HOW TO SPECIFY ALTOS 16

where to find the information you need

Teknion provides an array of tools and information resources to help you get things done simply and easily. From product pricing to application guidelines to online planning suggestions, you will find what you need when you need it.

product pricing

Online Access to all current pricing in PDF format, can be found at **www.teknion.com**, by selecting the **products** tab, the desired product line and then **pricing module**.

Printed Price Guides by product line containing product maps, detailed pricing tables and product basics information are available to help you specify correctly. These guides can be ordered online through **www.teknion.com**, by selecting the **tools** tab and then **print on demand** or by contacting your local Teknion Representative.

application guidelines

Online Access to all current Application Guides in PDF format, can be found at **www.teknion.com**, by selecting the **tools** tab, **application guides** and the desired product line.

Printed Application Guides by product line containing detailed application guidelines as well as tips to help you plan and specify each of our products are available. These guides can be ordered online through **www.teknion.com**, by selecting the **tools** tab and then **print on demand** or by contacting your local Teknion Representative.

planning tool

Select and view typicals of our products by setting, product, or footprint. Get great ideas and save time!

Online Access is available on **www.teknion.com**, by selecting the **tools** tab and then **planning tool**.

weights & volumes

Online Access to Weights & Volumes are available on **www.teknion.com**, by selecting the **products** tab and the desired product line. Download Weights & Volumes.

fabrics & finishes

Teknion's Fabrics and Finishes offering includes the following programs; Finishes + Materials and Teknion Textiles.

Online Access is available on **www.teknion.com**, by selecting the **tools** tab and then **Fabrics & Finishes**.

Printed Fabrics & Finishes Guides can be ordered online through **www.teknion.com**, by selecting the **tools** tab and then **print on demand** or by contacting your local Teknion Representative.

product photography & drawings

Online Access to all photos, line drawings and renderings are available on **www.teknion.com**, by selecting the **tools** tab and selecting either **photography**, **CAD symbols** or **Sketchup 3D Warehouse**.

order forms

All forms (COM Request, TekniPaint and TekniStain forms) are available online at **www.teknion.com**, by selecting the **tools** tab and then **Fabrics & Finishes**. Download the form you require.

warranty/terms & conditions of sale

Online Access is available on **www.teknion.com**, by selecting the **Legal & Warranty** link located on the footer of the website.

installation guides

Installation Guides are available for both Online and Print. Contact your Teknion Customer Service Representative for more details.

user feedback

How is our marketing material working for you?

Feedback from the user is very important to the quality of Teknion's marketing material. We ask that if you have suggestions on how you think we could improve content **OR** if you have found an error, that you please contact your Teknion Technical Services department.

how to make this guide work for you

price guide contents

This guide contains all the information you need to order this product through your specification software. The Introduction section provides everything you need to get started and the subsequent sections provide detailed pricing and specification information by product type. Each of these sections contains Overview and Basics pages to explain key application and specification guidelines that will help you specify the product correctly. The detailed pricing pages follow.

price guide

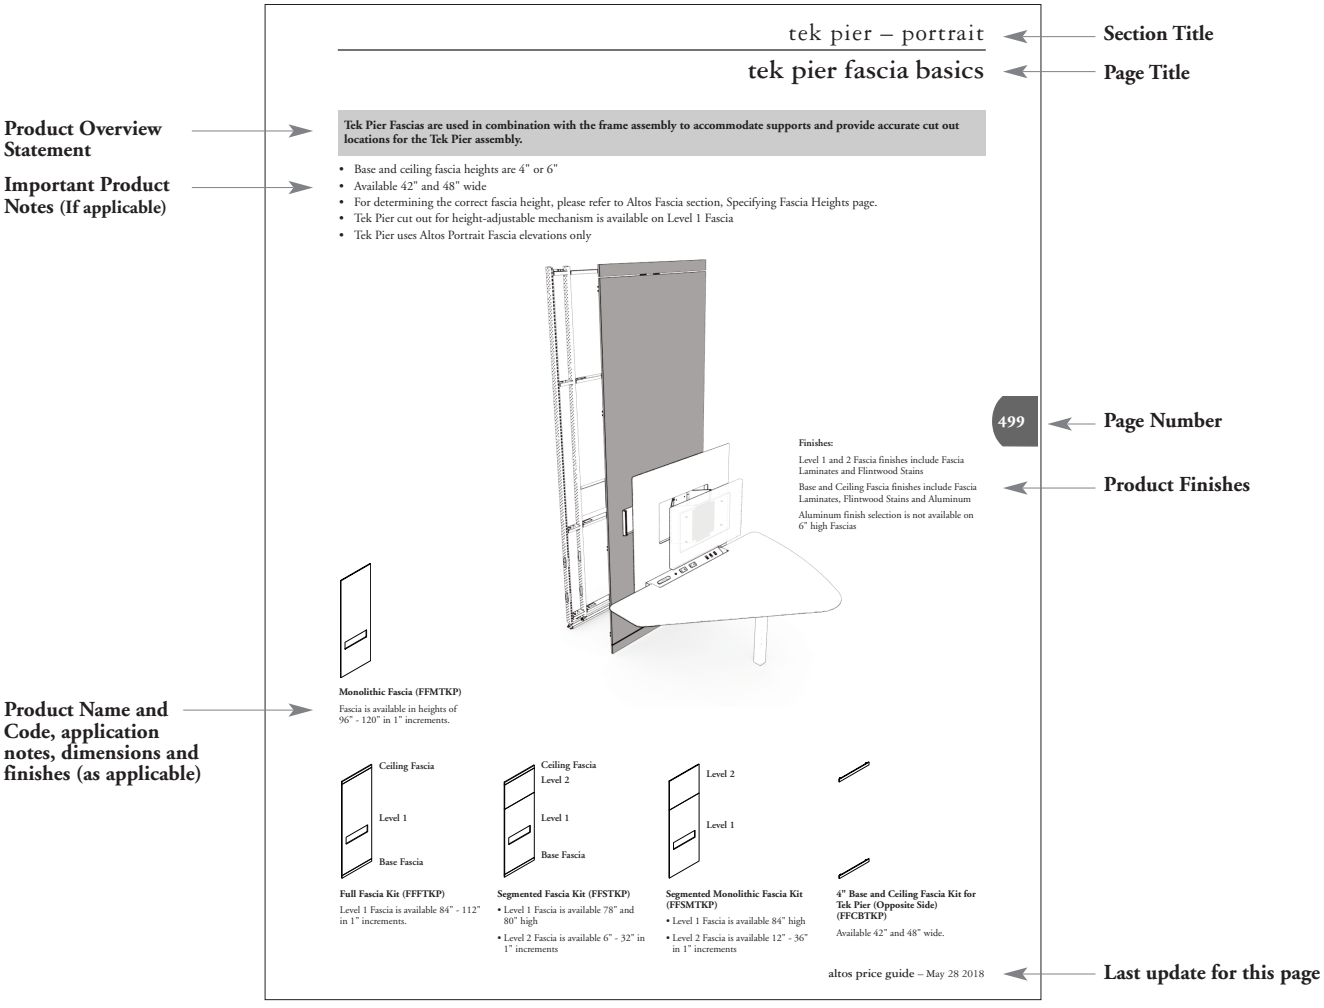
Overview and Basics by section
Pricing by section

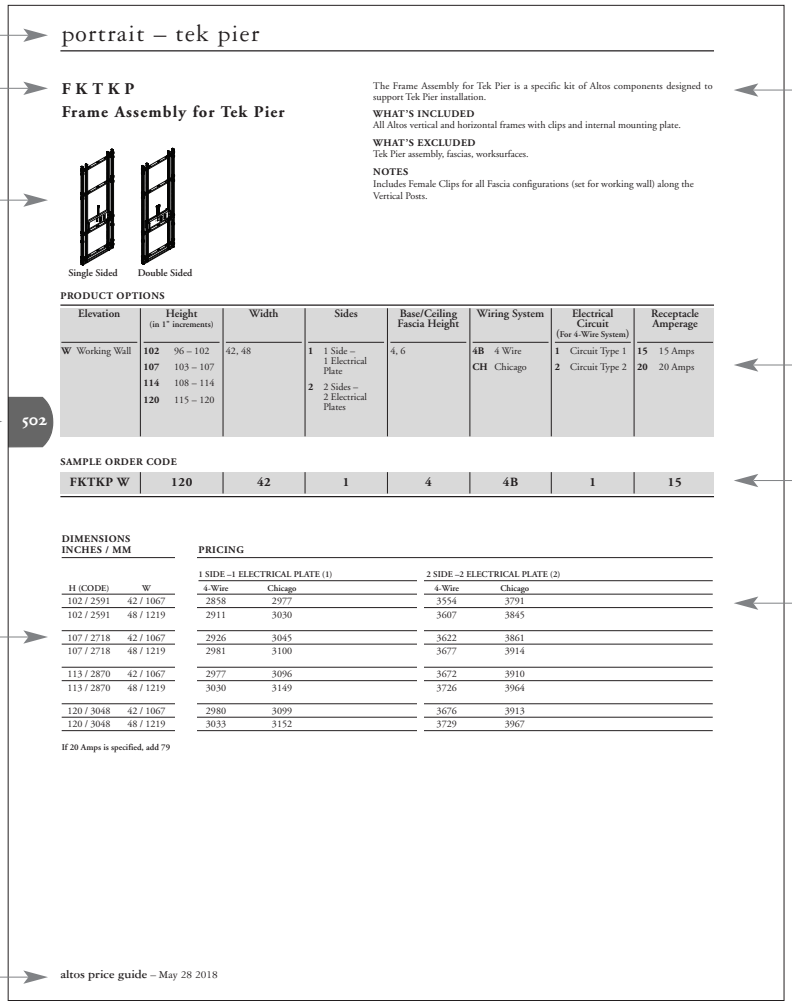
basics page at a glance

It is recommended that you review the basics pages before you begin specifying a product. For more detailed application and planning information refer to the appropriate Application Guide available on **www.teknion.com**.



how to make this guide work for you (continued)

pricing details at a glance



additional information

The following forms are available at **www.teknion.com**, by selecting the **tools** tab and then **Fabrics & Finishes**, to help you specify and place your order if required:

teknipaint

If you require a custom paint color match, you must submit a TekniPaint form.

using your own material (COM)

If you wish to use your own material on fabric-covered products, you must submit a completed COM form including a sample upholstery and safety testing.

A COM Order Information Sheet must also be submitted. This form captures all relevant ordering and tracking information.

A COM Request for Yardage Calculation form may be sent to Teknion for preliminary yardage requirements.

placing a manual order

Complete an Order Cover Sheet with the information we need to fill your order. This is the most important step. If the Order Cover Sheet is not complete and correct, the order may be delayed.

noting key requirements

If you require that certain pieces share the same locks you will need to specify Set of Keys Alike (SOKL) located in the Price and Product Guide.

Wall Gasket	FKJ	447
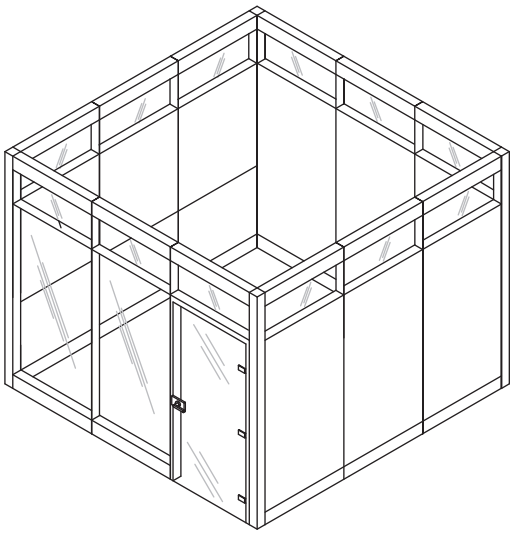
Wall Start	FKW	438
Wedge Top Worksurface	TKPC	513
Working Wall (Level III)	FLJW3	286

how to specify altos

Step 1 – Fascia & Door Packages

Specifying Fascia types and sizes determines the footprint of the Altos office.

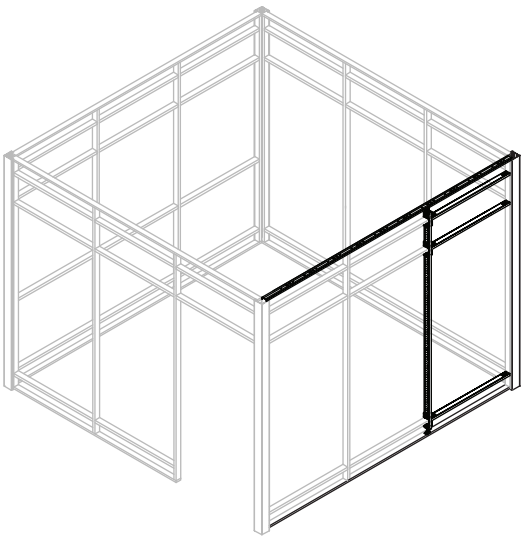
- Fascias include surfaces only and conceal the structural supports which must be specified
- Specify Fascia packages to meet required wall lengths and locations
- Locate door packages, including transom and ceiling fascias as required



Step 2 – Frame Kits

Frames are specified to correspond to Fascia specifications.

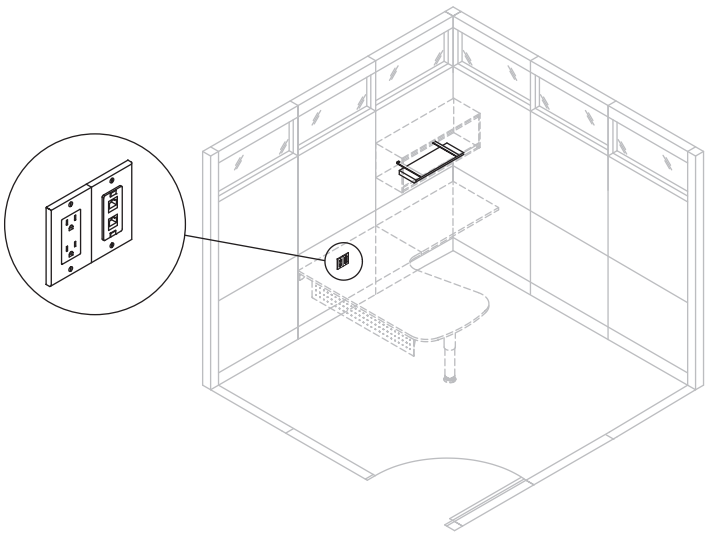
- Calculate quantities and specify Ceiling Channel, Ceiling Clips, if applicable and Wall Gasket
- Specify the Vertical Posts and Horizontal Rails as determined by Fascia elevations
- Specify corner connections and appropriate method for attaching Altos walls to the building (Wall Start, Adjustable Wall End, Filler Panel, etc.)



Step 3 – Power & Communication

The electronics & communication locations should be determined in conjunction with the Fascias so that the appropriate Fascias are ordered

- Locate electrical and communication outlets
- Select method of providing power and communications (by contractor or Altos product)
- Specify appropriate product



how to specify altos (continued)

Step 4 – Worksurface & Storage

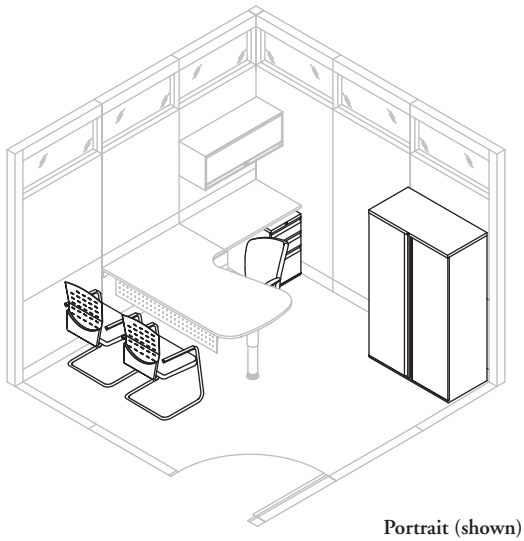
A variety of Teknion Worksurface & Storage components are available to compliment Altos

Portrait:

- If wall mounting, worksurfaces and overhead storage must be mounted on-module (match wall module width) (Refer to Transit & Filing & Storage Price Guides and Application Guides for applicable products)
- Specify worksurfaces, worksurface supports and storage as appropriate

Landscape:

- Specify Landscape Collection:
  - Desk, Wall-Mounted Cabinet, Shelving, and Lighting
- Any internal frame required is automatically updated within Storyboard
  - Ex: Functional rail for Storage unit
    Ex: Internal framework for desk
- Specify additional accessories:
  - Fitted Seat cushion, Power Cube, Rectangular Grommet



Portrait (shown)

Step 5 – Integration with Optos

- Altos walls integrate seamlessly with Optos walls
- Altos walls and Optos walls can be designed to compliment each other
- Connectors and trims available to connect Altos to Optos
- See Optos Price Guide and Application Guide for details
- Altos Landscape is not compatible with Optos Clerestory

FASCIA ELEVATION BASICS 34

SMART FASCIA BASICS 36

FILLER PANEL BASICS 37

SPECIFYING FASCIA HEIGHTS 38

PRODUCT LISTING 40

fascia elevation basics

Fascias are used to create the faces of Altos walls and are configured into four wall types depending on the Fascia selection.

- Fascias are available in a variety of solid and glass finishes that correspond to the selected wall elevation
- Fascias are built-up to complete the front and back elevation of a wall module and solid Fascias do **not** need to be identical
- Power and communication receptacle cut outs can be specified with solid and fabric wrapped Fascias, except 4" base fascias
- The structural members are **not** included with all Fascias
- Wall elevation types must be installed from floor to ceiling
- Fascias are available in widths from 12" – 48" in 1" increments
- Acoustic Fascias are **not** available for base, ceiling or W3, S2 fascias below 12" in height; use Fabric Wrapped fascias in these applications
- The 4" and 6" base and ceiling **cannot** be mixed; both **must** be 4" or 6" only

Full Elevations

Full Fascia (FFF1, FFR1, FFA1)

- One surface Fascia between the 4" or 6" Base and Ceiling Fascia
- Available in Solid, Glass, Acoustic and Fabric Wrapped

Glass

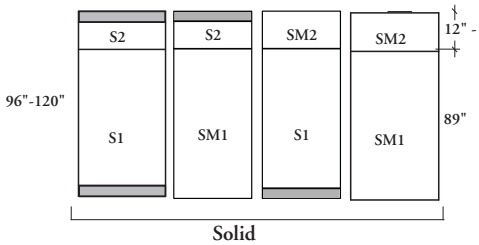
Segmented Elevations

Segmented Fascias (FFS1, FFS2, FFRS1, FFRS2, FFAS1, FFAS2)

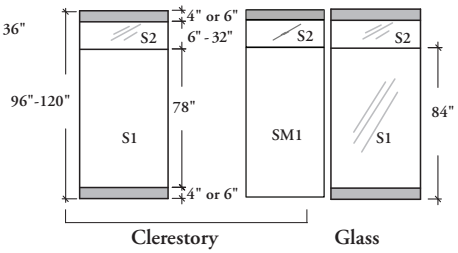
- Two surface Fascias between the Base and Ceiling Fascias
- FFS1 is available 78" high
- FFS2 is available from 6" - 30" to complete the height
- Available in Solid, Glass, Acoustic and Fabric Wrapped

Segmented Monolithic Fascias (FFSM1, FFSM2, FFRSM1, FFRSM2, FFASM1, FFASM2) (Not Shown)

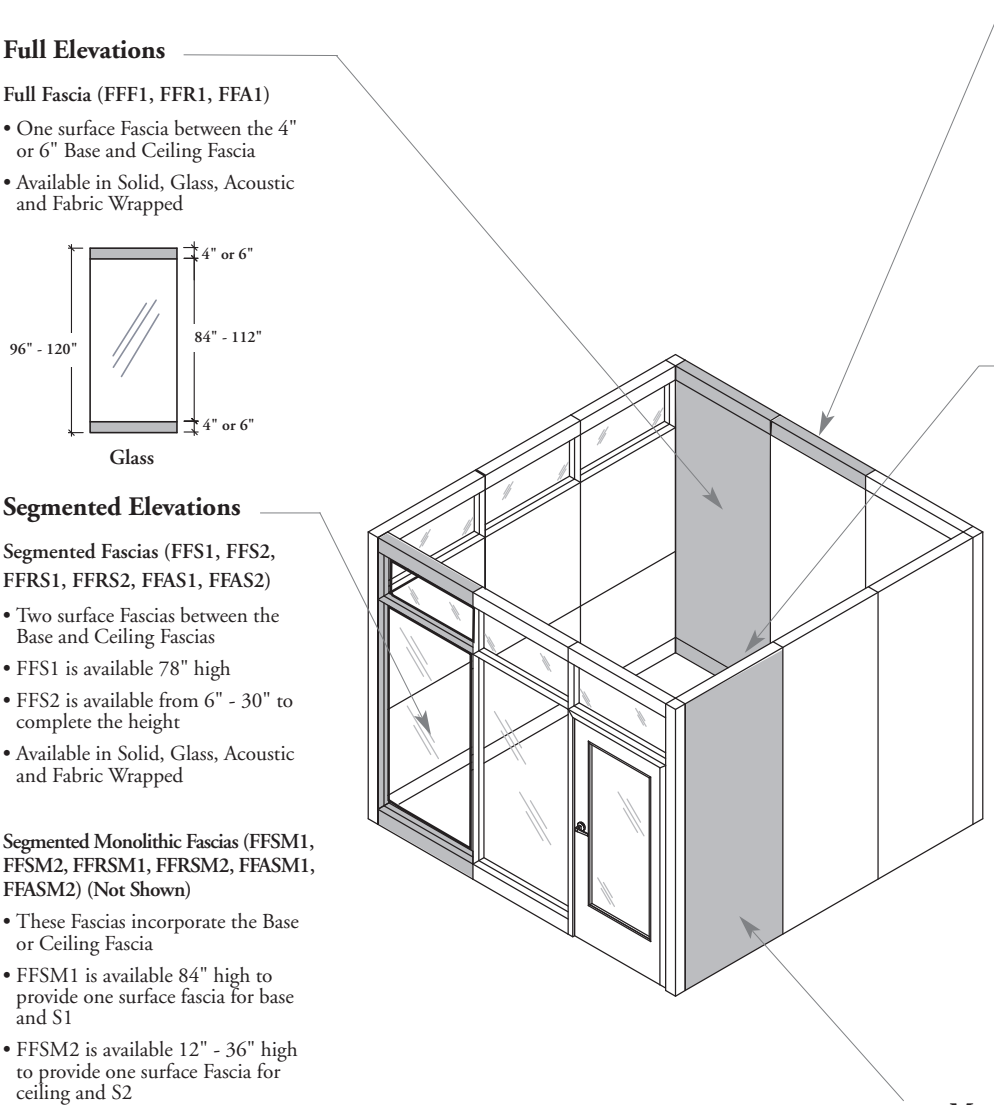
- These Fascias incorporate the Base or Ceiling Fascia
- FFSM1 is available 84" high to provide one surface fascia for base and S1
- FFSM2 is available 12" - 36" high to provide one surface Fascia for ceiling and S2
- Available in Solid, Acoustic and Fabric Wrapped



Solid



Clerestory Glass



Ceiling Fascia (FFC, FFRC)

- Provides a solid flush finish to the top of a wall elevation
- **Not** used with Monolithic Fascias (FFM1, FFSM2, FFWM3, FFAWM3, FFRWM3)
- Available in Solid and Fabric Wrapped, 4" also available in Clear Anodized and Painted

Base Fascia (FFB, FFRB)

- Provides a solid flush finish at the bottom of a wall elevation
- Accommodates base electrics and communications option
- Two cut outs **cannot** be specified for Fascias less then 21" wide
- Three cut outs **cannot** be specified for Fascias less than 30" wide
- Available in Solid and Fabric wrapped, 4" also available in Clear Anodized or Painted
- **Not** used with Monolithic Fascias (FFM1, FFSM1, FFWM1, FFWAM1, & FFRWM1)

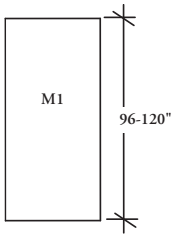
No Power/Communications cut outs

Power/Communications cut outs

Monolithic Elevation

Monolithic Fascias (FFMI, FFRM1, FFAM1)

- Provides a single Fascia from floor-to-ceiling
- No Base or Ceiling Fascia
- Available in Solid, Acoustic and Fabric Wrapped



fascia elevation basics (continued)

Fascias are used to create the faces of Altos walls and are configured into four wall types depending on the Fascia selection.

Working Wall Elevations

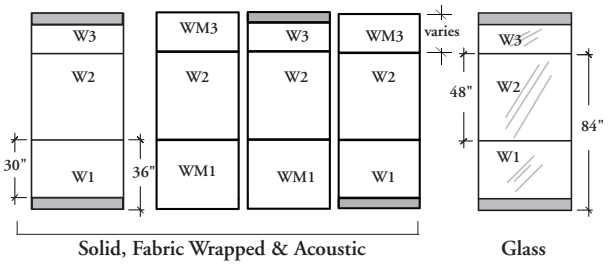
Working Wall Fascias (FFW1, FFW2, FFW3, FFRW1, FFRW2, FFRW3, FFAW1, FFAW2, FFAW3)

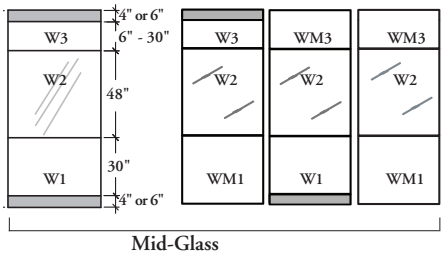
- Three surface Fascias between the Base and Ceiling Fascias
- FFW1 is available 30" high and provides a one surface finish to level W1
- FFAW2 provides a one surface finish to level W2 and are always 48" high
- Accommodate Smart Fascias
- FFW3 is available 6" - 30" high to complete level W3
- Available in Solid, Glass, Acoustic and Fabric wrapped

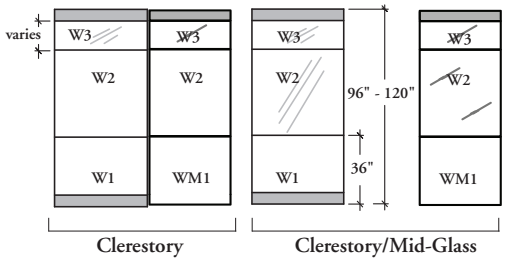
Also available but Not Shown:

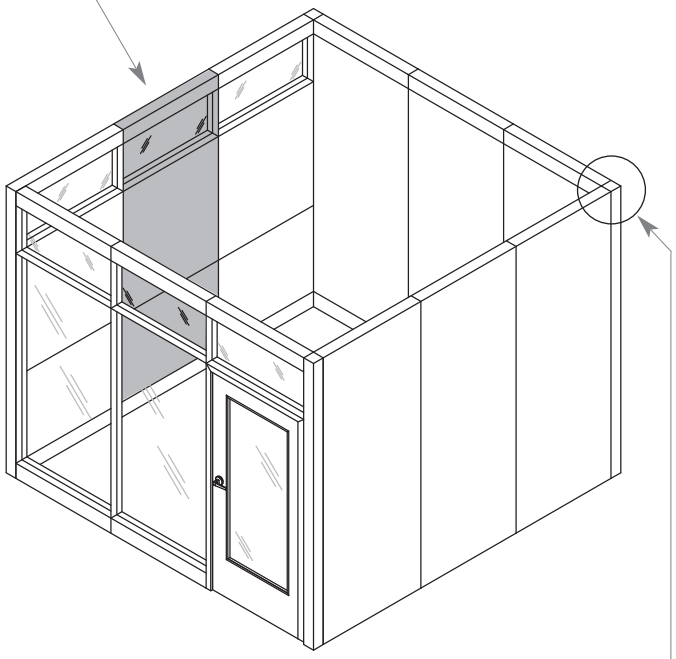
Working Wall Monolithic Fascias (FFWM1, FFWM3, FFRWM1, FFRWM3, FFAWM1, FFAWM3)

- These Fascias are used in conjunction with FFW2, FFRW2 and FFAW2 and incorporate the 4" or 6" Base or Ceiling Fascia
- FFWM1 is available 36" high to provide one solid Fascia for base and W1 and can only be used in this location
- FFWM3 is available 12" - 36" high to provide one surface Fascia for W3 and ceiling and can only be used in this location
- Available in Solid, Acoustic and Fabric wrapped

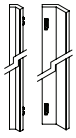




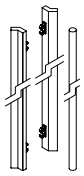




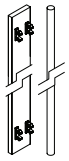
Also available but not shown:



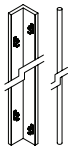
Two-Way 135° Corner Cover (FKCN132)
Provides a full-height trim for two walls connected at 135°



Three-Way 135° Corner Cover (FKCN133)
Provides a full-height trim for three walls connected at 135°



Three-Way 180° Corner Cover (FKCN180)
Provides the full-height trim for three walls connected at 180°

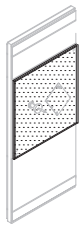


Two-Way 90° Corner Cover (FKCN90)
Provides the full-height trim for two walls connected at 90° at Two-Way Connection 90° Corner

smart fascia basics

The Working Wall has the added ability of integrating Smart Fascias to provide a means of personalizing the office space while adding functionality to the vertical surface of the wall.

- Available only with Working Wall elevation at W2 location only
- Smart Fascias can be interchanged with any other Fascia of the same level and width



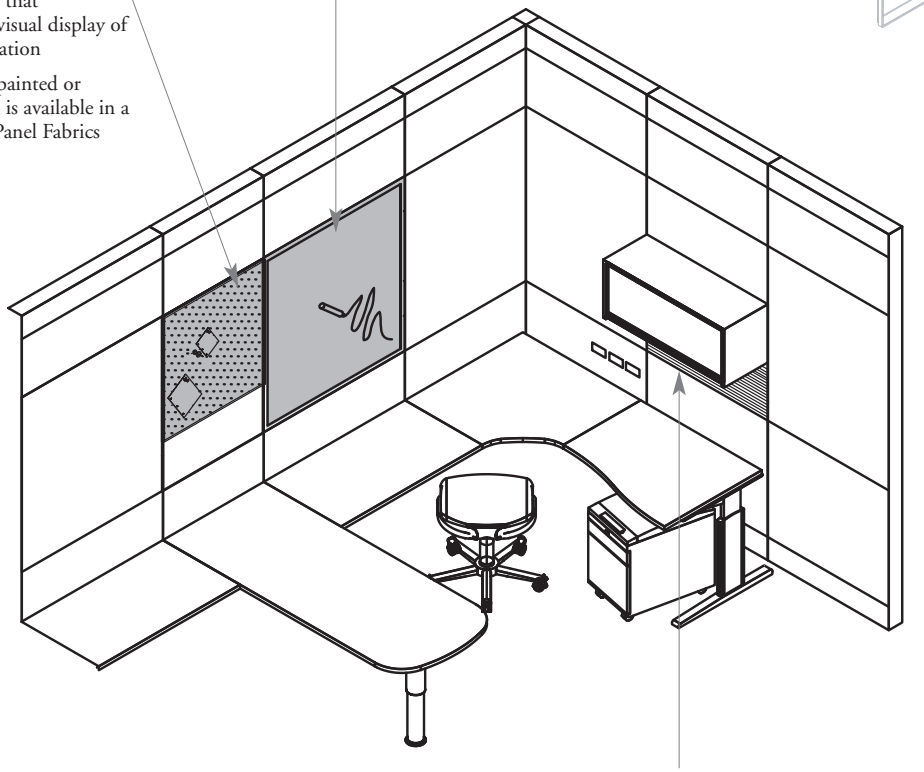
Tackboard (FFMT)

- Is a tackable surface that accommodates the visual display of paper-based information
- Is surrounded by a painted or anodized frame and is available in a variety of Teknion Panel Fabrics

Whiteboard (FFMW)

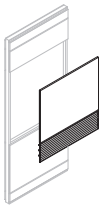
- Provides a dry erasable magnetic whiteboard surface
- For increased functionality, a 3" Shelf (FMS3) can be specified to sit at the base of the Smart Fascia – Whiteboard (FFMW) to provide a surface for holding markers and brushes or resting light objects and can be found in Complements: *Teknion Ergonomic's & Accessories Program*

- Is slightly inset from its painted or anodized frame to prevent adjacent Fascias from marking when the whiteboard is cleaned (erased)



Accessory Rail (FFMA)

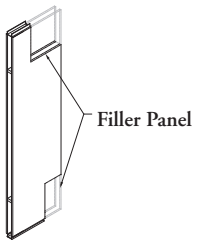
- Consists of a 15" high parallel accessory rail and a 33" high upper Fascia
- Provides an accessory rail for the suspension of a variety of paper management accessories including the complete range of the 3" Shelves (FMS3) and the 6" Shelving System (FMS)
- Monitor arms with Accessory Element Mount options YKFA, YKFB, YKFEA) **cannot** be mounted to the Accessory Rail



filler panel basics

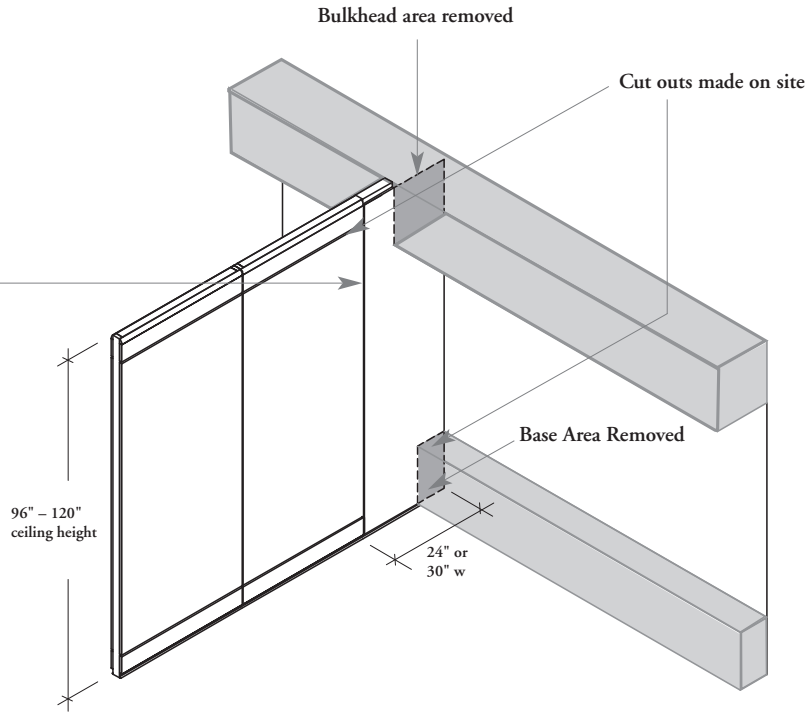
The Filler Panel (FPF) is used when an Altos wall surface needs to be cut away to fit the wall around the building structure, usually at the perimeter of the building.

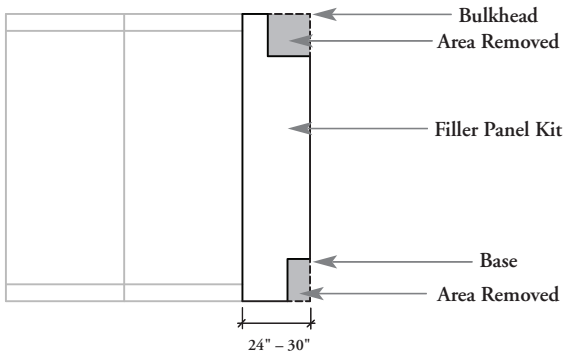
Height	Ceiling Height Range
102" (8'-6"	96" to 102" (8'-0" to 8'-6")
108" (9'-0")	103" to 108" (8'-7 "to 9'-0")
114" (9'-6")	109" to 114" (9'-1" to 9'-6")
120"(10'-0")	115" to 120" (9'-7" to 10'-0")



Filler Panel (FPF)

- One floor to ceiling Fascia, no Ceiling or Base Fascias required
- Available in solid finish only with no horizontal reveals
- Can be cut away to a maximum of 6" from floor to ceiling. Amounts greater than 6" can be cut away above and below the horizontal rails
- **Cannot** be used against window mullions





specifying fascia heights

- To determine the correct height for Fascia F1 in the Full Configuration, Fascia S2 in the Segmented Configuration, and Fascia W3 in the Working Wall configuration, use the chart below
- One piece Glass Fascias are only available up to 112"

6" base and ceiling fascia

	Monolithic (M1)	Full (F1)	Segmented (S2)	Segmented Monolithic (SM2)	Working (W3)	Working Monolithic (WM3)

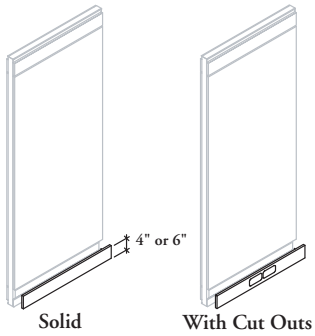
F F B

Base Fascia



The Base Fascia provides a solid finish at the bottom of the wall section.

WHAT'S INCLUDED
1 Fascia with or without cut outs (as specified) and connection hardware.

NOTES
Type 1 Fascias have a Class A fire rating and minimum order quantities are required. Please contact Technical Services (US) or Specials (CAN) for pricing and details.

Type 2 Fascias have a Class B fire rating and are standard product.

Exact width **must** be specified in the order code. Range codes (i.e. **12, 18**) are listed for pricing purpose only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

6" height is **not** available in Clear Anodized (AC) and Painted.

4" height is available in Solid, Clear Anodized (AC) and Painted.

PRODUCT OPTIONS

Style	Height	Width (in 1" increments)	Finish
1 Solid	4, 6	**12** 12	Clear Anodized
2 1 Electric/Communication cut out (for all Fascias widths)		**18** 13 – 18	Painted
		24 19 – 24	Fascia Laminate
3 2 Electric/Communication cut outs (for Fascias 21" to 48" wide)		**30** 25 – 30	Flintwood
		36 31 – 36	
4 3 Electric/Communication cut outs (for Fascias 30" to 48" wide)		**40** 37 – 40	
		42 41 – 42	
		48 43 – 48

For Type 1 pricing, please contact Technical Services (US) or Specials (CAN) for pricing and details.

