Mr. Brian McCarty
Technical Supervisor – Clinical Laboratory
University of Mississippi Medical Center
2500 N. State Street
Jackson, MS 39216
SENT VIA EMAIL: BRMccarty@umc.edu

Dear Mr. McCarty,

QML is a proprietary, point of care ("POC") data management and interface management system
that is installed at University of Mississippi Medical Center ("UMMC"). While UMMC has already
purchased the core components of the QML system, it is our understanding that UMMC now wishes
to add various TELCOR device drivers in order to interface with CLINITEK Connect at its
Hattiesburg, Gulf Coast Peds as well iSTAT DE, NovaNet StatStrip Glucose and CLINITEK Connect
at its Belzoni Clinic. Because QML and the related drivers are products proprietary to TELCOR, they
may be purchased only from, and supported by, TELCOR.

Please contact me if you require any further explanation.

Best Regards,

Alicia Anderson
