**Expandable vertical cable manager** provides cable management from under the worksurface to the floor. It is ideal for use with height-adjustable tables.

**Vertical cable manager for use with Xsedes or Navyd height-adjustable desks** can be used alone or with a plastic cable carrier as shown. The cable manager clips onto any side of the leg of height-adjust desk models. When using with a cable carrier, it can be placed over the entire length, or you can remove links in the cable carrier to just partially route cables into the top. Available in two heights specific to standard- and extended-height models.

**Plastic cable carrier** guides the power strip cord and data cables from the worksurface to the power source preventing kinks in the cables as the desk moves. The top screws to the underside of the worksurface and is held in place on the leg in two locations using high strength magnets. Magnets snap into the vertebrae at any location top to bottom. The carrier features 1/2" x 1/2" openings on the inside to slip cords into; each opening accommodates one 1/4" cord and one data cable per side. Links in the carrier can be removed to adjust to the desired length. Available in two lengths to accommodate height ranges.

**Metal cable basket** secures power and data cables neatly to the underside of any worksurface.

**Undersurface cable manager** features wave design to manage cords and cables. Cables pressure-fit between each wave. Black plastic. Set of 5.

# PERKS® POWER & DATA

## Clamp Mount

## Planning

Statement of Line	➤ See page PP.2
Planning	PP.11
Pricing	PP.11
Surface Materials	PP.47

**Ashley Duo power/USB center** adjusts to accommodate 1/2"- to 1 1/2"-thick worksurfaces. When installed, the unit height is 3" above the surface. For use with P, J, or F rim profiles; not for use with knife rim, reverse knife rim, sloped edge, or wire manager worksurfaces.

**Voice/data module** includes two openings. It does not include jacks; end user must supply jacks, cabling, and voice/data connection to work with:

- Standard, keystone-style CAT3, CAT5, CAT5e, or CAT6 jacks or couplers
- Avaya (Lucent) proprietary jacks
- Orthonics CAT5, CAT5e, or CAT6
- Blanks for no opening

**Delta power/USB center** installs easily by clamping onto the edge of a worksurface using hand-tightened thumb screws; unit can be removed. It is available in three color options:

- White
- Silver
- Black

**Nik power/USB center** features hand-tightened screws for simplified installation. It is available in four color options:

- White
- Silver
- Black
- Ash

**Power module** is hand-tightened and can be removed. Compatible with worksurfaces up to 1 9/16" thick.

**Aficionado power/USB center** is a convenient power solution that offers three types of desktop chargig power for your devices. The USB Type-C charging port is Quick Charge (QC) and Power Delivery (PD) enabled, perfect for rapid charging smart phones, tablets, and many laptops. The USB Type-A charging port is Quick Charge (QC) enabled, which is ideal for charging traditional USB devices, such as smart phones and tablets. Two tamper-resistant AC outlets are great for monitors, computers, and other desktop items.

Statement of Line	➤See page PP.2
Planning	PP.11
Pricing	PP.11
Surface Materials	PP.47

**Jolt USB charger** provides connectivity and functionality in a clean and flexible way. This USB charger can be adhered to underneath side of work-surfaces so it's readily accessible. Jolt USB charger is capable of charging a variety of devices including phones and tablets; IOS or Android. The front connectors are backlit (blue) indicating that the USB connectors are powered. Unit charges up to 2 amps per port; devices must be compatible with USB 1.0, 2.0 or 3.0 (Type A). Includes UL listed AC adapter with 10' cord.

**Jolt USB charger** adheres to laminate, veneer, solid surface or glass tops with acrylic foam tape that is pre-affixed to the top of the unit. Jolt should be mounted 1/8" inset from underside of worksurfaces.

**Apparatus power/USB center** is manufactured with sturdy cast aluminum in a variety of fun powdercoat colors, and finished with a braided electric cord. Includes fast charging Type-A and Type C USB ports. A playful solution for power anywhere you need it.

**Luna USB charging center** is a USB Type-A and Type-C power and charging solution that stands alone as a striking statement piece while providing a powerful surge of charging capability for all kinds of devices. Refined details, including a mesmerizing metal accent, evoke a sense of luxury designed for a myriad of hospitality and workplace environments.

**Rejuvenate power/USB center** is a stylish tabletop power and charging station with 180° accessibility. This unit is perfect for shared spaces. Includes wireless charges with cradles that hold the phone upright for access even when the phone is charging.

**Tuck power strip** can be used on any surface. USB-A and USB-C ports are capable of charging a variety of devices including phones and tablets (IOS or Android). Includes two AC tamper-resistant 120V outlets. Unit is certified UL 1363.

PERKS® POWER & DATA  
Freestanding

Planning

Statement of Line	➤See page PP.2
Planning	PP.11
Pricing	PP.11
Surface Materials	PP.47

**Isle power tower** is an independent, collaborative power hub that can be placed among a cluster of chairs or tables in a lounge, student center, or meeting area to provide 360° access of power to a group of users. Metal construction provides stability and durability, important in high traffic and collaborative areas. Available in three finishes: silver, gloss white, or gloss black. Tower provides: 12 tamper-resistant power outlets and 6 USB-A 3.0 ports charging ports.

**Scepter charging hub** provides a sleek triangular design which allows it to fit seamlessly in any location. It is equipped with wireless charging pockets, tamper-resistant AC outlets, and USB Type-A and Type-C charging ports. Scepter is designed with an aluminum body and a sturdy steel base that iw equipped with a Kensington NanoSaver lock slot for product security.

