BuzziCactus
— by Sas Adriaenssens

Free standing sound absorbing screen
Do you need privacy, quiet or protection?
The BuzziCactus is a charming room divider
that combines no less than three factors: sound
absorption, design and a surface you can stick pins
onto. Thanks to its striking shape and color you can
make a statement at home or at the office. Put your
BuzziCactus in direct sunlight – it deserves to be seen!

BuzziDonut
— by BuzziSpace Studio

Sound absorbing panel with central hole
A round, sound absorbing panel with a distinctive central hole that gives it its tasty name. The sleek round form, standardly upholstered or finished off with a 3D print, is available in all the colors of the BuzziSpace spectrum. The BuzziDonut improves the acoustic qualities of a space.
BuzziFalls
— by Sas Adriaenssens

A playful space divider in BuzziFelt

To divide a space and create some privacy, BuzziFalls is a playful variation in our acoustic solutions range. These strips are made out of BuzziFelt with cut out shapes in various patterns from organics to geometrics to city skylines. This design is a playful solution to regulate sounds and create smaller areas in big spaces.

The BuzziFalls Rail enables BuzziFalls to be slid with ease — creating movable room dividers that shift from private to public space. Running on a single three-meter track, panels slide from left to right. To create the effect of sliding doors, install two layers of parallel tracks for the rails. BuzziFalls can be attached directly to the surface of the track rail or suspended and exists in a black or white color.

BuzziFrio
— by BuzziSpace Studio

Set of three acoustic panels
Fresh mountain air would work wonders on office workers, but sadly bringing all that air into the city to ventilate workspaces would be quite a challenge. BuzziSpace has the next best thing. The shape of the BuzziFrio Machu and BuzziFrio Pichu room dividers recalls the rocky mountains of Peru, thus visually transforming an office space into a wide-open landscape. The playful shapes bring a touch of humor to the office, a defining trait of BuzziSpace.

As BuzziFrio consists of three panels set closely together, it has a large surface area that enables it to effectively regulate sound in a space. BuzziFrio is available in the standard BuzziSpace fabrics and can also be covered with fabrics from selected Kvadrat collections.

BuzziPleat
— by 13&9 Design

A series of architectural solutions by 13&9
The BuzziPleat delivers light and sound control with architectural edge. This series reinterprets ancient techniques used in fashion design, like smocking and pleating, to create large-scale, yet lightweight sculptural forms, made of sound-absorbing BuzziFelt.

Architectural folds maximize surface area, delivering exceptional acoustic performance. The hanging acoustic pendants can be configured with or without a light source, to marry sound control and illumination in one multi-purpose product.

BuzziScreen
— by Sas Adriaenssens

Sound absorbing dividing screen
The folding screen has come back into fashion with a bang! The BuzziScreen is a contemporary take on the flexible room divider with all sorts of advantages. For example, it can be extended infinitely: the handy recycled zipper system makes it easy for you to add panels. Just like with other BuzziSpace products, you can pin objects, photos or letters to the screen, and of course it works as sound absorption as well. Divide your office or room however you want, wherever you want!

BuzziScreen Mix
— by Sas Adriaenssens

Sound absorbing sound screen with different heights
The BuzziScreen Mix combines different heights and fabrics to vibrant effect. Alongside, the regular BuzziSpace fabrics (and select collections by Kvadrat) give a great edge to the end result. Add industrial zippers and this is not your average room divider, but a true designer piece. Of course, this room divider wouldn't be BuzziSpace if it didn't have acoustic qualities.