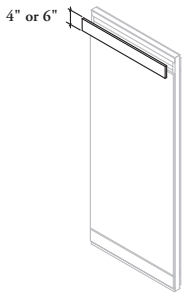
F F C
Ceiling Fascia



The Ceiling Fascia provides a solid finish at the top of the wall section.

WHAT'S INCLUDED
1 Fascia with connection hardware.

NOTES
Type 1 Fascias have a Class A fire rating and minimum order quantities are required. Please contact Technical Services (US) or Specials (CAN) for pricing and details.

Type 2 Fascias have a Class B fire rating and are standard product.

Exact width **must** be specified in the order code. Range codes (i.e. **12, 18**) are listed for pricing purpose only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

6" height is **not** available in Clear Anodized (AC) and Painted.

4" height is available in Solid, Clear Anodized (AC) and Painted.

PRODUCT OPTIONS

Height	Width (in 1" increments)	Finish
4, 6	**12** 12	Clear Anodized
	18 13 – 18	Painted
	24 19 – 24	Fascia Laminate
	30 25 – 30	Flintwood
	36 31 – 36	
	40 37 – 40	
	42 41 – 42	
	48 43 – 48

For Type 1 pricing, please contact Technical Services (US) or Specials (CAN) for pricing and details.

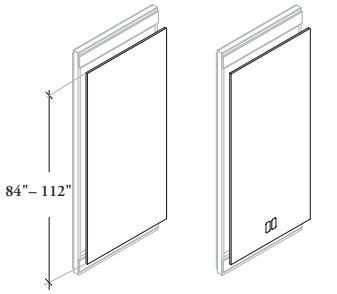
F F F 1
Solid Fascia – Full



Solid With Cut Outs

The Solid Fascia – Full provides a solid finish for full height wall elevation.

WHAT'S INCLUDED
1 Fascia with or without cut outs (as specified) and connection hardware.

NOTES
Type 1 Fascias have a Class A fire rating and minimum order quantities are required. Please contact Technical Services (US) or Specials (CAN) for pricing and details.

Type 2 Fascias have a Class B fire rating and are standard product.

Exact height and width **must** be specified in the order code. Range codes (i.e. **12, 18**) are listed for pricing purpose only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

PRODUCT OPTIONS

Style	Height (in 1" increments)	Width (in 1" increments)	Base Fascia Height	Finish	Type (For Fascia Laminates Only)
1 Solid	**90** 84 – 90	**12** 12	4, 6	Fascia Laminate	**2** Type 2
2 Worksurface Height (33" AFF) Cut Outs (number of cut outs depend on Fascia width specified)	**96** 91 – 96	**18** 13 – 18		Flintwood	
3 18" Height two Vertical Cut Outs (for Fascias 21" to 48" wide)	**102** 97 – 102	**24** 19 – 24			
4 18" Height one Vertical Cut Out	**108** 103 – 108	**30** 25 – 30			
5 18" Height Horizontal Cut Outs (number of cut outs depend on Fascia width specified)	**112** 109 – 112	**36** 31 – 36			
S 18" Height Vertical Cut Out for Single Power Plus Communication Module (for Fascias 13" to 48" wide)		**40** 37 – 40

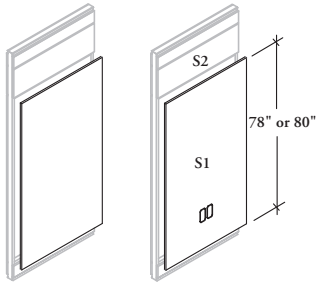
F F S 1
Solid Fascia – Segmented (Level I)



Solid With Cut Outs

The Solid Fascia – Segmented (Level I) provides a solid finish at S1 for segmented wall elevations.

WHAT'S INCLUDED
1 Fascia with or without cut outs (as specified) and connection hardware.

NOTES
Type 1 Fascias have a Class A fire rating and minimum order quantities are required. Please contact Technical Services (US) or Specials (CAN) for pricing and details.

Type 2 Fascias have a Class B fire rating and are standard product.

Exact width **must** be specified in the order code. Range codes (i.e. **12, 18**) are listed for pricing purpose only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

PRODUCT OPTIONS

Style	Height	Width (in 1" increments)	Base Fascia Height	Finish	Type (for fascia laminates only)
1 Solid	78, 80	**12** 12	4, 6	Fascia Laminate	**2** Type 2
2 Worksurface Height (33" AFF) Cut Outs (number of cut outs depend on Fascia width specified)		**18** 13 – 18		Flintwood	
3 18" Height two Vertical Cut Outs (for Fascias 21" to 48" wide)		**24** 19 – 24			
4 18" Height one Vertical Cut Out		**30** 25 – 30			
5 18" Height Horizontal Cut Out (number of cut outs depend on Fascia width specified)		**36** 31 – 36			
S 18" Height Vertical Cut Out for Single Power Plus Communication Module (for Fascias 13" to 48" wide)		**40** 37 – 40			
D 18" Height Vertical Cut Out for Double Power Plus Communication Module (for Fascias 17" to 48" wide)		**42** 41 – 42			
T 18" Height Vertical Cut Out for Triple Power Plus Communication Module (for Fascias 21" to 48" wide)		**48** 43 – 48			
Q 18" Height Vertical Cut Out for Quad Power Plus Communication Module (for Fascias 25" to 48" wide)

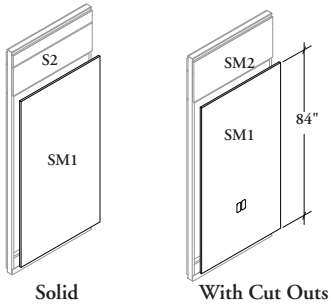
Solid Fascia – Segmented Monolithic (Level I)



Solid With Cut Outs

The Solid Fascia – Segmented Monolithic (Level I) provides a solid finish at S1 and base fascia for segmented wall elevations.

WHAT'S INCLUDED
1 Fascia with or without cut outs (as specified) and connection hardware.

NOTES
No base fascia required.

Type 1 Fascias have a Class A fire rating and minimum order quantities are required. Please contact Technical Services (US) or Specials (CAN) for pricing and details.

Type 2 Fascias have a Class B fire rating and are standard product.

Exact width **must** be specified in the order code. Range codes (i.e. **12, 18**) are listed for pricing purpose only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

PRODUCT OPTIONS

Style	Height	Width (in 1" increments)	Finish	Type (For Fascia Laminates Only)
1 Solid	84	**12** 12	Fascia Laminate	**2** Type 2
2 Worksurface Height (33" AFF) Cut Outs (number of cut outs depend on Fascia width specified)		**18** 13 – 18	Flintwood	
3 18" Height 2 Vertical Cut Outs (for Fascias 21" to 48" wide)		**24** 19 – 24		
4 18" Height 1 Vertical Cut Out		**30** 25 – 30		
5 18" Height Horizontal Cut Outs (number of cut outs depend on Fascia width specified)		**36** 31 – 36		
6 Base Height 1 Horizontal Cut Out (for all Fascia widths)		**40** 37 – 40		
7 Base Height 2 Horizontal Cut Outs (for Fascias 21" to 48" wide)		**42** 41 – 42		
8 Base Height 3 Horizontal Cut Outs (for Fascias 30" to 48" wide)		**48** 43 – 48		
S 18" Height Vertical Cut Out for Single Power Plus Communication Module (for Fascias 13" to 48" wide)

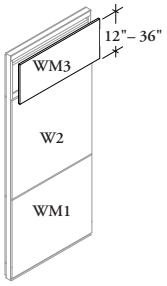
F F W M 3

Solid Fascia – Working Wall Monolithic (Level III)



The Solid Fascia – Working Wall Monolithic (Level III) provides a solid finish at the W3 and ceiling fascia location of a wall elevation.

WHAT'S INCLUDED
1 Fascia with connection hardware.

NOTES
No ceiling fascia required.

Type 1 Fascias have a Class A fire rating and minimum order quantities are required. Please contact Technical Services (US) or Specials (CAN) for pricing and details.

Type 2 Fascias have a Class B fire rating and are standard product.

Exact height and width **must** be specified in the order code. Range codes (i.e. **12**, **18**) are listed for pricing purpose only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

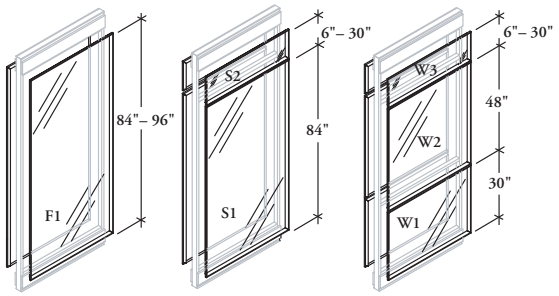
F F G D
Glass Fascia – Double



Full Wall | Segmented Wall | Working Wall

The Glass Fascia – Double provides varying levels of visual access with acoustic privacy.

WHAT'S INCLUDED
1 double-sided Fascia with connection hardware.

NOTES
Architectural Fabric Glass patterns in Frosted Square Solo and Frosted Square Collective are available for Fascia widths between 30" and 48" and heights 48", 78" and 84" to 112" on the W2, S1 or F1 levels only.

Exact height and width **must** be specified in the order code. Range codes (i.e. **12, 18**) are listed for pricing purpose only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

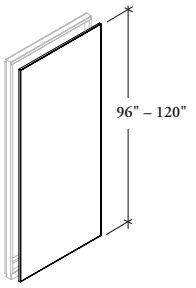
F F A M 1
Acoustic Fascia – Monolithic



The Acoustic Fascia – Monolithic provides both sound attenuating and blocking properties with a fabric finish from floor to ceiling.

WHAT'S INCLUDED
1 Fascia and connection hardware.

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 18) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using the imperial dimensions.

PRODUCT OPTIONS

Height (in 1" increments)	Width (in 1" increments)	Finish
102 96 – 102	**12** 12	COM
108 103 – 108	**18** 13 – 18	Architectural Fabric

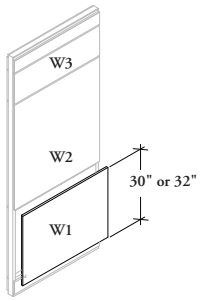
F F A W 1

Acoustic Fascia – Working Wall (Level I)



The Acoustic Fascia – Working Wall (Level I) provides both sound attenuating and blocking properties with a fabric finish at the W1 location of a working wall elevation.

WHAT'S INCLUDED
1 Fascia and connection hardware.

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 18) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using the imperial dimensions.

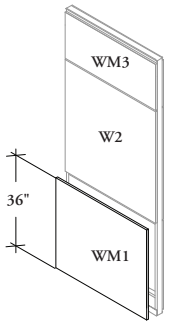
Acoustic Fascia – Working Wall Monolithic (Level I)



The Acoustic Fascia – Working Wall Monolithic (Level I) provides both sound attenuating and blocking properties with a fabric finish at the W1 and base fascia location of a working wall elevation.

WHAT'S INCLUDED
1 Fascia and connection hardware.

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 18) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using the imperial dimensions.

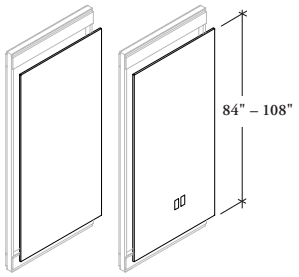
F F R F 1
Fabric Wrapped Fascia – Full



Solid With Cut Outs

The Fabric Wrapped Fascia – Full provides a fabric finish for full-height wall elevation.

WHAT'S INCLUDED
1 Fascia with or without cut outs (as specified) and connection hardware.

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 18) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using the imperial dimensions.

PRODUCT OPTIONS

Style	Height (in 1" increments)	Width (in 1" increments)	Base/Ceiling Fascia Height	Finish
1 Solid	**90** 84 – 90	**12** 12	4, 6	COM
2 Worksurface Height (33" AFF) Cut Outs (number of cut outs depend on Fascia width specified)	**96** 91 – 96	**18** 13 – 18		Architectural Fabric
3 18" Height 2 Vertical Cut Outs (for Fascias 21" to 48" wide)	**102** 97 – 102	**24** 19 – 24		
4 18" Height 1 Vertical Cut Out	**108** 103 – 108	**30** 25 – 30		
5 18" Height Horizontal Cut Outs (number of cut outs depend on Fascia width specified)	**112** 109 – 112	**36** 31 – 36		
S 18" Height Vertical Cut Out for Single Power Plus Communication Module (for Fascias 13" to 48" wide)		**40** 37 – 40		
D 18" Height Vertical Cut Out for Double Power Plus Communication Module (for Fascias 17" to 48" wide)		**42** 41 – 42		
T 18" Height Vertical Cut Out for Triple Power Plus Communication Module (for Fascias 21" to 48" wide)		**48** 43 – 48		
Q 18" Height Vertical Cut Out for Quad Power Plus Communication Module (for Fascias 25" to 48" wide)

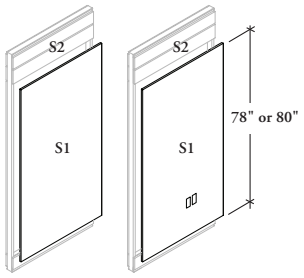
F F R S 1
Fabric Wrapped Fascia – Segmented (Level I)

The Fabric Wrapped Fascia – Segmented (Level I) provides a fabric finish at S1 for segmented wall elevations.

WHAT'S INCLUDED
1 Fascia with or without cut outs (as specified) and connection hardware.

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 18) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using the imperial dimensions.



Solid With Cut Outs

PRODUCT OPTIONS

Style	Height	Width (in 1" increments)	Base/Ceiling Fascia Height	Finish
1 Solid	78, 80	**12** 12	4, 6	COM
2 Worksurface Height (33" AFF) Cut Outs (number of cut outs depend on Fascia width specified)		**18** 13 – 18		Architectural Fabric
3 18" Height 2 Vertical Cut Outs (for Fascias 21" to 48" wide)		**24** 19 – 24		
4 18" Height 1 Vertical Cut Out		**30** 25 – 30		
5 18" Height Horizontal Cut Outs (number of cut outs depend on Fascia width specified)		**36** 31 – 36		
S 18" Height Vertical Cut Out for Single Power Plus Communication Module (for Fascias 13" to 48" wide)		**40** 37 – 40		
D 18" Height Vertical Cut Out for Double Power Plus Communication Module (for Fascias 17" to 48" wide)		**42** 41 – 42		
T 18" Height Vertical Cut Out for Triple Power Plus Communication Module (for Fascias 21" to 48" wide)		**48** 43 – 48		
Q 18" Height Vertical Cut Out for Quad Power Plus Communication Module (for Fascias 25" to 48" wide)

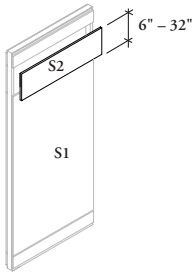
F F R S 2
Fabric Wrapped Fascia – Segmented (Level II)



The Fabric Wrapped Fascia – Segmented (Level II) provides a fabric finish at S2 of segmented wall or door.

WHAT'S INCLUDED
1 Fascia with or without cut outs (as specified) and connection hardware.

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 18) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using the imperial dimensions.

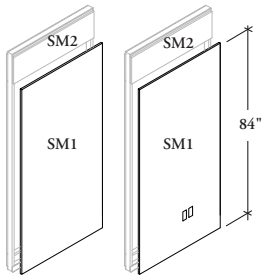
F F R S M 1
Fabric Wrapped Fascia – Segmented Monolithic (Level I)



Solid With Cut Outs

The Fabric Wrapped Fascia – Segmented Monolithic (Level I) provides a fabric finish at S1 and base fascia for segmented wall elevations.

WHAT'S INCLUDED
1 Fascia with or without cut outs (as specified) and connection hardware.

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 18) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using the imperial dimensions.

PRODUCT OPTIONS

Style		Height	Width (in 1" increments)	Finish
1	Solid	84	**12** 12	COM
2	Worksurface Height (33" AFF) Cut Outs (number of cut outs depend on Fascia width specified)		**18** 13 – 18	Architectural Fabric
			24 19 – 24	
3	18" Height 2 Vertical Cut Outs (for Fascias 21" to 48" wide)		**30** 25 – 30	
4	18" Height 1 Vertical Cut Out		**36** 31 – 36	
5	18" Height Horizontal Cut Outs (number of cut outs depend on Fascia width specified)		**40** 37 – 40	
6	Base Height 1 Horizontal Cut Out (for all Fascia widths)		**42** 41 – 42	
7	Base Height 2 Horizontal Cut Outs (for Fascias 21" to 48" wide)		**48** 43 – 48	
8	Base Height 3 Horizontal Cut Outs (for Fascias 30" to 48" wide)			
S	18" Height Vertical Cut Out for Single Power Plus Communication Module (for Fascias 13" to 48" wide)			
D	18" Height Vertical Cut Out for Double Power Plus Communication Module (for Fascias 17" to 48" wide)

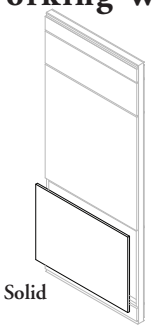
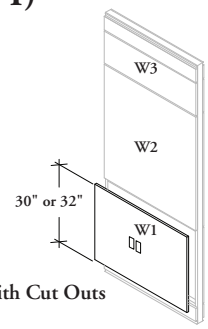
Fabric Wrapped Fascia – Working Wall (Level I)



Solid



With Cut Outs

The Fabric Wrapped Fascia – Working Wall (Level I) provides a fabric finish at the W1 location of a working wall elevation.

WHAT'S INCLUDED

1 Fascia with or without cut outs (as specified) and connection hardware.

NOTES

Exact width must be specified in the order code. Range codes (i.e. 12, 18) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using the imperial dimensions.

PRODUCT OPTIONS

Style	Height	Width (in 1" increments)	Base/Ceiling Fascia Height	Finish
1 Solid	30, 32	**12** 12	4, 6	Architectural Fabric
2 Worksurface Height (33" AFF) Cut Outs (number of cut outs depend on Fascia width specified)		**18** 13 – 18		Panel Fabric
3 18" Height 2 Vertical Cut Outs (for Fascias 21" to 48" wide)		**24** 19 – 24		
4 18" Height 1 Vertical Cut Out		**30** 25 – 30		
5 18" Height Horizontal Cut Outs (number of cut outs depend on Fascia width specified)		**36** 31 – 36		
S 18" Height Vertical Cut Out for Single Power Plus Communication Module (for Fascias 13" to 48" wide)		**40** 37 – 40		
D 18" Height Vertical Cut Out for Double Power Plus Communication Module (for Fascias 17" to 48" wide)		**42** 41 – 42		
T 18" Height Vertical Cut Out for Triple Power Plus Communication Module (for Fascias 21" to 48" wide)		**48** 43 – 48		
Q 18" Height Vertical Cut Out for Quad Power Plus Communication Module (for Fascias 25" to 48" wide)

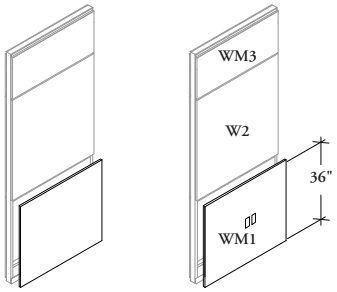
Fabric Wrapped Fascia – Working Wall Monolithic (Level I)



Solid With Cut Outs

The Fabric Wrapped Fascia – Working Wall Monolithic (Level I) provides a fabric finish at the W1 and base fascia location of a working wall elevation.

WHAT'S INCLUDED
1 Fascia with or without cut outs (as specified) and connection hardware.

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 18) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using the imperial dimensions.

PRODUCT OPTIONS

Style	Height (in 1" increments)	Width (in 1" increments)	Finish
1 Solid	**36** 31 – 36	**12** 12	Architectural Fabric
2 Worksurface Height (33" AFF) Cut Outs (number of cut outs depend on Fascia width specified)		**18** 13 – 18	Panel Fabric
3 18" Height 2 Vertical Cut Outs (for Fascias 21" to 48" wide)		**24** 19 – 24	
4 18" Height 1 Vertical Cut Out		**30** 25 – 30	
5 18" Height Horizontal Cut Outs (number of cut outs depend on Fascia width specified)		**36** 31 – 36	
6 Base Height 1 Horizontal Cut Out (for all Fascia widths)		**40** 37 – 40	
7 Base Height 2 Horizontal Cut Outs (for Fascias 21" to 48" wide)		**42** 41 – 42	
8 Base Height 3 Horizontal Cut Outs (for Fascias 30" to 48" wide)		**48** 43 – 48	
S 18" Height Vertical Cut Out for Single Power Plus Communication Module (for Fascias 13" to 48" wide)			
D 18" Height Vertical Cut Out for Double Power Plus Communication Module (for Fascias 17" to 48" wide)			
T 18" Height Vertical Cut Out for Triple Power Plus Communication Module (for Fascias 21" to 48" wide)			
Q 18" Height Vertical Cut Out for Quad Power Plus Communication Module (for Fascias 25" to 48" wide)

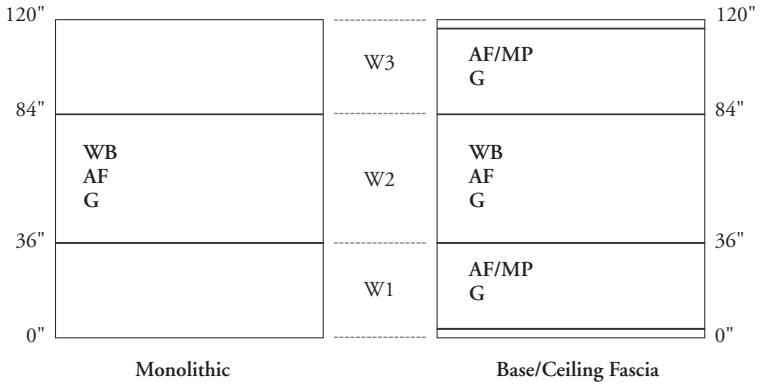
understanding fascias – landscape

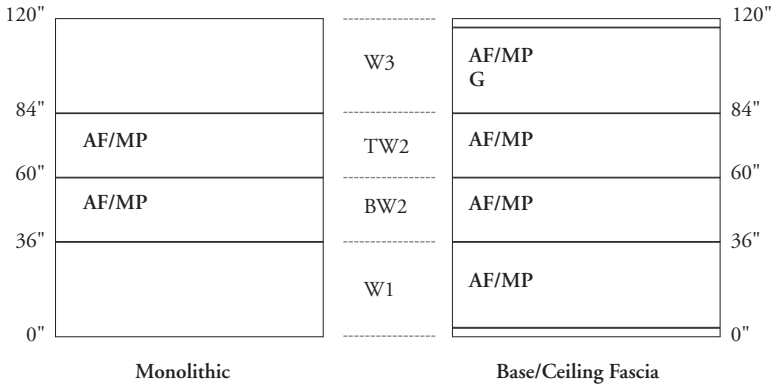
Landscape Fascias can be planned in six elevations for various datum combinations.

The following chart outlines the Landscape elevations offered.

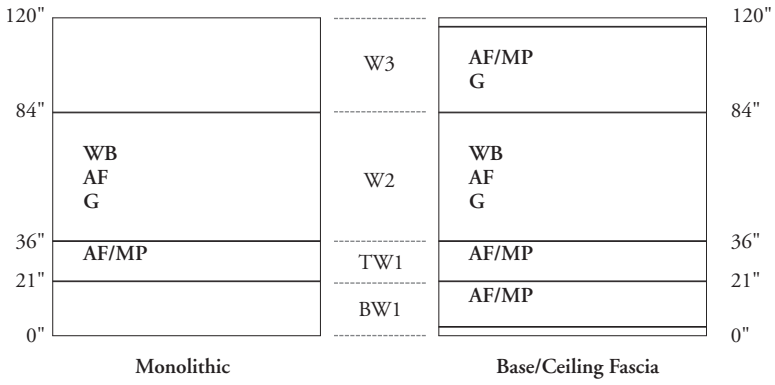
Standard Working Wall
- Shares 36" and 84" high datums with Portrait elevations
- Can accommodate Wall-Mounted Light and Shelving
- Base/Ceiling Fascias are 4" high



Light Working Wall
- Can accommodate Wall-Mounted Light and Shelving
- Allows for 36", 60" and 84" datums
- Base/Ceiling Fascias are 4" high



Cabinet Working Wall
- Can accommodate wall-mounted cabinets, shelving and lighting.
- Allows for 21", 36", and 84" datums
- Base/Ceiling Fascias are 4" high



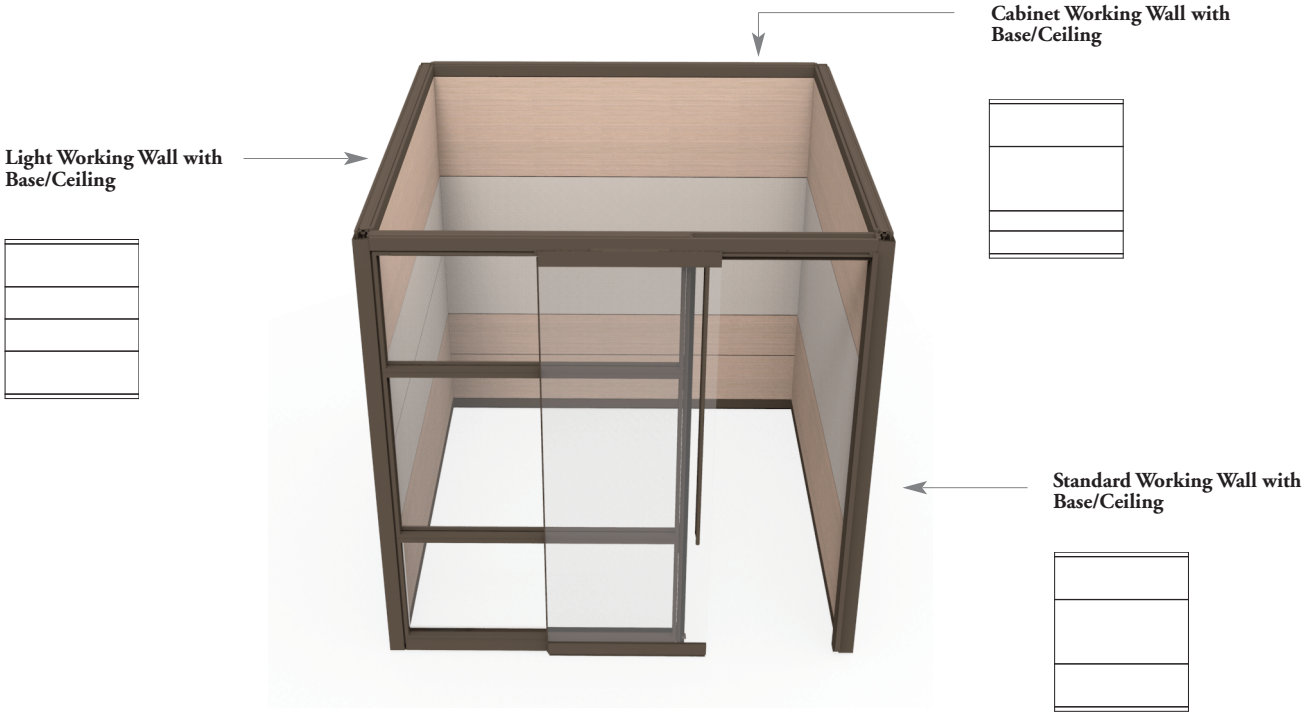
Legend:

code	description	width range
S	Solid (available on all fascias)	12" - 120"
FW	Fabric Wrapped (available on all fascias)	12" - 120"
WB	Whiteboard Framed	12" - 120"
WB	Whiteboard Frameless	12" - 96"
AF	Acoustic Tackable Fabric	12" - 120"
MP	Metal Micro Perforated	12" - 96"
G	Glass	12" - 96"

fascia elevation overview – landscape

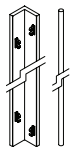
Landscape Fascias are used to create the faces of Altos walls and are configured into six elevations depending on the Fascia selection.

- Fascias are available in a variety of solid and glass finishes that correspond to the selected landscape elevation
- Landscape elevations are built up out of fascias and frames to complete both sides of a wall module
- Landscape elevations can be different on the front and back of the wall
- Power and communication receptacle cut outs can be specified with select solid and fabric wrapped Fascias
- Walls must be installed from floor to ceiling
- Acoustic Fascias are not available for base, ceiling, WM1, or WM3 locations; use Fabric Wrapped fascias in these applications
- Landscape Base and Ceiling Fascias are 4" high
- Select Landscape Fascias are available in widths from 12" – 120" in 1/8" increments

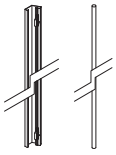


Altos Landscape works with some Altos Portrait components to create a complete wall solution. For full details on these components please refer to the Altos Portrait section.

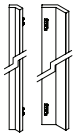
Also available but Not Shown:



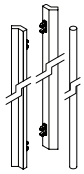
Two-Way 90° Corner Cover (FKCN90)
Provides the full-height trim for two walls connected at 90° at Two-Way Connection 90° Corner



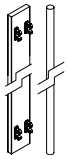
Two-Way 120° Corner Cover (FKCN120)
Provides the full-height trim for two walls connected at 120°



Two-Way 135° Corner Cover (FKCN132)
Provides a full-height trim for two walls connected at 135°



Three-Way 135° Corner Cover (FKCN133)
Provides a full-height trim for three walls connected at 135°



Three-Way 180° Corner Cover (FKCN180)
Provides the full-height trim for three walls connected at 180°

fascia elevation basics – landscape

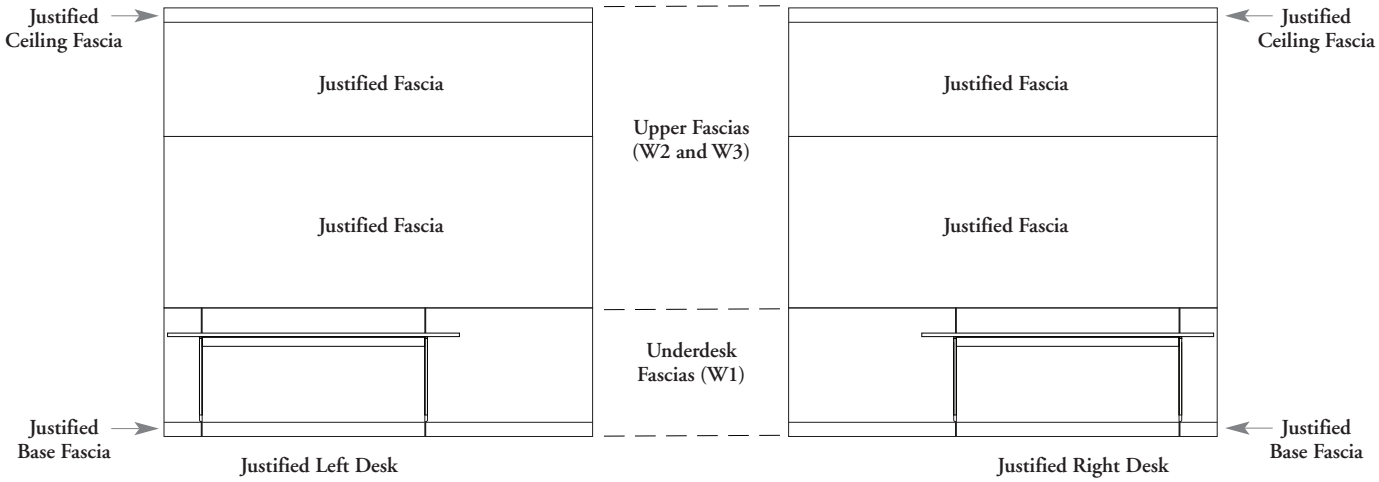
Altos Landscape fascia options include Solid, Glass, Whiteboard, Fabric-Wrapped, Acoustic Tackable Fabric, and Acoustic Metal Micro Perforated. Fascias can be reconfigured to other fascia types after installation without modifying the interior wall structure.

Landscape Arrangement	Fascias Available
Standard Working Wall Monolithic 	• **WM3** FLWM3 and FLRWM3 are 12 - 36" high in 1" increments to accommodate ceiling height • **W2** FLW2, FLRW2, FLATW2, FLMWN, FLMWF, FLGC, FLGD are 48" high • **WM1** FLWM1 and FLRWM1 are 36" high
Standard Working Wall Base/Ceiling 	• **Ceiling** FLC is 4" high and available in Solid, Fabric Wrapped, Anodized and Painted • **W3** FLW3, FLRW3, FLATW3, FLMPW3, FLMBW3, FLGC and FLGD are 12 - 32" high in 1" increments to accommodate ceiling height • **W2** FLW2, FLRW2, FLATW2, FLMWN, FLMWF, FLGC and FLGD are 48" high • **W1** FLW1, FLRW1, FLATW1, FLMPW1, FLMBW1, FLGC and FLGD are 32" high • **Base** FLB is 4" high and available in Solid, Fabric Wrapped, Anodized and Painted
Light Working Wall Monolithic 	• **WM3** FLWM3 and FLRWM3 are 12 - 36" high in 1" increments to accommodate ceiling height • **TW2** FLTW2, FLRTW2, FLATTW2, FLMPTW2 and FLMBTW2 are 24" high • **BW2** FLBW2, FLRBW2, FLATBW2, FLMPBW2 and FLMBBW2 are 24" high • **WM1** FLWM1 and FLRWM1 are 36" high
Light Working Wall Base/Ceiling 	• **Ceiling** FLC is 4" high and available in Solid, Fabric Wrapped, Anodized and Painted • **W3** FLW3, FLRW3, FLATW3, FLMPW3, FLMBW3, FLGC and FLGD are 12 - 32" high in 1" increments to accommodate ceiling height • **TW2** FLTW2, FLRTW2, FLATTW2, FLMPTW2 and FLMBTW2 are 24" high • **BW2** FLBW2, FLRBW2, FLATBW2, FLMPBW2 and FLMBBW2 are 24" high • **W1** FLW1, FLRW1, FLATW1, FLMPW1, FLMBW1, FLGC and FLGD are 32" high • **Base** FLB is 4" high and available in Solid, Fabric Wrapped, Anodized and Painted
Cabinet Working Wall Monolithic 	• **WM3** FLWM3 and FLRWM3 are 12 - 36" high in 1" increments to accommodate ceiling height • **W2** FLW2, FLRW2, FLATW2, FLMWN, FLMWF, FLGC and FLGD are 48" high • **TW1** FLTW1, FLRTW1, FLATTW1, FLMPTW1 and FLMBTW1 are 15" high • **BWM1** FLBWM1 and FLRBWM1 are 21" high
Cabinet Working Wall Base/Ceiling 	• **Ceiling** FLC is 4" high and available in Solid, Fabric Wrapped, Anodized and Painted • **W3** FLW3, FLRW3, FLATW3, FLMPW3, FLMBW3, FLGC and FLGD are 12 - 32" high in 1" increments to accommodate ceiling height • **W2** FLW2, FLRW2, FLATW2, FLMWN, FLMWF, FLGC and FLGD are 48" high • **TW1** FLTW1, FLRTW1, FLATTW1, FLMPTW1 and FLMBTW1 are 15" high • **BW1** FLBW1, FLRBW1, FLATBW1, FLMPBW1 and FLMBBW1 are 17" high • **Base** FLB is 4" high and available in Solid, Fabric Wrapped, Anodized and Painted

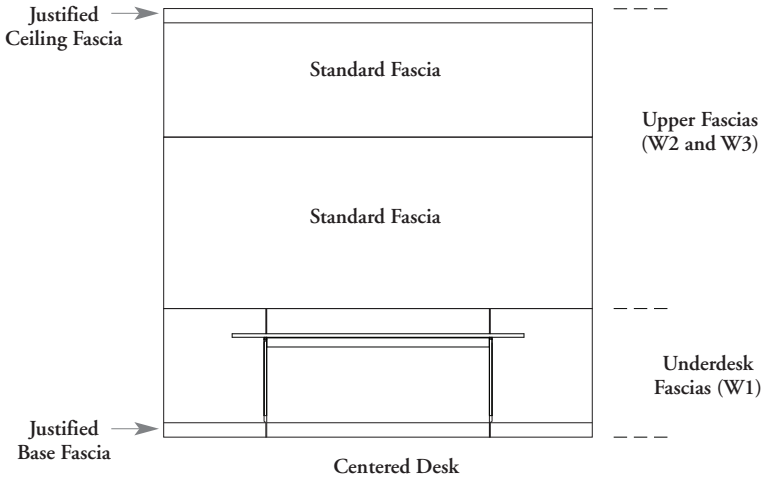
justified fascia overview – landscape

Landscape Justified Fascias are used when a Landscape Desk is justified left or right on the wall module. They are specified at the W2, W3 and Base and Ceiling fascia locations.

When a desk is specified justified left or right on the wall module the upper fascias must be specified as Landscape justified fascias to avoid interference with the Landscape Desk Frame (FLDF). Justified Fascias are not required at the W1 location. See Desk fascia basics page for more details.



When a desk is centered on the wall module use standard Landscape fascias above the desk, except the ceiling & base fascia which must be justified.



justified fascia elevation basics – landscape

Altos Landscape Justified fascia options include Solid, Glass, Whiteboard, Fabric-Wrapped, Acoustic Tackable Fabric, and Acoustic Metal Micro Perforated. Justified fascias are used with a Desk and can be reconfigured to other justified fascia types after installation without modifying the interior wall structure.

Justified fascias **cannot** be located at W1/WM1 or on Cabinet Working Wall elevations.

