Answer Boundary Screens

Straight, Single-Connect For Use with Thin Trim Panels

Tip: Additional hardware upcharge is applied only when single-connect straight split style number is specified.

Tip: When specifying a boundary screen equal to or taller than an Answer panel, order a same height end-of-run junction for height of Answer panel with the omit trim option.

Tip: When attaching boundary screen to Answer panel with stacking segment, order a boundary screen, end-of-run junction, omit trim, add a change-of-height trim, and stacking junction.

Tip: When specifying a boundary screen shorter than Answer panel, order a same height end-of-run junction for height of Answer panel with the omit trim option, and order a change-of-height trim.

Tip: When specifying the paint finish for the bracket cover, select a finish that compliments the selected laminate or veneer finish.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: When specifying a split boundary screen, two screen widths will need to be specified.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

Answer Boundary Screens

L Return, Single-Connect For Use with Thin Trim Panels

Tip: Additional hardware upcharges are applied only when single-connect single-sided L return, or single-connect split L style numbers are specified.

Tip: When specifying a boundary screen equal to or taller than an Answer panel, order a same height end-of-run junction for height of Answer panel with the omit trim option.

Tip: When attaching boundary screen to Answer panel with stacking segment, order a boundary screen, end-of-run junction, omit trim, add a change-of-height trim, and stacking junction.

Tip: When specifying a boundary screen shorter than Answer panel, order a same height end-of-run junction for height of Answer panel with the omit trim option, and order a change-of-height trim.

Tip: When specifying the paint finish for the bracket cover, select a finish that compliments the selected laminate or veneer finish.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: When specifying a split L return boundary screen, four screen widths will need to be specified.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

Tip: Additional hardware upcharges are applied only when dual-connect single-sided L return, or dual-connect split L return style numbers are specified.

Tip: When specifying a boundary screen equal to or taller than an Answer panel, order a same height end-of-run junction for height of Answer panel with the omit trim option.

Tip: When attaching boundary screen to Answer panel with stacking segment, order a boundary screen, end-of-run junction, omit trim, add a change-of-height trim, and stacking junction.

Tip: When specifying a boundary screen shorter than Answer panel, order a same height end-of-run junction for height of Answer panel with the omit trim option, and order a change-of-height trim.

Tip: When specifying the paint finish for the bracket cover, select a finish that compliments the selected laminate or veneer finish.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: When specifying a split L return boundary screen, four screen widths will need to be specified.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

Base Horizontal Frame Packages—Square Trim

For Panel Buildups

Tip: You must order vertical junctions separately to complete your frame.

► Page 404

Tip: Specify omit top cap when adding a frameless glass screen to a panel or when ordering spanning top caps.

Tip: Remember to specify an optional change-of-height top cap on any panel in a change-of-height configuration.

Exception: The tallest panel in the configuration never needs a change-of-height top cap.

Tip: Remember to omit base trim(s) when using skins to the floor or when using an open base trim conversion kit.

Tip: Base cable tray cannot be used if omit base trim is selected for one or both sides of panel.

Tip: Remember to order skins to complete the panel.

Base Horizontal Frame Packages—Oval Trim

For Panel Buildups

Tip: You must order vertical junctions separately to complete your frame.

► Page 405

Tip: Remember to specify an optional shortened change-of-height top cap on any panel in a change-of-height configuration.

Exception: The tallest panel in the configuration never needs a shortened change-of-height top cap.

Tip: Remember to omit base trim(s) when using skins to the floor or when using an open base trim conversion kit.

Tip: Base cable tray cannot be used if omit base trim is selected for one or both sides of panel.

Tip: Remember to order skins to complete the panel.

► Page 442

Tip: Omit standard base trim and specify separate hardware base trim when accessing hardware power in the base.

Fabric Covered Panel Skins To The Floor

For Panel Buildups

Tip: Remember to omit base trim(s) on a horizontal frame package when using a skin to the floor.

Tip: 48"H fabric covered panel skins to the floor accommodate select fabrics in the vertical direction only.

Tip: 48"H and 60"H fabric covered panel skins accommodate fabric in the vertical direction only.

Tip: 72"W fabric covered panel skins accommodate fabric in the horizontal direction only.

Tip: For further information about fabric direction, see page 682.

Tip: 30"H and 42"H skins only work on junctions manufactured on or after October 10, 2011.

Tip: When specifying skins, the total skin height will be 6" less than the panel height. Skins to the floor are indicated by an F suffix. Plan 6" shorter than panel height, but skins to the floor are taller in actual height to cover the base trim area.

► See Panel Buildups, page 18, for more information.

