

Leg frames (end and in-line) and rails provide support. By utilizing in-line legs where two units join together, the redundancy of multiple legs is avoided and a clean visual is created by sharing support.

Starter

Add-On

End

IMPORTANT: Modular lounge units are specified to the left as seated. Modular lounge application consists of three types of models:

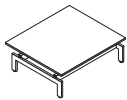

- Starter
- Add-on
- End

Starter unit begins the run and has one end leg frame on the right (as seated) and one in-line leg frame on the left (as seated) allowing it to connect to the next unit.

Add-on unit connects to the starter unit utilizing the in-line leg frame from the starter unit. The add-on unit has an in-line leg frame on the left (as seated) allowing it to connect to next add-on or end unit. There is no limit to the number of add-on units that can be used when creating a modular configuration.

End unit completes the modular lounge configuration. The end unit connects to the add-on unit (or starter if only two units will be connected), sharing the in-line leg for support. The end unit includes one end leg frame on the left (as seated) to complete the support of the modular run.

Corner lounges and corner tables are available for modular lounge configurations. ➤ See page DA.8 for corner planning.

In-line tables feature a variety of surface materials and color offering. Woodgrain runs side-to-side only. In-line tables are specified as one model but the top ships separately from the base for field installation.

IMPORTANT: Modular configurations are only intended for side-to-side ganging. Back-to back ganging is not supported.

DAYMORA™ SEATING & TABLES

Modular Lounge | Configurations with Add-On Corner Units

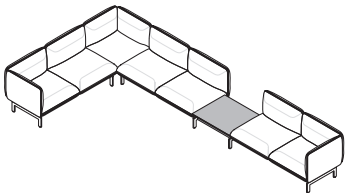

Planning

Statement of Line	➤ See page DA.3
Planning	DA.6
Pricing	DA.11
Surface Materials	DA.30

Modular corners are available in tables or upholstered lounge units .

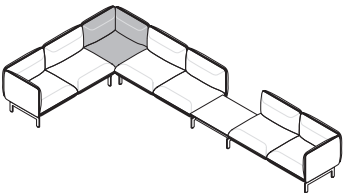

All corners (table or upholstered lounge) are add-on units and cannot be used to start or end a run. They must connect to armless models on both sides.

IMPORTANT: Planning for add-on corners follows the same guidelines as other modular lounge units. Modular lounge units are specified to the left as seated.

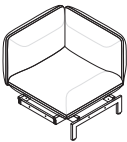

Corner tables feature a variety of surface materials and color offering, Woodgrain can run in either direction upon field installation.

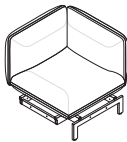

Corner tables ship in two boxes (top ships separately from the base) although the table is specified as one model.

Upholstered corner lounges and benches can be used to create an inside “L” configuration only. They ship fully assembled with rails, corner leg and in-line leg frame (left as seated). On the right as seated, the in-line leg frame from the attaching unit connects to the corner.

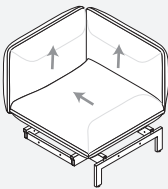

Left

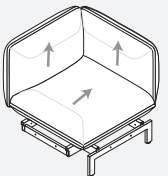

Right

Upholstered corner lounges are handed so that the textile direction can be specified to match the textile on the adjacent unit to the right or left.

Textile Direction:

Textile direction on left corner seats will match the units to its right (as seated).

Textile direction on right corner seats will match the units to its left (as seated).

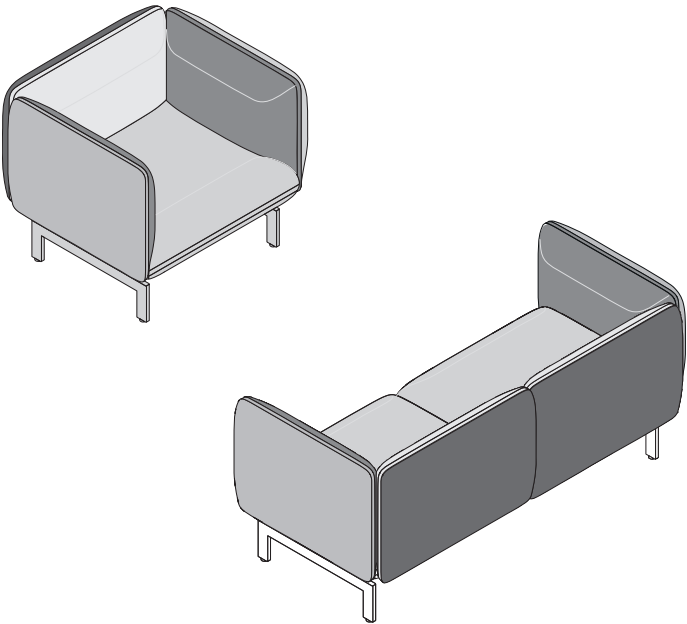

DAYMORA™ SEATING & TABLES
Modular Lounge | Upholstery Specification Reference

Contrasting upholstery may be specified for each of the areas shown.

- Contrasting Upholstery Key:

 - = Back
 - = Extreme back (outer back)
 - = Seat
 - = Inside arm
 - = Outside arm
 - = Piping

IMPORTANT: Use an electronic specification tool for accurate pricing when specifying contrasting textiles from different price grades.