**Vesta power/USB tower** is a free-standing powered charging accessory. It can charge laptops, tablets, and mobile phones at the same time. Tower provides three USB-A and one USB-C charging ports. The unit is available in white with grey accents or black with dark grey accents.

Statement of Line	➤ See page PP.2
Planning	PP.11
Pricing	PP.11
Surface Materials	PP.47

**Power/data drawers and electrical components** are for use in open planning and freestanding applications. They are recommended for use with Priority™, Definition®, and Footprint®.

**Perks power/data sliding drawer** brings both power and data to the underside of the worksurface. Unlike fixed troughs or baskets, the drawer pulls out to allow routing of excess cabling once the initial connection has been made.

**Mounting hardware** is field installed.

**Metal knock-outs** in the front face and back of the drawer can be removed as needed for data or electrical outlets.

**Single-circuit, four-circuit, and hardwire electrical components** are for use in power/data drawers.

**Cut-outs** on the ends (sides) of the drawer allow jumpers to exit for connection inside the next drawer.

**Large cut-outs** on the bottom of the drawer allow power in-feed to enter the drawer.

**Data/telecommunication modules** can be used in the power/data drawer bottom cut-outs or the knock-outs on the front or back of the drawer.

**Data cables** can also be routed in the drawer to service the workstation.

**Expandable cable manager** manages cables from under the surface to the floor.

**IMPORTANT:** Expandable, vertical, and undersurface cable managers are required to protect four-circuit (8-wire) components from physical damage.

### Circuitry Options:

Power/data drawers accept single-circuit or four-circuit electrical components. Components are specific to either single or multi-circuit; they cannot be used interchangeably. Power/data drawers are U.L. listed.

Single-circuit components access power from a standard wall or floor electrical outlet. This flexible, non-sequential, daisy-chaining system allows power to be distributed to a maximum of eight duplex receptacles per power in-feed.  
➤ See page PP.15 for application guidelines.

Four-circuit components combine to form an 8-wire, 4-circuit, power system.  
➤ See page PP.16 for application guidelines.

Hardwire components are also available to allow field hardwiring of power within the power/data drawer where required by local codes.  
➤ See page PP.19 for application guidelines.

Statement of Line	➤ See page PP.2
Planning	PP.11
Pricing	PP.11
Surface Materials	PP.47

## Details

**Power/data drawer** is a powder-coated metal tray that mounts to the underside of a worksurface using two bent sheet metal drawer slides.

**1/2" gap** between the worksurface and the front and back edges of the drawer allows cords to exit. Cut-outs in the sides allow cables to pass to adjacent drawers.

➤ See next page for knock-out and cut-out details.

**Holes centered in the floor** of the power/data drawer are provided to attach laptop/equipment lock.

## Planning Factors

**Power/data drawers** are for use in open plan and freestanding applications. Recommended for use with Priority, Definition, and Footprint. They are designed to work with 24", 30" and 36"W worksurfaces in single or back-to-back configurations.

**Specify drawer size** based on the width of the surface to which it will attach. Specify the drawer to be 10" shorter than the worksurface width to allow for it to mount inboard of the surface support. For example, specify a 62"W drawer for a 72"W worksurface. If using a surface with storage, base your calculation on the unsupported surface dimension to determine drawer size.

**90° and 120° corner worksurfaces** can accommodate a power/data drawer. Specify model 99K26PDD for use with a 90° corner support frame; specify model 99K26PDD or 99K32PDD, for use with 120° corner support frame.

**Power/data drawers** are not intended for use against a wall or in conjunction with Systems panels.

**In single worksurface applications**, the power/data drawer should be inset 1" from the back of the worksurface.

**Factory-installed grommets** in worksurfaces are located so excess cabling will fall directly into the drawer.

drawer.

**On 48" and 60"D worksurfaces** (depicted above), power/data drawer can be located so that when the drawer is extended, it is located on the centerline of the surfaces. Both the 10" rectangular power/data center (KCU0810ELPDC) and the 40" rectangular power/data center (KCU0840ELPDC) will work in conjunction with the power/data drawer in this application.

*Note: Not applicable for all surface widths due to interference with support legs.*

**Depending on user electrical needs**, one drawer can be shared in back-to-back configurations. Some users may require an individual

**When using wire manager worksurfaces in back-to-back configurations**, the power/data drawer can be shared between the users depending on user electrical needs. It should align with the wire manager. The drawer can extend forward to store the excess cabling under the wire manager.

**Modesty panel must be located behind the power/data drawer** to allow the drawer to extend forward toward the approach side of the worksurface for cable access.

**Power/data center (99KPDCAM)** may be mounted (recessed) on 36"D worksurfaces with a power/data drawer.

**Use of a power/data center on a 24" or 30"D surface** in conjunction with single power/data drawer is not possible due to clearance.

*Note: Use two smaller power/data drawers on a single worksurface to allow power/data center, clamp-mounted accessories, or through-grommet accessories to extend below the surface between the power/data drawers.*

PERKS® POWER & DATA

Power/Data Drawers | Knock-Out and Cut-Out Locations

Planning

Statement of Line	➤See page PP.2
Planning	PP.11
Pricing	PP.11
Surface Materials	PP.47

**Knock-outs** in the front and back of the drawer are compatible with industry-standard data faceplates, such as Tyco/Amp, Panduit, ECA and Hubbell. Individual knockouts are 1⅜" x 2⅞". Data and telecommunication modules are the responsibility of the user. Knock-outs are located 6" on center. Distance between knockouts is 3¼".

**Pre-punched cut-outs** are located in the floor of the drawer and are sized similarly to knock-outs as described above. Use these cut-outs for hardwire applications. Receptacles placed in the drawer bottom cut-outs must be installed facing the floor.

Surface Width	Drawer Width	Model Number	Front & Back Knock-Outs	Small Bottom Cut-Outs	Flexchain Cut-Outs
36"	26"	99K26PDD	3	2	1
42"	32"	99K32PDD	5	2	3

Statement of Line	➤See page PP.2
Planning	PP.11
Pricing	PP.11
Surface Materials	PP.47

Details

**Single-circuit components access power from a standard wall or floor electrical outlet.** This flexible, non-sequential, daisy-chaining system allows power to be distributed to a maximum of eight duplex receptacles per power in-feed.

- The following components comprise the single-circuit system:**
- Power in-feed
  - Duplex receptacles with an attached 12" modular feed
  - 12", 24", 48", 74", 96" and 120" jumper cables

**Power in-feed** is a 10' cord with a "smart box" that monitors the number of receptacles connected. The system will automatically shut off if more than eight receptacles are plugged into the power in-feed. One end of the cord features a three-prong plug that plugs into a standard 110 volt, 15 amp wall or floor outlet.

**For ease in installation,** jumper cables feature a squeeze-latch connector and will only plug in one way.

**Duplex receptacles** snap into the power/data drawer. Receptacles feature a 12" modular feed with a double-out interface. Power is brought to the receptacle by a power in-feed or jumper cable. Power is passed to adjacent components by a jumper cable, forming a daisychain.

Planning Factors

**When planning jumper cable lengths** to connect two adjacent power/data drawers, calculate that an additional 24" of the cable is required inside the drawers (12" per drawer) to make connection to the receptacles' modular feeds.

**For jumping between receptacles inside** a power/data drawer, 12" jumpers are recommended for drawers that are 50"W or smaller; 24" jumpers are for 56"W and wider drawers.

**In 120° applications,** 24" jumper cables can be used to jump from one power/data drawer to another.

**Jumpers must be secured every 24"** when spanning under the work-surfaces.

**This system should not be plugged into a GFCI outlet receptacle.** The single-circuit system contains an overload breaker, and the sensing circuit in the "smart box" can affect the sensitivity of a GFCI power feed, causing the GFCI duplex receptacle to trip.

Related Products

**Single-circuit mini-adapt power module** features an 18" modular feed with a double-over interface. The unit contains two receptacles for power access at the worksurface. A hand-tightened clamp on the back of the unit allows flexibility for positioning it at the back of the worksurface.

**48" jumper cables** can be used to connect one power/data drawer to another. They can span over one 15"W pedestal with spacers.

**74", 96", and 120" jumpers** are for use when spanning over Priority storage with spacers.

Power/Data Drawers:

Power/data drawers accept single-circuit or four-circuit electrical components. Components are specific to either single or multi-circuit; they cannot be used interchangeably. ➤See page PP.13.

Approval/Compliance:

All Perks single-circuit components are U.L. 962 Listed and comply with the National Electrical Code (NEC). Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. *Note: Any field modification of the electrical components voids the UL listing.*

PERKS® POWER & DATA  
Power/Data Drawers | Four-Circuit (8-Wire) Power System

Planning

Statement of Line	➤See page PP.2
Planning	PP.11
Pricing	PP.11
Surface Materials	PP.47

Details

The following components combine to form an 8-wire, four-circuit system:

- Hardwire power in-feeds (two options) or ceiling power entry
- Power distribution assemblies
- Duplex receptacles
- Jumper cables

For ease in installation, the connectors will only plug in one way.

There are three ways to bring power to the system:

- 10' floor/wall power in-feed;
- Modular wall starter and modular 10' power in-feed; or
- 12' ceiling power in-feed

IMPORTANT: Power in-feeds entering the power/data drawer from the floor or wall must be secured/ protected by a flexchain, expandable cable manager, vertical cable manager, or secured to the legs.

Floor/wall power in-feed features a 10' liquid tight conduit with a pigtail on one end that must be wired by a licensed electrician to a wall or floor-mounted junction box. The other end features a single squeeze-latch connector to attach to a power distribution assembly.

Modular wall power in-feed features a 10' modular conduit with a squeeze-latch connector on each end. One end must connect to modular wall starter, specified separately, the other end connects to a power distribution assembly. Modular wall starter must be wired to building power by licensed electrician.  
*Note: This modular power in-feed option allows you to unplug the cable from the wall and store away when not in use.*