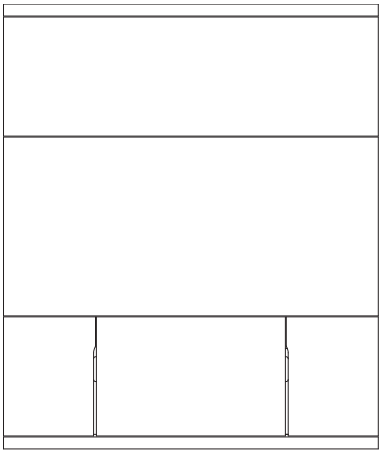
Landscape Arrangement	Fascias Available
Working Wall Monolithic 	• **WM3** FLJWM3 and FLJRWM3 are 12 - 36" high in 1" increments to accommodate ceiling height • **W2** FLJW2, FLJRW2, FLJATW2, FLJMWN and FLJMWF are 48" high
Working Wall Base / Ceiling 	• **Ceiling**: FLJC is 4" high and available in Solid, Fabric Wrapped, Anodized and Painted • **W3** FLJW3, FLJRW3, FLJATW3, FLJMPW3 and FLJMBW3 are 12 - 32" high in 1" increments to accommodate ceiling height • **W2** FLJW2, FLJRW2, FLJATW2, FLJMWN and FLJMWF are 48" high • **Base** FLJB is 4" high and available in Solid, Fabric Wrapped, Anodized and Painted
Light Working Wall Monolithic 	• **WM3** FLJWM3 and FLJRWM3 are 12 - 36" high in 1" increments to accommodate ceiling height • **TW2** FLJTW2, FLJRTW2, FLJATTW2, FLJMPTW2 and FLJMBTW2 are 24" high • **BW2** FLJBW2, FLJRBW2, FLJATBW2, FLJMPBW2 and FLJMBBW2 are 24" high
Light Working Wall Base / Ceiling 	• **Ceiling** FLJC is 4" high and available in Solid, Fabric Wrapped, Anodized and Painted • **W3** FLW3, FLRW3, FLATW3, FLMPW3, FLMBW3, FLGC and FLGD are 12 - 32" high in 1" increments to accommodate ceiling height • **TW2** FLJTW2, FLJRTW2, FLJATTW2, FLJMPTW2 and FLJMBTW2 are 24" high • **BW2** FLJBW2, FLJRBW2, FLJATBW2, FLJMPBW2 and FLJMBBW2 are 24" high • **Base** FLJB is 4" high and available in Solid, Fabric Wrapped, Anodized and Painted

desk fascia basics – landscape

Landscape desk fascias accommodate the fixed or height-adjustable desk's connection to the wall frame, and provide access to desk electrics. They work in conjunction with both standard or justified fascias.

- Desk orientation can be Center, Left or Right
- Desk fascias are located on level W1/WM1 only
- Available in Solid
- Not available with Power and Communication cutouts

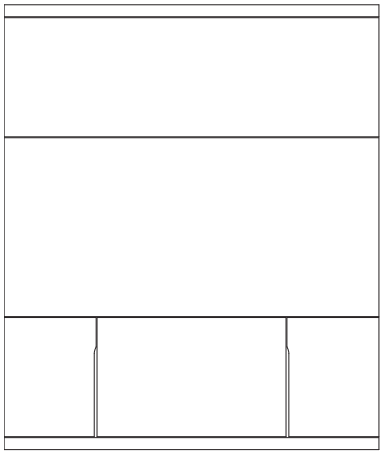
Landscape Fixed Desk Fascia



Landscape Fixed Desk Fascias (FLDFW1, FLDFWM1)

- Available for 29" or 42" high Fixed Desks
- Desk Fascia shown combined with Base Fascia

Landscape Height-Adjustable Desk Fascia



Landscape Height-Adjustable Desk Fascias (FLDHW1, FLDHWM1)

- Accommodates 28" - 44" high Height-Adjustable Desk range
- Desk Fascia shown combined with Base Fascia

clerestory basics – landscape

A Landscape clerestory module consists of a Landscape glass fascia above the 84" datum with Landscape fascias below.

- Altos Landscape clerestory is available in the W3 location above the 84" datum
- Available with 4" ceiling fascia in Aluminum, Solid and Fabric Wrapped finishes
- The maximum width for a glass fascia is 96"
- Available with Landscape shelving and light offering: Wall Mounted Light, Aluminum, Whiteboard Tray, Glass and Solid shelves
- Typical Landscape Fascia elevations apply

Restrictions:

• Cannot be used above an Altos Desk

• No ceiling feed path through glass fascia. Ceiling feed must be routed to the side of the fascia or to the floor.

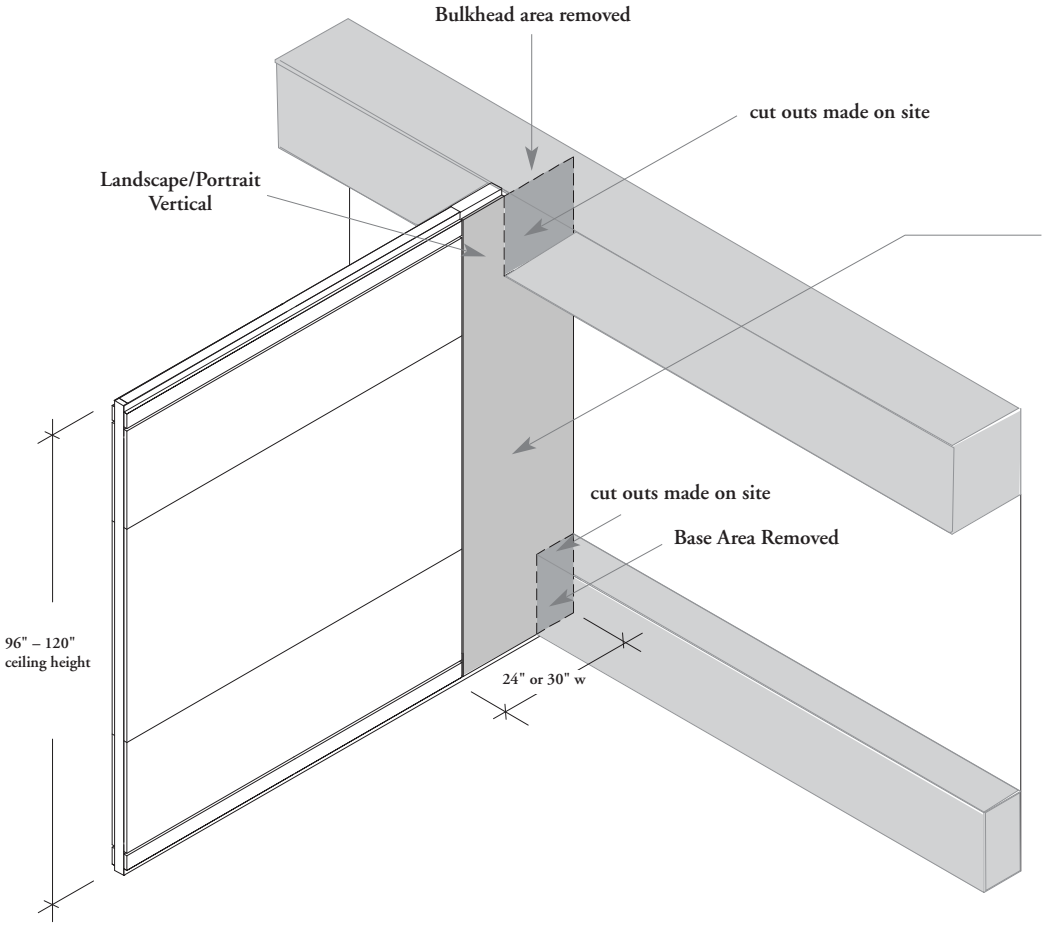
• One Clerestory cannot span over both a Landscape fascia module and an Altos/Optos door together.

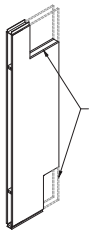
filler panel basics – landscape

The Filler Panel (FPF) is used when an Altos wall surface needs to be cut away to fit the wall around the building structure, usually at the perimeter of the building.

The Filler Panel can be used next to both Altos Portrait or Landscape fascias. Directional finishes for the Filler Panel are vertical, therefore when planning beside Altos Landscape, a non-directional finish is recommended.

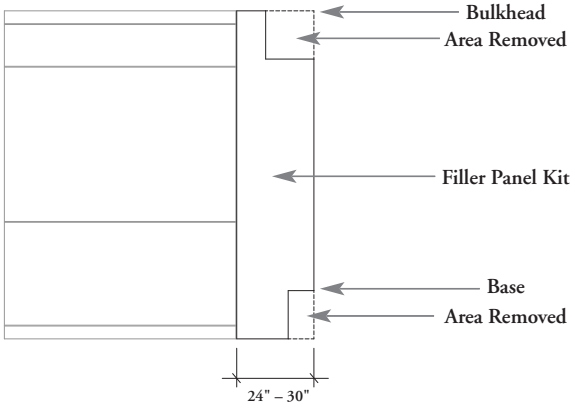
Height	Ceiling Height Range
102" (8'-6"	96" to 102" (8'-0" to 8'-6")
108" (9'-0")	103" to 108" (8'-7 "to 9'-0")
114" (9'-6")	109" to 114" (9'-1" to 9'-6")
120"(10'-0")	115" to 120" (9'-7" to 10'-0")





Filler Panel (FPF)

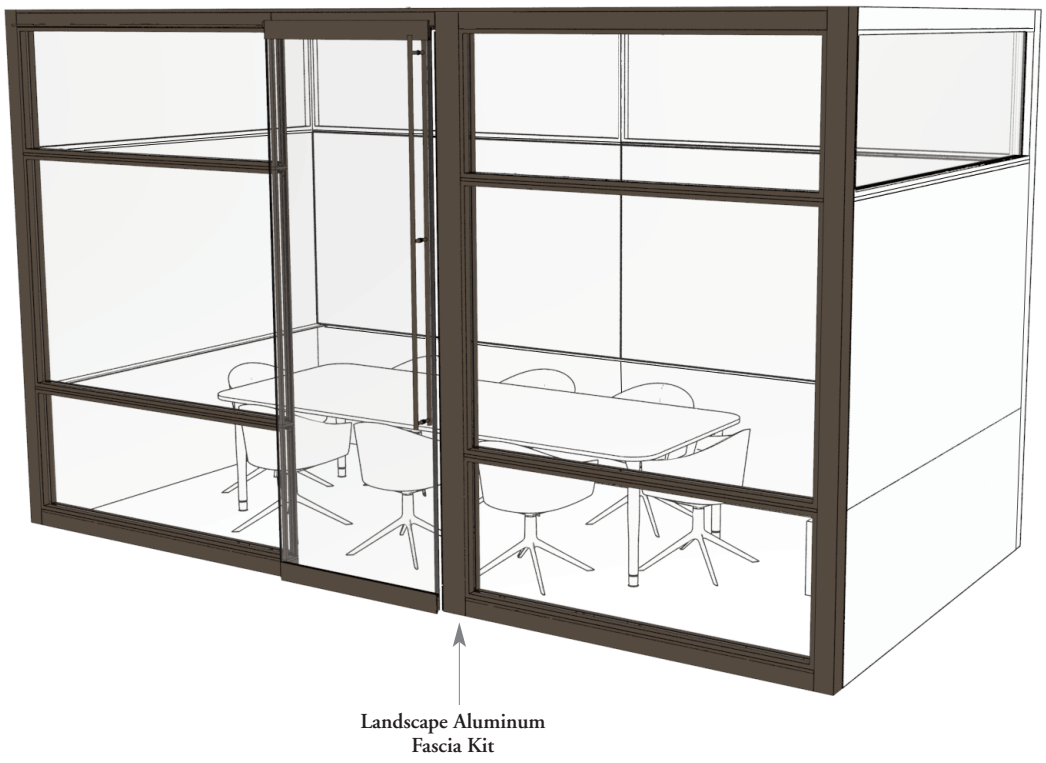
- One floor to ceiling Fascia, no Ceiling or Base Fascias required
- Available in solid finish only with no horizontal reveals
- Can be cut away to a maximum of 6" from floor to ceiling. Amounts greater than 6" can be cut away above and below the horizontal rails
- **Cannot** be used against window mullions
- Has a vertical grain direction for directional finishes



aluminum fascia kit basics – landscape

When electrics must be routed around a Functional Rail or a Glass Fascia, the Landscape Aluminum Fascia Kit (FLFK) can be used to run cables to the floor or ceiling.

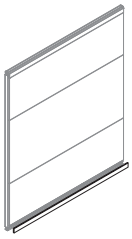
The Landscape Aluminum Fascia Kit can be Clear Anodized or painted in any of the 8 Architectural Paints.



Landscape Aluminum Fascia Kit (FLFK)

- A routing path to the floor or ceiling around Functional Rails or Glass fascias for up to 4 conduit feeds (0.75" diameter)
- Option for a Wall-Mounted Switch cut out at 42" from the floor
- Option for a Wall-Mounted Electrical Box cut out at 15" from the floor

F L B
Landscape Base Fascia



The Landscape Base Fascia provides a solid finish at the bottom of the wall section.

WHAT'S INCLUDED
1 fascia and connection hardware

NOTES
Type 1 Fascias have a Class A fire rating and minimum order quantities are required. Please contact Technical Services (US) or Specials (CAN) for pricing and details.

Type 2 Fascias have a Class B fire rating and are standard product.

Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

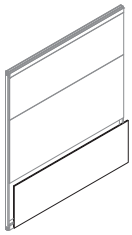
F L W 1

Landscape Solid Fascia – Working Wall (Level I)



The Landscape Solid Fascia – Working Wall (Level I) provides a solid finish at the W1 location of a working wall elevation.

WHAT'S INCLUDED
1 fascia with or without cut outs (as specified) and connection hardware

NOTES
Type 1 Fascias have a Class A fire rating and minimum order quantities are required. Please contact Technical Services (US) or Specials (CAN) for pricing and details.

Type 2 Fascias have a Class B fire rating and are standard product.

Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

PRODUCT OPTIONS

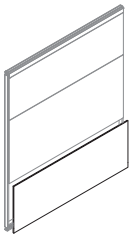
F L W M 1

Landscape Solid Fascia – Working Wall Monolithic (Level I)



The Landscape Solid Fascia – Working Wall Monolithic (Level I) provides a solid finish at the W1 location of a working wall elevation.

WHAT'S INCLUDED

1 fascia with or without cut outs (as specified) and connection hardware

NOTES

Type 1 Fascias have a Class A fire rating and minimum order quantities are required. Please contact Technical Services (US) or Specials (CAN) for pricing and details.

Type 2 Fascias have a Class B fire rating and are standard product.

Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

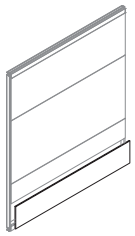
F L B W 1

Landscape Solid Fascia – Working Wall Bottom (Level I)



The Landscape Solid Fascia – Working Wall Bottom (Level I) provides a solid finish at the W1 location of a working wall elevation.

WHAT'S INCLUDED

1 fascia with or without cut outs (as specified) and connection hardware

NOTES

Type 1 Fascias have a Class A fire rating and minimum order quantities are required. Please contact Technical Services (US) or Specials (CAN) for pricing and details.

Type 2 Fascias have a Class B fire rating and are standard product.

Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

FLTW2
Landscape Solid Fascia – Working Wall Top (Level II)

The Landscape Solid Fascia – Working Wall Top (Level II) provides a solid finish at the W2 location of a working wall elevation.

WHAT'S INCLUDED
1 fascia with connection hardware

NOTES
Type 1 Fascias have a Class A fire rating and minimum order quantities are required. Please contact Technical Services (US) or Specials (CAN) for pricing and details.

Type 2 Fascias have a Class B fire rating and are standard product.

Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

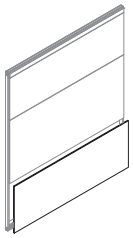
F L R W M 1

Landscape Fabric Wrapped Fascia – Working Wall Monolithic (Level I)



The Landscape Fabric Wrapped Fascia – Working Wall Monolithic (Level I) provides a fabric finish at the W1 location of a working wall elevation.

WHAT'S INCLUDED
1 fascia with or without cut outs (as specified) and connection hardware

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

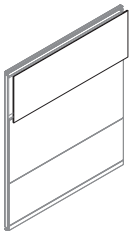
F L R W M 3

Landscape Fabric Wrapped Fascia – Working Wall Monolithic (Level III)



The Landscape Fabric Wrapped Fascia – Working Wall Monolithic (Level III) provides a fabric finish at the W3 location of a working wall elevation.

WHAT'S INCLUDED
1 fascia with connection hardware

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

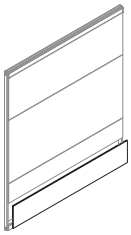
F L R B W 1

Landscape Fabric Wrapped Fascia – Working Wall Bottom (Level I)



The Landscape Fabric Fascia – Working Wall Bottom (Level I) provides a fabric finish at the W1 location of a working wall elevation.

WHAT'S INCLUDED
1 fascia with or without cut outs (as specified) and connection hardware

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

PRODUCT OPTIONS

Style	Height	Width (in 1" increments)	Width Increment	Base Fascia Height	Fabric
1L Solid	17	**12** 12	**84** 79 – 84	**0** 0"	4	Panel Fabric

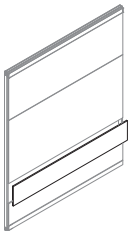
Landscape Fabric Wrapped Fascia – Working Wall Top (Level I)



The Landscape Fabric Wrapped Fascia – Working Wall Top (Level I) provides a fabric finish at the W1 location of a working wall elevation.

WHAT'S INCLUDED
1 fascia with or without cut outs (as specified) and connection hardware

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

FLATW2
Landscape Acoustic Tackable Fascia (Level II)

The Landscape Acoustic Tackable Fascia (Level II) provides sound attenuating properties with a fabric finish at the W2 location of a working wall elevation.

WHAT'S INCLUDED
1 fascia with connection hardware

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

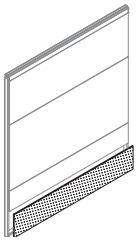
Landscape Micro Perforated Metal Acoustic Fascia – Working Wall Bottom (Level I)



The Landscape Micro Perforated Metal Acoustic Fascia – Working Wall Bottom (Level I) provides sound attenuating properties with a micro perforated metal fascia at the W1 location of a working wall elevation.

WHAT'S INCLUDED
1 fascia with connection hardware

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

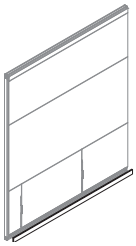
Landscape Justified Fabric Wrapped Base Fascia



The Landscape Justified Fabric Wrapped Base Fascia provides a fabric finish at the bottom of the wall section.

WHAT'S INCLUDED
1 fascia with connection hardware

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

4" height is only available solid.

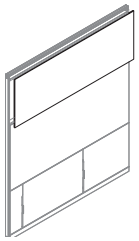
Landscape Justified Fabric Wrapped Fascia – Working Wall Monolithic (Level III)



The Landscape Justified Fabric Wrapped Fascia – Working Wall Monolithic (Level III) provides a fabric finish at the W3 location of a working wall elevation.

WHAT'S INCLUDED
1 fascia with connection hardware

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

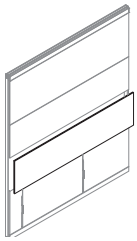
Landscape Justified Fabric Wrapped Fascia – Working Wall Bottom (Level II)



The Landscape Justified Fabric Wrapped Fascia – Working Wall Bottom (Level II) provides a fabric finish at the W2 location of a working wall elevation.

WHAT'S INCLUDED
1 fascia with connection hardware

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

PRODUCT OPTIONS

Fascia Height	Desk Width	Fascia Width (in 1" increments)	Fascia Width Increment	Desk Orientation	Fabric
24	60, 66, 72, 78, 84	**60** 60	**0** 0"	**L** Left	Architectural Fabric
		66 61 - 66	**1** 1/8"	**R** Right	Panel Fabric
		72 67 - 72	**2** 1/4"		
		78 63 - 78	**3** 3/8"

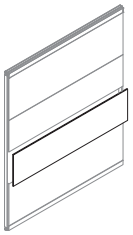
Landscape Justified Acoustic Tackable Fascia – Working Wall Bottom (Level II)



The Landscape Justified Acoustic Tackable Fascia – Working Wall Bottom (Level II) provides sound attenuating properties with a fabric finish at the W2 location of a working wall elevation.

WHAT'S INCLUDED
1 fascia with connection hardware

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

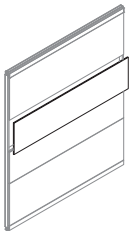
FLJATTW2

Landscape Justified Acoustic Tackable Fascia – Working Wall Top (Level II)



The Landscape Justified Acoustic Tackable Fascia – Working Wall Top (Level II) provides both sound attenuating and blocking properties with a fabric finish at the W2 location of a working wall elevation.

WHAT'S INCLUDED
1 fascia with connection hardware

NOTES
Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

PRODUCT OPTIONS

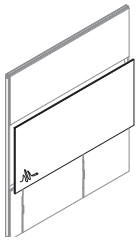
F L J M W N

Landscape Justified Whiteboard Frameless



The Landscape Justified Whiteboard Frameless provides a dry-erase surface for use at Level W2 WW elevation.

WHAT'S INCLUDED

1 fascia - frameless whiteboard with magnetic backer and connection hardware

NOTES

Exact width must be specified in the order code. Range codes (i.e. 12, 120) are listed for pricing purposes only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

PRODUCT OPTIONS

Fascia Height	Desk Width	Fascia Width (in 1" increments)	Fascia Width Increment	Desk Orientation
48	60, 66, 72, 78, 84	**60** 60	**0** 0"	**L** Left
		66 61 - 66	**1** 1/8"	**R** Right
		72 67 - 72	**2** 1/4"	
		78 63 - 78	**3** 3/8"	
		84 79 - 84	**4** 1/2"	
		90 85 - 90	**5** 5/6"	
		96 91 - 96	**6** 3/4"	
			7 7/8"

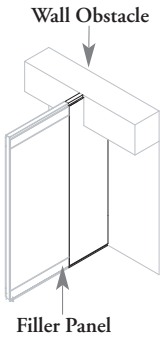
F P F
Filler Panel



The Filler Panel is used when an Altos surface needs to be cut away to fit around the building structure.

WHAT'S INCLUDED
2 solid wall Fascias, gasket, adjustable horizontal rail, Base Channel – Modular (FKB), connection hardware (L–Bracket).

NOTES
Used for both Portrait and Landscape applications.

Exact height and width **must** be specified in the order code. Range codes (i.e. **36, 40**) are listed for pricing purpose only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

Type 1 Fascias have a Class A fire rating and minimum order quantities are required. Please contact Technical Services (US) or Specials (CAN) for pricing and details.

Type 2 Fascias have a Class B fire rating and are standard product.

FKCN90
Two–Way 90° Corner Cover

The Two–Way 90° Corner Cover provides a full–full-height trim for two walls connected at 90°.

WHAT'S INCLUDED
1 corner cover with fascia connectors, 1 foam backer rod.

NOTES
Used for both Portrait and Landscape applications.

Hardware for Altos Corner Connections for 90° (FKCH90) provides the framework for a Two–Way 90° Corner connection and must be specified separately.

Exact height **must** be specified in the order code. Range codes (i.e. **102, 108**) are listed for pricing purpose only.

Corner covers are full–full-height from floor to ceiling.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

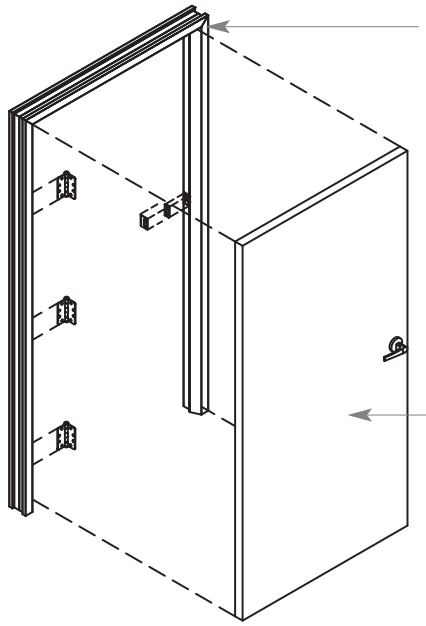
door overview

For typical openings, Altos offers a variety of doors that meet a range of privacy and functional needs – the four basic types are: Hinged, Pivot and Barn.

- Solid doors are 1-3/4" thick
- Glass doors are 10mm thick (3/8" nominal thickness)
- Laminated glass must be specified for ceiling heights greater than 114" with 6" ceiling fascia or 112" with 4" ceiling fascia
- Doors and frames specified separately
- Low profile door styles bring the aesthetics of Optos doors into the Altos product line
- Consideration for ADA compliant locking hardware for doors needs to be determined early in the project cycle. Teknion offers a custom special solution that complies with ADA requirements, subject to local approvals.This is applicable to all Barn Doors with the exception of Double Barn Doors where there is no ADA compliant option available

building up door modules



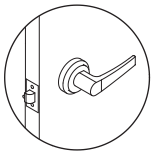
Frame or Transom and Frame Kit

The frame can be customized by height, swing direction, door package type and frame finish

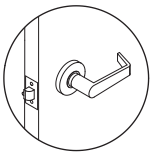
Door

- The door can be customized by door type, height, swing/pull direction, lever type, hardware type, drop seal and surface finish
- Doors have an adjustment range of +2-3/4" and -1/4"

lever types:

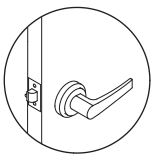


Jupiter

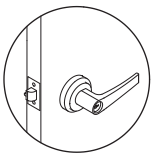


Saturn

hardware types:



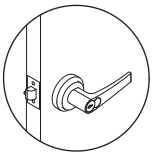
Without Lock (Passage Set)



Standard Lock and Cylinder

Mortise Lock and Standard Cylinder

Mortise Lock and Interchangeable Core Cylinder



Standard Lock and Interchangeable Core Cylinder

- Doors specified with "Standard Cylinder" are keyed randomly (2 keys provided per door)
- Doors specified with "Interchangeable Core Cylinder" are keyed randomly (2 keys provided per door) yet can be removed by a universal control key (1 key provided per order)
- After installations, customers may choose to relocate or replace interchangeable core cylinders to suit their security needs

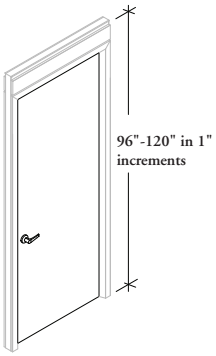
hinged door basics

Hinged doors create an opening with a 180°.

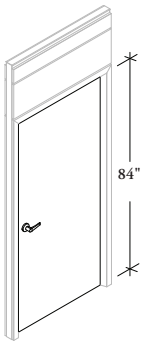
A drop seal is an option to minimize sound leakage at the bottom of the solid doors

Hinged Door (FDH)

Door Size	Clearance	Clearance when Installed at Corner
40" Wide	34.75"	33"
42" Wide	36.75"	35"

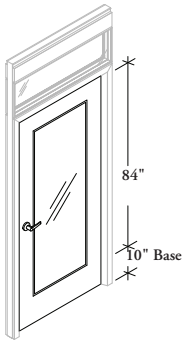


Full-Height
Creates a 180° swing



84" high (with Solid Transom)

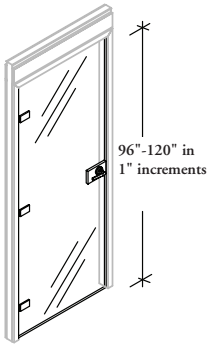
- 84" segmented requires a transom measuring between 6" & 30" for ceiling heights between 96" & 120" in 1" increments
- Transom can be Solid or Glass



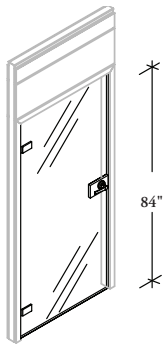
84"high (with Glass Insert and Glass Transom)
Available with clear or frost glass insert options for privacy aesthetic variation

Hinged Glass Door (FDJ)
An optional 10" high stainless steel kickplate may also be specified

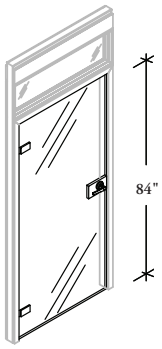
Door Size	Clearance	Clearance when Installed at Corner
40" Wide	34.75"	33"
42" Wide	36.75"	35"



Full-Height



84"high (with Solid Transom)

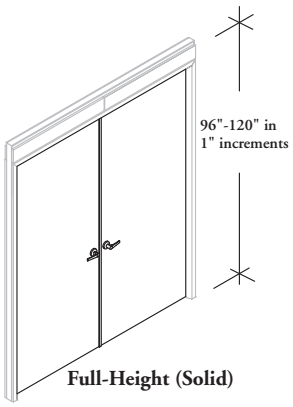


84"high (with glass insert and Glass Transom)

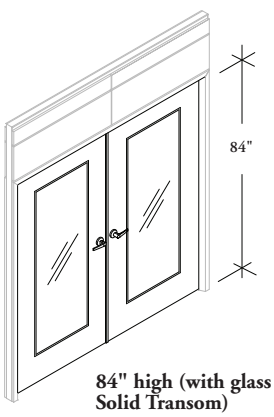
- Door will be ceiling height minus ceiling fascia height
- Transom can be Solid or Glass
- Glass is Clear or Frost and has a 3/8" nominal thickness

Hinged Double Door (FDD)

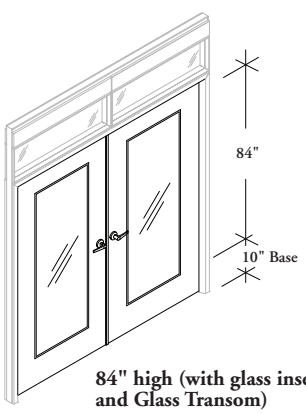
Door Size	Clearance
72" Wide	67"
80" Wide	75"
84" Wide	79"



Full-Height (Solid)



84" high (with glass insert and Solid Transom)

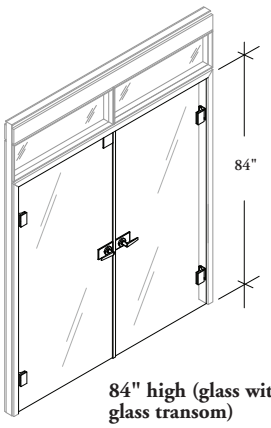


84" high (with glass insert and Glass Transom)

- 84" segmented requires a transom measuring between 6" and 32" for ceiling heights between 96" and 120" in 1" increments
- Available with Clear or Frost glass insert options for privacy aesthetic variation – Transom can be Solid or Glass

Hinged Glass Double Door (FDE)
An optional 10" high stainless steel kickplate may also be specified

Door Size	Clearance
72" Wide	67"
80" Wide	75"



84" high (glass with glass transom)

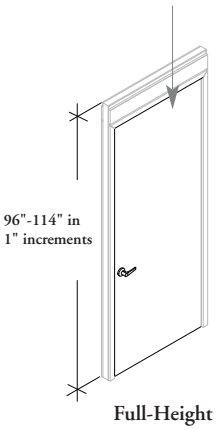
84" Segmented requires a transom measuring between 6" and 32" ceiling heights between 96" and 120" in 1" increments

pivot door basics

The Solid Pivot Door uses pivot hardware to attain a 90° swing. The Glass Pivot Door is a full height door that pivots open 180° with an optional adjustable door closer/door stay. It has enhanced acoustic performance offered by its continuous Frame Seal.

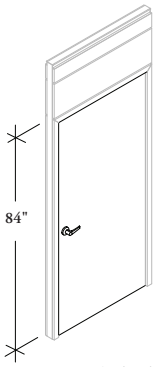
Pivot Door (FDP)

Door will be ceiling height minus Ceiling Fascia height



Full-Height

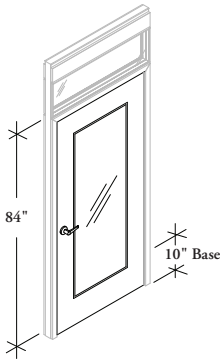
Pivot Door with Fascia



84" high

84" high (with Solid Transom)

- 84" segmented requires a transom measuring between 6" and 32" for ceiling heights between 96" and 120" in 1" increments
- Transom can be Solid or Glass



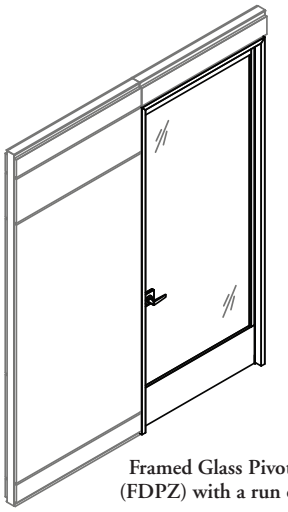
84" high

84" high (with glass insert and Glass Transom)

- Available with Clear or Frost glass insert options for privacy and aesthetic variation
- Pivot hardware allows for the door swing direction to be switched

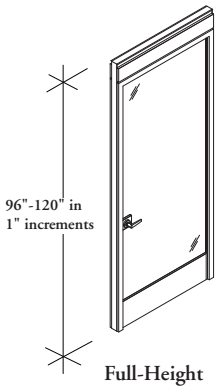
Framed Glass Pivot Door (FDPZ)

Door Size	Clearance	Clearance when Installed at Corner
40" Wide	35"	33"
42" Wide	42"	40"



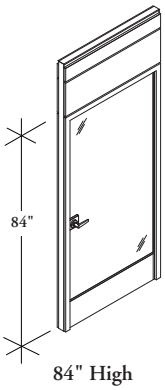
Framed Glass Pivot Door (FDPZ) with a run of Altos

- Available with 4" or 6" Ceiling Fascia or for Segmented Height with transom
- Available in 6mm or 10mm Tempered or Tempered Laminated Glass
- Two lever types available as standard: Jupiter and Saturn



Full-Height

Glass Pivot Door with Fascia



84" High

84" high (with Solid Transom)

- Available with Standard height and 10" high Integrated ADA Aluminum Kickplate
- Available with or without standard lock and interchangeable core cylinder or no lock
- Glass is available 6mm, 10mm or 12mm thick, tempered laminate is only available on 10mm thick glass
- Frame finishes include Anodized and Painted finishes

84" High

84" high (with Glass Transom)

- Available with Clear or Frost glass insert options for privacy and aesthetic variation

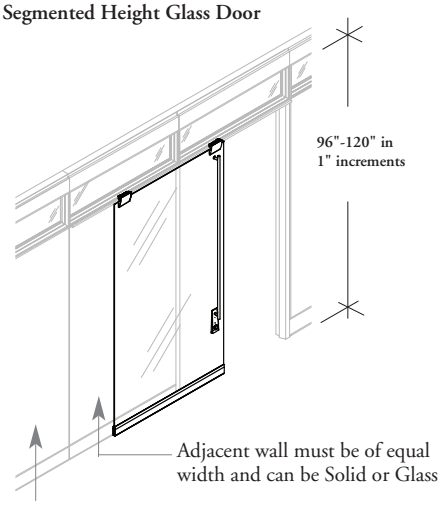
single barn door basics

The Single Barn Door creates a sliding door by mounting to the outside face of wall modules.

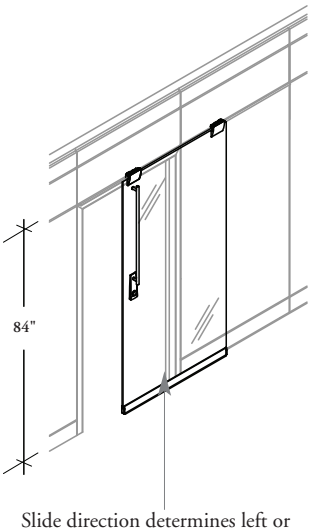
- Please check local code requirements, as in some jurisdictions, the use of the Barn Door is limited to room occupancies of 10 people maximum
- Adds 1" to wall module depth
- Locks **cannot** be retrofitted on Barn Doors
- Segmented height doors can only be planned adjacent to segmented or working wall elevations
- Monolithic elevations **cannot** be used adjacent to segmented or full-height barn doors
- Solid and Solid with Insert **cannot** be used with 4" base and ceiling fascias
- 48" wide Glass Door is **not** available in ceiling heights greater than 108"
- Consideration for ADA compliant locking hardware for doors needs to be determined early in the project cycle. Teknion offers a custom special solution that complies with ADA requirements, subject to local approvals.This is applicable to all Barn Doors with the exception of Double Barn Doors where there is no ADA compliant option available

Glass and Solid Barn Door (FDC, FDS)

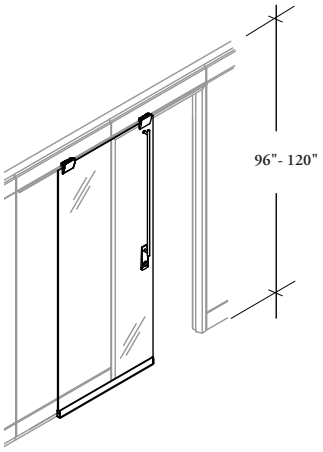
Segmented Height Glass Door



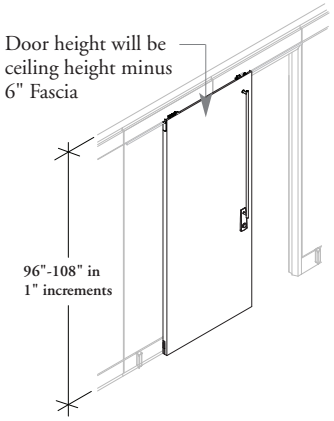
- May be mounted on inside or outside of wall module unless specified with lock, then it must on the outside
- Keyed lock is on the outside and thumb turn on the inside



Glass Door Full-Height

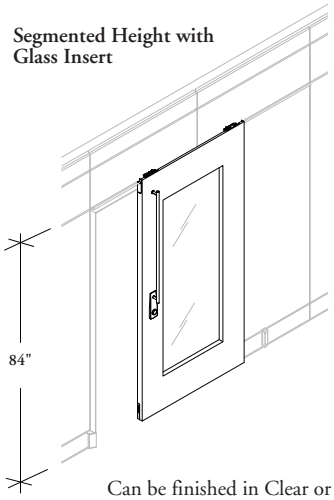


Solid Full-Height



Door Size	Clearance
40" Wide	32"
42" Wide	34"
48" Wide	40"

Segmented Height with Glass Insert



Can be finished in Clear or Frost Glass and can be adjacent to Solid and Glass Fascias

Glass Barn Door Low Profile (FDCZ)

- Available in widths of 40" and 42" only
- 4" ceiling fascia height
- Door slides can be left or right and can be interior or exterior
- Available with or without standard lock and interchangeable core cylinder
- Glass is available in tempered and tempered Laminate is required over 111" high
- Can be specified with or without soft close mechanism. Trolly and Base Cover finish include Anodized and Paint
- Should **not** be used with adjacent Fabric Fascias

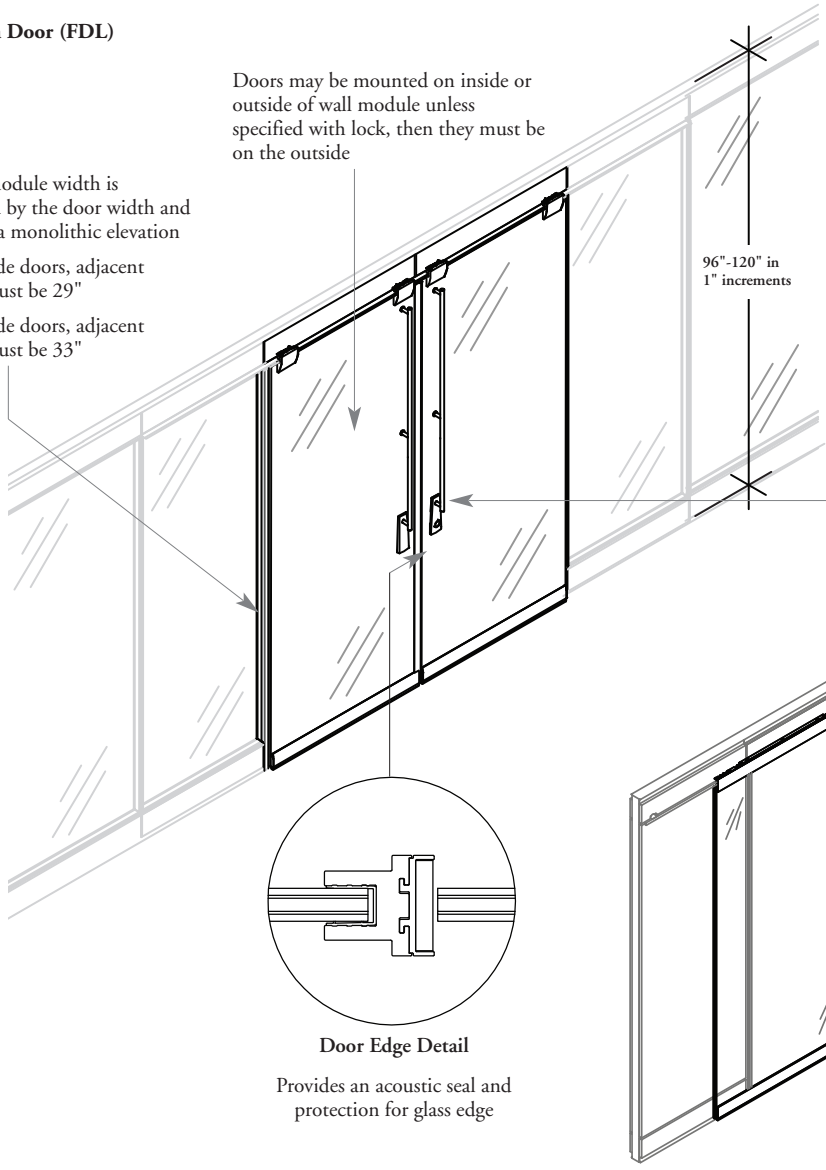
double barn door basics

The Double Barn Door creates sliding doors by mounting to the inside or the outside face of wall modules.

- Please check the local code requirements, as in some jurisdictions, the use of the Barn Door is limited to room occupancies of 10 people maximum
- Adds 1" to wall module depth
- Locks **cannot** be retrofitted on Barn Doors
- Glass Barn Doors only
- Full-height format only (**not** available in segmented height)
- Only available for use with 6" ceiling fascias
- No ADA compliant locking option is available for Double Barn Doors

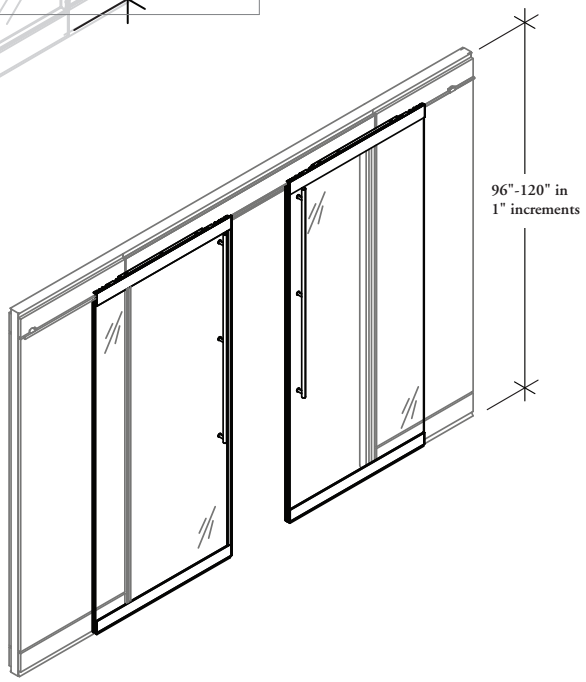
Door Size	Clearance
72" (2 x 36")	56"
80" (2 x 40")	64"

Double Barn Door (FDL)



Door Edge Detail

Provides an acoustic seal and protection for glass edge



Double Glass Barn Door Low Profile (FDLZ)

- 72" wide only
- Can only be ordered with 4" ceiling fascia configuration
- Available with or without standard lock an interchangeable core cylinder
- Available in tempered or laminated glass
- Base Cover and Trolley finish include Anodized and Painted finishes
- Should **not** be used with adjacent Fabric Fascias

door overview – landscape

For typical openings, Altos Landscape offers a variety of doors that meet a range of privacy and functional needs – the four basic types are: Hinged, Pivot and Barn.

- Solid doors are 1-3/4" thick
- Glass doors are 10mm thick (3/8" nominal thickness)
- Laminated glass must be specified for ceiling heights greater than 112" with 4" ceiling fascia
- Doors and frames specified separately
- Low profile door styles bring the aesthetics of Optos doors into the Altos product line
- Consideration for ADA compliant locking hardware for doors needs to be determined early in the project cycle. Teknion offers a custom special solution that complies with ADA requirements, subject to local approvals.This is applicable to all Landscape Barn Doors

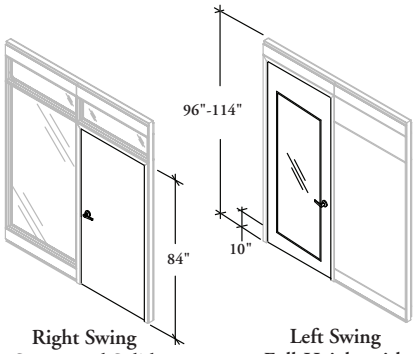
F D P
Pivot Door



Right Swing
Segmented Solid

Left Swing
Full-Height with
Glass Insert

The Pivot Door is a solid door with a 90° swing and optional glass insert.

WHAT'S INCLUDED
1 door (optional glass insert), Brushed Chrome lever (with or without lock as specified), 1 door base stop and connection hardware.

WHAT'S EXCLUDED
Ceiling Fascias (FFC), Solid or Glass Fascias (FFS, FFG), Door Frame Kit (FKD3) and Horizontal Rail Packages (FKHG).

NOTES
Used for both Portrait and Landscape applications.

Door	Door Dimensions	Door Clearance
FDP_40	36" wide	35"
FDP_42	38" wide	37"

Door can be adjusted in the field between left and right handed orientation.

Exact height **must** be specified in the order code. Range codes (i.e. **84, 102**) are listed for pricing purpose only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

Ceiling Fascia Height **must** be specified for full height doors.

frame kit overview

Frame kits are used together to create the structural frame of the Altos wall. Frame kits are specified after the Fascia configurations has been determined.

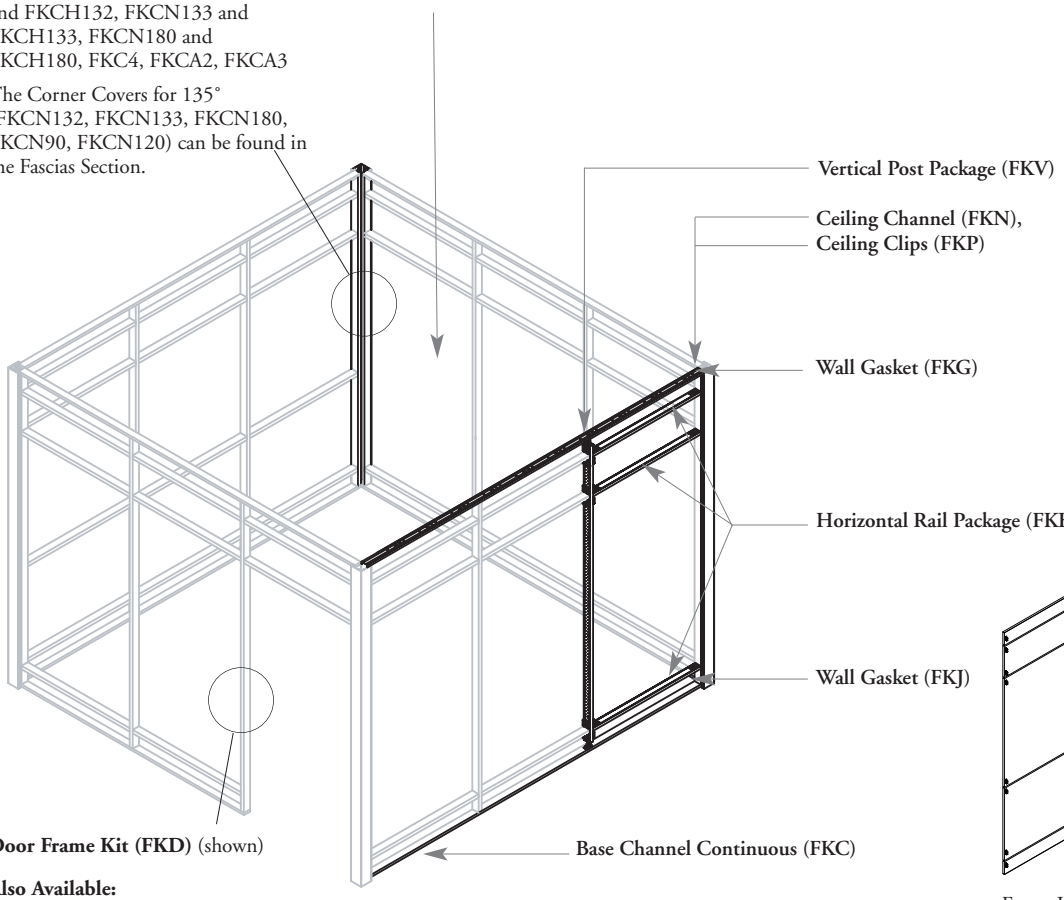
Two-Way 90° Corner Cover (FKCN90) and Hardware for Altos Corner Connections (FKCH90) (shown)

Also Available:

FKCN120 and FKCH120, FKCN132 and FKCH132, FKCN133 and FKCH133, FKCN180 and FKCH180, FKC4, FKCA2, FKCA3

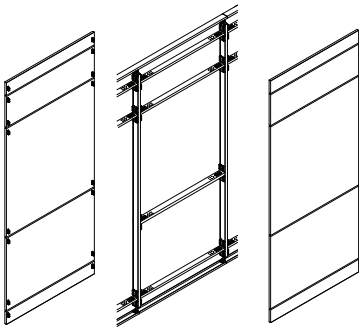
The Corner Covers for 135° (FKCN132, FKCN133, FKCN180, FKCN90, FKCN120) can be found in the Fascias Section.

Recycled Cotton Insulation (FAI) (not shown)
Recycled cotton insulation used within the Altos wall cavity to improve STC. Available as a 50' x 4' roll cut to size on site.

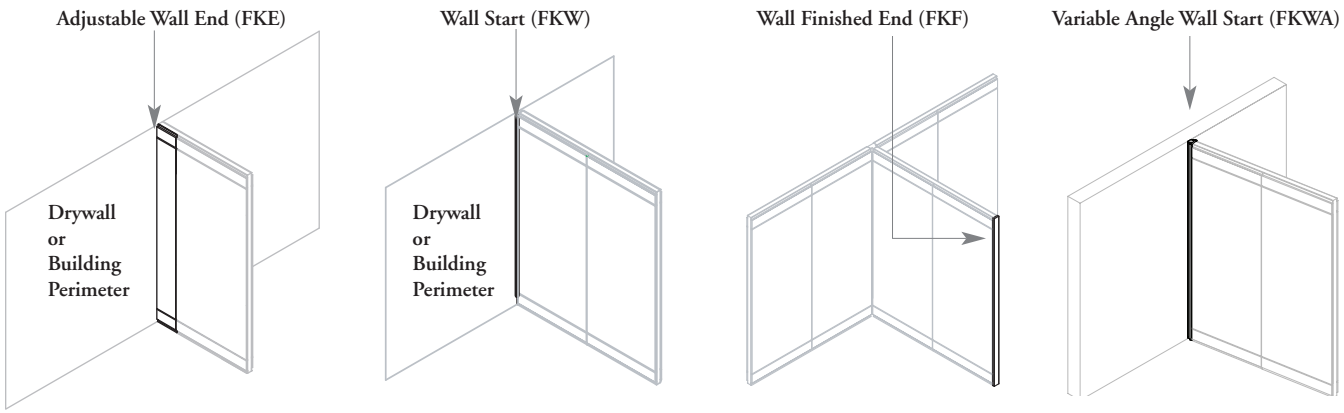


Door Frame Kit (FKD) (shown)

Also Available:
FKTF, FKTS, FKRT, FKRS, FKRSS



Frame Kit packages are for vertical posts and horizontal rails are specified to coordinate with Fascia elevations chosen

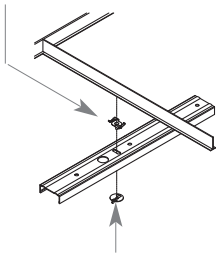


ceiling & base channel basics

A Ceiling Channel is required over entire wall run, including openings and corner connections in all applications of Altos wall system.

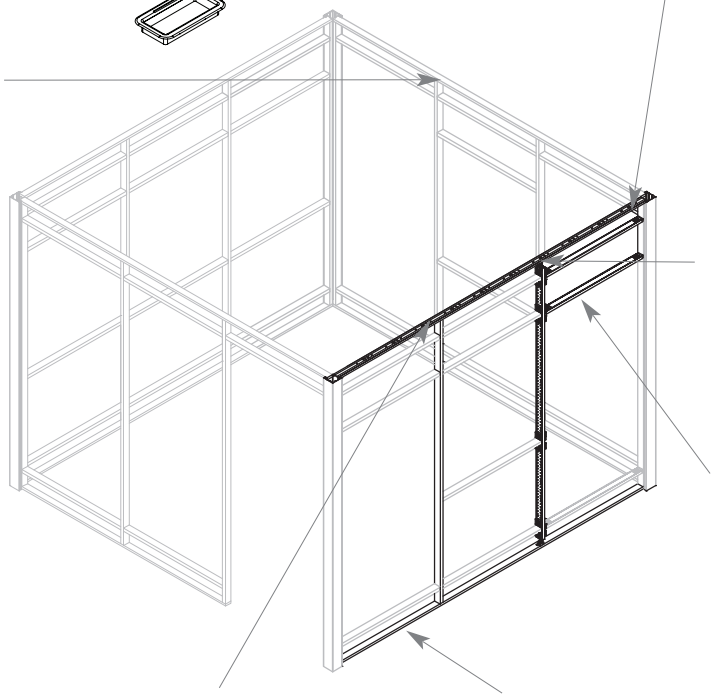
Ceiling Clip (FKP)
- Is a non-permanent method of connecting the ceiling channel to the suspended ceiling
- **Cannot** be connected to all types of ceilings – site verification required
- Non-marking and need to be ordered separately from ceiling channel
- Accommodate the changing wall locations without defacing the T-Bar

Ceiling Clip Upper

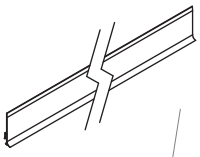


Ceiling Clip Lower

Horizontal Grommet (FBG)
(not shown)
- The Horizontal Grommet provides a finish to the Horizontal Rail cut outs
- Optional for use with solid and fabric fascias. **Cannot** be used with Glass Fascias



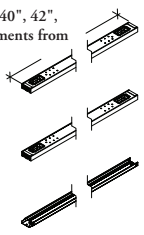
Wall Gasket (FKJ)
- Is a light and sound seal between the bottom of the wall system and the finished floor and the top of the wall system and the ceiling
- Minor height variations in floor and ceiling surfaces may be concealed by the wall gasket – available in 10'-0" lengths only



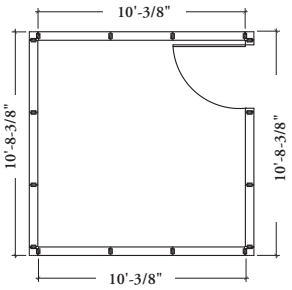
Vertical Reveal Cover Kit (FKJC)
The Vertical Reveal Cover provides a trim for vertical post when Platinum or Very White gaskets are used

Horizontal Rail Package (FKH)
- Consist of horizontal rails and one Base Channel – Modular (FKB)
- Horizontal pass-through of electrics and communications is possible through the openings in the horizontal rails
- One Package is shared between the inner and outer elevation of a wall module
- Are universal and are used for both Solid and Glass Fascias
- **Must** specify base and ceiling fascia height being used
- When the 4" fascia is specified, female mounting clips are installed on the Horizontal Rail. When the 6" fascia is specified then female clips are mounted on the Vertical Posts

12", 18", 24", 30", 40", 42", 48" and in 1" increments from 12" - 48"

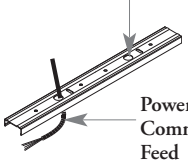


To determine the number of Ceiling Channels (FKN) required for the length of a wall run, take the total linear footage multiplied by 0.14



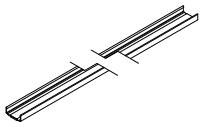
Ceiling Channel (FKN)
- Attaches to the ceiling and supports the Vertical Post Packages
- Is an inverted steel U-channel start and can be cut to size on site
- Holes are punched into the Ceiling Channel to facilitate power and communications feed from the ceiling into the wall
- Is available in 10'-0" lengths only
- Can be attached to ceiling at any angle

Ceiling Channel



Power and Communications Feed

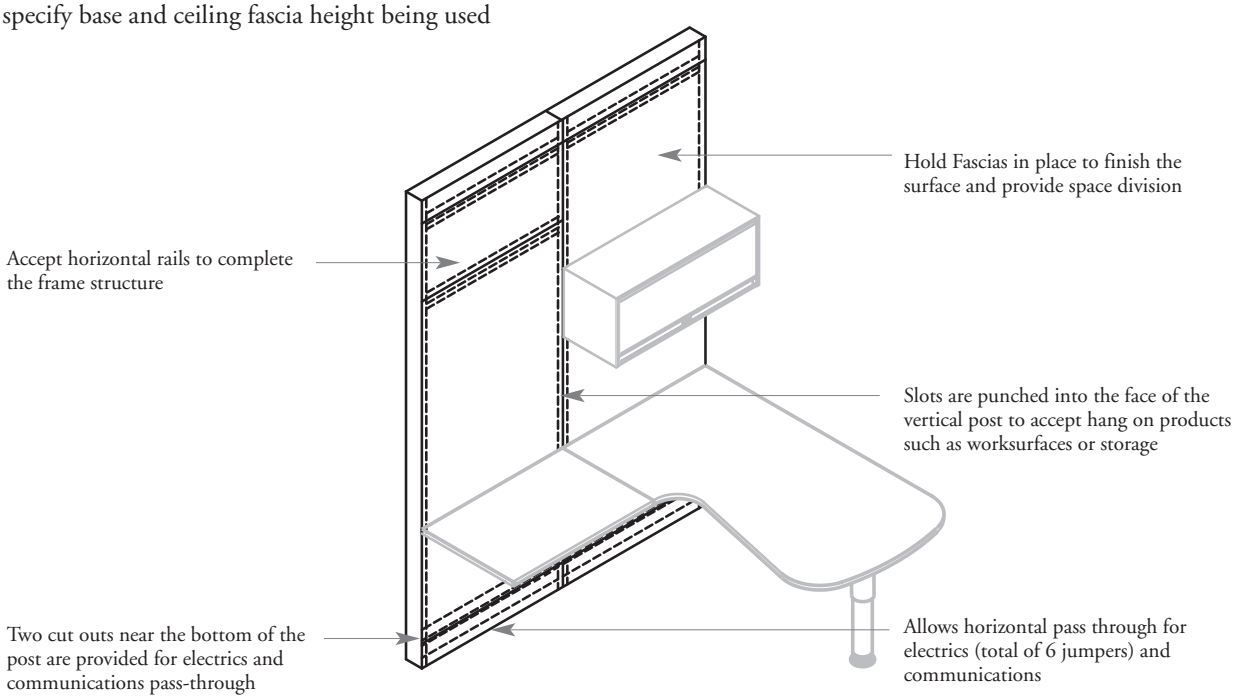
Base Channel (FKC)
- Horizontal frame work of all wall assemblies
- Gap tape is provided along the underside of the channel to add stability and an acoustic barrier without mechanical attachments to the floors
- Can also be mechanically fastened to the floor if a more secure or permanent attachment is required (hardware not included)
- Available in 10" widths only



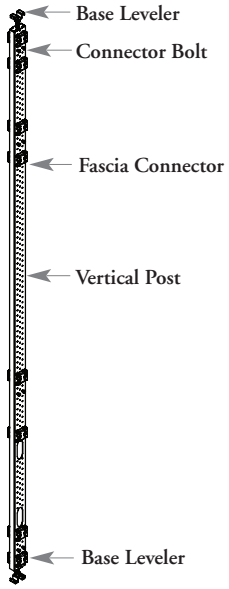
vertical post basics

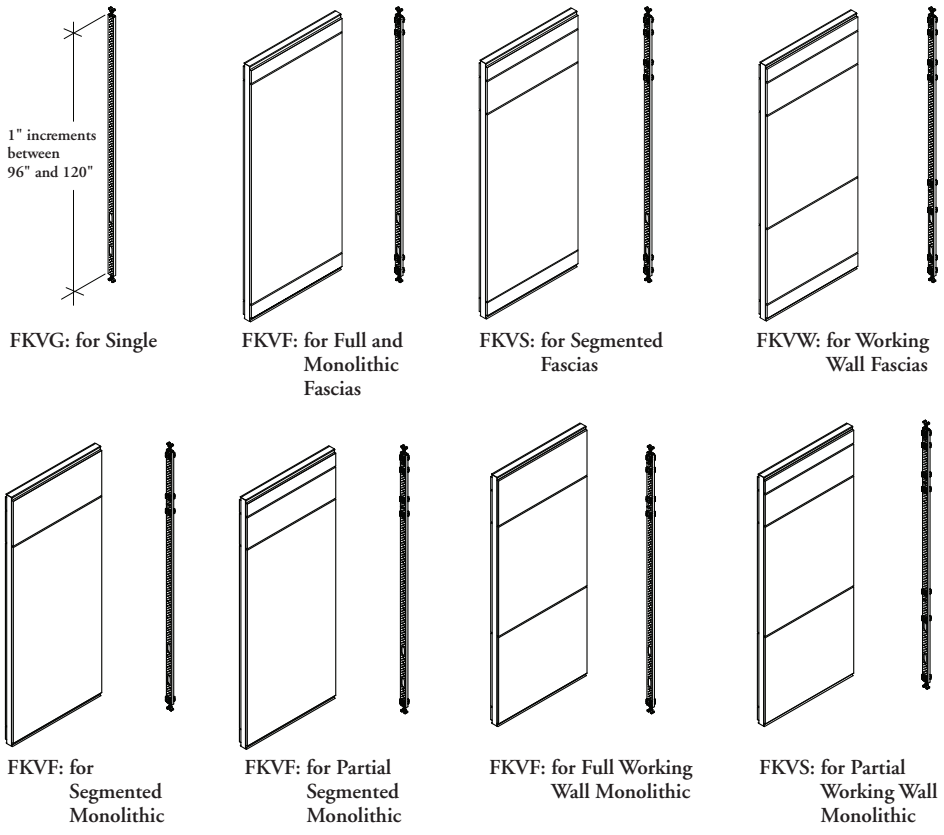
The Vertical Post Package extends from finished floor to finished ceiling and is the vertical support of the Altos frame.

- Vertical Post Packages are universal and also fulfill the vertical post requirements for door openings
- The levelers allow for adjustment of +1-1/2 / -0.5" independently at the top and +1-1/2 / -0.5" independently at the bottom
- **Must** specify base and ceiling fascia height being used



Vertical Post Package (FKV)

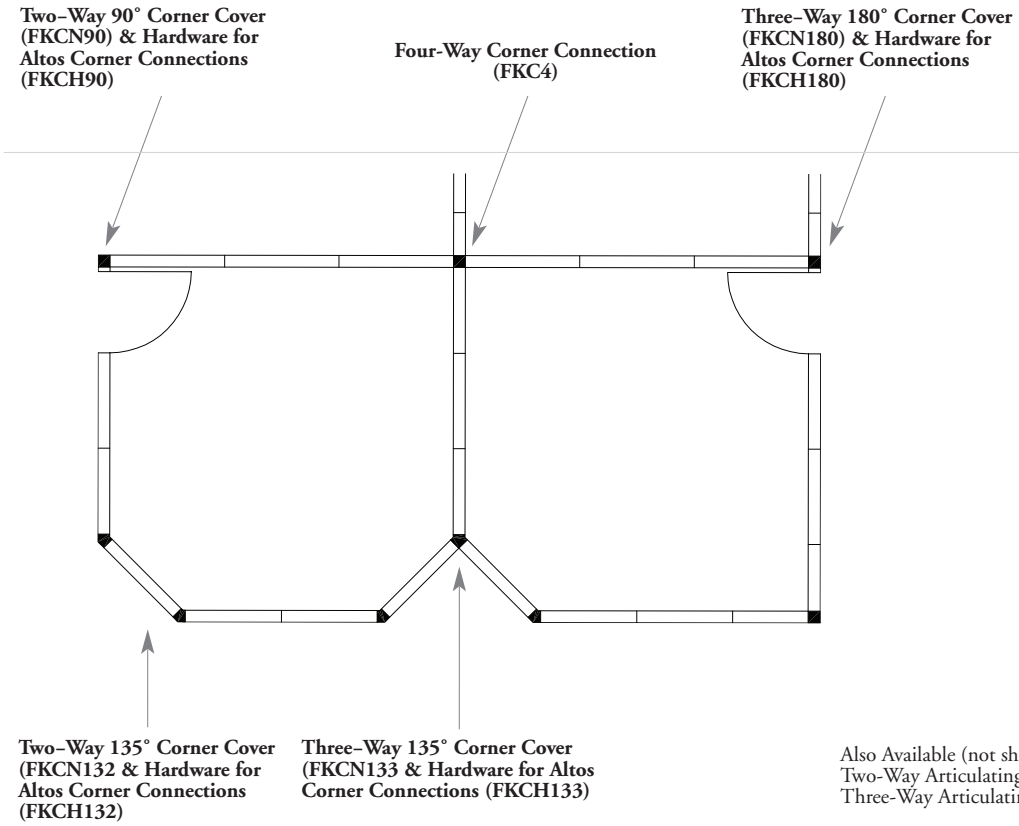




corner & module connection overview

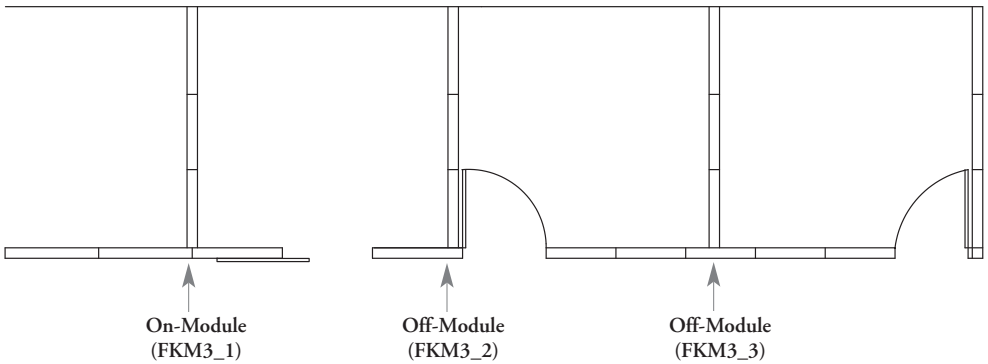
Altos allows 90˚, 135˚ and 180˚ connections in two-way, three-way and four-way configurations, as well as mid-wall connections.

- All connections allow for passage of power and communications except FKCA2 and FKCA3
- Partial height connections are not possible
- All connections are available for ceiling heights from 96" to 120" in 1" increments
- The Corner Covers for 135˚ (FKCN132, FKCN133, FKCN180, FKCN90, FKCN120) can be found in the Fascias Section



Also Available (not shown):
Two-Way Articulating Corner (FKCA2) and
Three-Way Articulating Corner (FKCA3)

modular connections

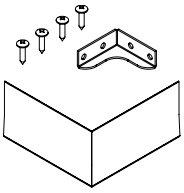


Module Connections create three-way intersections behind the bisected wall

90° corner connection basics

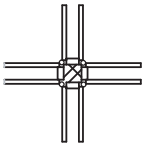
Walls can be connected at right angles in two-way, three-way and four-way configurations.

- Brackets connect post packages to form a corner
- The quantity of brackets required may vary according to wall heights or wall material
- Can enclose electrics & communications travelling from wall-to-wall or from ceiling down to glass modules
- Covers for two-Way and three-way corners are in the Fascias Section



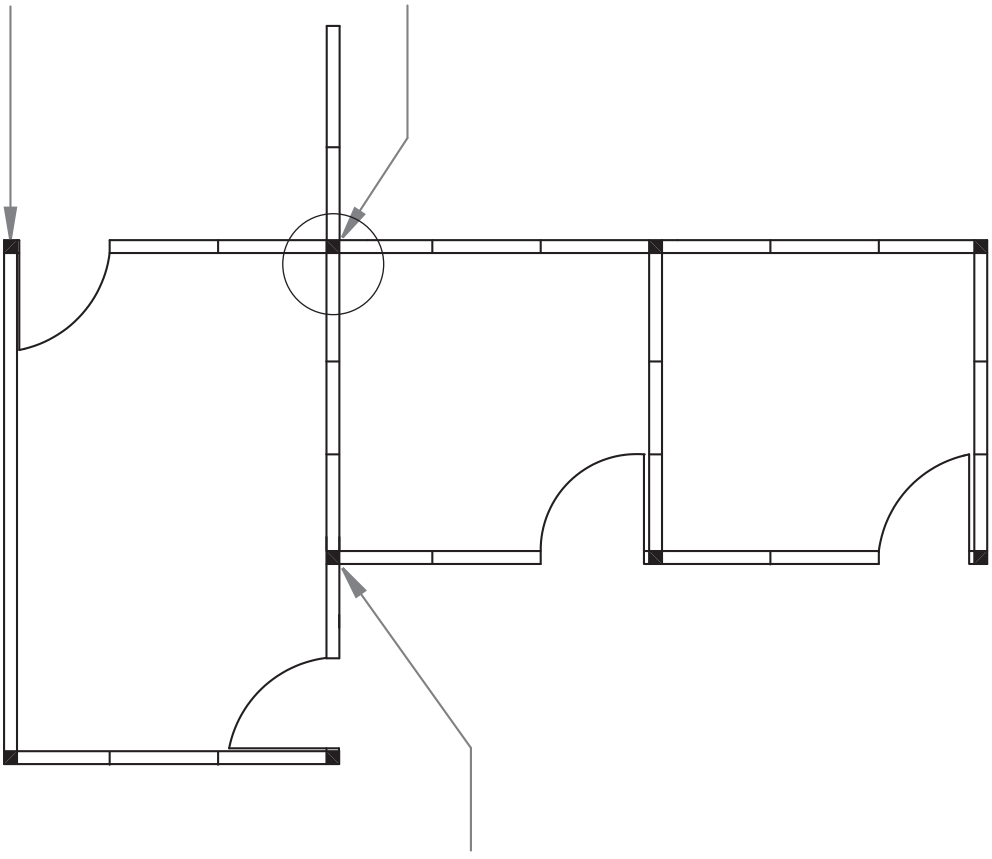
Hardware for Altos Corner Connections (FKCH90)

Provides the framework to connect two walls at 90°.



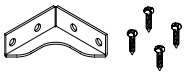
Four-Way Connection 90° Connection (FKC4)

Creates a full-height connection between four walls which are connected at 90°.



Hardware for Altos Corner Connections (FKCH180)

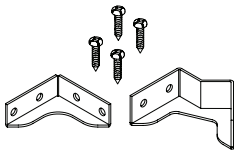
Provides the framework to connect three walls at 180°.



135° corner connection basics

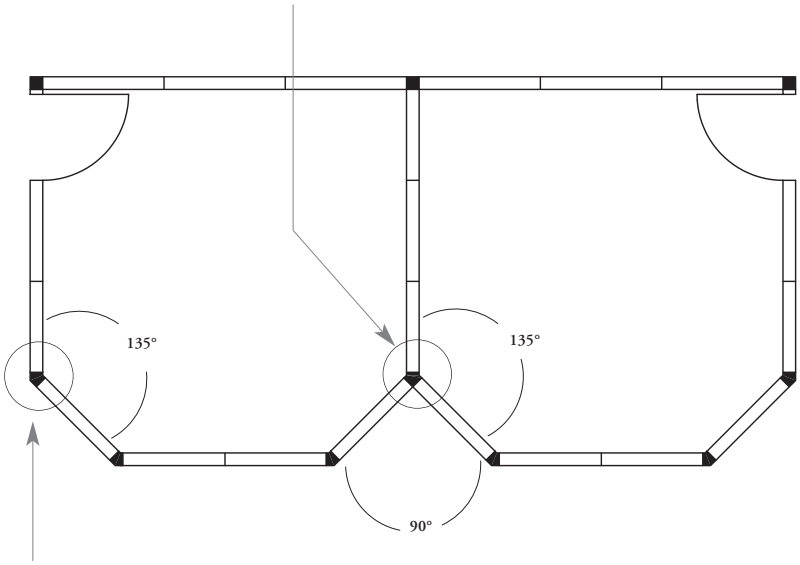
Walls can be connected at 135° in two-way and three-way configurations.

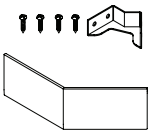
The Corner Covers for 135° (FKCN132, FKCN133) can be found in the Fascias Section.



Three–Way 135° Corner Cover (FKCN133)

Provides the framework to connect to three walls at 135°.





Two–Way 135° Corner Cover (FKCN132)

Provides the frame work for two walls to be connected at 135°.

articulating corner basics

Articulating Corners are used to change the angle of an Altos wall run.

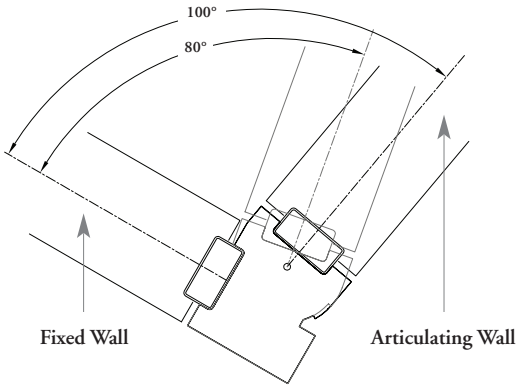
- Articulating Corners are available in two-way and three-way configurations
- All Articulating Corners accommodate a range of adjustment from -10° to +10°
- Finished in clear anodized or painted

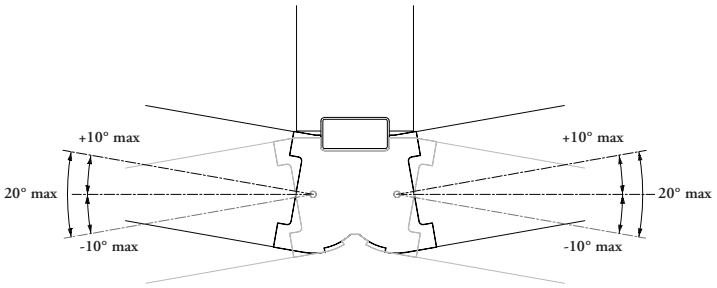
Articulating Two-Way Corner (FKCA2)

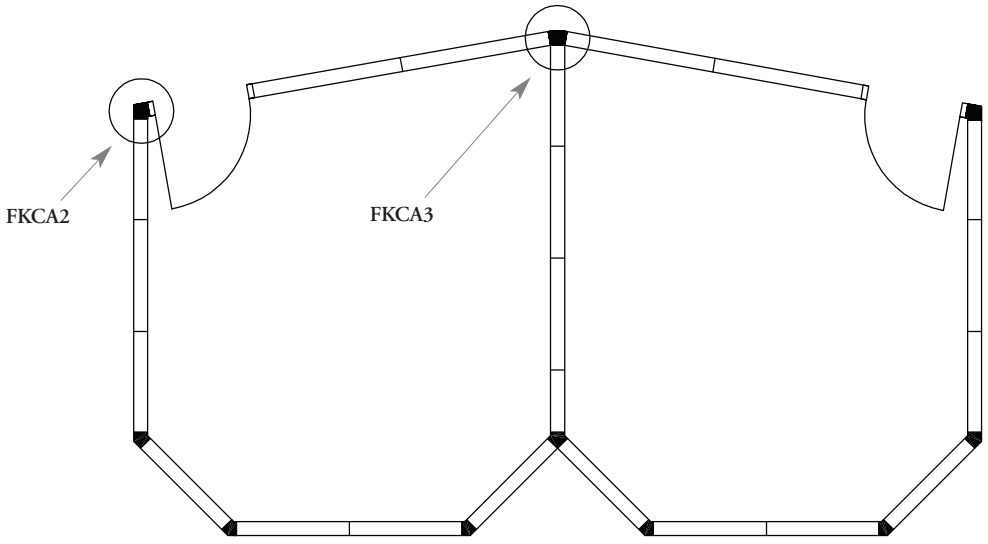
- Connects two Altos walls between 80° and 100°
- Articulating wall can be on either side of corner
- Provides both the connecting hardware and cover

Articulating Three-Way Corner (FKCA3)

- Connects two Altos walls between 80° and 100° with a third fixed Altos wall
- Both sides of corner can be angled independently, each side allows for a maximum 20° of rotation (+/- 10°)
- Provides both the connecting hardware and cover





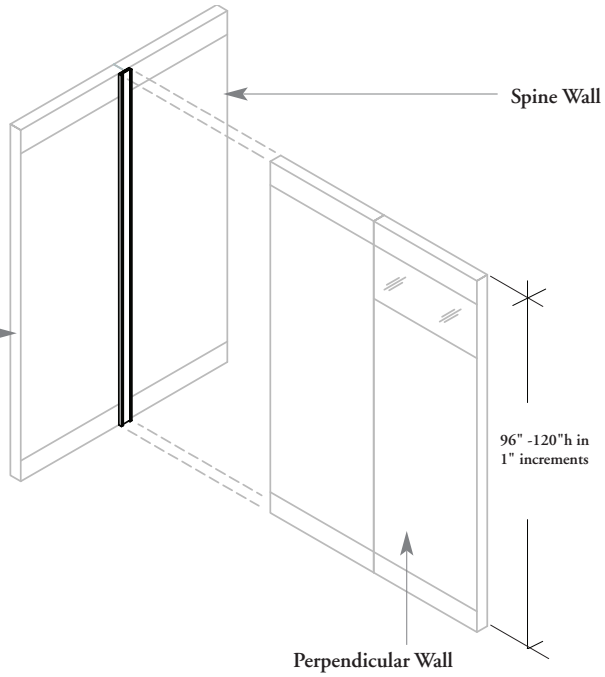


module connection basics

The Three-Way 180° Module Connection provides options for on and off-module connections to an existing wall run.

