Base diameter	15-1/2"
Tabletop diameter	18"
Overall height	27"

DIMENSIONS

STATEMENT OF LINE

CTBL

Tabletop
Tabletops are18" diameter and consist of $^3/_4$" thick high-density 45 lb particleboard core with a .03" thick high-pressure laminate top and a .028" thick phenolic backer (bottom). The table edge is 2 mm polypropylene (73P) and is available in a variety of colors. See KI Color Addendum for laminate and edge finish options.

Base Frame
The table base frame is constructed of welded steel. The spider plate is 14-gauge, base is $^3/_8$" thick and the vertical post is $1^1/_2$" diameter by .083" thick wall. The base frame is finished in electrostatically applied hybrid powdercoating. The coating is then fused and cured in a baking oven to form a smooth, continuous finish that is chemical-resistant, hard, tough and mar-resistant. Powder-coated paint is available in all standard KI paint colors except for chrome. See KI Color Addendum for complete options.

Glides
Six 1" diameter self-adhesive white polyurethane glides are recessed into machined pockets within the steel base.

Table Assembly
Tabletops are attached to the base frame using seven #12 x $^3/_4$" Phillips truss head screws. Tables are shipped completely assembled with a packaged weight of 23 lbs. Assembled tables without packaging weigh $17^1/_2$" lbs.

TECHNICAL SPECIFICATIONS

Fixed-Height Table - Dual-Post Cantilever

The fixed-height table is offered in 26" or 29" tabletop heights. The base frame is constructed of welded $1\frac{1}{2}$" diameter, 16-gauge steel tubing with a top mounting plate of 7-gauge (.179" thick) steel and a $\frac{3}{8}$" (10 mm) thick C-shaped steel base. A $\frac{1}{2}$" diameter welded steel cross brace member stabilizes the entire frame.

Adjustable-Height Table - Dual-Post Cantilever

The adjustable-height table raises and lowers in 1" locking increments, between 25" and 30" overall table height. Adjustability is controlled by a lever assembly that protrudes from the base, underneath the tabletop. When compressed, the lever assembly unlocks the upper frame weldment from the lower frame weldment, allowing height adjustment that is assisted by a pneumatic cylinder enclosed within one of the vertical leg tubes. When the tabletop is positioned at the desired height, the lever can be released, and the bottom of the lever assembly locks into one of six height positioning holes in one of the lower leg tubes. Delrin bushings are installed between the tubes of the upper and lower frames, allowing for smooth adjustment. The outer portion of the lever assembly ships loose and is secured to the inner portion of the lever with a hex jam nut during assembly of the table units.

The upper frame of the adjustable-height table is constructed with two $1\frac{1}{4}$" diameter, 14-gauge steel tubes and a 7-gauge (.179" thick) steel mounting plate, all welded together. The lower frame of the adjustable-height table is constructed with two $1\frac{1}{2}$" diameter, 16-gauge steel tubes, a 7-gauge (.179") steel mounting plate, and a $\frac{3}{8}$" (10 mm) thick C-shaped steel base, all welded together. The height adjustment lever is $\frac{5}{16}$" diameter welded steel. A $\frac{1}{2}$" diameter welded steel cross brace member stabilizes the entire frame.

Base Finish

Base frames are powder-coat painted, and may be specified in all standard KI colors. Chrome-plated finish is not available. See KI Color Addendum for color options offered.

Table Surfaces

Table surfaces are $\frac{3}{4}$" thick high-density 45 lb particle board core with .03" thick high pressure laminate and .028" thick phenolic backer (bottom). The table edge is 2 mm polypropylene (73P) and is available in a variety of colors. See KI Color Addendum for laminate and edge finish options.

Glides

Seven 1" diameter self-adhesive white polyurethane glides are recessed into machined pockets within the steel base.

Table Assembly

The tabletop is secured to the base using seven #12 x $\frac{3}{4}$" Phillips truss head screws. All tabletops are shipped separately from bases.

FINISH INFORMATION

ADDITIONAL LAMINATE OFFERING
Additional laminates, beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.