Steel Panel Skins

For Panel Buildups

Tip: Steel skins cannot accommodate power receptacles or communication outlets. Use the base or fabric skin for power access.

Tip: Horizontal beam and the back of the opposite skin is visible through a perforated skin.

Tip: 18"H and 30"H skins only work on junctions manufactured on or after October 10, 2011.

Tip: Data and modular receptacle cutouts are available on 24"H steel skins only.

Tip: Data cutout can be placed on the left or the right side of a steel beam skin. Data cutouts cannot be placed on both left and right side of steel beam skins.

Tip: Data cutout is an option under receptacle location. Specify data cutout location under the appropriate receptacle selection. Data cutout price is added to the receptacle cutout price.

Tip: On 24"W and 30"W steel skins, hardwire receptacle cutout option will always be with a centered hardwire cutout.

Tip: On 36"W and wider steel skins, hardwire receptacle cutout option will always come with a left and a right hardwire cutout.

Tip: No data or modular receptacle cutouts are available on 18"W steel skins.

Tip: Data or modular receptacle cutouts are NOT available on perforated or ribbed steel skins.

Steel To The Floor Skins

For Panel Buildups

Tip: Remember to omit base trim(s) on horizontal frame package when using a skin to the floor.

Tip: Steel skins cannot accommodate power receptacles or communication outlets. Use a fabric skin for power access.

Tip: 30"H skins only work on junctions manufactured on or after October 10, 2011.

Tip: When specifying skins, the total skin height will be 6" less than the panel height. Skins to the floor are indicated by an F suffix. Plan 6" shorter than panel height, but skins to the floor are taller in actual height to cover the base trim area.

► See Panel Buildups, page 18, for more information.

Tip: Data and modular receptacle cutouts are available on 24"H steel skins only.

Tip: Data cutouts can be placed on the left or the right side of a steel beam skin. Data cutouts cannot be placed on both left and right side of steel beam skins.

Tip: Data cutout is an option under receptacle location. Specify data cutout location under the appropriate receptacle selection. Data cutout price is added to the receptacle cutout price.

Tip: On 24"W and 30"W steel skins, hardwire receptacle cutout option will always be with a centered hardwire cutout.

Tip: On 36"W and wider steel skins, hardwire receptacle cutout option will always come with a left and a right hardwire cutout.

Sliding Panel Doors

Tip: The sliding door is located outside of the panel system when installed in the standard position.

Tip: Door infill is standard in ribbed translucent plastic.

Tip: The standard door is handed and non-locking. When a lock option is specified, the lock will be on the trail end of the door. The illustration above shows a left-handed sliding door. If a lock option is specified, the lock will be on the right (trail) side of the door.

Tip: Width of host panel should always be equal to the width of sliding door.

Tip: Height of host and receiving panels must match height of door.

Tip: Remember to specify lock cylinder and key.
 ▶ Lock Cylinders, page 694.

Tip: When attaching the sliding door to an Answer panel, a junction stabilizer bracket is available for added rigidity to the host panel. If a host and/or receiving panel run exceeds 4', a junction stabilizer bracket must be applied to the door end of the host and/or receiving panel run. On long runs, apply a junction stabilizer bracket or perpendicular panel every 8'.

Straight Worksurfaces

High-Pressure Laminate or Wood Veneer

Tip: Supports for freestanding and panel-mounted applications must be specified separately.

Tip: Long work surface spans require additional support.

► See understanding section for details, page 216

For wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number. (For example, US1830 becomes US1830SW for wood with square edge profile.)

Tip: Power and data access door and tray is ordered separately to be used with cutout.

► See page 552

► See page 218 for work surface size availability matrix.

Exception: 48"W work surface with soft edge used with FrameOne post leg has some limitations.

► See page 219 for connections.

Tip: Scallop will be omitted if you select power access door.

Tip: Power access door option includes the power access door and a cutout for the door in the work surface.

Tip: Power access door option is only available on straight work surfaces with 1/2" cord drop.

Straight Worksurfaces with Soft Edge Profile

High-Pressure Laminate or Wood Veneer

Tip: Supports for freestanding and panel-mounted applications must be specified separately.

► Need help? Product details, page 214

Standard Includes

- Worksurface: High-Pressure Laminate price group 1 or wood group 1 veneer
- Laminate worksurface:
 - Plastic antimicrobial soft edge profile centered on worksurface
 - Plastic 3 mm edge profile on balance of front edge
 - Plastic flat profile on side and back edges
- Wood worksurface:
 - Wood 3 mm edge profile on front edge
 - Plastic antimicrobial soft edge centered on worksurface
 - Matching veneer flat profile on side and back edges
- Cable scallop on back edge

Required to Specify

- 1 Style number with appropriate edge profile suffix
WS Wood with square edge
► See edge profiles below.
- 2 High-Pressure Laminate or wood color number for worksurface
- 3 Plastic color number for front edge on laminate worksurface, if selected
- 4 Options, if selected (see below)
► See *Surface Materials*, page 676.

For wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Long worksurface spans require additional support.
► See understanding section for details, page 216

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number. (For example, US2448S becomes US2448SWS for wood with square edge profile.)

Tip: Power and data access door and tray is ordered separately to be used with cutout.

► See page 218 for worksurface size availability matrix.

Standard Includes

- Worksurface: High-Pressure Laminate price group 1 or wood group 1 veneer
- Laminate worksurface:
 - Plastic antimicrobial soft edge profile centered on worksurface
 - Plastic 3 mm edge profile on front edge
 - Plastic default flat profile on side and back edges
- Wood worksurface:
 - Plastic antimicrobial soft edge centered on worksurface
 - Wood square edge profile on front edge
 - Matching veneer flat profile on side and back edges
- Depth: 18"D – 36"D
- Width: 18"W – 120"W

Required to Specify

- 1 Style number
 - 2 Worksurface size type (see below under Required Selections)
 - 3 Depth (see below under Required Selections)
 - 4 Width (see below under Required Selections)
 - 5 User edge profile (see below)
 - 6 High-Pressure Laminate or wood color number for worksurface
 - 7 Plastic color number for front edge on laminate worksurface, if selected
 - 8 Options, if selected (see below)
- See *Surface Materials*, page 676

Tip: Long worksurface spans require additional support.

Transition Worksurfaces

High-Pressure Laminate or Wood Veneer

Tip: Illustration above shows a left-hand worksurface.

Tip: Supports for freestanding and panel-mounted applications must be specified separately.

For wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Long worksurface spans require additional support.
► See understanding section for details, page 216

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number. (For example, UT2136L becomes UT2136LSW for wood with square edge profile.)

Divisio Side Screen

Tip: The Divisio side screen can be used on any 3/4"- to 1 1/2"-thick worksurface.

Tip: The Divisio side screen has an overhang of 8". This is important when planning for returns or storage.

Tip: The Divisio side screen weighs approximately 14 1/2 pounds. Take this into consideration when planning for use on height-adjustable workspaces.

Tip: The Divisio side screen is intended for use on the front of a worksurface.

Tip: The Divisio side screen does not work on knife edge profiles.

Note: Divisio side screen is included here to simplify your planning. It may have different pricing terms than other products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/ EMEA – Europe, Middle East, and Africa/ APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the Surface Materials Reference Manual. Additional details, like product approvals by geography and finish number conversions, can also be found in the Surface Materials Reference Manual or see steelcase.com/surface-materials under the Select Surface section.

Custom Surfaces**Open Line Laminate (OLL)**

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate on Universal worksurfaces and Universal Storage tops, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Wood

Applies to:

- Universal worksurfaces and tables—wood veneer
- Answer pedestal tops and fronts
- High-Density storage
- Universal storage tops and fronts
- Wood skins and trims
- Infills for FrameOne legs

Tip: Wood is not offered as a finish on the value package for High-Density storage cases.

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Tip: Answer panel wood trims are only available with quarter-cut finishes with the exception of maple finishes. Maple on wood trims is only available with flat-cut finishes. For ordering simplicity, both flat-cut and quarter-cut finishes can be specified on panel trims. However, for all finishes except maple, if a flat-cut finish is selected, the trims will have the coordinating quarter-cut finish. For maple finishes, if quarter-cut is selected, the trims will have the coordinating flat-cut finish. Blending panel trims with other wood products that have flat-cut finishes may be visually acceptable for most applications. If a more exact match is desired for non-maple finishes, please specify quarter-cut finishes for the entire project. If a more exact match is desired for maple finishes, please specify flat-cut finishes for the entire project.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surfaces program and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as part of our Select Surfaces program, with Wood Group 1 pricing.

Composite veneers are not available on Answer trims.

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesce standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Lock and Keying for Universal Steel Storage Products	694

Lock and Keying for Universal Steel Storage Products and High-Density Storage

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.
Exception: Individual locking drawers are only available with field-installed locks.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available—the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.
Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices

are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).
Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key Random

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.
Tip: Designate the quantity per key number in your specification.
▶ See example at right.

Key Specific

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Key Consecutive

Example of a typical lock cylinder specification is shown below:
