

caliber

stacking chair for behavioral health

caliber

Caliber is a one-piece, injection-molded polypropylene stackable chair designed for intensive use environments. The seamless construction, leg design and the span of the chair work together to provide incredible strength. Yet it is lightweight, weighing only 8 lbs.

Features

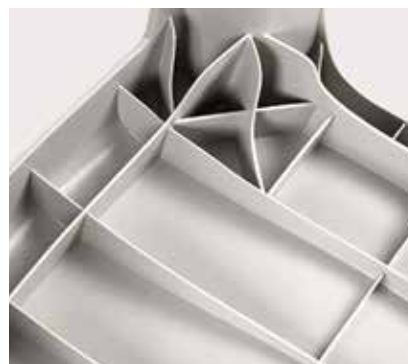

- Weight rating: 300 lb.
- Cal TB 133 compliant
- Stain-resistant, seamless and easy to clean

Options

- Custom colors available for larger projects
- Can be bolted to floor or wall
- Chair dolly available for transport

features

Ultra durable design passes
300 lb dynamic load test

Low back design more resistant to tipping or rocking

Feet bottoms feature pilot hole indicator to facilitate bolt down option

Dimensions:
