

Roman Chair

X020101

Black R100

Slate Blue R103

Blue Gray R104

ABOUT

For intense environments, the Roman chair stands up to much more than the average wear and tear. A one-piece injection molded frame composed of high-impact polypropylene creates the perfect solution for correctional and behavioral health facilities. Additional features include an ergonomic low back rest that resists leaning and rocking as well as the ability to be bolted-down. Roman chairs are rated at a 1500 lb static load with a 300 lb recommended weight capacity and pass the Cal TB133 burn test. Choose from three standard colors.

46" W 29" D 30" H

Sofa
L280103 Shown w/ Putty Cushions
67.5" W 29" D 30" H

ABOUT

Designed for extreme environments, the Integrity Lounge Series stands up to abuse and harsh treatment. The Integrity features an integrated cushion system made of durable PVC filled with dense polyurethane foam. Heavy-gauge steel tubes run through the cushions and into the butcher block end panels, creating a virtually indestructable frame. Flow-thru Rotomold cushions help to avoid accumulation of liquids or debris as well as the hiding of contraband.

Rear View

Enclosed Base

ABOUT

The Oasis Lounger is the newest collaboration between Blockhouse Furniture and a Behavioral Healthcare partner with a specific need. The Oasis Lounger was developed for patient in-take areas as a safer alternative to a recliner. Where recliners can be effective in the appropriate environment, they can also present safety risks to the patient. The Oasis Lounger shares similar ergonomic features without the moving parts of a recliner.