Planning

Statement of Line	➤ See page DA.3
Planning	DA.6
Pricing	DA.11
Surface Materials	DA.30

Patterns:
Applying textiles with horizontal or vertical patterns and stripes on corner units and the backs of the units that will be used in a ganging applications is discouraged.

Flip:
Textiles reflect light differently when viewed at various angles, creating a natural phenomenon called “flip.” Flip is visible on all textiles and is not considered a defect; it is more easily recognized on textiles with a nap or shimmer, and is more apparent on corner units.

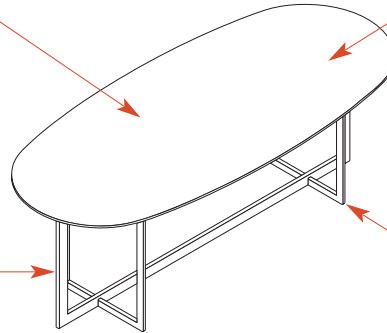

DAYMORA™ SEATING & TABLES

Freestanding Occasional & Console Tables | Overview

Planning

Statement of Line	➤ See page DA.3
Planning	DA.6
Pricing	DA.11
Surface Materials	DA.30

Occasional table tops are available in HPL, wood, matte laminate, solid surface and quartz, in a variety of colors. They feature a knife edge profile that gives the illusion of a slim top thickness.

Occasional table frames are made of two different sizes (1½"D x 1½"W and 1½"D x 1"W) of welded, structural steel tube; available in a variety of powder-coat colors.

HPL tops feature a softened 3mm PVC edgebanding.

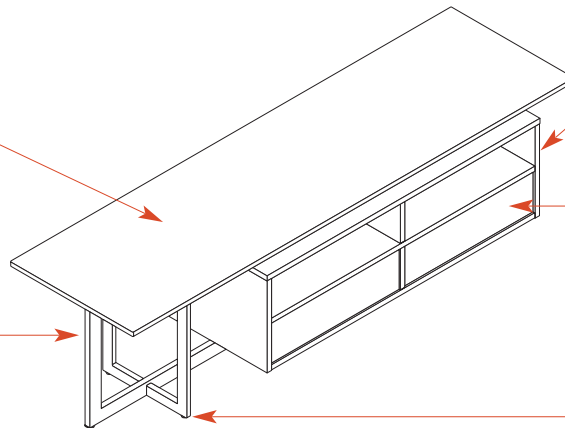

Matte laminate tops feature 1mm ABS edgebanding (always matching).

Wood tops feature a softened 3mm hardwood edgebanding (always matching).

HPL, matte laminate, and wood tops feature an MDF core on occasional tables and a flakeboard core on console tables.

Clear press-in floor glides are standard on occasional tables.

Console table tops are available in HPL, wood, matte laminate, solid surface and quartz, in a variety of colors. They feature a straight edge profile.

Console table frames are made of two different sizes (¾"D x 1½"W and ¾"D x 1"W) of welded, structural steel tube; available in a variety of powder-coat colors.

Console table chassis is available in thermally-fused laminate or wood. Chassis material and color are specified separately from console top.

Touch-to-open drawers feature soft-closing slides. Drawer fronts always match color selection of the storage.

Non-marring glides on console tables are black and feature 1" adjustment.

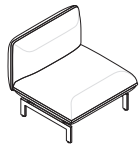

Occasional table top ships separately from the base.

Console tables ship completely assembled.

*Deduct 3/16" from height of table for solid surface top; deduct 3/8" for quartz top.

Standard Includes

- Top
- Metal rails and legs
- Non-skid glides

Tips

- Ships in two cartons; top ships separately from the base.

How to Specify

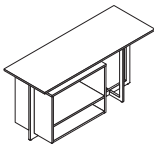

- 1 Model
- 2 Top material:
L = HPL with vinyl edgeband
W = Wood
ML = Matte Laminate
SS = Solid Surface
Q = Quartz
- 3 Top finish price group (omit for matte laminate and quartz)
STD = Group 1
- 4 Top color designator
- 5 Vinyl edgeband designator (include for HPL top only)
- 6 Frame paint price group:
STD = Standard
STDM = Metallic
GAL1 = Gallery (+\$142)
- 7 Frame paint designator

Kimball has analyzed each model to most accurately reflect the COM/COL yardage requirements. The yardage requirement for each model is based on 54"W textile and cutting the textile up the roll.

For widths other than 54", increase the yardage requirement by the factors below:

<i>Textile width</i>	<i>Increase yardage</i>
50"—53"	15%
48"—49"	30%
45"—47"	45%

If repeat is larger than 18", contact Customer Service to confirm the correct amount of yardage required.

When ordering 10 or more chairs in the same COM, yardage requirements may be reduced.

▶ Contact Customer Service.

Kimball has analyzed each model to most accurately reflect the COM/COL yardage requirements. The yardage requirement for each model is based on 54"W textile and cutting the textile up the roll.

For widths other than 54", increase the yardage requirement by the factors below:

Textile width	Increase yardage
50"—53"	15%
48"—49"	30%
45"—47"	45%

If repeat is larger than 18", contact Customer Service to confirm the correct amount of yardage required.

When ordering 10 or more chairs in the same COM, yardage requirements may be reduced.