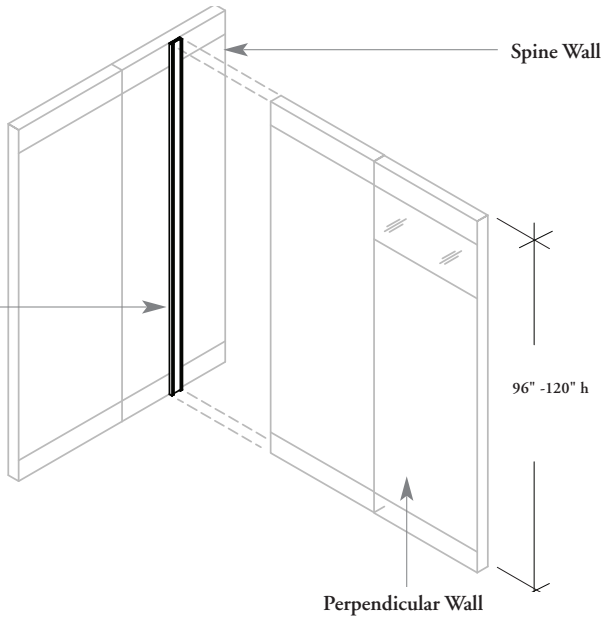
Three-Way 180° Module Connection (FKM3_1) (On-Module)

- Centers the connection at the vertical reveal between Fascias
- May **not** be attached at any other location



Three-Way 180° Module Connection (FKM3_2) (Off-Module)

- Creates a connection anywhere between reveals of Fascias
- May **not** be used a the vertical reveal
- Can be used at Solid and Double glass Fascias only
- Module Connection adds 1-1/4" Creep – this added dimension comes from the connection interface

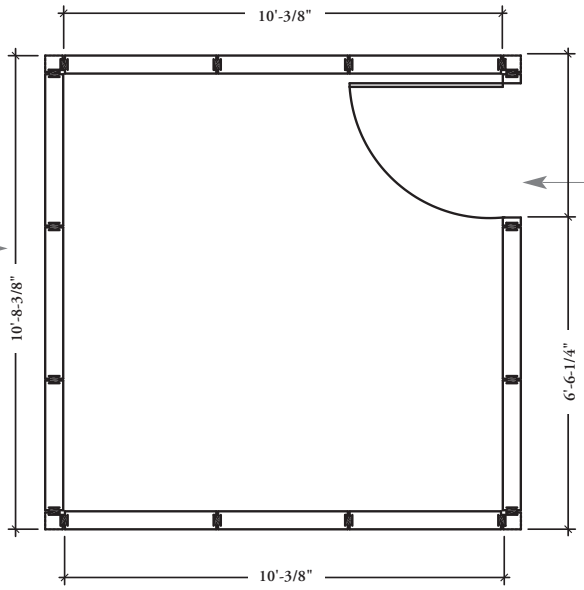


wall gasket basics

The Wall Gasket (FKG) provides a light and sound seal between the bottom of the wall system and the finished floor and the top of the wall system and the ceiling.

Minor height variations in floor and ceiling surfaces may be concealed by the wall gasket.

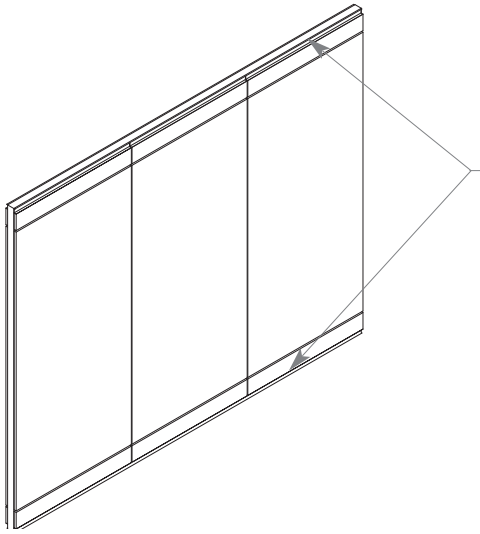
determining wall gasket requirements



For the **Wall Gasket** at Base do **not** include any doorway opening dimensions

- Measure the entire wall run, excluding any doorway openings for bottom wall gasket only. Both elevations of a wall run require a Wall Gasket
- Any dimensional variations should be included in this calculation
- Wall Gaskets are required at both sides of a wall module at floor and ceiling junctions

The formula to determine the number of Wall Gaskets (FKG) required for the length of a wall run is the total linear footage of this product multiplied by 0.40 equals total number of Wall gaskets required.

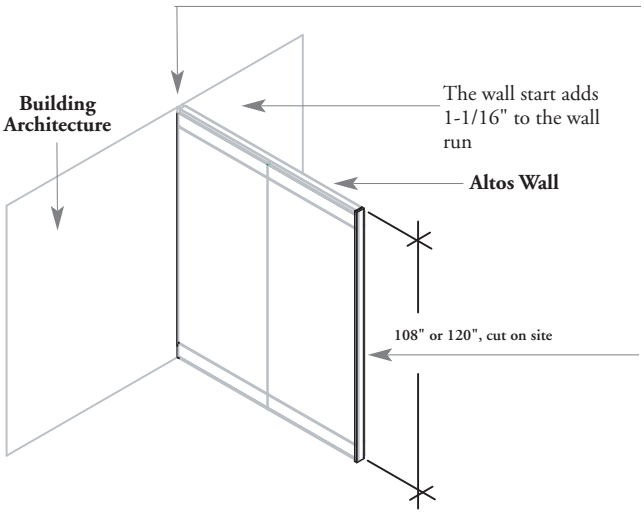


Wall Gasket (FKG)

- Required at both sides of a wall module at floor and ceiling junctions
- Used as a sound and light seal
- Is not required at the bottom of a door opening

wall start & end basics

Altos offers three types of wall ends for finishing Altos runs; Wall Start, Wall End and Adjustable Wall End.

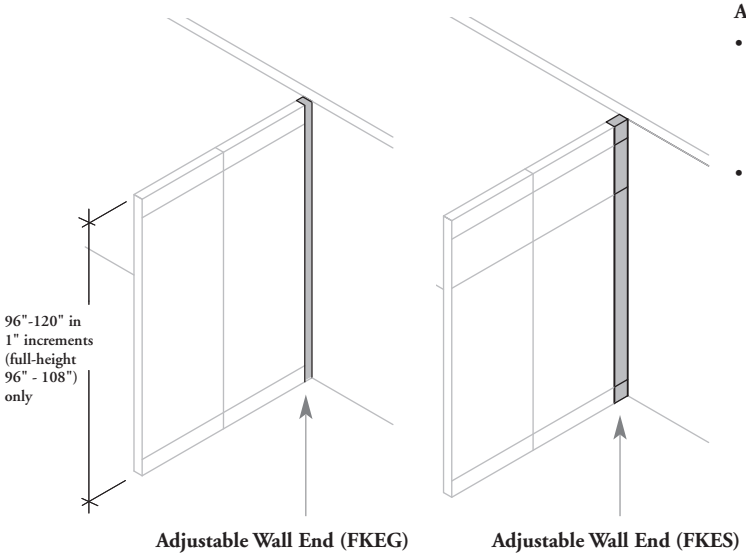


The Wall Start (FKW)

- Begins or ends a wall run at the building wall, column or mullion and provides a clean connection between the building and the Altos wall
- Can accommodate between +1/4" to -1/4" spacing due to untrue or unlevel wall surfaces
- Adds 1-1/16" to the wall run
- Can be cut on site
- Intended for minimal gaps in width only; for larger gaps, an Adjustable Wall Start (FKEF, FKES, FKEW, FKEG) should be specified (same as FKES)
- Must be used with a Vertical Post package
- The Wall Start does **not** route electrics or communication from the building architecture wall

Wall Finished End (FKF)

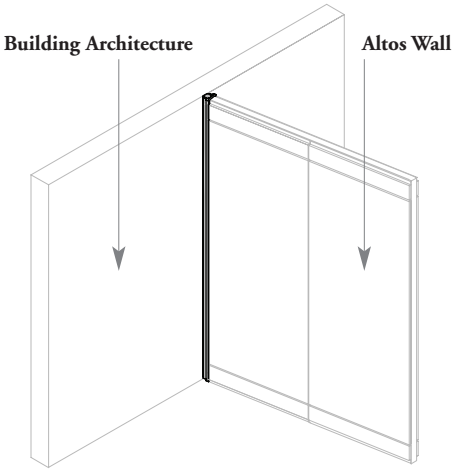
- Is used to cap the end of a wall run where there is no connection to another wall run
- Can be cut to size
- Extends from floor to ceiling



Adjustable Wall End (FKEF, FKES, FKEW, FKEG)

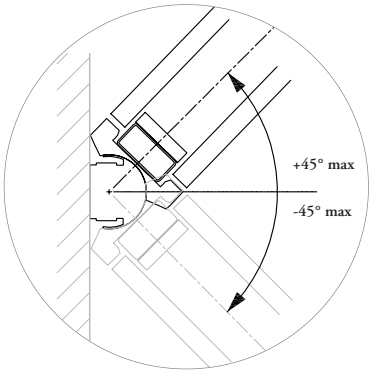
- Used to allow dimensional adjustment of wall width onsite to complete a wall run where interfacing with building architecture including mullions
- Adjustable Wall End (FKEG) accommodates adjustment range of 1-1/2" - 4-1/2" with no horizontal reveals (Flintwood option is only available to 114")
- Adjustable Wall Ends (FKES, FKEF and FKEW) accommodate adjustment range of 3" – 9" and are specified to match Full, Segmented and Working Wall elevations
- All wall connections including Fascia, horizontal rails, base channel and hardware are included but Ceiling Channel (KFN), Ceiling Clips (FKP) and Vertical Posts (FVP) must be ordered separately

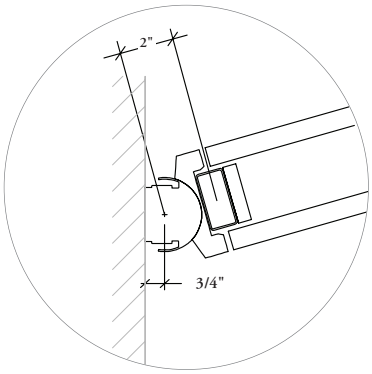
wall start & end basics (continued)



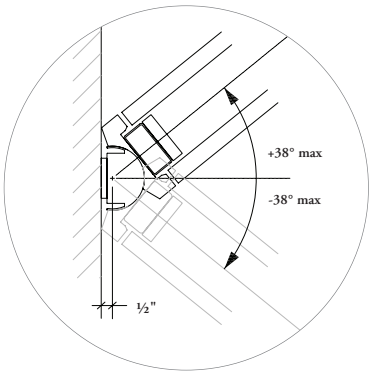
Variable Angle Wall Start (FKWA)

- Used at the beginning or end of a run connecting to building wall, mullion or columns
- Accommodates minor width variation from -1/4" to +3/8"
- When wall start is at nominal position from the building, the Altos wall can start at any angle between -45° and +45°
- When wall start is at minimum position (1/2") from building the Altos wall can start at any angle between -38° and +38°
- Distance between rotation point of wall start and building wall is 3/4"
- Distance between rotation point of wall start and centerline of the first vertical post is 2"
- Must be used with a Vertical Post package
- Does **not** route electrics or communications from the building architecture
- Finished in clear anodized or painted





Nominal Adjustment

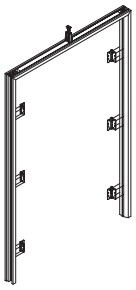


Minimum Adjustment

door frame basics

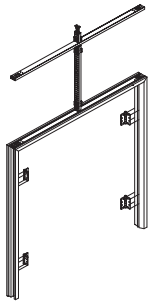
Several frame packages are available for door packages. See price pages for details of these products.

- It is not recommended to install a door adjacent to a Wall End (FKE), Wall Start (FKW) or Filler Panel (FPF)
- If Fascias are required to complete assembly they must be specified separately



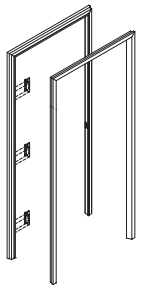
Double Door Frame – Full Height (FKTF)

Required for the Hinged Double Door (FDD) at full-height



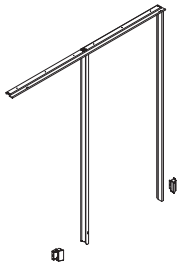
Double Door Transom & Frame – Segmented Height (FKTS)

Required for the Hinged Double Door (FDD) at segmented-height



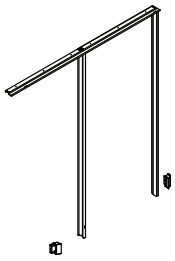
Door Frame Kit (FKD)

Required for Hinged Door (FDH), Pivot Door (FDF) or Glass Door (FDJ) – door swing orientation must be specified



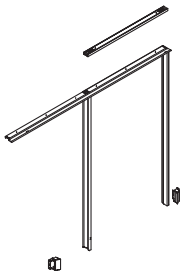
Barn Door & Frame – Full Height For Glass Door (FKSF)

Required for the Glass Barn Door (FDC)



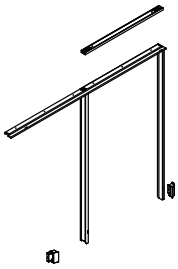
Barn Door & Frame Package – Full for Solid/Glass Insert Door (FKRFS)

Required for Solid Barn Door (FDS)



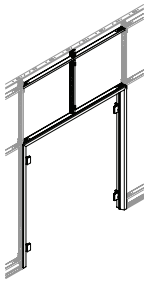
Barn Door Transom & Frame – Segmented Height For Glass Door (FKSS)

Required for use with Segmented Glass Barn Door (FDC)



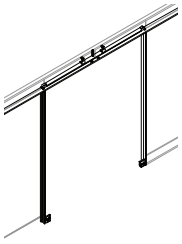
Barn Door Transom & Frame – Segmented for Solid/Glass Insert Door (FKRSS)

Required for use with Solid Barn Door (FDS/FDI)



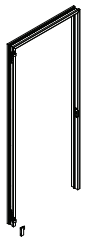
Hinged Glass Double Door Transom & Frame Package – Segmented Height (FKTES)

Required for use with Hinged Glass Double Door (FDE)



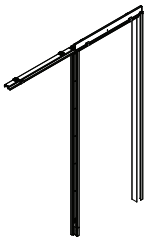
Double Barn Door Frame – Full Height for Glass Doors (FKLF)

Required for use with Double Glass Barn Doors (FDL)



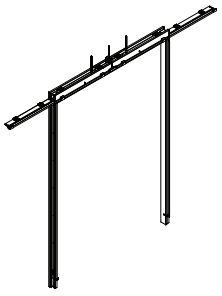
Glass Pivot Door Frame Kit – Low Profile (FKPFZ/FKPSZ)

Required for use with Framed Glass Pivot Door (FDPZ)



Standard Glass Barn Door Frame – Low Profile (FKSFZ)

Required for use with Glass Barn Door (FDCZ)

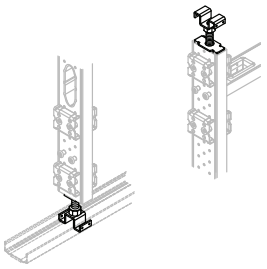


Double Glass Barn Door Frame – Low Profile (FKLFZ)

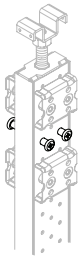
Required for use with Double Glass Barn Door (FDLZ)

frame kit component basics

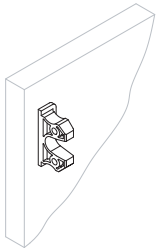
Altos frame kits come with all necessary connection components however, certain components can also be purchased individually if required. See Price & Product Guide for details of these products.



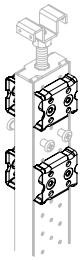
Base Levelers (FBB)



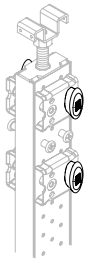
Horizontal Shoulder Screw (FBN)



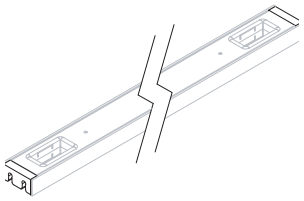
Fascia Connector – Male (FBFM)



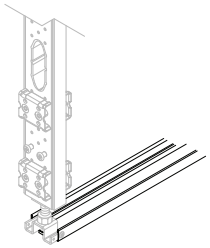
Fascia Connector – Female (FBFF)



Fascia Lock (FKL)



Horizontal End Cap (FBE)

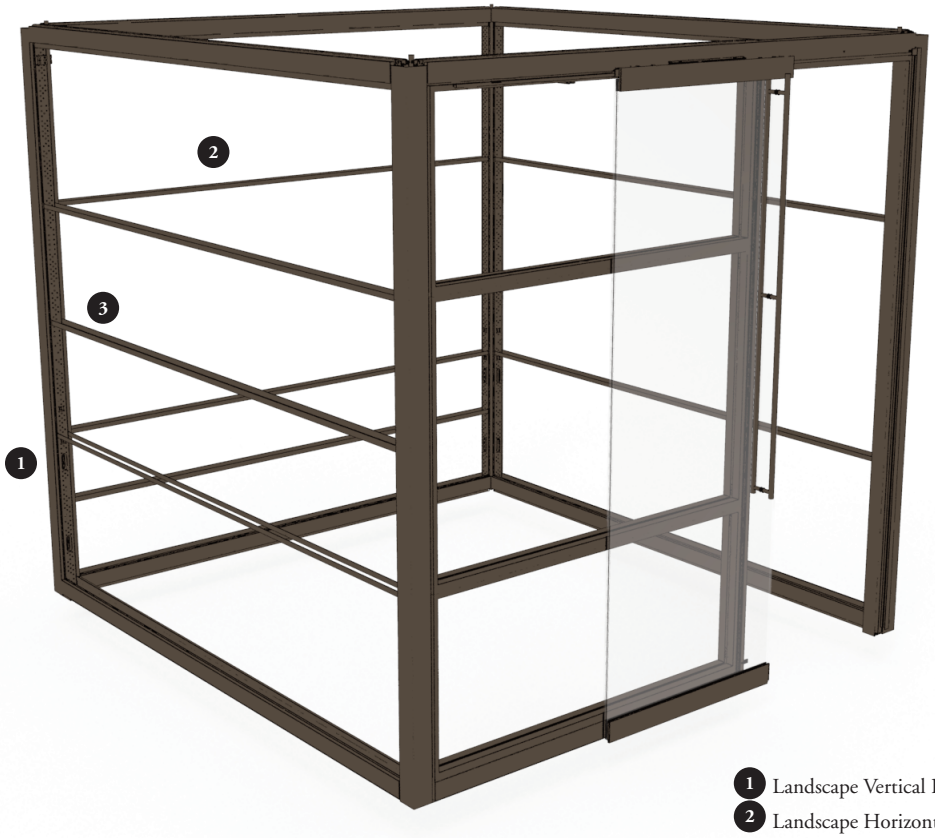


Base Channel - Modular (FKB)

frame kit overview – landscape

Frame kits are used together to create the structural frame of the Altos wall. Frame kits are specified after the Landscape fascia elevation has been determined.

- Altos Portrait corners and connections are used with Altos Landscape fascias to create In-line, two-way, three-way and four-way transitions
- Any grain or fabric direction for the corner component will have a vertical directionality like Altos Portrait. Solid or Aluminum corner components can be used if matching the directionality of the adjacent Landscape fascia is desired

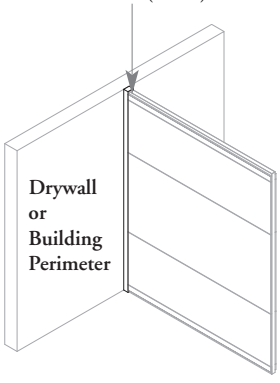


1. Landscape Vertical Post Package (FLKV)
2. Landscape Horizontal Rail Package (FLKH)
3. Landscape Functional Rail Kit (FLKF)

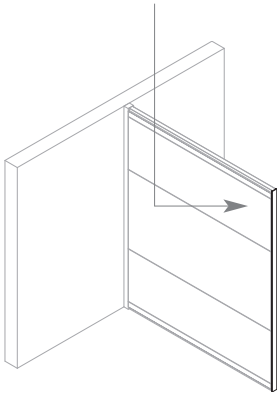
Not Shown:

Landscape Desk Frame (FLDF)

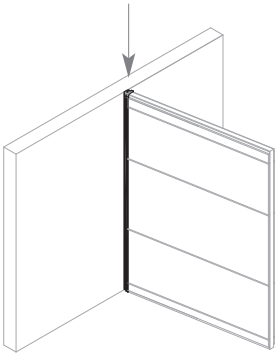
Wall Start (FKW)



Wall Finished End (FKF)



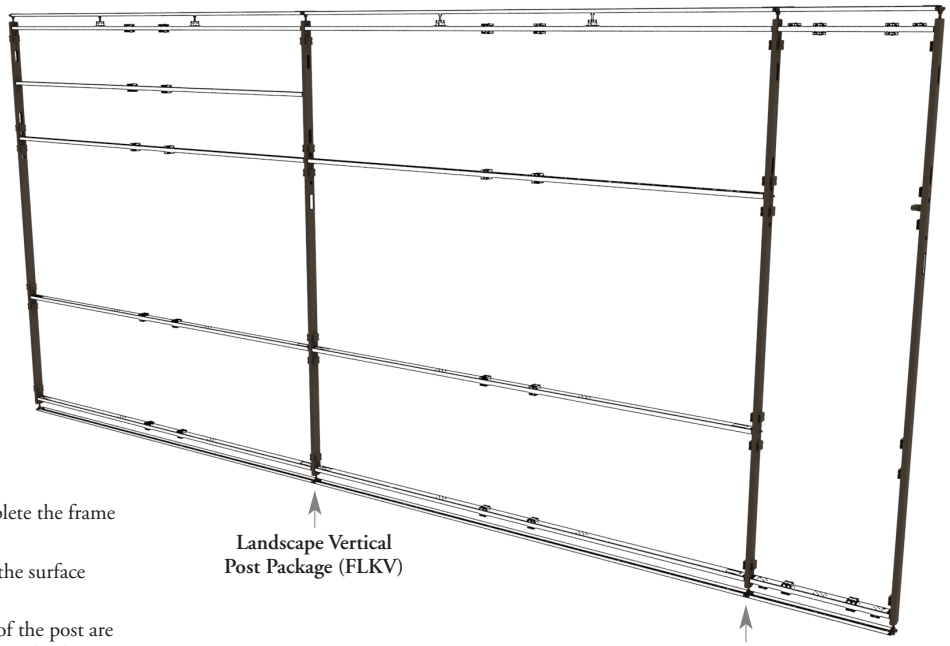
Variable Angle Wall Start (FKWA)



vertical post basics – landscape

The Landscape Vertical Post Package extends from finished floor to finished ceiling and is the vertical support of the Altos frame.

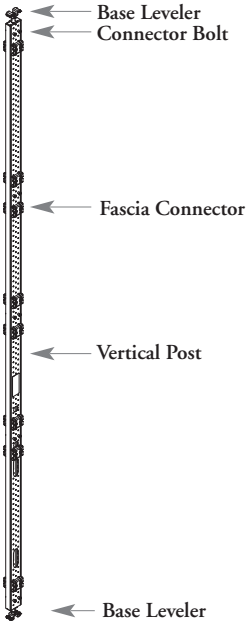
- Landscape Vertical Post Packages (FLKV) are universal when used with Altos Landscape and also fulfill the vertical post requirements for door openings
- Landscape to Portrait Vertical Post Packages (FLKVP) can be used when transitioning between Landscape and Portrait fascias
- The levelers allow for adjustment of +1-1/2 to -0.5" independently at the top and +1-1/2 to -0.5" independently at the bottom



- Accept horizontal rails to complete the frame structure
- Hold Fascias in place to finish the surface and provide space division
- Two cut outs near the bottom of the post are provided for electrics and communications pass-through (total of 6 jumpers)

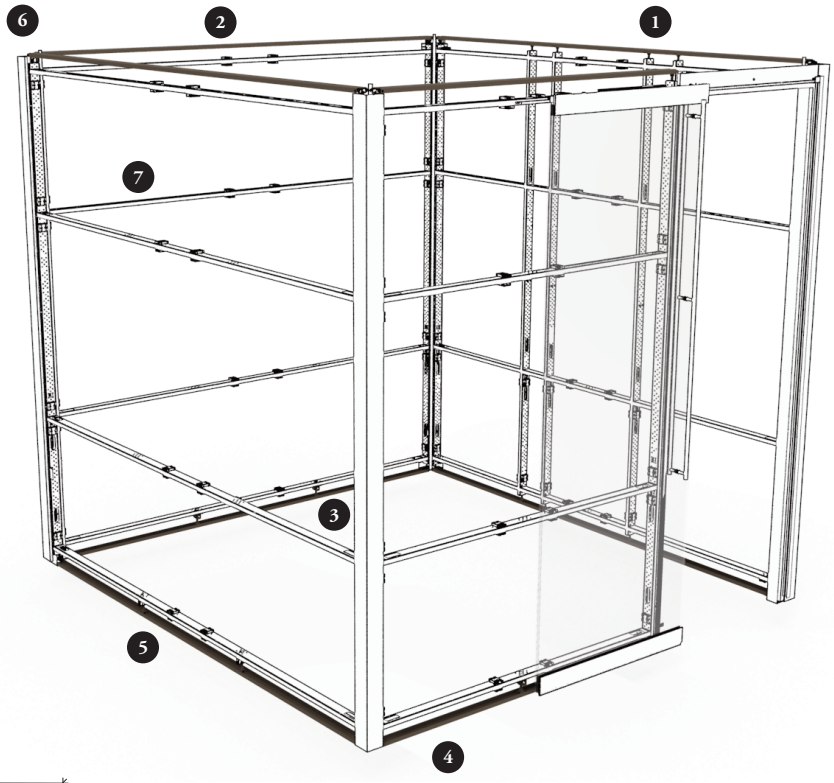
Landscape Vertical Post Package (FLKV)

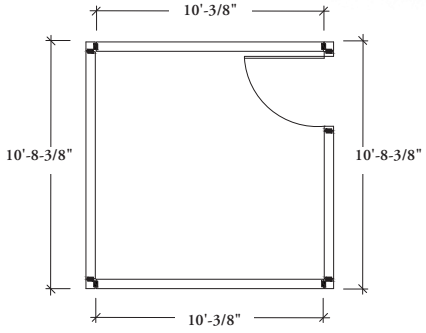
The Vertical Post Package is made up of the vertical post, levelers and connectors. The connectors can be specified to accommodate all Landscape frame elevations.



base & ceiling channel overview – landscape

A Ceiling Channel is required over the entire wall run, including door openings and corner connections in all applications of the Altos wall system.



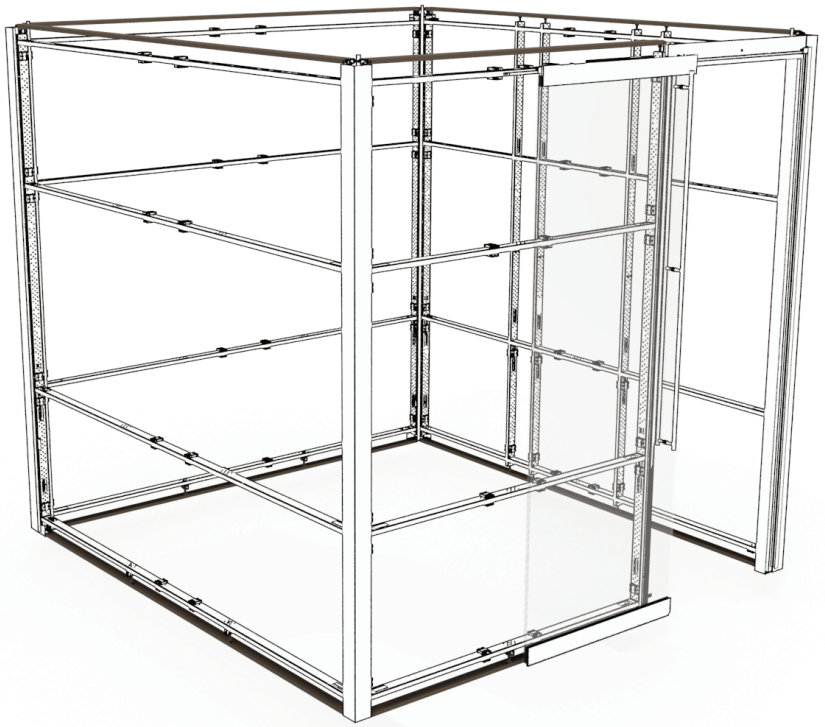


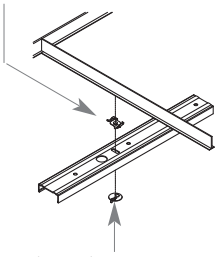
To determine the number of Ceiling Channels (FKN) required for the length of a wall run, take the total linear footage multiplied by 0.14.

1. Ceiling Clip (FKP)
2. Ceiling Channel (FKN)
3. Horizontal Grommet (FBG)
4. Base Channel (FKC)
5. Wall Gasket (FKJ)
6. Vertical Reveal Cover Kit (FKJC)
7. Landscape Horizontal Rail Package (FLKH)

base & ceiling channel basics – landscape

A Ceiling Channel is required over the entire wall run, including door openings and corner connections in all applications of Altos wall system.



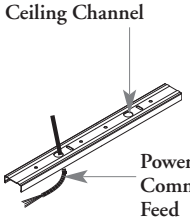


Ceiling Clip (FKP)

- Is a non-permanent method of connecting the ceiling channel to the suspended ceiling
- **Cannot** be connected to all types of ceilings – site verification required
- Non-marking and need to be ordered separately from ceiling channel
- Accommodate the changing wall locations without defacing the T-Bar

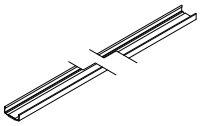
Horizontal Grommet (FBG)
(not shown)

- The Horizontal Grommet provides a cover to the Horizontal Rail cut outs
- Optional for use with Solid, Fabric Wrapped, Acoustic Tackable, Metal Micro Perforated and Whiteboard fascias. **Cannot** be used with Glass Fascias



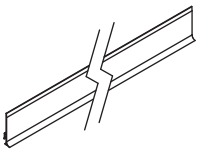
Ceiling Channel (FKN)

- Attaches to the ceiling and supports the Vertical Post Packages
- Is an inverted steel U-channel start and can be cut to size on site
- Holes are punched into the Ceiling Channel to facilitate power and communications feed from the ceiling into the wall
- Is available in 120" lengths only
- Can be attached to ceiling at any angle



Base Channel (FKC)

- Can be paired with Landscape Horizontal framework
- Gap tape is provided along the underside of the channel to add stability and an acoustic barrier without mechanical attachments to the floors
- Can also be mechanically fastened to the floor if a more secure or permanent attachment is required (hardware not included)
- Available in 120" widths only

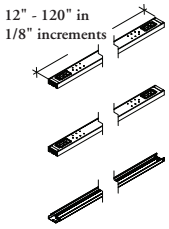


Wall Gasket (FKJ)

- Is a light and sound seal between the bottom of the wall system and the finished floor and the top of the wall system and the ceiling
- Minor height variations in floor and ceiling surfaces may be concealed by the wall gasket – available in 10'-0" lengths only

Vertical Reveal Cover Kit (FKJC)

The Vertical Reveal Cover provides a trim for vertical post when Platinum or Very White gaskets are used

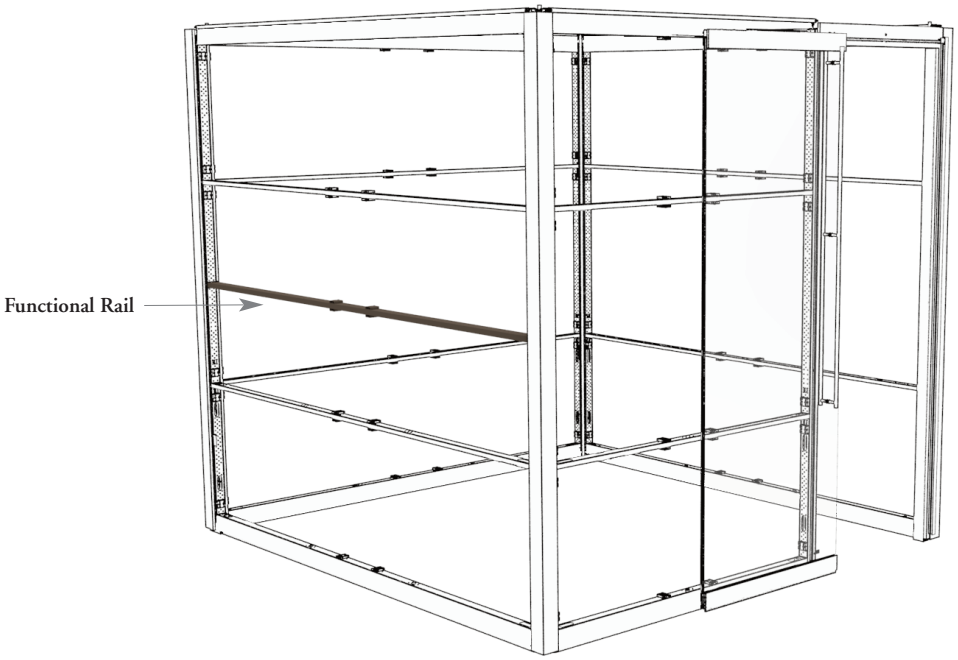


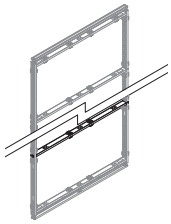
Landscape Horizontal Rail Package (FLKH)

- Consist of horizontal rails and one Landscape Base Channel
- Available in 12" - 120" in 1/8" increments
- Pass-through of electrics and communications is possible through the openings in the horizontal rails
- One Package is shared between the inner and outer elevation of a wall module
- Are universal and are used for all Landscape fascias

functional rail kit basics – landscape

The Functional Rail provides a universal continuous mounting location for the Altos Landscape shelving and accessories program.



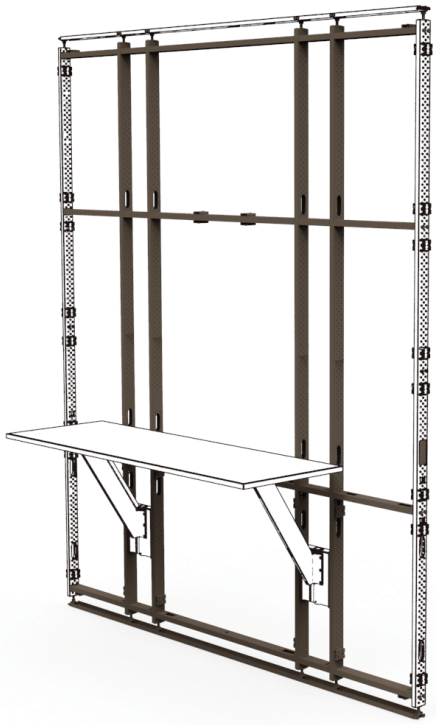


Landscape Functional Rail Kit (FLKF)

- Replaces the Altos horizontal rail where functionality is desired
- Available from 48-1/8" - 120" lengths in 1/8" increments.
- Built-in shelf leveling capability
- Single and Double sided applications
- Able to hold:
  -Landscape Wall-Mounted Cabinets (FLWC)
  -Landscape Shelves (FLSA/FLSG/FLSS/FLTW)
  -Landscape Wall-Mounted Light (ELWML)

desk frame basics – landscape

The Landscape Desk Frame is the support system used to mount the Landscape Desks into the wall module.



Landscape Desk Frame (FLDF)

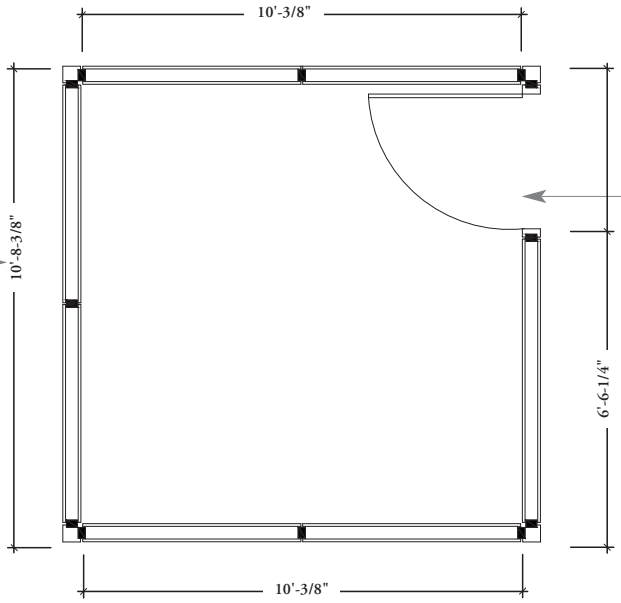
- Provides a mounting location for both Landscape fixed and height-adjustable desks
- Available as a Working Wall or Light Working Wall
- Heights available include 96" - 120" in 1" increments
- Frame widths available include 60" - 120" in 1/8" increments
- Accommodates desk widths 60" - 84" in 6" increments
- The desk width is always equal or less than the frame width
- Desk location can be specified centered, justified left or justified right

wall gasket basics – landscape

The Wall Gasket (FKG) provides a light and sound seal between the bottom of the wall system and the finished floor and the top of the wall system and the ceiling.