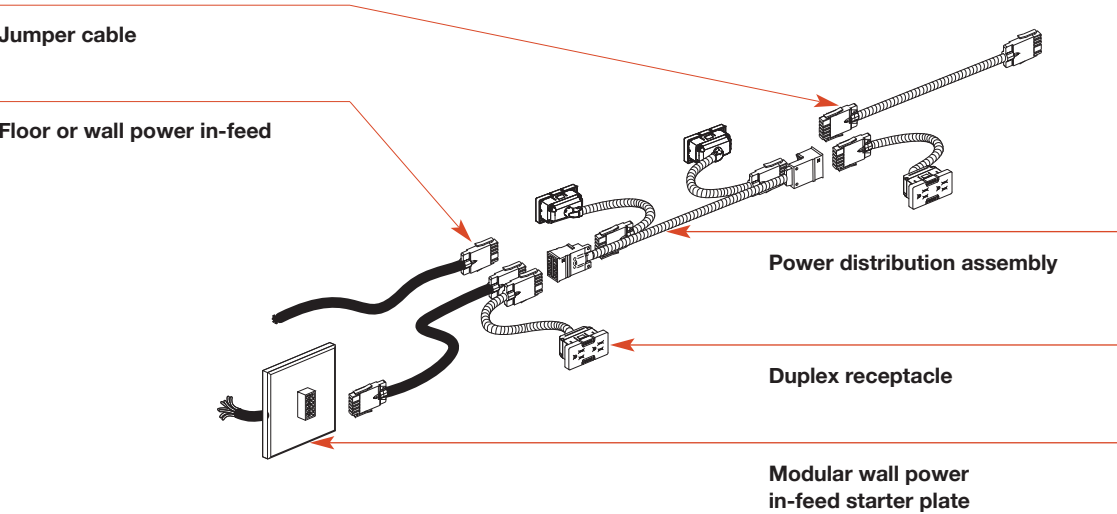

Ceiling power in-feed features a 12' flexible, galvanized metal conduit with a pigtail on one end that must be wired by a licensed electrician to a junction box in the ceiling. The other end features a single squeeze-latch connector to attach to a power distribution assembly.

Power/data flexible ceiling pole is available to conceal ceiling power in-feed and other data cables. Pole is a flexible, metal conduit. Outer diameter of pole is 2 1/8"; inner diameter is 2".

Ceiling power pole can be field installed on Priority center-mount shelf on stanchions. Power can be routed between tiles to the bottom of the worksurface.

Power/Data Drawers:

Power/data drawers accept single-circuit or four-circuit electrical components. Components are specific to either single or multi-circuit; they cannot be used interchangeably.  
➤See page PP.13.

Approval/Compliance:

All Perks four-circuit components are U.L. 1286 Listed and comply with the National Electrical Code (NEC). Consult a qualified electrical contractor or engineer for proper installation of electrical equipment.  
*Note: Any field modification of the electrical components voids the UL listing.*

# PERKS® POWER & DATA

## Power/Data Drawers | Four-Circuit (8-Wire) Power System, continued

Planning

Statement of Line	➔ See page PP.2
Planning	PP.11
Pricing	PP.11
Surface Materials	PP.47

**Trim plates** can be specified for field installation to conceal the intersection of the flexible ceiling pole at the ceiling and worksurface.

**Power distribution assembly** supplies power for four duplex receptacles within a power/data drawer. Power distribution assemblies are 36" long.

**Duplex receptacles** feature a 12" flexible, metal conduit and a single squeeze-latch connector to attach it to the power distribution assembly.

**Receptacles models are numbered 1, 2, 3, 4, or 5** to correspond to the circuit to which they will provide access.

**Jumper cables** feature a squeeze-latch connector on each end and are available in 24", 36", 48", 74", 96" and 120" widths. Jumpers are encased in a flexible, galvanized metal conduit.

**Use 24" and 36" jumper cables** inside the power/data drawer to connect power distribution assemblies and duplex receptacles.

**When planning jumper cable lengths** to connect two adjacent power/data drawers, calculate that an additional 24" of the cable is required inside the drawers (12" per drawer) to make connection to the receptacles' modular feeds.

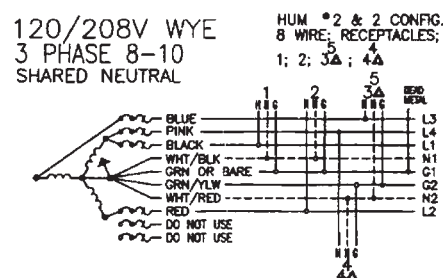

**Use 48" jumper cables** to connect a two power/data drawers on adjacent surfaces. 48" jumpers may also be used to span over one Priority 15"W pedestal with spacers.

**78", 96", and 120" jumpers** are for use when spanning over Priority storage with spacers.

**Jumpers must be secured every 24"** when spanning under the work-surfaces.

### Wiring Schematics:

The 8-wire, multi-circuit configuration provides up to four circuits. Ideally a 4-wire, WYE, 208 volt service provides the best utilization.

### Planning & Installation:

**IMPORTANT:** Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

Installations should be in accordance with the NEC. Local codes may vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. Hardware necessary for installation is shipped with all components.

# PERKS® POWER & DATA

## Power/Data Drawers | Four-Circuit (8-Wire) Power System, continued

### Planning

Statement of Line	➤ See page PP.2
Planning	PP.11
Pricing	PP.11
Surface Materials	PP.47

#### Planning Factors

**Two wiring configurations** are possible—3 and 1 or 2 and 2—utilizing the same components.

➤ See wiring configurations at right.

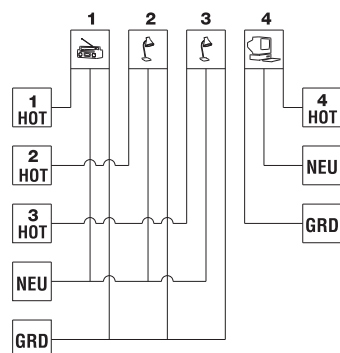

**Duplex receptacles** used for both types of wiring configurations are the same. This simplifies specifications and allows a faster understanding of the system.

➤ See page PP.15 for receptacle recommendations for single-circuit applications.

