

BARE BONES®

No-Rinse / No Scrub Liquifying Stripper

DESCRIPTION

A 55% active speed stripper that easily cuts through multi-layers of burnished floor finish. This "true" no-rinse stripper does not contain potassium hydroxide or sodium hydroxide yet is the fastest working liquifier on the market. Low foaming, no scrub and no rinse features make this product a must for all professional floor care systems.

PRODUCT FEATURES / BENEFITS

- Low foaming / Can be used through automatic scrubbers
- Contains no potassium or sodium hydroxide / Safe for personnel & flooring
- Requires no rinsing / Saves time by eliminating neutralizing and rinsing
- No scrubbing machine needed / Reduces equipment costs & can be used in hard to get to places
- 55% Active / High use dilution for greater economy

DIRECTIONS FOR USE

For the rapid removal of all floor finishes and waxes from resilient flooring including: vinyl, vinyl asbestos, vinyl composition, asphalt, linoleum, and rubber tiles. Also ideal for finished non-resilients such as: terrazzo, marble, ceramic, quarry tile, ceramic, quarry tile, concrete, and poured epoxy flooring. Although excellent for any type of equipment, greatest savings are realized when using automatic scrubbing equipment.

Dilute **BARE BONES®** following dilution recommendations below. Dilute using cold or mildly warm water only.

Light/Normal Buildup: 8 oz per gallon of water (1:16)

Heavy Buildup (Burnished): 21 oz per gallon of water (1:5)

Mop/Wet Vacuum Stripping System: Apply liberally with a mop to an area small enough so as not to allow the product to

dry and allow to stand for 3 to 5 minutes. Agitate with a mop and remove solution and old finish with a wet vacuum. Allow floor to dry thoroughly and apply new finish as directed by manufacturer. If complete stripping is not accomplished repeat the above procedure before re-application of recommended NCL Floor Finish.

Floor Machine Stripping System: Allow to stand for 3 to 5 minutes, scrub with a rotary floor machine or automatic scrubber equipped with stripping pads. Remove solution and old finish with a wet vacuum and allow floor to dry completely. If desired, a rinsing step can be added. Apply recommended NCL Floor Finish as per instructions.

Note: As some asphalt tiles may be damaged by prolonged soaking in concentrated strippers, a spot test is recommended before general use.