Minor height variations in floor and ceiling surfaces may be concealed by the wall gasket

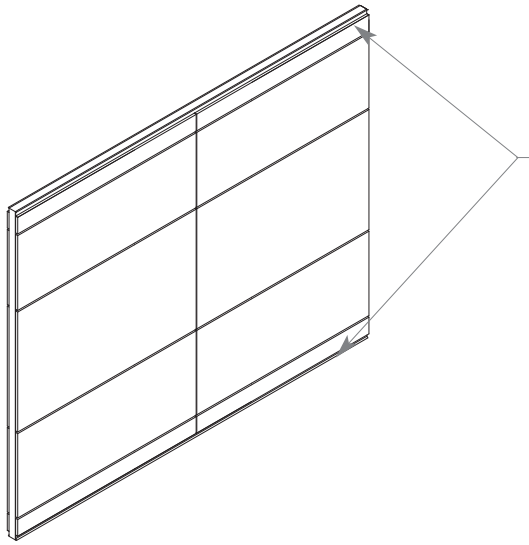
determining wall gasket requirements



- Measure the entire wall run, excluding any doorway openings for bottom wall gasket only. Both elevations of a wall run require a Wall Gasket
- Any dimensional variations should be included in this calculation
- Wall Gaskets are required at both sides of a wall module at floor and ceiling junctions

For the **Wall Gasket** at Base do **not** include any doorway opening dimensions

The formula to determine the number of Wall Gaskets (FKG) required for the length of a wall run is the total linear footage of this product multiplied by 0.40 equals total number of Wall gaskets required.



Wall Gasket (FKG)

- Required at both sides of a wall module at floor and ceiling junctions
- Used as a sound and light seal
- Is not required at the bottom of a door opening

corner & module connection overview – landscape

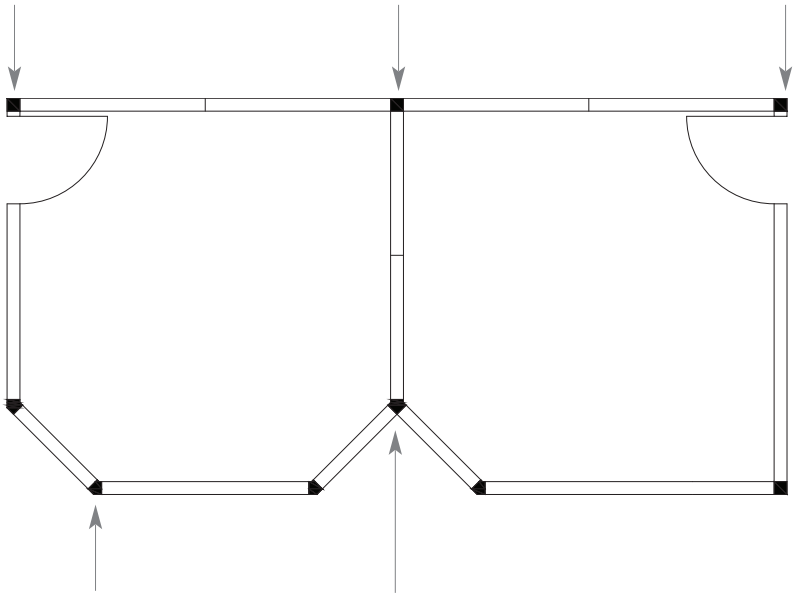
Use Altos corners and connections with Altos Landscape fascias to create In-line, two-way, three-way and four-way transitions.

- If applicable, any grain or fabric direction for the corner component will have a vertical directionality like Altos Portrait. Solid or Aluminum corner components can be used if matching the directionality of the adjacent Landscape fascia is desired
- Transitions between Altos corner codes to Landscape fascias do not require use of the Landscape / Portrait Vertical FLKVP. The Landscape Vertical Post Package FLKV can be used
- Partial height connections are not possible
- All connections are available for ceiling heights from 96" to 120" in 1" increments
- The Corner Covers for 135° (FKCN132, FKCN133, FKCN180, FKCN90, FKCN120) can be found in the Fascias Section.

Two–Way 90° Corner Cover (FKCN90) and Hardware for Altos Corner Connections (FKCH190)

Four-Way Corner Connection (FKC4)

Three–Way 180° Corner Cover (FKCN180) and Hardware for Altos Corner Connections (FKCH180)

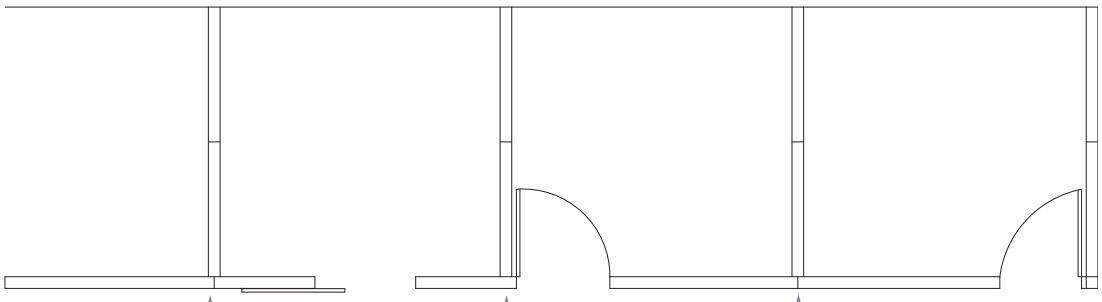


Two–Way 135° Corner Cover (FKCN132) and Hardware for Altos Corner Connections (FKCH132)

Three–Way 135° Corner Cover (FKCN133) and Hardware for Altos Corner Connections (FKCH133)

modular connections

Also Available (not shown):
Two-Way Articulating Corner (FKCA2) and
Three-Way Articulating Corner (FKCA3)



On-Module (FKM3_1)

Off-Module (FKM3_2)

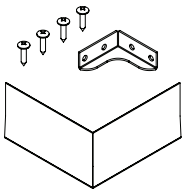
Off-Module (FKM3_3)

Module Connections create three-way intersections behind the bisected wall

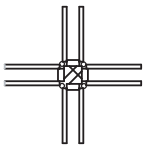
90° corner connection basics – landscape

Walls can be connected at right angles in two-way, three-way and four-way configurations.

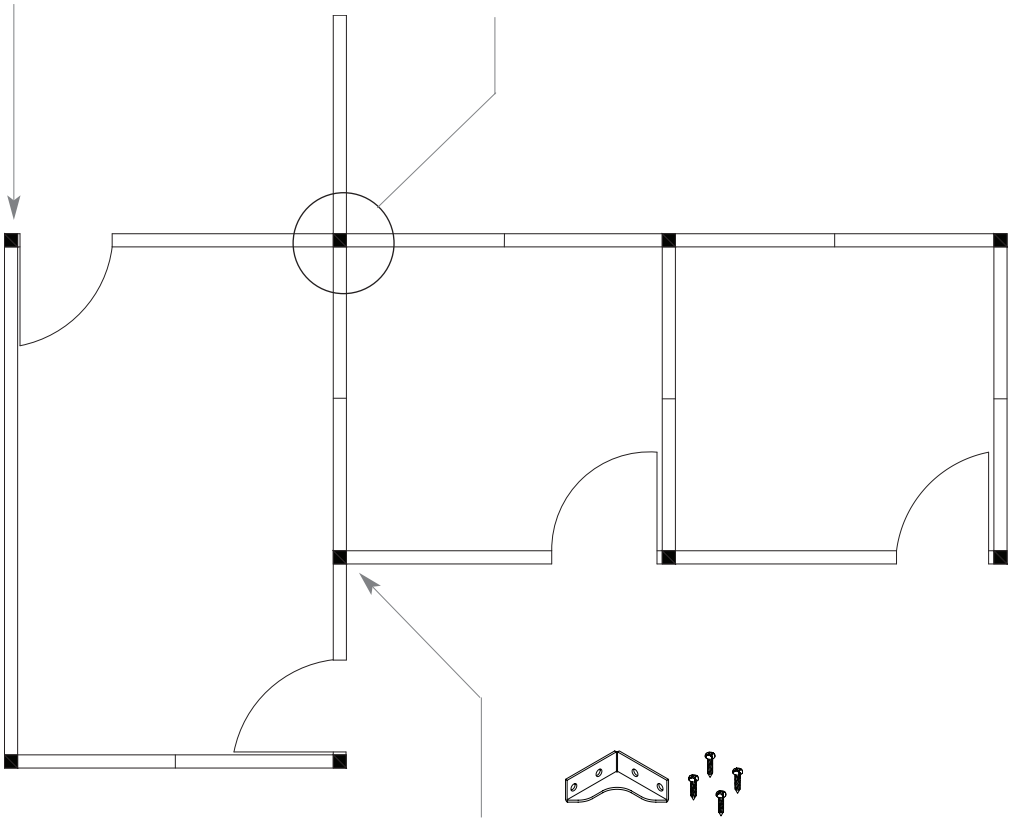
- Brackets connect post packages to form a corner
- The quantity of brackets required may vary according to wall heights or wall material
- Can enclose electrics & communications travelling from wall-to-wall or from ceiling down to glass modules
- Covers for two-way and three-way corners are in the Fascias Section



Two-Way 90° Frame Hardware Kit (FKCH90)
Provides the framework to connect two walls at 90°.



Four-Way Connection 90° Connection (FKC4)
Creates a full-height connection between four walls which are connected at 90°.



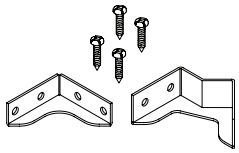
Three-Way 180° Frame Hardware Kit (FKCH180)
Provides the framework to connect three walls at 180°.

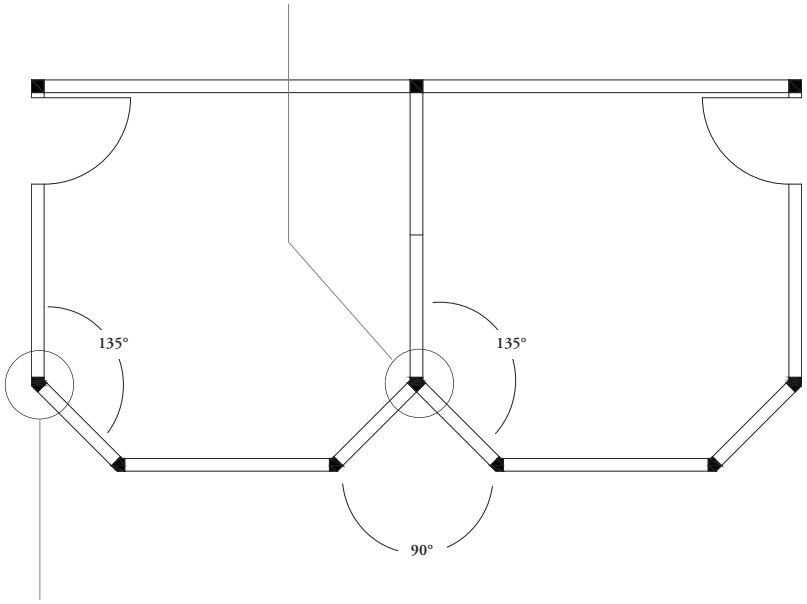
135° corner connection basics – landscape

Walls can be connected at 135° in two-way and three-way configurations.

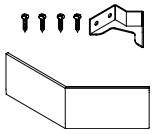
The Corner Covers for 135° (FKCN132, FKCN133, FKCN180, FKCN90, FKCN120) are in the Fascias Section.

Three-Way 135° Frame Hardware Kit (FKCH133)
Provides the framework to connect to three walls at 135°.





Two–Way 135° Corner Cover (FKCN132)
Provides the frame work for two walls to be connected at 135°.



articulating corner basics – landscape

Articulating Corners are used to change the angle of an Altos wall run.

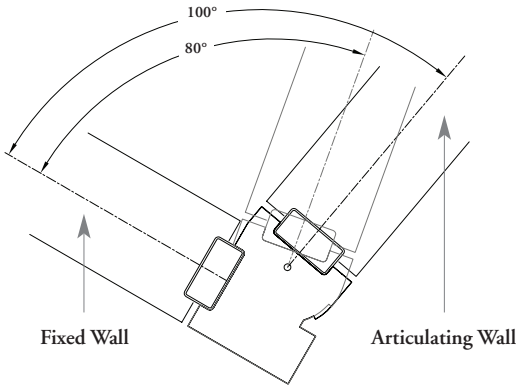
- Articulating Corners are available in two-way and three-way configurations
- All Articulating Corners accommodate a range of adjustment from -10° to +10°
- Finished in anodized aluminum or painted

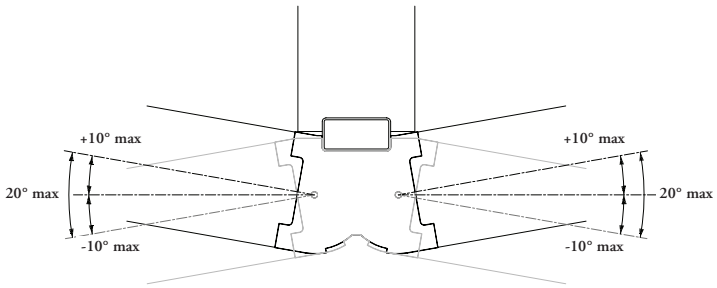
Articulating Two-Way Corner (FKCA2)

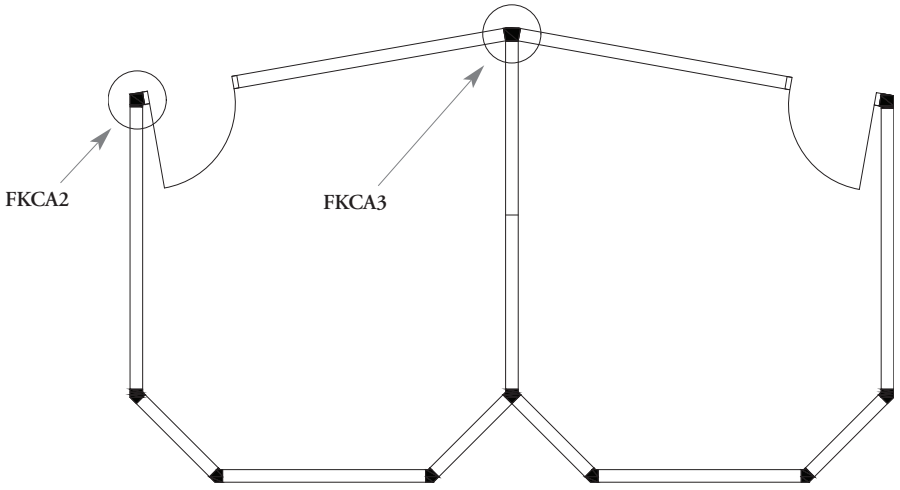
- Connects two Altos walls between 80° and 100°
- Articulating wall can be on either side of corner
- Provides both the connecting hardware and cover

Articulating Three-Way Corner (FKCA3)

- Connects two Altos walls between 80° and 100° with a third fixed Altos wall
- Both sides of corner can be angled independently, each side allows for a maximum 20° of rotation (+/- 10°)
- Provides both the connecting hardware and cover





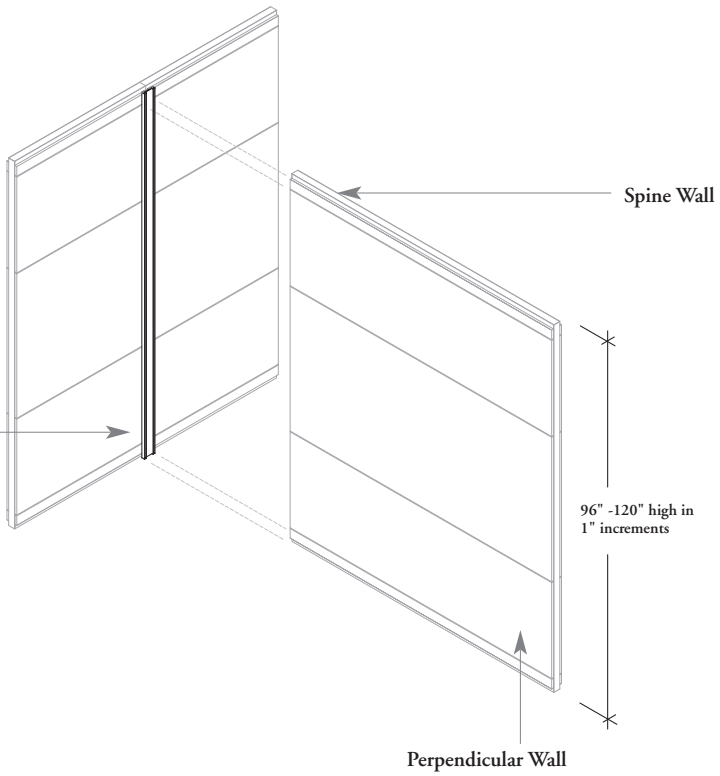


module connection basics – landscape

The Three-Way 180° Module Connection provides options for on and off-module connections to an existing wall run.

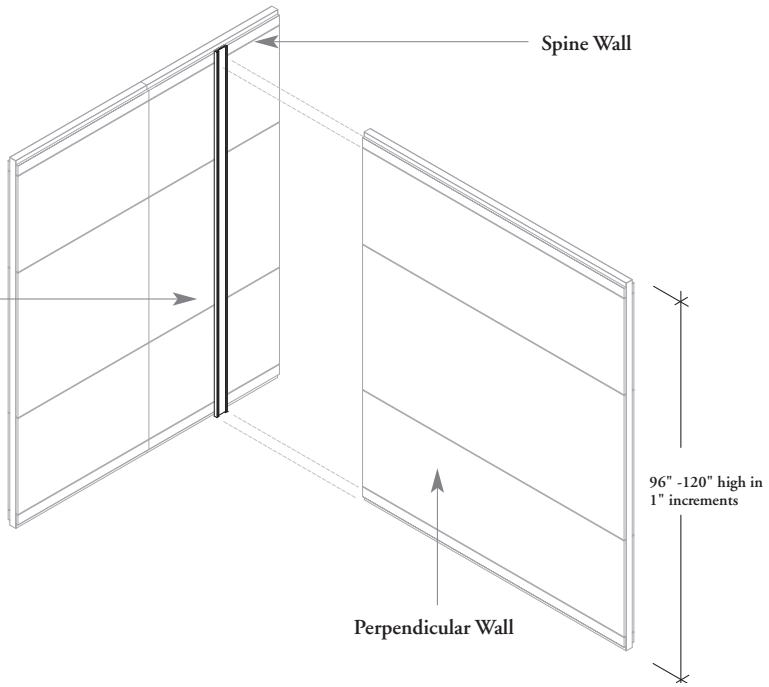
Three-Way 180° Module Connection (FKM3_1) (On-Module)

- Centers the connection at the vertical reveal between Fascias
- May **not** be attached at any other location



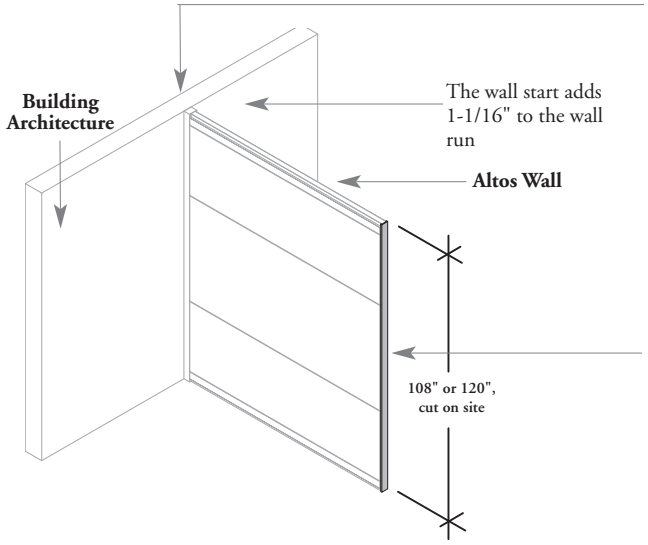
Three-Way 180° Module Connection (FKM3_2) (Off-Module)

- Creates a connection anywhere between reveals of Fascias
- May **not** be used at the vertical reveal
- Can be used at Solid and Double glass Fascias only
- Module Connection adds 1-1/4" Creep – this added dimension comes from the connection interface



wall start & end basics – landscape

Altos offers four types of wall starts and wall ends for completing Altos runs.

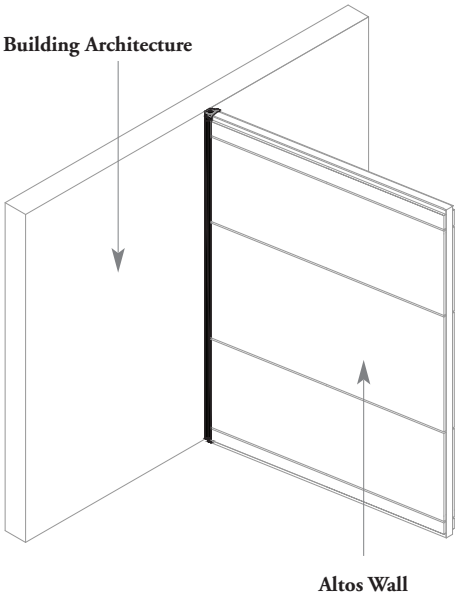


Wall Start (FKW)

- Begins or ends a wall run at the building wall, column or mullion and provides a clean connection between the building and the Altos wall
- Can accommodate between +1/4" to -1/4" spacing due to untrue or unlevel wall surfaces
- Adds 1-1/16" to the wall run
- Can be cut on site
- Must be used with a Landscape Vertical Post Package when planning with Landscape fascias
- The Wall Start does **not** route electrics or communication from the building architecture wall

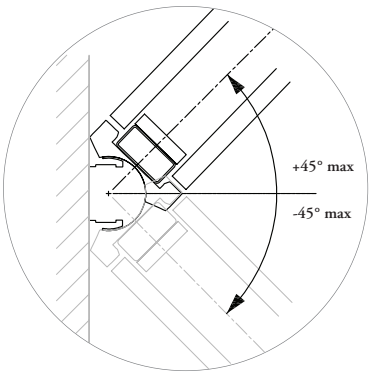
Wall Finished End (FKF)

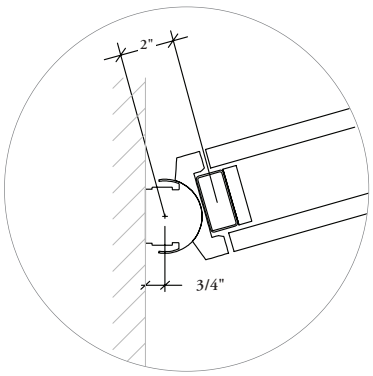
- Is used to cap the end of a wall run where there is no connection to another wall run
- Can be cut to size
- Extends from floor to ceiling
- The grain direction will run vertically, if applicable



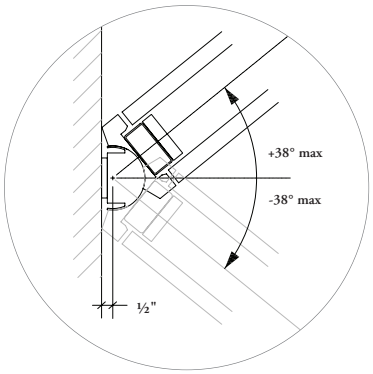
Variable Angle Wall Start (FKWA)

- Used at the beginning or end of a run connecting to building wall, mullion or columns
- Accommodates minor width variation from -1/4" to +3/8"
- When wall start is at nominal position from the building, the Altos wall can start at any angle between -45° and +45°
- When wall start is at minimum position (1/2") from building the Altos wall can start at any angle between -38° and +38°
- Distance between rotation point of wall start and building wall is 3/4"
- Distance between rotation point of wall start and centerline of the first vertical post is 2"
- Must be used with a Landscape Vertical Post package when planning with Landscape fascias
- Does **not** route electrics or communications from the building architecture
- Finished in anodized aluminum or painted





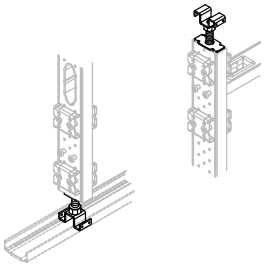
Nominal Adjustment



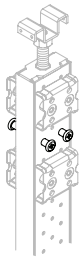
Minimum Adjustment

frame kit component basics – landscape

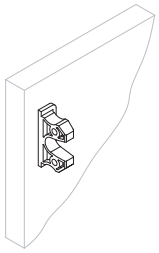
Altos frame kits come with all necessary connection components however, certain components can also be purchased individually if required. See Price & Product Guide for details of these products.



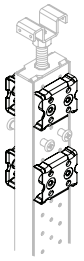
Base Levelers (FBB)



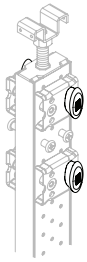
Horizontal Shoulder Screw (FBN)



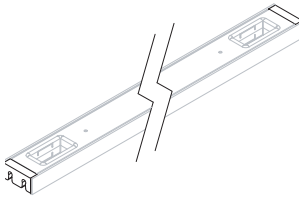
Fascia Connector – Male (FBFM)



Fascia Connector – Female (FBFF)



Fascia Lock (FKL)

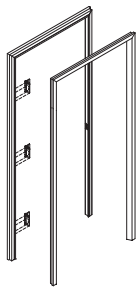


Horizontal End Cap (FBE)

door frame basics – landscape

Several frame packages are available for door packages. See price pages for details of these products.

- It is not recommended to install a door adjacent to a Wall Start (FKW) or Filler Panel (FPF)
- If Fascias are required to complete assembly they must be specified separately

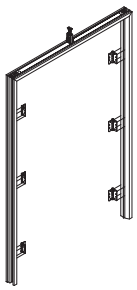


Door Frame Kit (FKD)

Required for Hinged Door (FDH), Pivot Door (FDF) or Glass Door (FDJ) – door swing orientation must be specified

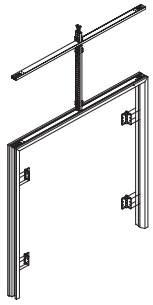
Glass Pivot Door Frame Kit – Low Profile (FKPFZ/FKPSZ)

Required for use with Framed Glass Pivot Door (FDPZ)



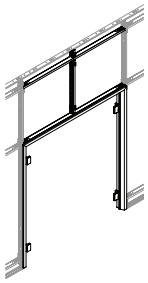
Double Door Frame – Full Height (FKTF)

Required for the Hinged Double Door (FDD) at full-height



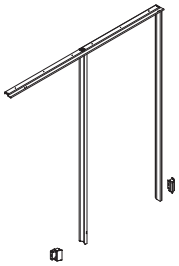
Double Door Transom & Frame – Segmented Height (FKTS)

Required for the Hinged Double Door (FDD) at segmented-height



Hinged Glass Double Door Transom & Frame Package – Segmented Height (FKTES)

Required for use with Hinged Glass Double Door (FDE)

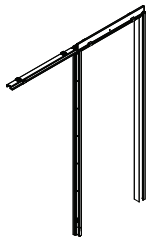


Landscape Barn Door Frame Package - Full Height for Glass Door (FLKSF)

Required for the Glass Barn Door (FDC) when planning with Landscape

Landscape Barn Door Transom & Frame Package- Segmented Heights for Glass Door (FLKSS)

Required for use with Segmented Glass Barn Door (FDC) when planning with Landscape



Landscape Glass Barn Door Frame - Low Profile (FLKSFZ)

Required for use with Landscape Glass Barn Door Low Profile (FDCZ)

F K N
Ceiling Channel

The Ceiling Channel is the top horizontal framework and holds the vertical posts in place.

WHAT'S INCLUDED

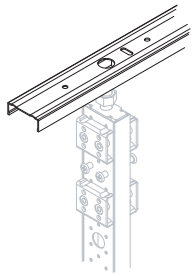
1 channel

WHAT'S EXCLUDED

Ceiling Clips (FKP) for attachment to T-Bar ceiling system.

NOTES

The Ceiling Channel comes in a 120" length only and is cut to size on site.



F K C
Base Channel – Continuous

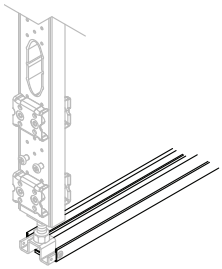
The Base Channel provides stability at the floor for the Vertical Posts.

WHAT'S INCLUDED

1 channel, connection hardware and grip tape.

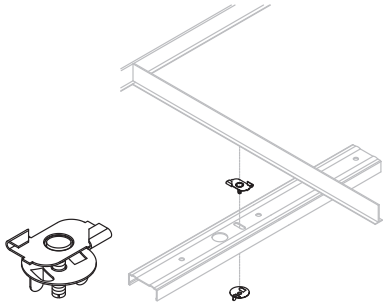
NOTES

Base Channel – Continuous comes in a 120" length and is cut to size on site.



FKN CEILING CHANNEL	FKC BASE CHANNEL – CONTINUOUS
31	57

F K P
Ceiling Clips



Ceiling Clips are a non-permanent method used to attach the Ceiling Channel (FKN) to T-Bar ceiling system.

WHAT'S INCLUDED
10 Clips per kit.

NOTES
Used for both Portrait and Landscape applications.

To estimate quantities, allow for one Ceiling Clip per tile.

PRODUCT OPTIONS

Style
1 9/16" Ceiling Clip (For use with flat tiles only)
2 15/16" Ceiling Clip (Can be used with flat or drop tiles)
3 1/4" Spacer
4 9/16" (For Ultraline 3500, 3600)
5 9/16" (For Fineline grids)
6 9/16" Ceiling Clip (For drop tiles)

F K K
Horizontal Rail

Horizontal Rails attach to Vertical Posts to provide lateral support.

WHAT'S INCLUDED
Horizontal Rail (quantity as per elevation) and connection hardware.

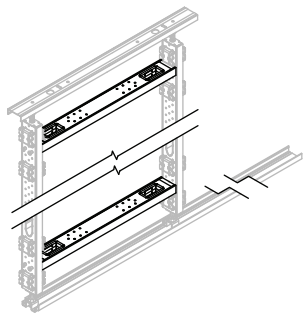
WHAT'S EXCLUDED
Base Channel – Continuous (FKC).

NOTES
Use a Horizontal Rail Package (FKH) with doors and monolithic elevations.

The Horizontal Rail must correspond to wall elevation and Fascia width.

Exact width **must** be specified in the order code. Range codes (i.e. **12, 18**) are listed for pricing purpose only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.



PRODUCT OPTIONS

Elevation	Width (in 1" increments)	
F Full	**12** 12	**36** 31 – 36
S Segmented	**18** 13 – 18	**40** 37 – 40

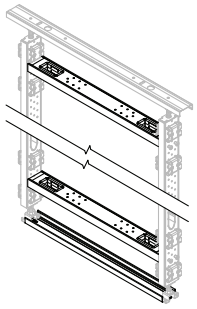
F K H
Horizontal Rail Packages



Horizontal Rails attach to Vertical Posts to provide lateral support.

WHAT'S INCLUDED
Horizontal Rails packages include Horizontal Rails (FKK) and Base Channel - Modular (FKB).

NOTES
Horizontal Rails (single - one rail, Monolithic - one rail, Full - two rails, Segmented - three rails, Working Wall - four rails), Base Channel - Modular (not included with single deviation).

Use a Single Horizontal Rail Package (FKHG) with doors.

The Horizontal Rail must correspond to wall elevation and Fascia width.

When the 4" fascia is specified, female mounting clips are installed on the Horizontal Rail. When the 6" fascia is specified then female clips are mounted on the Vertical Posts

Exact width **must** be specified in the order code. Range codes (i.e. **12, 18**) are listed for pricing purpose only.

While sizing is shown in both imperial and metric, products need to be ordered using imperial dimensions.

Base/Ceiling Fascia height must be specified for Full Height, Segmented and Working Wall Elevations.

Installation Tools

Various tools used in the installation and removal of Altos-specified items.

WHAT'S INCLUDED
Tool as specified.

NOTES
Used for both Portrait and Landscape applications.

The Male Connector Insertion tool is to attach the male clips to the fascia.

The Fascia Removal Tool is used to remove a fascia after it has been installed.

The Horizontal Rail Field Cut is used for cutting Horizontal Rails in the Filler Panel FPF.

The Foam Tape 2" x 1/4" is used to fill gaps caused by out of plumb walls.

The Foam Tape 1" x 1/8" is used to cover the vertical slots between fascias. This tape is included with the Vertical Post FKV and this roll should only be ordered if extra is required.

The Drill Stop Assembly for Male Fascia Holes and the Jig to Drill Fascias are used together to cut the Filler Panel FPF or any solid fascia on site.

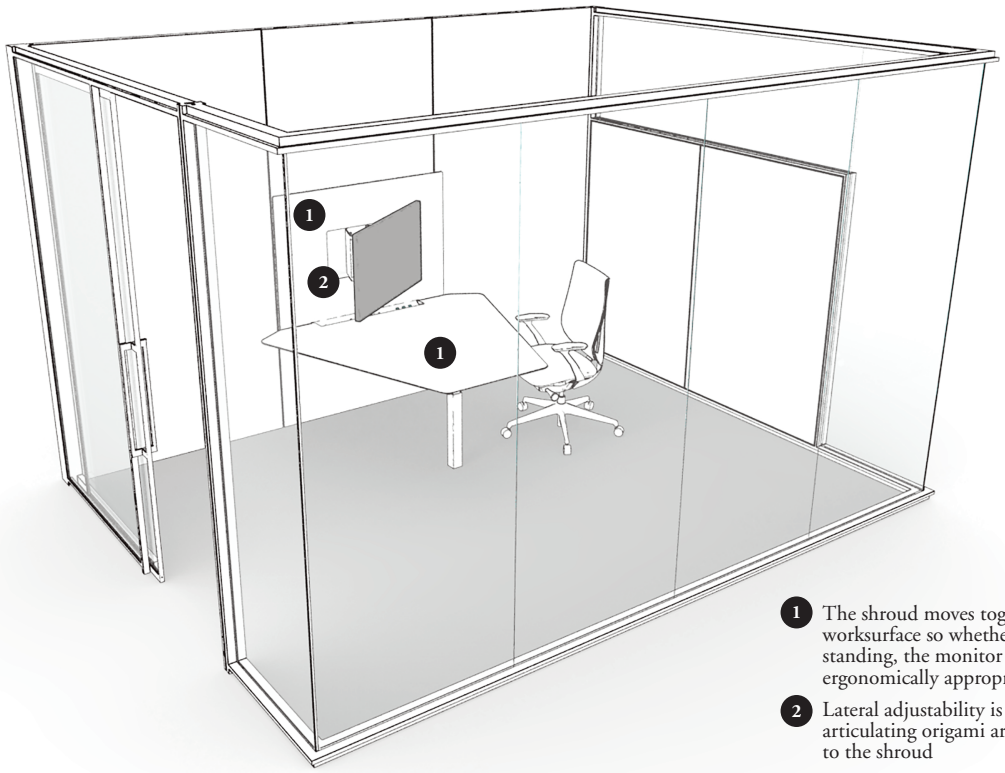
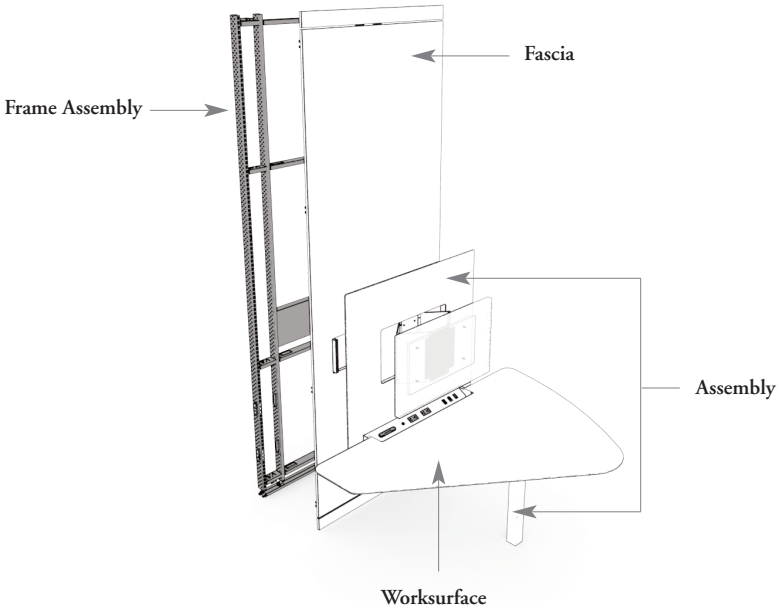
what is tek pier

Tek Pier is a demountable wall-integrated, height-adjustable, and technology-supported workspace. Designed to enable technology engagement by articulating a large monitor for individual or group use in private office and meeting room environments, this innovative solution maintains a minimal profile while providing an ergonomic collaboration experience.