➤ See page PP.16 for receptacle recommendations for four-circuit applications.

**A maximum of 13 duplex receptacles** can be accommodated per circuit.

#### 3 and 1 (8-wire):

- Three utility circuits share a neutral and common ground.
- One circuit with a DEDICATED hot, neutral and ground.
- Utilize receptacles #1, 2, 3 for utility and #4 for the DEDICATED ground circuit.

Circuits 1, 2, and 3 can be used for general electrical needs. Customarily, one or more of the circuits is reserved for lighting or other everyday uses, which allows control by central or master switching.

Circuit 4 consists of three separate conductors (hot, neutral, and ground) and meets the BIFMA/ANSI definition for a dedicated circuit.

#### 2 and 2 (8-wire):

- Two DESIGNATED utility circuits and two DESIGNATED computer circuits.
- Utilize receptacles #1 and #2 for the designated utility circuits and receptacles #4 and #5 for the designated computer circuits.

*Note: Receptacle #3 cannot be used in the 2 and 2 configuration. If receptacle #3 is used, possible cross feed or interference from utility circuits one and two can be introduced to computer circuits.*

Circuits 1 and 2 provide a pair of designated circuits for general electrical needs, as described for the 3 & 1.

Circuits 4 and 5 provide a pair of designated circuits for computer applications.

City of Chicago:

The City of Chicago requires that an electrician hardwire the electrical components to the furniture. The electrician can install hardwire boxes into the bottom of the power/data drawer utilizing the pre-punched rectangular cut-outs. Holes for attaching the duplex to the hardwire box are also provided.

Hardwired receptacles must be placed in the drawer bottom knock-outs and be installed facing the floor.

Hardwire box (99KPBH)

Flexible galvanized metal conduit is recommended so that the power/data drawer can still be extended for excess cable storage.

Planning & Installation:

IMPORTANT: Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

Installations should be in accordance with the NEC. Local codes may vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. Hardware necessary for installation is shipped with all components.

Hardwire components are also available to allow field hardwiring of power within the power/data drawer where required by local codes.

City of New York:

The City of New York requires that an electrician make the connection from the floor entry to the modular electrical system. The electrician can wire the floor/wall power in-feed hardwire boxes into the bottom of the power/data drawer using the pre-punched rectangular cut-outs. Power entry for NYC (model 99KP4FPFNYC) includes a modular floor/wall power in-feed, hardwire box and lid, 2' galvanized metal conduit to encase the power in-feed (not shown), and cover plate.

## Standard Includes

### M2X Double-Sided Pneumatic Pop-Up Power/Data Center

- Three power outlets on each side (six total) on power/power model
- Two power outlets (four total) and one data port on each side (two total) on power/data model
- Side 1 two power outlets and one open data port; side 2 one power outlet and two USB
- 6' cord
- Housing: silver powdercoat

### M2X Power/Data Center

- Four power outlets (2 per side)
- Six blank data ports (3 per side)
- Voice/adaptor kit to accept couplers and jacks
- One touch pivot open/close
- Two 10' power cords
- Housing: silver powdercoat

### M2X Power/Data/USB/HDMI/VGA Center

- Four power outlets (2 per side)
- Two duplex USB charging ports (1 duplex per side)
- One HDMI port
- One VGA port
- Two blank data ports (1 per side)
- Voice/adaptor kit to accept couplers and jacks
- Two touch pivot open/close
- Two 6' power cords, rated at 15 amps 120 volts (1 per side)
- Housing: silver powdercoat

### Mho 2X Power/Data/USB Center

- One 2-port USB charger
- One open data port
- Three power outlets
- 120"L power cord
- Housing: silver powdercoat

Surface Materials	PT.13

**Keyboard kits or trays** attach below the surface to provide adjustability and storage for computer keyboards.

**Monitor arms** can be positioned at optimum height and distance to minimize strain and fatigue, preventing discomfort and injury.

**Grommets** are available for field installation to allow cords and cables to pass through the worksurface.  
➤ See the applicable price list for factory-installed grommets.  
➤ See the Perks Power & Data chapter for field-installed grommets.

**Adjustable Keyboard Kits:**

Keyboard kits cannot be used with President and Senator kneespace credenzas due to the central locking mechanism.

Keyboard kits can be used with Xsede when undersurface support rails are not used.

Keyboard kit models 99K1706KK2 and 99K1706KK1 work with Priority support rails and height-adjustable tables. Keyboard mount slide will need to be oriented parallel with the front edge of the worksurface. To store, lower the keyboard and swing under the surface.

**For corner applications:**

Series	Keyboard Arm Model
Priority™	99K2208KK1
	99K2319KKS1
Definition®	99K2208KK1
	99K2319KKS1
Footprint®	99K2319KKS1

**Trackless Keyboard Kits:**

Trackless keyboard kit is engineered to fit workspaces that have undersurface supporting structures, such as height-adjustable tables and benching systems, where space is limited and conventional track-mounted keyboard arms will not fit.

Monitor Arms | Slat or Wall, Clamp, Grommet/Bolt-Thru, & Accessory Rail

Planning

Statement of Line	➤ See page PT.2
Planning	PT.3
Pricing	PT.6
Surface Materials	PT.13

## Details

Single

Dual Independent  
(Monitors move independently)

Dual Crossbar  
(Monitors move together)

**Monitor arms in this collection feature 4D adjustment**, adjusting in and out, up and down, swiveling left and right, and tilting back and forward. Rotation of arm can be adjusted to prevent overhang on desk edges.

