

## Invitation for Bids for Cat Island Reef Development

### Questions and Answers

October 5, 2022

W.C. Fore Trucking, Inc.

- 1) Will there be any additional detail on the structure provided?

**If you have any specific questions about the details of the structure, we can provide more information.**

- 2) Can a steel pipe be used for the center stem?

**Yes, a steel pipe can be used for the center stem. It will need to be at least 6 inches in diameter and a minimum of schedule 80.**

- 3) Can concrete rip rap be used instead of limestone?

**No, rip rap cannot be used. It is a limestone/concrete mixture that is an approved material.**

- 4) Is there a preference on structure being "round" or "square"?

**There is no preference on the structure being round or square- but it does need to be one of those options and the base of the structure does need to be square.**

- 5) Do the structures need to stand upright on the water bottom?

**Yes, the structures will need to be individually placed upright on the bottom.**

- 6) Is there a plan holders list?

**No, there is not a plan holder's list.**