1. The shroud moves together with the Tek Pier worksurface so whether sitting or standing, the monitor is always at an ergonomically appropriate viewing height
2. Lateral adjustability is provided by the articulating origami arm which is mounted to the shroud

- A Tek Pier station consists of a frame assembly, fascias, Tek Pier assembly and a worksurface which all must be specified individually
- Tek Pier uses Altos Portrait Fascia elevations only
- Tek Pier is **not** available next to Altos Landscape



what is tek pier (continued)

Two sizes of the Tek Pier assembly are available:

- Tek Pier Assembly 1
- Tek Pier Assembly 2

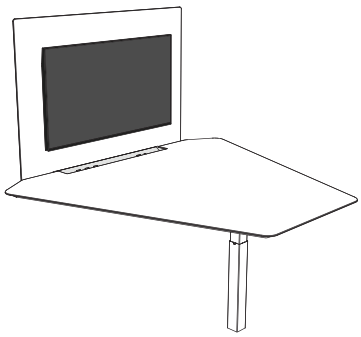
Three worksurface shapes are available:

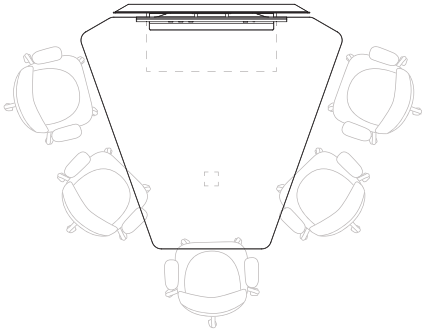
- Spade Top Worksurface
- Pie Top Worksurface
- Wedge Top Worksurface

Three configurations can be achieved depending on the worksurface shape and the Tek Pier assembly specified:

tek pier assembly 1

Spade Top

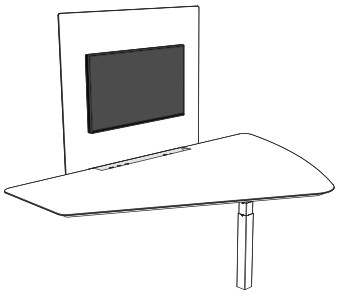


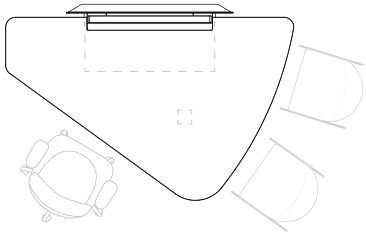


- Up to five collaborators
- Symmetrical
- Sit Stand Range 24" - 43"
- Ideal for meeting rooms and collaboration

tek pier assembly 2

Pie Top

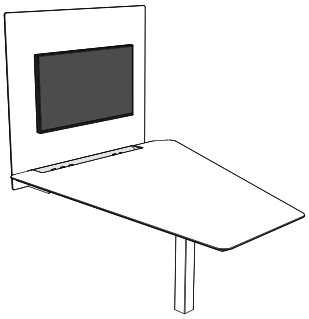


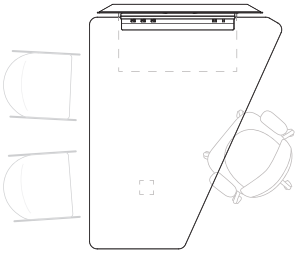


- Up to three collaborators, one primary and two guests
- Left and right handed versions
- Sit Stand Range 24" - 43"
- Ideal for small enclaves and private offices

tek pier assembly 2

Wedge Top



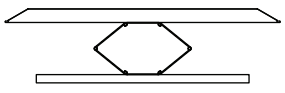


- Up to three collaborators, one primary and two guests
- Left and right handed versions
- Sit Stand Range 24" - 43"
- Ideal for small enclaves and private offices

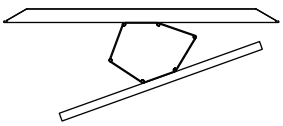
origami arm

The origami arm has six pivot points allowing the user to adjust the monitor in several locations.

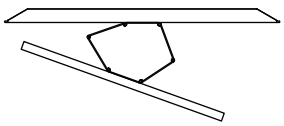
Flat on wall



Extended off wall



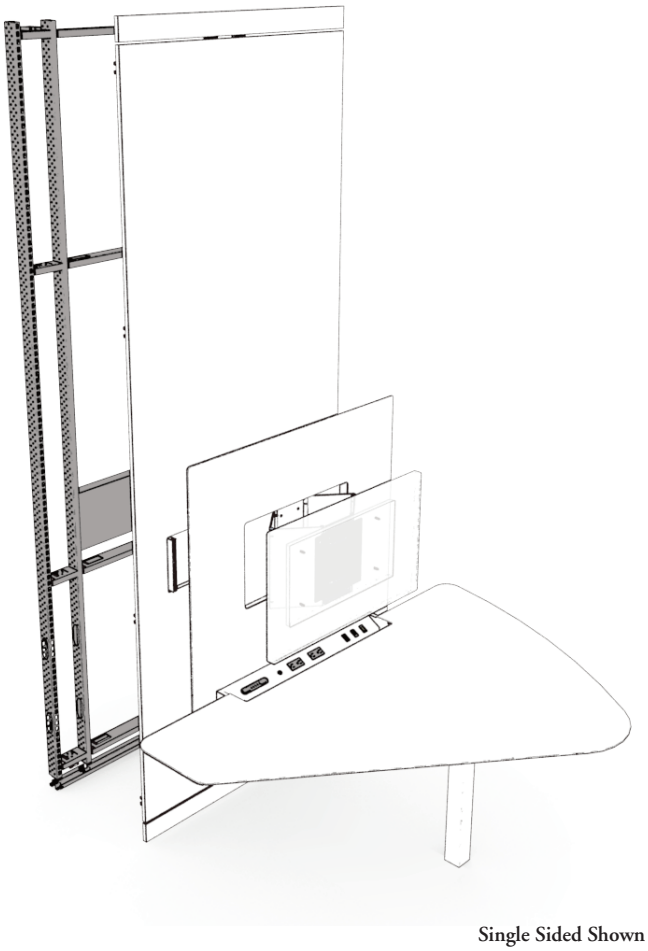
Angled right



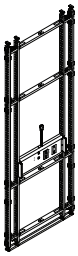
Angled left

frame assembly basics

The Frame Assembly for Tek Pier is an Altos frame and consists of several vertical and horizontal channels allowing for Tek Pier technology and supports to be concealed within the frame.



Single Sided Shown



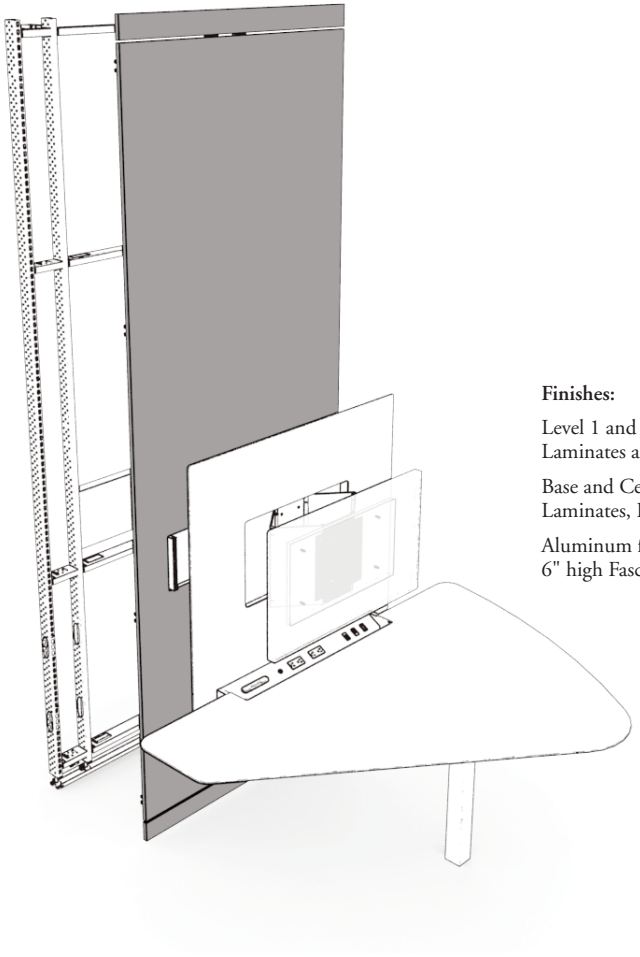
Frame Assembly for Tek Pier (FKTKP)

- Available heights include 96"-120" in 1" increments
- Available widths are 42" and 48"
- Available single sided or double sided
- Wiring system is 4 Wire (Modular and Chicago) hardwire
- Available with Circuit Type 1 and Circuit Type 2 for Modular only
- Base and ceiling fascia heights are 4" and 6" high
- Fascias must be ordered separately and are available only as kits
  - Monolithic
  - Segmented Monolithic
  - Full
  - Segmented

tek pier fascia basics

Tek Pier Fascias are used in combination with the frame assembly to accommodate supports and provide accurate cut out locations for the Tek Pier assembly.

- Base and ceiling fascia heights are 4" or 6"
- Available 42" and 48" wide
- For determining the correct fascia height, please refer to Altos Fascia section, Specifying Fascia Heights page.
- Tek Pier cut out for height-adjustable mechanism is available on Level 1 Fascia
- Tek Pier uses Altos Portrait Fascia elevations only

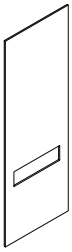


Finishes:

Level 1 and 2 Fascia finishes include Fascia Laminates and Flintwood Stains

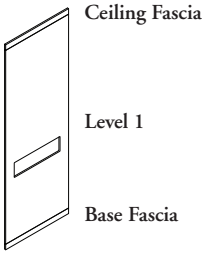
Base and Ceiling Fascia finishes include Fascia Laminates, Flintwood Stains and Aluminum

Aluminum finish selection is not available on 6" high Fascias



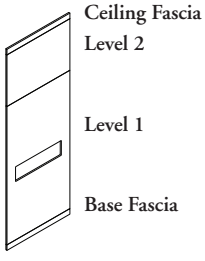
Monolithic Fascia (FFMTKP)

Fascia is available in heights of 96" - 120" in 1" increments.



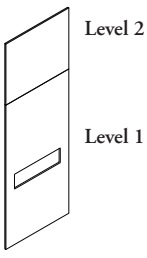
Full Fascia Kit (FFFTKP)

Level 1 Fascia is available 84" - 112" in 1" increments.



Segmented Fascia Kit (FFSTKP)

- Level 1 Fascia is available 78" and 80" high
- Level 2 Fascia is available 6" - 32" in 1" increments



Segmented Monolithic Fascia Kit (FFSMTKP)

- Level 1 Fascia is available 84" high
- Level 2 Fascia is available 12" - 36" in 1" increments

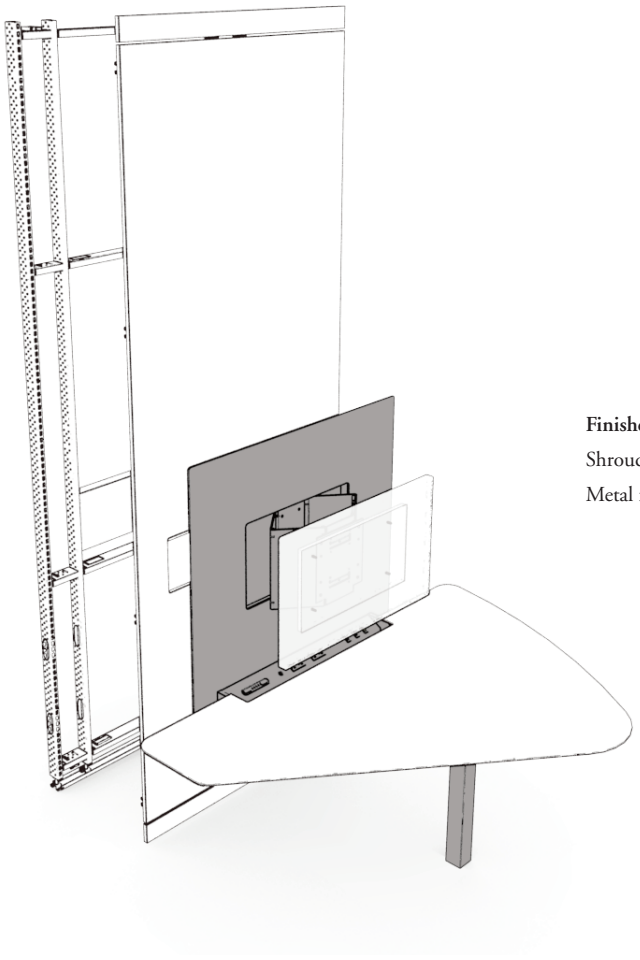
4" Base and Ceiling Fascia Kit for Tek Pier (Opposite Side) (FFCBTKP)

Available 42" and 48" wide.

tek pier assembly basics

The Tek Pier assembly includes the actuators, e-chain, shroud, origami arm, shroud pan, Tek Pier electrics beam and height-adjustable leg.

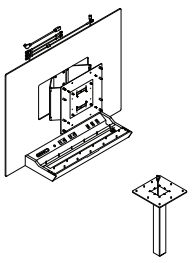
Electrical orientation can be specified left or right.



Finishes:

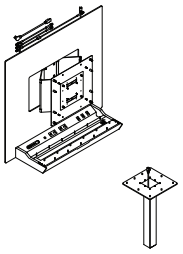
Shroud surface finish is Glacier White solid surface

Metal finishes include Very White and Platinum paint



Tek Pier Assembly 1 (TKP1)

- Accommodates Spade Top Worksurface (TKPA)
- Must be specified on a 48" wide Frame Assembly for Tek Pier (FKTKP)
- Recommended monitor is 39" - 46" and is restricted to 35 lbs

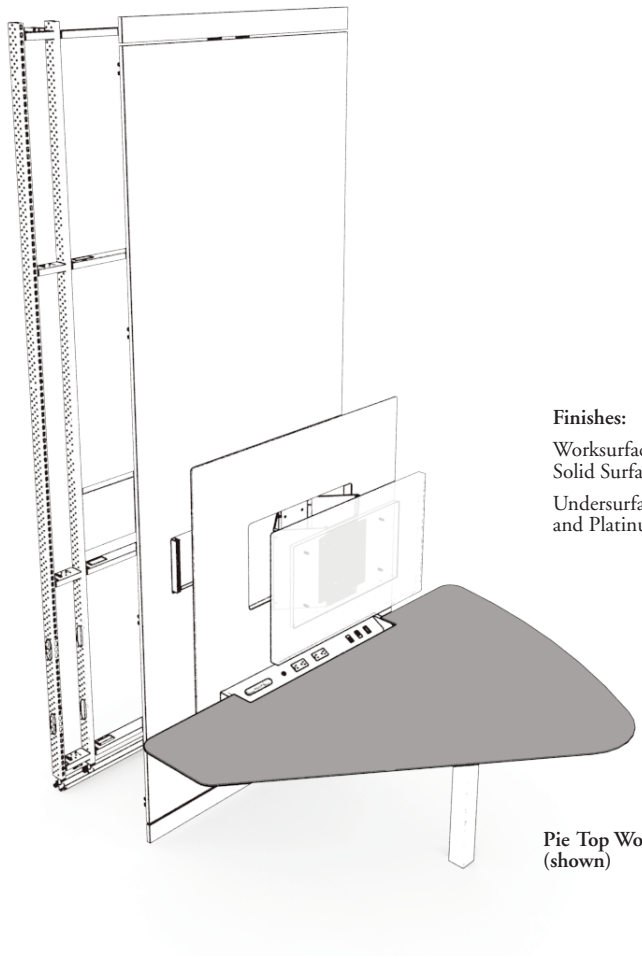


Tek Pier Assembly 2 (TKP2)

- Accommodates Wedge Top Worksurface (TKPC) and Pie Top Worksurface (TKPB)
- Must be specified on a 42" wide Frame Assembly for Tek Pier (FKTKP)
- Recommended monitor is 30" - 38" and is restricted to 35 lbs

tek pier worksurface basics

Tek Pier worksurfaces are available in three shapes: Spade, Pie and Wedge Tops to match Tek Pier assembly sizes.

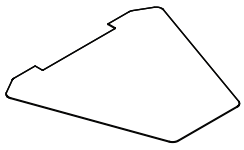


Finishes:

Worksurface top finish is Glacier White Solid Surface

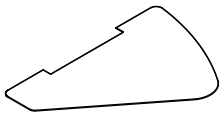
Undersurface finishes include Very White and Platinum Paint

Pie Top Worksurface (left-handed) (shown)



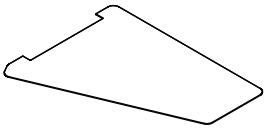
Spade Top Worksurface (TKPA)

- Worksurface depth is 59"
- Worksurface length is 67-1/2"
- Must be used with Tek Pier Assembly 1 (TKP1)
- Symmetrical



Pie Top Worksurface (TKPB)

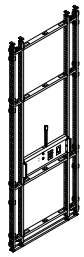
- Worksurface depth is 46"
- Worksurface length is 66-1/2"
- Is left or right-handed
- Must be used with Tek Pier Assembly 2 (TKP2)



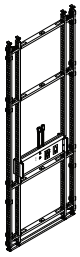
Wedge Top Worksurface (TKPC)

- Worksurface depth is 66"
- Worksurface length is 50"
- Is left or right-handed
- Must be used with Tek Pier Assembly 2 (TKP2)

F K T K P
Frame Assembly for Tek Pier



Single Sided



Double Sided

The Frame Assembly for Tek Pier is a specific kit of Altos components designed to support Tek Pier installation.

WHAT'S INCLUDED
All Altos vertical and horizontal frames with clips and internal mounting plate.

WHAT'S EXCLUDED
Tek Pier assembly, fascias, worksurfaces.

NOTES
Includes Female Clips for all Fascia configurations (set for working wall) along the Vertical Posts.

FFCBTKP

4" Base and Ceiling Fascia Kit for Tek Pier (Opposite Side)

The 4" Base and Ceiling Fascia Kit for Tek Pier (Opposite Side) provides a solid finish at the top and bottom of the opposite side of the wall section.

WHAT'S INCLUDED
Altos base and ceiling fascia for opposite side of Tek Pier wall.

NOTES
Similar to Altos Base Fascia (FFB) and Ceiling Fascia (FFC) however is specific for the Tek Pier configuration.

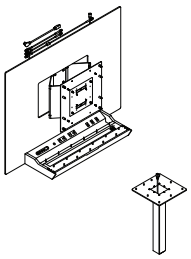
T K P 1
Tek Pier Assembly 1



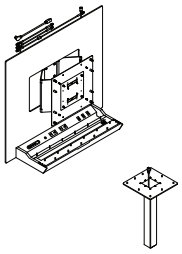
The Assembly 1 is recommended for use with 39" - 46" monitor size (max 35 lbs) and must be specified on a 48" wide Frame Assembly for Tek Pier (FKTKP).

WHAT'S INCLUDED
Shroud assembly, origami mount, wall actuators, electrics beam, mounting plate, pyramid liaison, monopod linak leg.

WHAT'S EXCLUDED
Altos frame and fascia kits with electrics plate, worksurface, monitor.

NOTES
For use with Spade Top Worksurface (TKPA).

T K P 2
Tek Pier Assembly 2



The Assembly 2 is recommended for use with 30" - 38" monitor size (max 35 lbs) and must be specified on a 42" wide Frame Assembly for Tek Pier (FKTKP).

WHAT'S INCLUDED
Shroud assembly, origami mount, wall actuators, electrics beam, mounting plate, pyramid liaison, monopod linak leg.

WHAT'S EXCLUDED
Altos frame and fascia kits with electrics plate, worksurface, monitor.

NOTES
For use with Pie Top Worksurface (TKPB) and Wedge Top Worksurface (TKPC).

PRODUCT OPTIONS

Shroud Surface Finish	Metal Finish	Electrical	Electrical Orientation

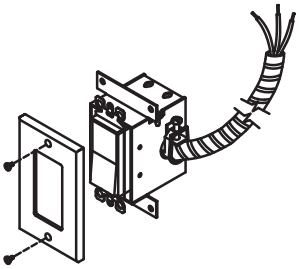
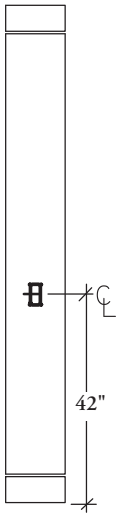
lighting overview

A light switch is available in Altos that allows user control of ambient lighting.



Light Switch (ELS)

- Allows for user control of individual office ambient light
- Can be installed on solid Fascias
- Is recommended to locate the cut out 42" above finished floor to the center-line of the light switch



Solid: Full (FPVSF)

Solid: Segmented (FPVSS)

Solid: Working Wall (FPVSW)

electrics & communications overview

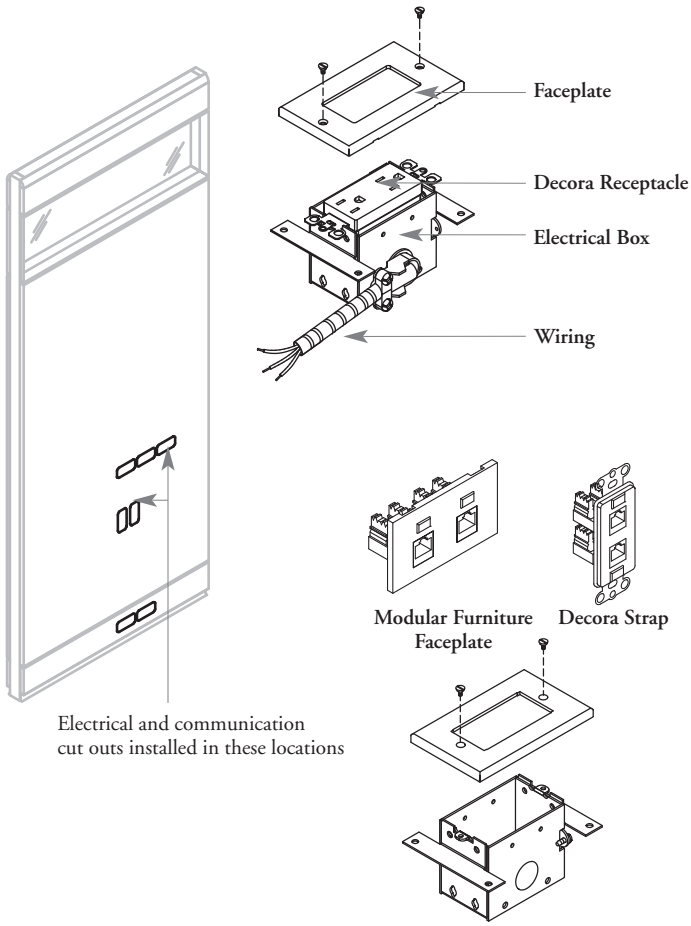
There are four methods of supplying power and communications in Altos Portrait, each method functions differently. The following chart will help you select the appropriate solution.

	Field-supplied Electrics	Hardwire Electrics	Modular Electrics	Power Plus Communications Electrics
application	• Uses industry standard receptacles commonly used in drywall applications • Contractor provides all electrical components – only the Fascias are specified with cut outs • Client customized	• Used in single office applications • Individual feed to each receptacle	• Used with systems furniture applications • Allows for spine planning and routing power between receptacles	• Used in single office applications • Individual feed to each box with disconnect in ceiling • Each box can hold 1 data plus 1-3 Duplex
benefits	• Contractor provides all electrical components • Fascia cut outs accept industry standard duplex or decora style receptacles	• Industry standard receptacle module pre-wired with 20' – 0" cable • Includes standard electrical box, decora receptacle and faceplate • Standard and isolated circuits • 120 volt; 15 and 20 amp options • Communications module accepts modular furniture or decora strap faceplates • Voice/data jacks and cabling not included	• Allows power to be routed between receptacles • Single and double sided power boxes correspond to wire system • Communications box accepts modular furniture faceplates • Voice/data jacks and faceplates not included	• 120 volt; 15 amp and 20 amp options • Communication opening accepts modular furniture faceplates • 1 faceplate is used for the entire box
features	• Compatible with standard electrical wiring systems	• Compatible with standard electrical wiring systems • Each receptacle fed individually • Does not route power between receptacles	• Available in many wire systems • Reduces number of feeds required • Cost effective • Easy to reconfigure • Compatible with systems furniture • Requires fewer connections to building power	• Available in many wire systems • Compatible with standard electrical wiring systems • Does not route power between receptacles • Single box for power and data • Easy to disconnect for relocation
wire systems	• Standard Circuit • Isolated Circuit	• Standard Circuit • Isolated Circuit	• 4B • 8T • 5D • 8N • 7G • 8K	• 4B • 8T • 5D • 8K • 6G • 7G
electrical components available		• Receptacle Module (ERM) • Communications Module (ECM) • Light Switch (ELS) • Fascia Cover Cap (EFCC)	• Ceiling/Underfloor Feed (ECF) • Single Power Box (ERAS) • Double Power Box (ERAD) • Two-Sided Power Box (ERAB) • Communications Box (ERC) • Power Harness (EB) • Transition Harness (EBT) • Modular Power Distribution Box (EFA) • Mounting Rail (EMR) • Fascia Cover Cap (EFCC)	• Power Plus Communications Module – Single (ERGMS) • Power Plus Communications Module – Double (ERGMD) • Power Plus Communications Module – Triple (ERGMT) • Power Plus Communications Module – Quad (ERGMQ) • Power Plus Communications Module Starter Cable (ERSC)

hardwire electrics & communications basics

Hardwire components consist of receptacle modules, communications modules and power distribution boxes.

- Connection to building supply must be done by a qualified electrician
- Fascia cut outs may not accept client-supplied standard electric/data boxes, receptacles and faceplates, the factory cut outs match factory electrics
- One size cut out fits both receptacle and communications modules. Any combination of Receptacles or Communications Modules are possible



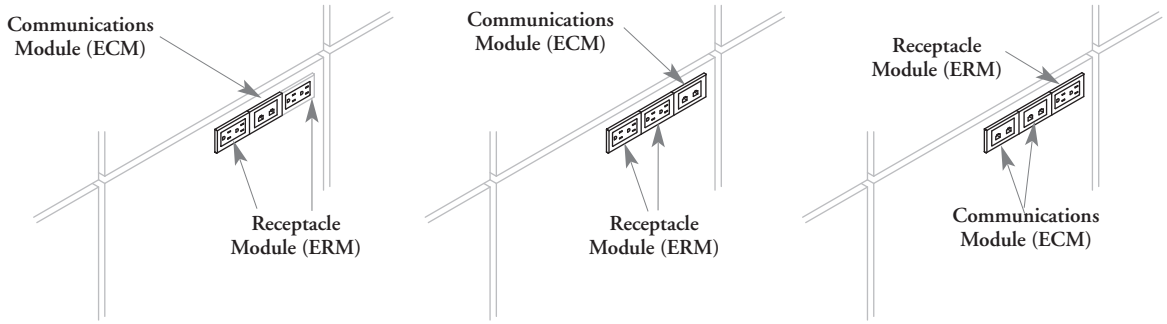
Receptacle Module (ERM)

- Provides access to electrical power and can be installed at all Fascia cut outs located at base height, 18" height, and worksurface height
- Available in Standard or Isolated Ground
- Pre-wired with 20'–0" cable
- Altos receptacles are standard 120-volt with a choice of 15 or 20 amps
- Comes ready for installation and includes a standard electrical/data box, decora receptacle and faceplate

Communications Module (ECM)

- Voice and data are brought to the workspace via the Communications Module and can be used in all Fascia cut outs located at base height, 18" high and worksurface height
- Accepts modular furniture or decora strap faceplates
- Jacks/faceplates and cabling not included
- Can be specified to accept the pictured two faceplates
- Can be specified to accept twisted pair, fiber optic or coaxil cable (supplied by others)

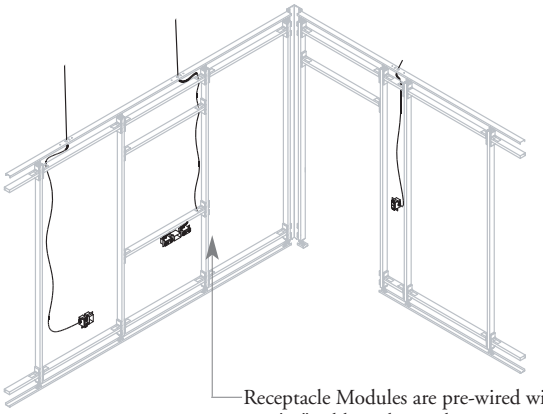
- One size cut out fits both receptacle and Communications Modules
- Any combination of Receptacles or Communications Module are possible



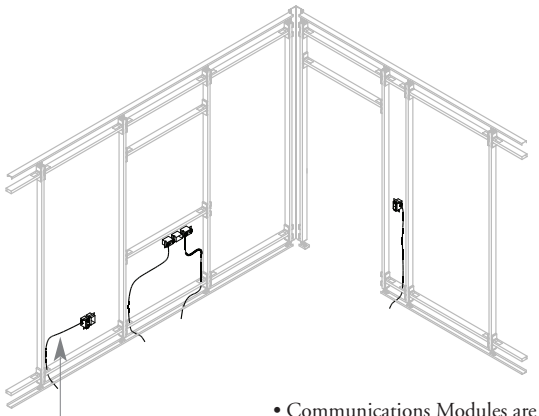
hardwire electrics & communications basics (continued)

The following should be considered when planning with hardwire electrics and communications.

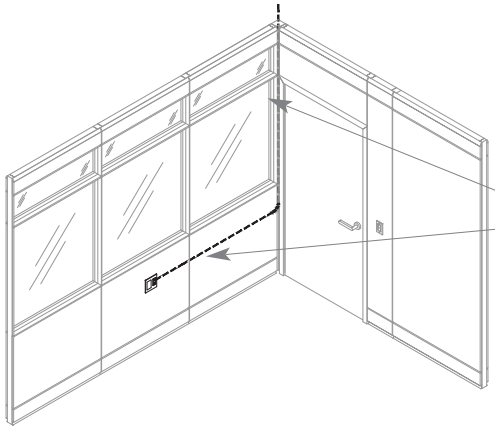
Electrical and communication cables are fed from the ceiling or from access floors through cut outs in the Ceiling or Base Channels to Receptacle and Communications Modules.



Receptacle Modules are pre-wired with a 20'-0" cable and must be connected to building supply by a qualified electrician

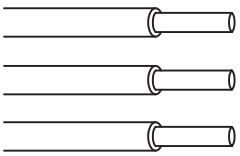


- Communications Modules are not pre-wired
- All cables must be supplied by the cable contractor



Ceiling feed must be routed vertically through corner connections when planning with clerestories or glazed Fascias and horizontally to Receptacle or Communications Modules

Standard Circuit

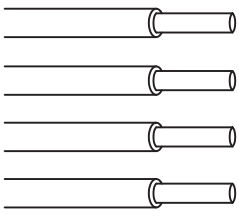


H Hot Wire

N Neutral Wire

G Ground Wire

Isolated Ground Circuit



H Hot Wire

N Neutral Wire

G Ground Wire

IG Isolated Ground Wire

Altos Receptacle Modules (ERM) and Light Switches (ELS) are compatible with standard electrical wiring systems used in drywall building applications. These consist of three wires (one circuit) for standard circuits and four wires for isolated ground circuits. This simplified approach to power eliminates the need for coordinating various circuit configurations. Receptacles can be specified as standard or isolated ground

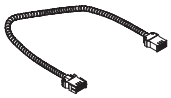
modular electrics basics

Modular electrics consists of components that allow systems furniture to be powered directly from Altos walls.

- All components must be specified from same wire system – systems available – 4B, 5D, 7G, 8T, 8N and 8K
- Power from a single building supply may be routed to multiple offices
- Back-to-back installation of electrics and communications is possible by off-set mounting on the Fascia

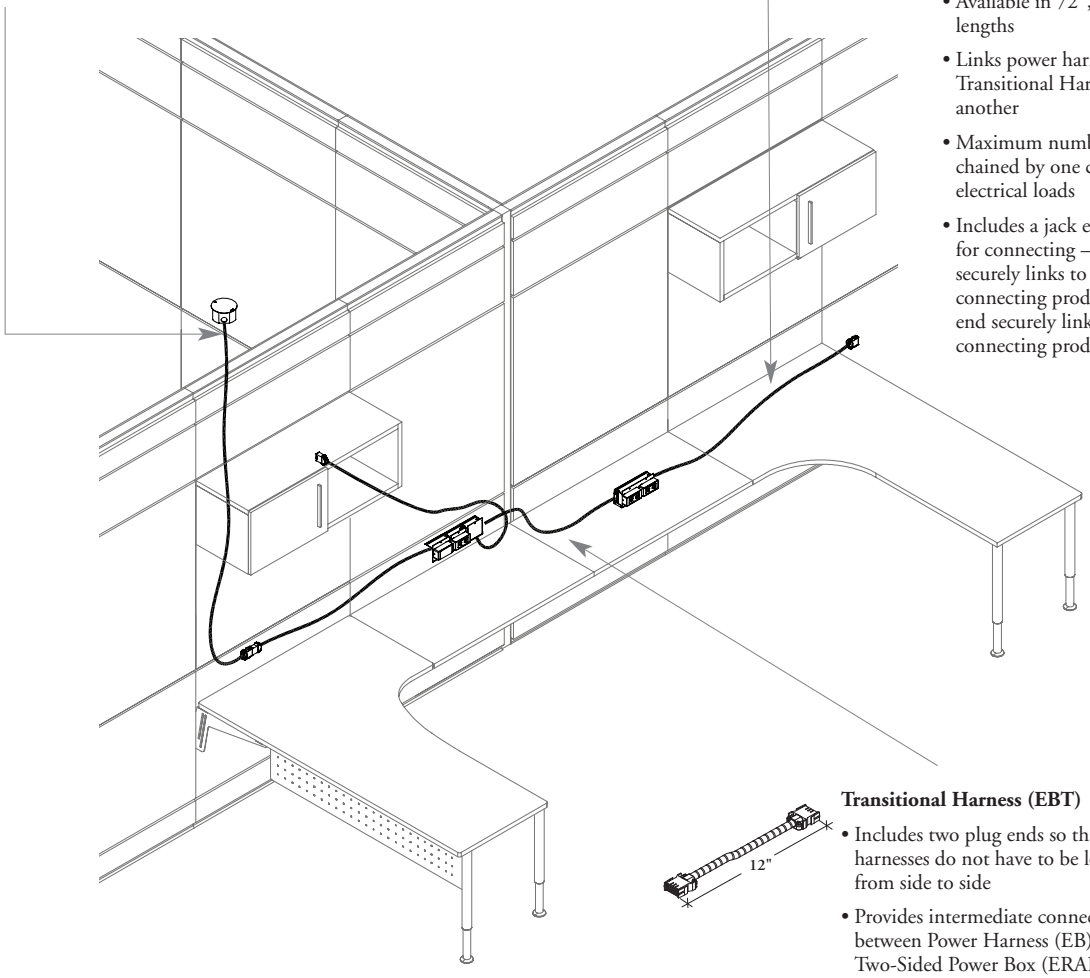
Ceiling/Underfloor Feed (ECF)

- Hardwired to the building power supply and brings power to other modular electrics products
- Available in 120", 240" and 360" lengths
- Must be routed through solid Fascias or corner connections (any elevation) – **cannot** be routed through Fascias with glass



Power Harness (EB)

- Routes power between power boxes and distribution boxes
- Available in 72", 96", 120" and 144" lengths
- Links power harnesses or Transitional Harnesses (EBT) to one another
- Maximum number of Power Boxes chained by one circuit is limited by electrical loads
- Includes a jack end and a plug end for connecting – the jack end securely links to the plug end of connecting products and the plug end securely links to the jack end of connecting product



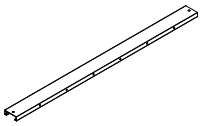
Transitional Harness (EBT)

- Includes two plug ends so that harnesses do not have to be looped from side to side
- Provides intermediate connection between Power Harness (EB) and Two-Sided Power Box (ERAB)

modular electrics basics (continued)

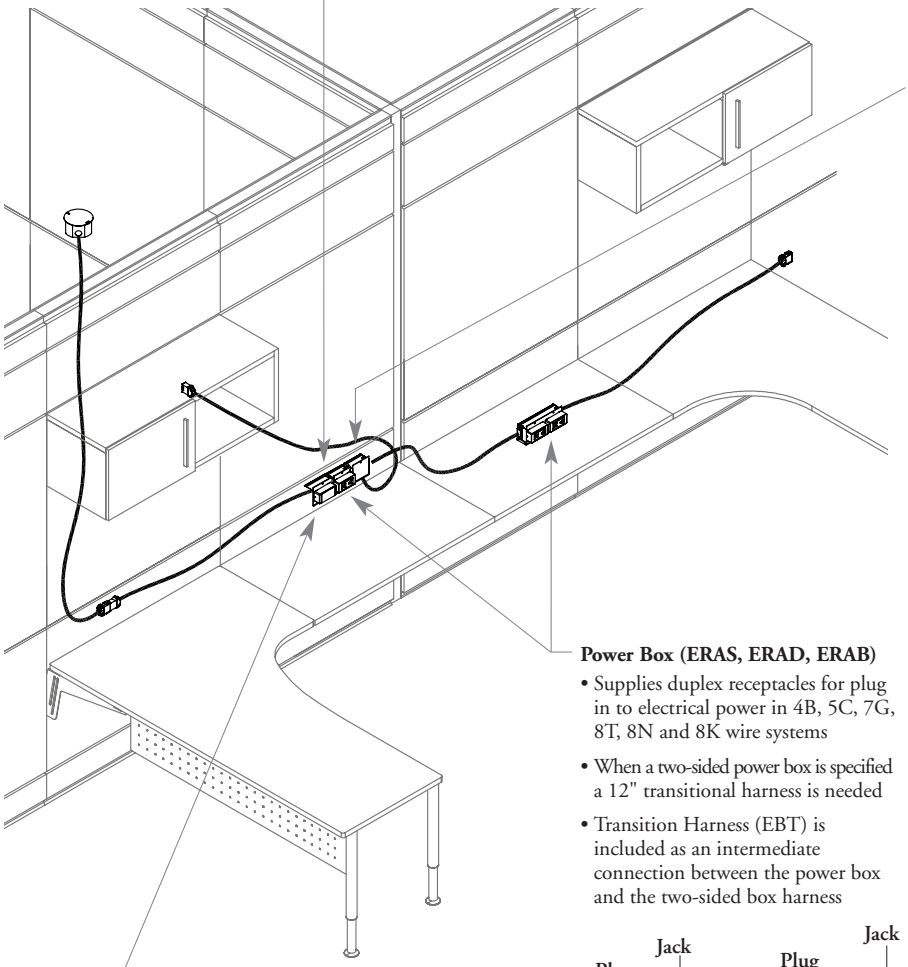
Modular electrics consists of components that allow systems furniture to be powered directly from Altos walls.