**Arm with integrated cable management** reach is 20" on single and dual independent models; 22" on dual crossbar models. Height adjustment range is 12" on single and dual independent models; and 11½" on dual crossbar models.

**Monitors up to 15½ lbs.** can be accommodated:

- Single model supports one monitor between 5–15½ lbs.
- Dual independent model supports two monitors between 5–15½ lbs. each. Each arm adjusts independently of the other for the greatest versatility.
- Dual crossbar model supports two monitors up to 12½ lbs. each.  
*Note: Dual-arm crossbar monitors must have two monitors attached at all times for balance.*

Slat or Wall

Clamp

Grommet/  
Bolt-Thru

Accessory Rail  
for Xsede Open Plan

**Single monitor arms** are available in slat-mount, clamp-mount, grommet/bolt-through, Xsede accessory rail models, and wall-mount models.

Clamp

Clamp  
for Xsede  
Open Plan

Grommet/  
Bolt-Thru

**Dual crossbar monitor arms** are available in clamp-mount and grommet/bolt-through models. Dual crossbar models can be used for a single-monitor application; however, the cross bar would be exposed.

Clamp

**Dual independent monitor arms** are available as a clamp-mount model only.

**100mm x 100mm VESA plates** are standard. A 75mm x 75mm plate can be accommodated. The standard VESA plates are not compatible with Apple monitors.

➤ Contact Apple Computer directly to purchase an appropriate VESA plate separately.

## Connections

**IMPORTANT:** Monitor mounts are specific to arm style and are not interchangeable between single and dual applications.

### Slat-mount single monitor arms are for use on metal slat tiles.

The number of single monitor arms per slat tile is limited:

- Wall-mounted, full, metal slat tiles accommodate one monitor arm per tile. Trim channels included with the slat tile must be used.
- 24" or 30"W Cetra slat tiles accommodate one monitor arm per tile.
- 18", 24", or 30"W 1-high or 2-high Xsite slat tiles accommodate one monitor arm per tile. 2-high Xsite slat tiles require an extra mid-frame support for stability, specified separately. Trim channels included with the slat tile must be used.
- Xsite technology tile can hold two monitors per tile.
- Priority slat or fabric/slat tiles will accommodate two monitor arms if spaced at least 24" apart.
- Xsede slat tiles will accommodate two monitor arms if spaced at least 24" apart.

**Slat-mount model** cannot be used on wall-mounted Traxx, wall-mounted fabric/slat tiles, or Xsite Traxx.

**Wall-mount monitor arms** must be mounted to a stud or Alterna wall panel.

**Clamp-mount models** must be mounted on the straight edge of a 1⅜" or 1⅞" worksurface; they are not applicable for knife, reverse knife, and sloped edge profile surfaces. When using on wire manager work-surfaces, the hard plastic underneath will have to be notched so the clamp is flush to a straight edge. The flexible topside durometer will bend.

**Grommet/bolt-through models** can be used in holes up to 2.3" in diameter. They cannot be placed over a pedestal, modesty panel, or support panel. They can be used with 1⅜" or 1⅞" worksurfaces. Bolt-through application can utilize a hole as small as ½" in the surface.

➤ Refer to assembly instructions at [www.kimball.com](http://www.kimball.com).

# PERKS® TECHNOLOGY MANAGEMENT

## Monitor Arms | M-Flex for G34 Accessory Frame

Planning

Statement of Line	➤ See page	PT.2
Planning		PT.3
Pricing		PT.6
Surface Materials		PT.13

### Details

**Monitor arms** are designed specifically for installation into the G34 accessory frame.

**G34 accessory frame** is available as a field-installed option only on Every-Space. It is aluminum with an 35"W x 2½"D opening and is available in all paint colors.

Single

Dual

**Single and dual M/Flex models** feature a center post with two adjustable cable management clips at the base of pole.

### Connections

**Monitor arms in this collection** feature the M2 dynamic arm assembly which features 4D adjustment. Each arm adjusts in and out, up and down, swiveling left and right, and tilting back and forward.

- Monitors up to 20 lbs.** can be accommodated:
- Single monitor arm supports one monitor 4-20 lbs.
  - Dual monitor supports two monitors 4-20 lbs. each. Each arm adjusts independently of the other for the greatest versatility.

**100mm x 100mm VESA plates** are standard. A 75mm x 75mm plate can be accommodated. The standard VESA plates are not compatible with Apple monitors.  
➤ Contact Apple Computer directly to purchase an appropriate VESA plate separately.

### Connections

**Monitor arms ship with mounting plate** that fits into the G34 accessory frame and is additionally secured to the underside of the worksurface. The mounting plate is available in all paint colors. The G34 grommet option on the worksurface must be specified to use these monitor arms. See page for other Perks monitor arm options for tops without the G34 accessory frame.

Sit-to-Stand Adjustable Keyboard Kit								
Intuitive Adjustment								
23"	28½"	10¾"	99K2319KKS1	-10° to +15°	8"	6⅞⅙"	360°	\$1108

\* Depth listed is the depth of the track that mounts to the underside of the worksurface.

\*\*Vertical adjustment dimensions are based on 1¾"-thick worksurface; they can also be used on 1⅞"-thick worksurfaces.

IMPORTANT: Keyboard kits on this page not compatible with height-adjust tables and benches due to the track depth. Specify trackless keyboard kit (99K1806KAT).

➤ See page PT.10.

