

Drop Lens Signage Office/Workstation

Doesn't get any simpler than this!

A drop-in 3/8" thick simulated glass lens and an anodized, aluminum housing with minimum reveal at the bottom and the two sides. The lens simply slides up to remove the graphic insert.

These signs come with mounting options that meet every installation challenge. Appenx has worked with manufacturers, contract furniture dealers and end users to develop specialized mounting options beyond our standard offering listed on this product sheet. Please call us if you have a unique application.

Sizes are limited to the size options shown on this product sheet.

Optional Modules

Drop-in tactile and sliding window modules can be easily added.

Look to Appenx.... to meet or exceed your signage requirements.