- All components must be specified from same wire system – systems available – 4B, 5D, 7G, 8T, 8N and 8K
- Power from a single building supply may be routed to multiple offices
- Back-to-back installation of electrics and communications is possible by off-set mounting on the Fascia

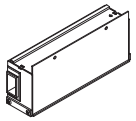


Mounting Rail (EMR)

- Must be specified separately to attach the Power Box and Communications Box to the Horizontal Rail
- The specified nominal width of the Mounting Rail must equal the width of the mounting Horizontal Rail
- In addition, a Horizontal Rail-Single (FKHG) must be specified when the Power Box and Communications Box are located at the 18" high cut out on all Fascias or the 36" high cut out on Full and Segmented Fascias



Three Connector



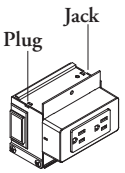
Four Connector

Modular Power Distribution Box (EFA)

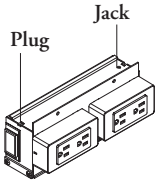
- Routes power in different directions – three-connector options routes in two directions and the four-connector options routes in three directions
- Connects directly to power boxes
- Non-directional
- A Mounting Rail (EMR) must be specified when it is positioned within a Fascia that does not have a power box
- A horizontal rail – single may be specified when located at the 18" high cut out on all Fascias or the 36" high cut out on full and segmented Fascia
- Also used adjacent to corner connections to route power to different directions

Power Box (ERAS, ERAD, ERAB)

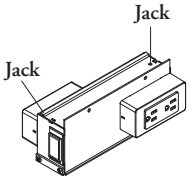
- Supplies duplex receptacles for plug in to electrical power in 4B, 5C, 7G, 8T, 8N and 8K wire systems
- When a two-sided power box is specified a 12" transitional harness is needed
- Transition Harness (EBT) is included as an intermediate connection between the power box and the two-sided box harness



Single Power Box one duplex receptacle (ERAS)



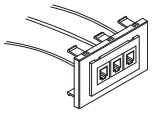
Double Power Box two duplex receptacles (ERAD)



Two-Sided Power Box one duplex receptacle on each side (ERAB)

Communications Box (ERC)

- Delivers voice and data to the workplace and can be used in conjunction with the power box
- Accepts modular furniture faceplates
- Jacks and faceplates and conduit are **not** included
- Not prewired



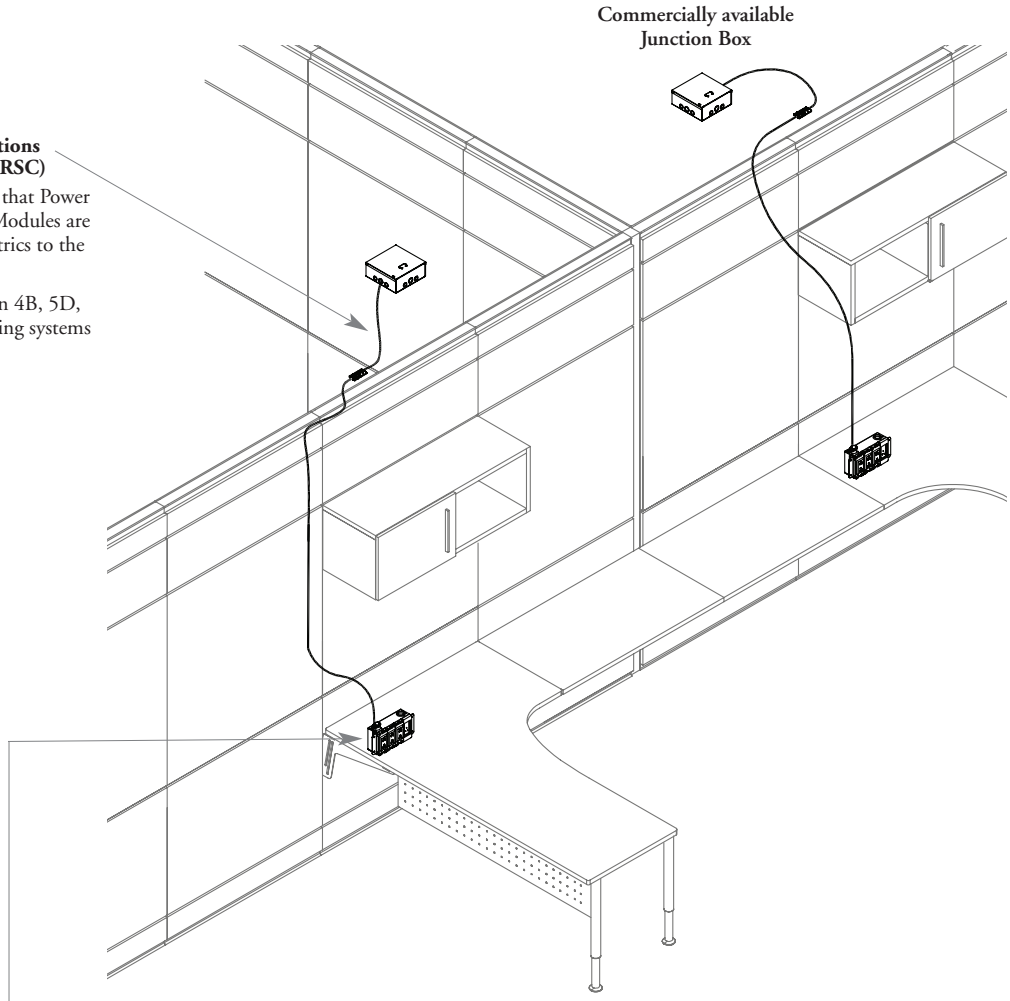
power plus communications module electrics basics

Power Plus communication modules allow office spaces to be powered directly from Altos walls.

- All components must be specified from same wire system – systems available – 4B, 5D, 6G, 7G, 8T and 8K
- Power from a single building supply may be routed to multiple offices
- Back-to-back installation of electrics and communications is possible because electrical box mounting if offset on the fascia.

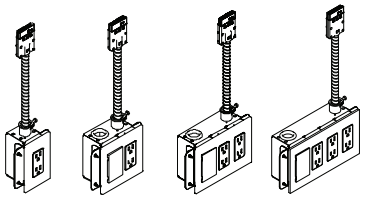
Power Plus Communications Module Starter Cable (ERSC)

- Is used at every location that Power Plus Communications Modules are used to connect the electrics to the ceiling power
- Available 12" long and in 4B, 5D, 6G, 7G, 8T and 8K wiring systems



Power Plus Communications Module (ERGMS, ERGMD, ERGMT, ERGMQ)

- Provides data and 1 - 3 duplexes on one faceplate for single office applications
- Each feed routes directly to the Power Plus Communications Module
- Cable lengths are available 20' and 30' long
- No option for only Data
- Available 120 volt and 15 amp or 20 amp
- Available in Single (ERGMS), Double (ERGMD), Triple (ERGMT) and Quad (ERGMQ) options
- Faceplates are available in E1 Black or E2 White
- Solid Portrait Fascias are available with cut outs to match each Power Plus Communications Module types. See the Fascias section for more details

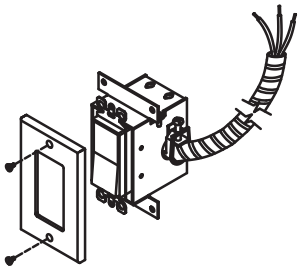


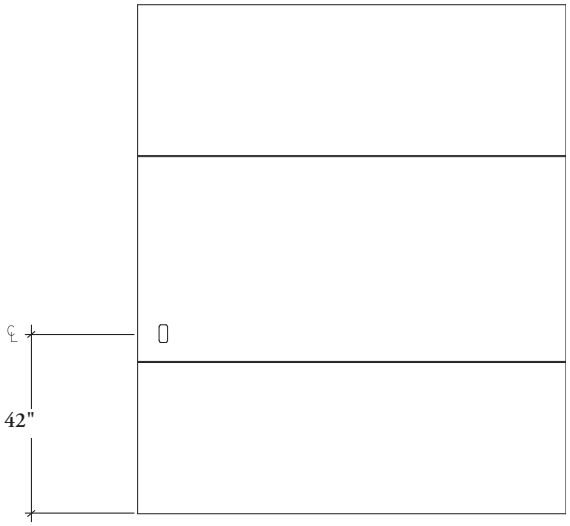
lighting overview – landscape

Altos Landscape offers integrated lighting solutions that take advantage of the wall for wire routing and structural support.

Light Switch (ELS)

Allows for user control of individual office ambient light or as a Remote Switch with the Landscape Wall Mounted Light (ELWML).





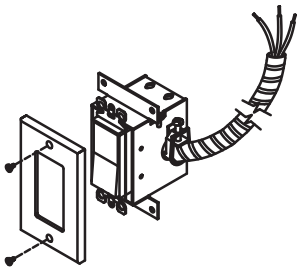
Landscape Wall-Mounted Light (ELWML)

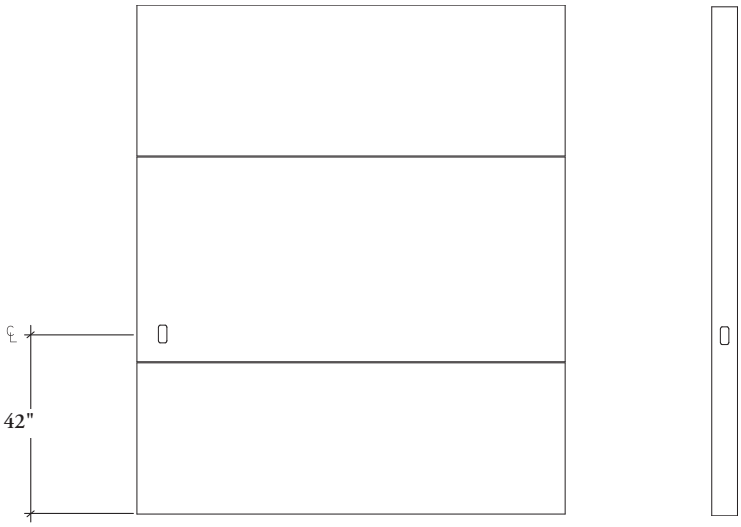
Provides lighting capability in task and ambient modes and can be mounted on the 60" or 84" horizontal datum.

Landscape Wall Mounted Light

light switch basics – landscape

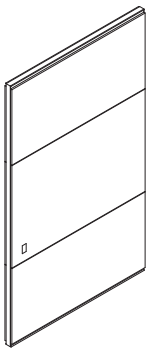
Altos Landscape offers integrated lighting solutions that take advantage of the wall for wire routing and structural support.



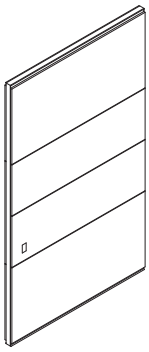


Light Switch (ELS)

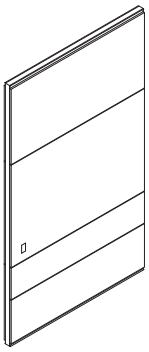
- Field installed on Landscape Solid and Fabric Wrapped Fascias and are cut on-site
- Can also be mounted to the Landscape Aluminum Fascia Kit (FLFK) at 42"
- Can be used as Remote Wall switch with Landscape Wall-Mounted Light (ELWML)
- It is recommended to locate the cut out 42" above finished floor, except when above a desk (46")



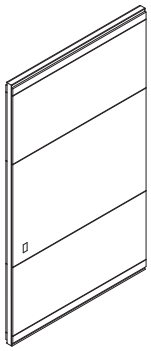
Working Wall Monolithic



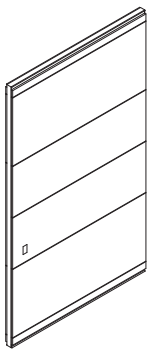
Light Working Wall Monolithic



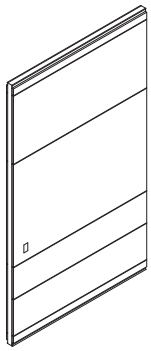
Cabinet Working Wall Monolithic



Working Wall Base/Ceiling Fascias



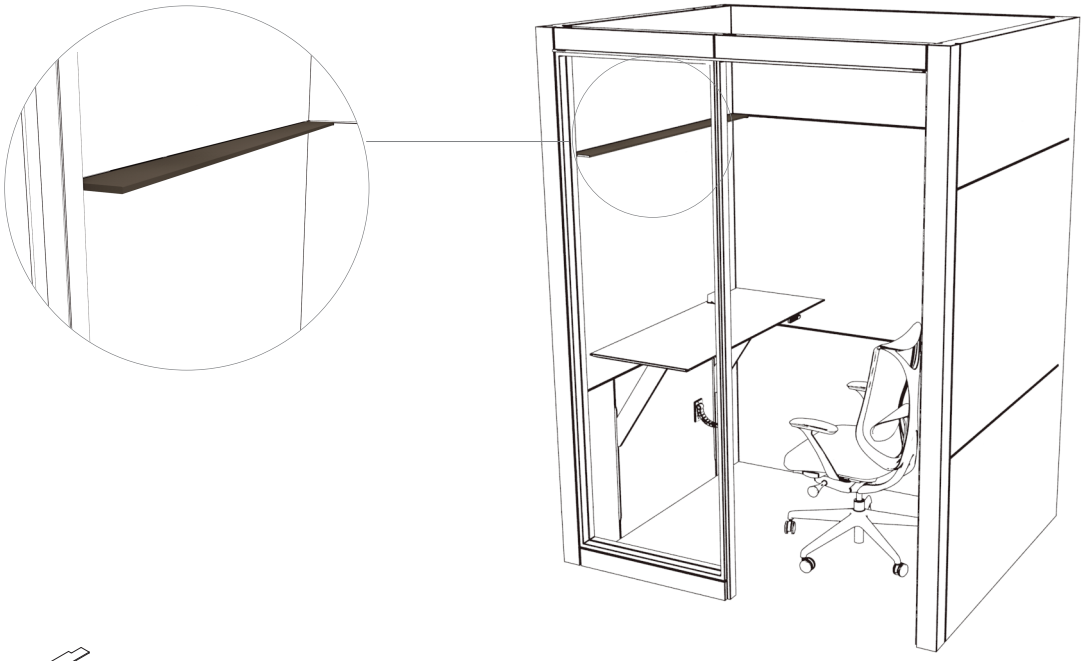
Light Working Wall Base/Ceiling Fascias

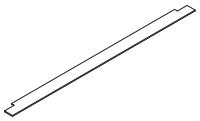


Cabinet Working Wall Base/Ceiling Fascias

wall-mounted light basics – landscape

The Landscape Wall-Mounted Light provides a lighting solution for both task and ambient lighting within a workspace.





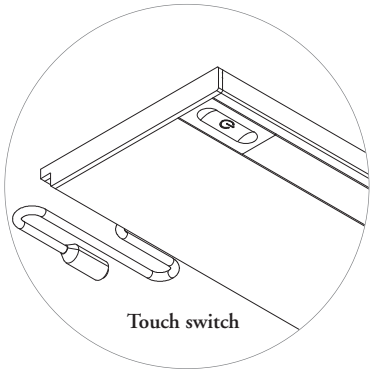
Landscape Wall-Mounted Light (ELWML)

- Can be mounted to either the 60" or 84" horizontal datum using a Functional Rail
- Available 4" deep x 48-1/8" - 96" long in 1/8" nominal increments
- Select finishes available include:
  - Paint: Foundation, Accent, Mica
  - Clear Anodized

switch options available:

Touch Sensitive Switch (left or right)

- Touch activated step dimming button located beside the lens
- Left handed light shown



Touch switch

Remote Wall-Mounted Switch

- Wall-Mounted Light Switch (ELS) can be connected to nearby Solid or Fabric Wrapped Fascia, or Landscape Aluminum Fascia Kit (FLFK)
- Left handed light (shown)

No Switch

- For building integrated solutions (connected to building power)
- Left handed light (shown)

electrics & communications overview – landscape

There are five methods of supplying power and communications in Altos Landscape, each method functions differently. The following chart will help you select the appropriate solution.

	Field-supplied Electrics	Hardwire Electrics	Power Plus Communications Electrics
application	• Uses industry standard receptacles commonly used in drywall applications • Contractor provides all electrical components – only the Fascias are specified with cut outs • Client customized	• Used in single office applications • Individual feed to each receptacle	• Used in single office applications • Individual feed to each box with disconnect in ceiling • Each box can hold one data plus one to three Duplex
benefits	• Contractor provides all electrical components • Fascia cut outs accept industry standard duplex or decora style receptacles	• Industry standard receptacle module pre-wired with 20' – 0" cable • Includes standard electrical box, decora receptacle and faceplate • Standard and isolated circuits • 120 volt; 15 and 20 amp options • Communications module accepts modular furniture or decora strap faceplates • Voice/data jacks and cabling not included	• 120 volt; 15 amp and 20 amp options • Communication opening accepts modular furniture faceplates • One faceplate is used for the entire box
features	• Compatible with standard electrical wiring systems	• Compatible with standard electrical wiring systems • Each receptacle fed individually • Does not route power between receptacles	• Available in many wire systems • Compatible with standard electrical wiring systems • Does not route power between receptacles • Single box for power and data • Easy to disconnect for relocation
wire systems	• Standard Circuit • Isolated Circuit	• Standard Circuit • Isolated Circuit	• 4B • 7G • 5D • 8T • 6G • 8K
electrical components available		• Receptacle Module (ERM) • Communications Module (ECM) • Light Switch (ELS) • Fascia Cover Cap (EFCC)	• Power Plus Communications Module – Single (ERGMS) • Power Plus Communications Module – Double (ERGMD) • Power Plus Communications Module – Triple (ERGMT) • Power Plus Communications Module – Quad (ERGMQ) • Power Plus Communications Module Starter Cable (ERSC)

electrics & communications overview – landscape (continued)

	Landscape Collection Support Electrics	Altos Desk Power Accessories
application	• Used to support internal electrical requirements for Altos Desk and Altos Light * For more details please refer to Landscape wall-mounted light basics and Landscape Desk Basics	• Electrics accessories for on the Altos Desk * For more details please refer to Desk Accessory Basics section
benefits	• Powers Altos Desk and Light with integrated cables and power feed contained within the wall	• User accessible accessories available on the Altos Desk for power and data requirements
features	• Available in many wire systems • Comparable with standard electrical wiring systems • Easy to disconnect for relocation	• Dual or Quad power cube available with power, USB or data options • Power Rod available with four power simplexes
wire systems	• 4B • 7G • 5D • 8T • 6G • 8K	• Plugs into In-Wall Distribution Box (ELWDB)
electrical components available	• ECF * Not necessary with Light Power Feed (single circuit) • Light Power Feed (ELPF) • In-Wall Distribution Box (ELWDB) Landscape Desk Connecting Hardness (ELDH) • Landscape Light Wire Management (ELWMG)	• Power Cube (EPWRC) • Power Rod (ELPR) • Rectangular Grommet (FLGR)

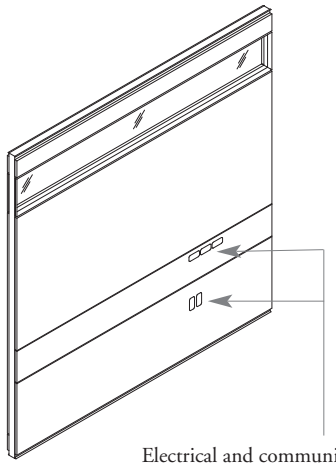
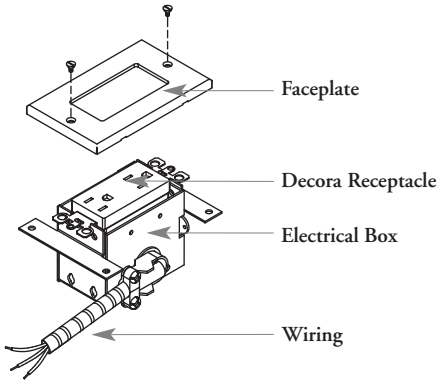
hardwire electrics & communications basics – landscape

Hardwire components consist of receptacle modules, communications modules and power distribution boxes.

- Connection to building supply must be done by a qualified electrician
- Fascia cut outs may not accept client-supplied standard electric/data boxes, receptacles and faceplates, the factory cut outs match factory electrics
- One size cut out fits both receptacle and communications modules. Any combination of Receptacles or Communications Modules are possible

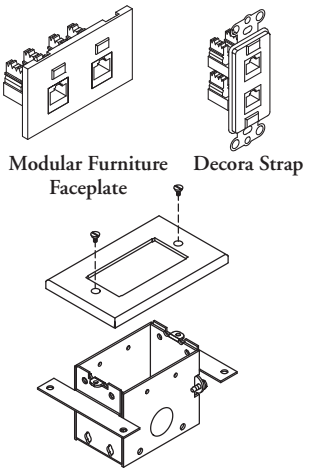


Electrical and communication cut outs installed in these locations



Receptacle Module (ERM)

- Provides access to electrical power and can be installed at all Fascia cut outs located at 15" height and worksurface height
- Available in Standard or Isolated Ground
- Pre-wired with 20'–0" cable
- Altos receptacles are standard 120-volt with a choice of 15 or 20 amps
- Comes ready for installation and includes a standard electrical/data box, decora receptacle and faceplate

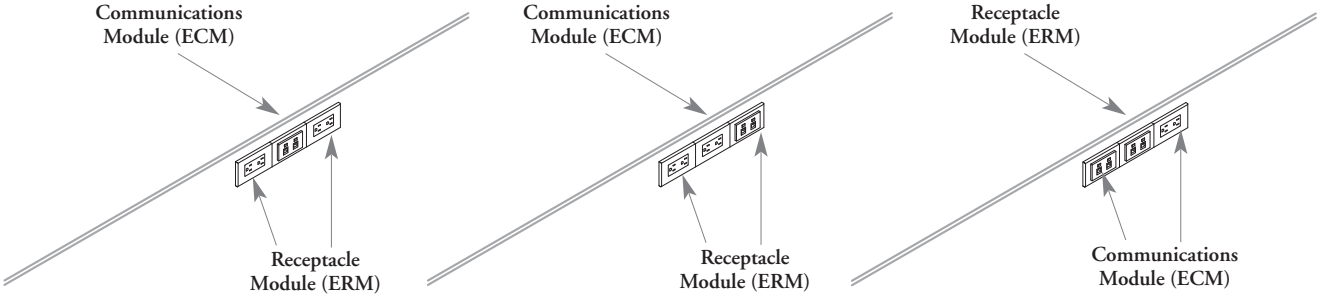


Communications Module (ECM)

- Voice and data are brought to the workspace via the Communications Module and can be used in all Fascia cut outs located at 15" high and worksurface height
- Accepts modular furniture or decora strap faceplates (not supplied by Teknion)
- Jacks/faceplates and cabling not included
- Can be specified to accept the pictured two faceplates
- Can be specified to accept twisted pair, fiber optic or coaxil cable (supplied by others)

Combining Receptacle and Communication Modules

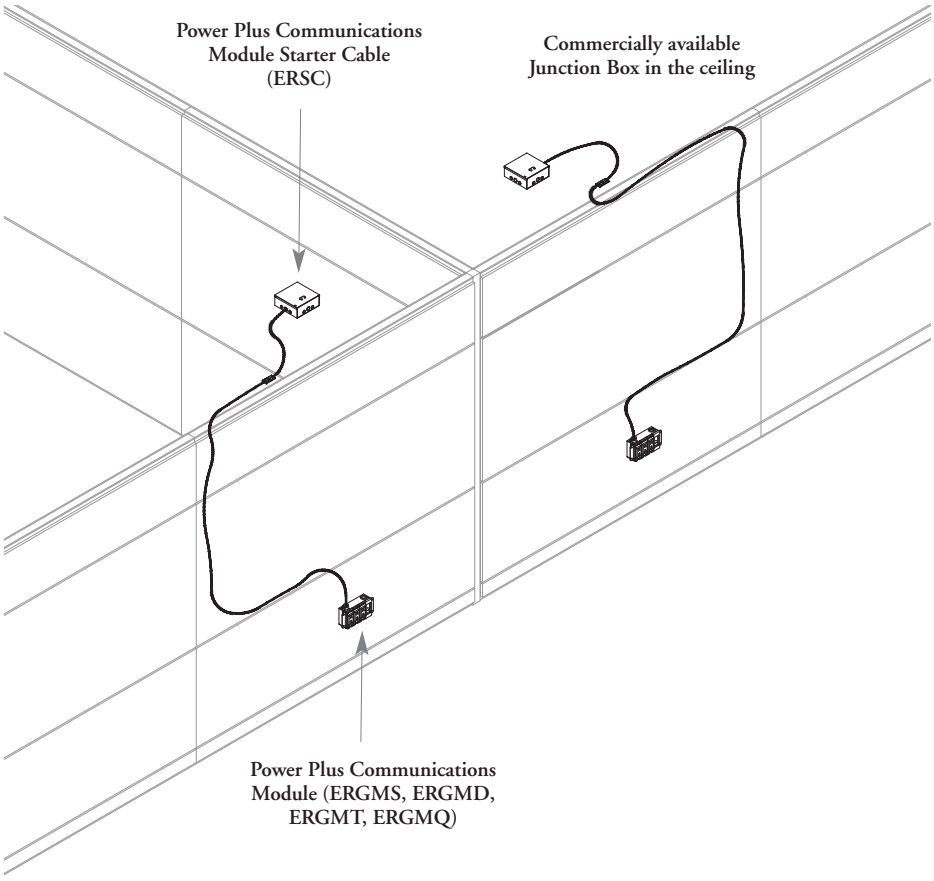
- One size cut out fits both receptacle and Communications Modules
- Any combination of Receptacles or Communications Module are possible



power plus communications module electrics basics – landscape

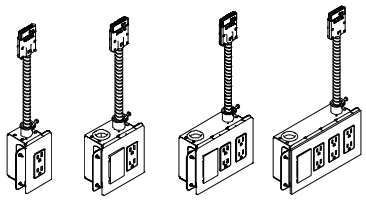
Power plus communication modules allow office spaces to be powered directly from Altos walls.

- All components must be specified from same wire system – systems available – 4B, 5D, 6G, 7G, 8T and 8K
- Power from a single building supply may be routed to multiple offices
- Back-to-back installation of electrics and communications is possible by off-set mounting on the Fascia



Power Plus Communications Module Starter Cable (ERSC)

- Is used at every location that Power Plus Communications Modules are used to connect the electrics to the ceiling power
- Available 12" long and in 4B, 5D, 6G, 7G, 8T and 8K wiring systems



Power Plus Communications Module (ERGMS, ERGMD, ERGMT, ERGMQ)

- Provides data and 1 - 3 duplexes on one faceplate for single office applications
- Each feed routes directly to the Power Plus Communications Module
- Cable lengths are available 20' and 30' long
- Available 120 volt and 15 amp or 20 amp
- Available in Single (ERGMS), Double (ERGMD), Triple (ERGMT) and Quad (ERGMQ) options
- Faceplates are available in E1 Black or E2 White
- Solid and Fabric Wrapped Fascias are available with cut outs to match each Power Plus Communications Module types. See the Fascias section for more details

ELS
Light Switch

The Light Switch is field installed on Solid Fascias and allows user control of lighting.

WHAT'S INCLUDED
1 electrical box with mounting bracket, pre-wired rocker-style decora light switch with 20' cable, faceplate, mounting hardware.

NOTES
Used for both Portrait and Landscape applications.

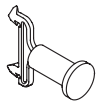
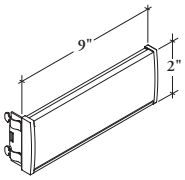
accessory basics

Altos Portrait offers the following mounted storage and accessory options.



Coat Hook (FMCH)

- Allows a means of hanging coats within an Altos environment
- Mounted on-module, in the vertical reveal at varying heights
- Can be used for all wall elevation and surface finish types



Office Signage (FMOS)

- Identifies an occupant and/or location, within an Altos environment
- Coordinates with the Workstation Signage on systems furniture
- Mounted on-module, in the vertical reveal at varying heights
- Can be used for all wall elevation and surface finish types

Art Hook (FMAH)

- Provides an alternative means of hanging pictures without damaging the face of Altos fascias
- Mounted off-module, from the horizontal reveal line above the location of the art work
- Can be used for all wall elevation and surface finish types
- Each hook can support a picture weighing up to 15 lbs
- Multiples of the Art Hook can be used to accommodate large, unbalanced or heavy pictures

F M C H

collection overview – landscape

The Landscape Collection consists of wall-integrated shelving, lighting, storage and height adjustable and fixed desks. The Landscape Collection can be mounted off-module, allowing for greater planning flexibility and maximizing floor space.

1 Landscape Wall-Mounted Light (ELWML)

- Provides task or ambient lighting applications above a desk, whiteboard, or along a storefront corridor

2 Power Cube (EPWRC)

- Provides user accessible Power, USB and Data to the Landscape Desk

3 Landscape Desk Fixed (FLDFX), Height-Adjustable (FLDHA)

- Landscape desks provide a Wall-Mounted desking solution to keep overall footprint of the room to a minimum
- Ideal enclave or office spaces
- Fixed or Height-Adjustable options available

4 Landscape Wall-Mounted Cabinet Open (FLWCO), Sliding Door (FLWCS)

- Landscape Wall-Mounted cabinets provide a semi-permanent or temporary storage application
- Available as an open cubby or with a sliding door

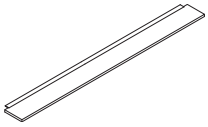
5 Landscape Fitted Seat Cushion (FLFC)

- Provides temporary seating solution on Wall-Mounted Cabinet
- Available in upholstery fabrics

shelf basics – landscape

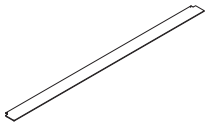
Landscape shelves are available in various materials and are ideal for personal or occasional storage. They can be mounted to the 36" and 60" horizontal datum.

Landscape Solid shelf (FLSS) (Shown)



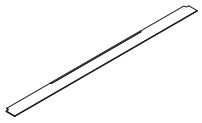
Landscape Shelf Solid (FLSS)

- Ideal for larger item storage and accommodates letter-sized paper
- 9" deep x 48-1/8" - 96" wide in 1/8" increments
- 1" thick with integrated connecting beam
- Available with flat edge
- Finishes:
  - Shelf: Foundation Laminate, Flintwood
  - Connecting Beam: Paint: Foundation, Mica



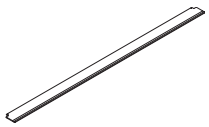
Landscape Shelf Aluminum (FLSA)

- 4" deep x 48-1/8" - 120" wide in 1/8" increments
- 7mm thick extruded profile
- Finishes:
  - Paint: Foundation, Accent, Mica



Landscape Shelf Glass (FLSG)

- 4" deep x 48-1/8" - 96" wide in 1/8" increments
- 6mm tempered glass

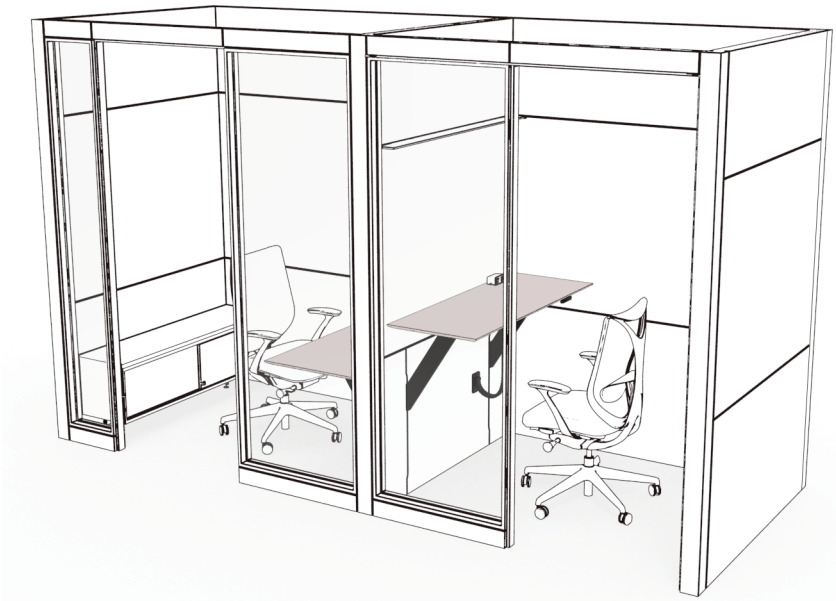


Landscape Shelf Whiteboard (FLTW)

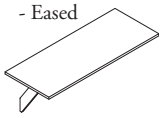
- Used below a backpainted glass fascia or wall-mounted monitor
- 4" deep x 48-1/8" - 120" wide in 1/8" increments
- 7mm thick extruded profile
- Finishes:
  - Paint: Foundation, Accent, Mica

desk basics – landscape

Landscape desks provide a wall-mounted desking solution that maximizes usable space in an environment and hides unnecessary cables.

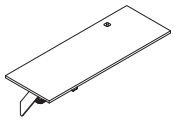


- Available fixed or height-adjustable
- Available single or double sided within a 4" thick Altos Landscape wall
- Depths available:
  - 24" (nominal)
  - 30" (nominal)
- Widths available include 60" - 84" (nominal) in 6" increments
- Available with desk-mounted Power / USB / Data options
- Worksurface Edges include:
  - Flat
  - Knife
  - Eased



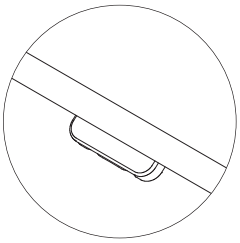
Landscape Desk Fixed (FLDFX)

- Heights available include:
  - 29"
  - 42"
- Leveling capability independent from the wall
- The back of the cantilever allows for electrical routing into the wall



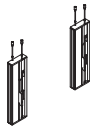
Landscape Desk Height-Adjustable (FLDHA)

- Height-adjustable leveling range is 28" - 44"
- E-chain allows for electrical routing into the wall



Landscape Desk Switch

- Intuitive form and function (lift up to move desk up, push down to move desk down)
- Memory positions
- Support / instructional content available on the Linak website: www.linak.com



Landscape In-Wall Connection for Height-Adjustable Desk (FLDHAC)

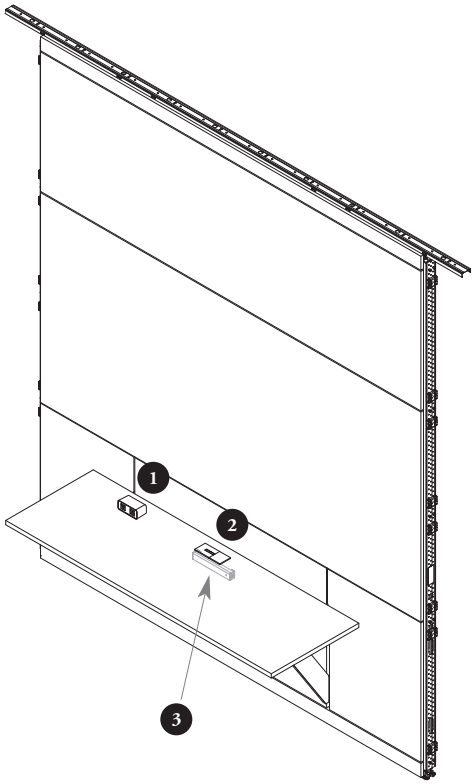
- Provides connection needed from Landscape Height-Adjustable Desk (FLDHA) to Landscape Desk Frame (FLDF)
- Available for single or double sided applications

Landscape In-Wall Connection for Fixed Desk (FLDFXC)

- Provides connection needed from Landscape Fixed Desk (FLDFX) to Landscape Desk Frame (FLDF)
- Available for single or double sided applications

desk accessory overview – landscape

The following electrical accessories are available on Landscape desks to provide desktop power and cable routing capabilities. For more details please see Lighting, Electrics & Communications section.



On-desk Accessories are available in Lighting, Electrics & Communications section:

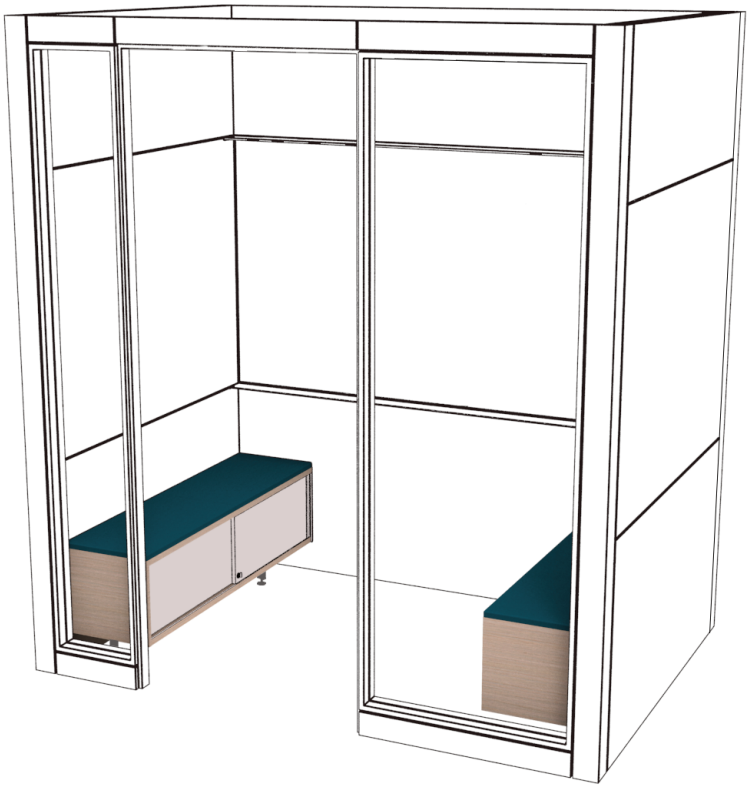
1 **Power Cube (EPWR):**
- Dual or Quad power cube available with power, USB or data options
- Available on left or right side of desk
- Power Cube and e-chain comes on the same specified location as the switch
- Appropriate cut out locations must be specified on Desk to accommodate On-desk Accessories

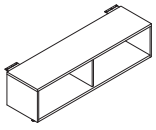
2 **Rectangular grommet (FLGR):**
- For cables routing to under-desk Power Rod (ELPR)
- Cut out accommodates Expansion grommet for Mast Monitor Arm
- Available centered on worksurface if center grommet cut out is specified

3 **Power Rod (ELPR)**
- For powering permanent devices under the desk (example: Monitors, Docking Stations)
- Available centered below desk

wall-mounted cabinet basics – landscape

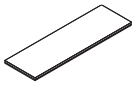
Landscape elevated cabinets provide a wall-mounted storage solution for temporary or personal storage. Elevated cabinets can be mounted to the 21" high functional rail only.





Landscape Wall-Mounted Sliding Door Cabinet (FLWCS) / Open Cabinet (FLWCO)

- Available 16" deep x 15" high
- Can be mounted in front of solid fascias only
- 30" - 60" wide in 6" increments
- Finishes:
  - Case: Seamless, Flintwood, Source Laminate
  - Fronts: Seamless, Flintwood, Source Laminate, Glass (Backpainted or Frosted)
  - Wall Mounting brackets: Painted (Foundation, Mica)
  - Legs painted Ebony



Fitted Seat Cushion (FLFC)

- Can be used on Landscape Cabinets as temporary guest seating
- 16" deep and 24" - 60" wide in 6" increments
- Available in Upholstery or COM Fabrics
- Fabric Directionality is railroad