## Planning Factors

17"D adjustable keyboard kits are recommended for bridge applications; 22" and 23"D adjustable keyboard kits can be used in corner-mount applications.

Width of keyboard kits includes mouse tray. Keyboard tray is 20⅙"W; mouse tray is 9" in diameter and is non-handed for mounting on the left or right.

Manual and intuitive adjustable keyboard kits slide in and out under the surface.

Keyboard kits will not be flush with the worksurface edge (in the stored, recessed position) when mounted in accordance with the manufacturer's directions.

Keyboard kits can be used with Xsede Open Plan when undersurface support rails are not used.

➤ See page PT.3 for a cross reference chart by furniture series of keyboard kits that comply to ANSI/HFES Method 2.

## Standard Includes

- Keyboard arm: black
- Foam gel wrist rest: black
- High-density polyethylene tray and ABS mouse tray: black

## How to Specify

Statement of Line	➤ See page PT.2
Planning	PT.3
Pricing	PT.6
Surface Materials	PT.13

<i>D</i>	<i>W</i>	<i>H</i>	<i>Model</i>	<i>Tray Tilt Adjustment</i>	<b>Vertical Adjustment</b> <i>Below Surface</i>	<i>Rotation</i>	<i>Price</i>
<b>Trackless Keyboard Kit</b>							
<b><i>Intuitive Adjustment</i></b>							
21¼"	19⅜"	3⅛"	<b>99K1806KAT</b>	-15° to +10°	-1.25" to 6.98" (5.73" adjustment range)	360°	\$908

\*Depth listed is overall depth, which includes the trackless keyboard with mini keyboard tray platform.

Planning Factors

Trackless keyboard kit is engineered to fit workspaces that have under-surface supporting structures, such as height-adjustable tables and benching systems, where space is limited and conventional track-mounted keyboard arms will not fit.

Suggested mounting position is 9⅜" from front edge of worksurface for full undersurface storage. The unit can be installed on clearances slightly less than 9⅜", but this will position the keyboard further away from the surface and reduce the undersurface storage area.

Exceeds HFES and BIFMA 5th percentile seated keyboarding height when mounted in accordance with manufacturers directions.

Weight not to exceed 20 lbs on keyboard and mouse.

Standard Includes

- Mounting hardware
- Black trackless keyboard arm
- Mini keyboard tray platform (9½"D x 19⅜"W x 1⅜"H); black high-density polyethylene tray and gel foam palm rest
- Non-handed mouse platform (8¾" diameter, 360° swivel); can be mounted on left or right

### Details

**Freestanding LED light** includes touch sensor switch on the head of the lamp. Push the red switch to turn on light. Hold the switch down and the light will dim to its lowest cycle and then start to brighten again. Release the switch when the light intensity is at the desired level.

**Arm on freestanding light** swivels 350°.

**Hinge on freestanding light** allows light to be turned straight up.

**Head on freestanding light** rotates 360° allowing the light to be directed to any angle.

**Surface-mount LED light** is field installed. Available for use with surfaces from 3/4" to 1 9/16" thick. The on/off touch switch is incorporated into the light.

**Head on surface-mount light** rotates 360° allowing the light to be directed to any angle.

- 3-year warranty
- 50,000 hour LED life
- U.L. listed power supply
- Mercury, lead and UV free
- Kelvin—3500K

PERKS® LIGHTING  
LED Task Lights

Planning

Statement of Line	➤See page PL.2
Planning	PL.3
Pricing	PL.5

Details

**LED task lights** are a thin-profile solution for overhead cabinets, highback organizers, and shelves. LEDs are mercury-free and consume less power.

**Linear body** features a metal trough reflector with diffuser lens. The body is silver anodized aluminum with white plastic end caps.

**Single-touch on/off and touch-and-hold continuous dimming pad** with last state memory will be remembered for the next time the fixture is turned on.

**Automatic turn-off feature** comes standard and will turn the fixture off after 10 hours of continuous use.

**Number of LED lights** varies by fixture width:  
17"W models include 24 LEDs  
31"W models include 48 LEDs  
44"W models include 72 LEDs

**LED specifications:**

- LED lifespan: 50,000 hours
- Color temperature: 3500K
- Color rendering index: 83
- ETL listed; compliant to UL 153 & CSA C22.2 No. 9

- Single/starter unit** includes:
- Fixture
  - Two-piece 12' black cord with an inline 4½"W x 2⅛"D x 1⅛"H 65-watt brick power supply with plug
  - Mounting kit

- Add-on unit** includes:
- Fixture
  - One 8" black interconnect cord
  - One 30" black interconnect cord
  - Two adhesive managers
  - Mounting kit

**Optional occupancy sensor**, available separately, turns the fixture off after 30 minutes of inactivity and back on again as the user enters the workspace. If occupant is present, the light will remain on. Occupancy sensor model includes:

- Sensor
- 1" connector pin
- Mounting kit

Connections

**Power cords and interconnect cords** can be plugged into either end of the fixture. Interconnect cord utilizes independent switching; each fixture must be turned on and off individually.

**Mounting kits**, standard with each task light unit, include:

- Two screw-mount clip/screws
- Two magnetic-mount clip/magnets
- Two adhesive cord managers

**Only one occupancy sensor** is required per interconnected (daisy chained) run of fixtures to turn all fixtures on and off automatically. The power supply must connect to the occupancy sensor, followed by the connector pin, then the single/starter unit as shown above.

