

New plaque designs in laminates or acrylics!

These new designs are available in our standard acrylic finishes or in many of today's popular laminate finishes. The laminates are backed with black gloss acrylic for a 1/4" thick, high quality look both front and back.

The plaques are available with our Dot mount option, primarily intended for panel workstations, or without the Dot mount as a plaque only with an adhesive, wall application for private offices.

The plaque only option, without the Dot mount, is only offered in our opaque finishes or in laminate finishes. These are also offered as ADA compliant with tactile lettering and braille.

Look to Appenx.... to meet or exceed your signage requirements.