**Interconnect (daisy chain) application** requires one single/starter unit and add-on units. Total wattage must not exceed 54 watts for the full run. ➤See *Interconnect Guide* at right.

Interconnect Guide:

Task Light Length	Watts per Unit	Max. No. of Units	Total Watts
17"	8	6	48
31"	18	3	54
44"	26	2	52

**IMPORTANT:** Different task light lengths can be combined in the chain; however, the total wattage cannot exceed 54. For example, one 17" unit (8 watts) plus one 44" unit (26 watts) = 34 watts which is below the maximum.

# PERKS® WORK TOOLS

## Overview

## Planning

Statement of Line	➤ See page PW.2
Planning	PW.7
Pricing	PW.8
Surface Materials	PW.24

**Name/sign holders** are available for an aesthetically pleasing method of identifying and personalizing your workspace.

**Coat hook** helps keep your workspace clear for more usable space.

**Work tools for accessory rails,** available factory-installed on KORE carts, Priority privacy screens, and EverySpace privacy screens, include:

- Utility cup
- Clock
- Picture frame
- Name plate
- Wavy shelf
- File organizer

**Work tools for G34 grommet accessory frame,** available factory-installed on EverySpace worksur-

- faces, include:
- Utility cup
  - Clock
  - Picture frame
  - Wavy shelf
  - Writable marker holder
  - Mounting plate for Salt or Pepper power/USB units

**Work tools,** available in metal or plastic, provide storage up off of the worksurface.

**Hanging markerboard tile** hangs from Xsite Traxx, metal slat tiles, or lower mobile table screens. It can be moved easily around the workspace to keep the creativity flowing.

**Organizational tools,** such as pencil trays and drawer organizers, provide more functionality to storage units.

**Pencil drawer** is a perfect amenity for height-adjustable tables. It is 8"D x 13½"W x 2"H, and available black, white or silver plastic.

**Carousel trays and center drawers** provide convenient undersurface storage. Carousel trays rotate 360°.

**Pencil drawer** is a perfect amenity for height-adjustable tables. It is 8"D x 13½"W x 2"H, and available black, white or silver plastic.

### Standard Includes

#### Wall-Mount Markerboards

- Black tray and 409M Icey White markerboard
- Mounting hardware

#### Hanging Markerboard Tile

- Cinder frame with porcelain markerboard surface

#### Magnetic Markerboards

- Markerboard
- Double-sided tape

### Tips

Hanging markerboard tile may be used with:

- Xsite Traxx
- Metal slat tiles
- Lower mobile table screens

Expo dry erase markers are recommended for use on markerboards. All other markers are not recommended, as they may leave undesirable results when erased.

# ACCESSORY SOLUTIONS PRICE LIST

## Revision Summary

## Reference

This section provides a summary of revisions made to the price list by release date, providing a one-year look back.

Effective 03.13.23

### Global

**Intellectual property link** has been added to the main table of contents.

Effective 02.06.23

### Global

**Surface materials sections** have been updated to reflect the harmonization of laminate, wood and vertical textiles where applicable.

**References and products specific Interworks EQ and Transcend** have been deleted, since those product lines are no longer available.

### Perks Power & Data

**The following products** have been discontinued:

- Flexchain cable manager
- Flexchain U-bracket
- Pull-up power/USB grommet

**Loop-style cable manager** has been replaced with a wave-design undersurface cable manager.

**Vesta portable charging hubs** have been discontinued; corded models are still available.

### Perks Work Tools

**The following products** have been discontinued:

- Plastic accessory dish
- Plastic utility tray
- Carousel center drawer
- Carousel tray

Effective 10.31.22

### Perks Power & Data

**The following products** are now available:

- Vertical cable managers for use with Xsede and Naviyd
- Metal cable basket
- Plastic cable carrier
- Aficionado clamp-mount power/USB center
- Delta clamp-mount power/USB center
- Nik clamp-mount power/USB center
- Apparatus set-on-surface power/USB center
- Luna set-on-surface USB center
- Rejuvenate set-on-surface power/USB/Qi wireless center
- Tuck set-on-surface power/USB center
- Freestanding power/USB strip
- Scepter power/USB charging hub
- Vesta power/USB tower

### Perks Technology Mgmt.

**The following products** are now available:

- M/Flex monitor arms for G34 accessory frame

### Perks Work Tools

**The following products** are now available:

- Plastic pencil drawer for adjustable-height tables
- Accessories for G34 accessory frame
- Accessories for privacy screen accessory rail

Effective 09.01.22

### Global

**Pricing** has been updated throughout the price list; pricing effective on 10.03.22.

**References to deleted product lines** including Scenario and Fluent have been removed.

### Perks Power & Data

**Expandable cable managers, model KCUCMHW and KCUCMHC,** are no longer available.

### Perks Work Tools

**Plastic binder shelf** is no longer available.

# ACCESSORY SOLUTIONS PRICE LIST

Revision Summary, continued

Reference

This section provides a summary of revisions made to the price list by release date, providing a one-year look back.

Effective 06.15.22

Effective 05.16.22

## General Information

**Changes and formatting updates** have been made to:

- Terms & Conditions
- Sustainability
- ANSI/BIFMA
- Asset Tags

## Perks Power & Data

**Round metal G19 grommets with locking cap and brush access** are applicable to KORE.

## Perks Work Tools

**Side-to-side surface dividers** are no longer offered in upholstery fabrics.

**Panel fabrics** are offered in grades A and B only.

**COM** is now the same price as fabric price B.
