Customer’s Own Material ■  
Specifications Form  
January 2023

How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor’s website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written spec ifying the direction the upholstery is to be applied.

Seating upholstery requiring specific positioning of intricate patterns or patterns repeats on seats and backrests, will need a Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

C.O.M. must be supplied in continuous yardage.

Yardage requirements listed in price list are based on plain goods 54” wide. Fabrics less than 54” wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. Consult matrix below for additional yardage needed.

**C.O.M. INCREASE MATRIX** (yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or K.O.M. upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7” REPEAT	8”–13” REPEAT	14”-21” REPEAT	22”-27” REPEAT	28”-33” REPEAT	34”-40” REPEAT	41”-48” REPEAT
54”	0	20%	25%	30%	45%	55%	70%	80%
51”-53”	15%	25%	30%	35%	50%	60%	80%	90%
48”-50”	20%	30%	35%	40%	55%	65%	85%	95%
45”-47”	30%	45%	50%	55%	60%	80%	90%	100%
36”-44”	50%	65%	70%	75%	80%	100%	110%	120%

Fabric with double repeat: If using a fabric with a double repeat, please follow this formula: take the total amount of the larger and half of the smaller repeat; add together to find the correct overall repeat. Example: 10” vertical with 14” horizontal would be 14+5=19.

If fabric comes in on multiple rolls, one additional yard per roll needs to be added to the yardage requirement.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet or yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

Production

Customer’s upholstery must be approved prior to acceptance for production.

After approval, a memo swatch of the C.O.M. from the textile distributor must accompany the order. KI assumes no responsibility for wear, defects, or performance of C.O.M. or K.O.M. upholstery.

C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C.O.M. Shipping Location listing for the correct facility address by product.

All C.O.M. must be labeled as follows:

1. Name and address
2. Your purchase order number
3. Our style number to which fabric is to be applied
4. Supplier name and fabric name, number, and color

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric samples to the manufacturing facility. See KI C.O.M. Shipping Location listing for the correct facility address by product.

ALL C.O.M. Shipments must be prepaid. Collect shipments will be refused.

Treated Materials

If C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changed Orders

KI assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer’s responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order

TECHNICAL SPECIFICATIONS

Upholstered Seat & Backrest

Upholstered Seat & Back - Lounge Chair & High Back Lounge Chair

Backrest foam is 1<sup>3</sup>/<sub>16</sub>" thick, is glued to a continuous curved Birch plywood structure, then upholstered using glue. Seat foam is 2<sup>1</sup>/<sub>2</sub>" thick, is glued to the seat structure, then upholstered using heat activated glue.

Upholstered Seat & Backrest - Stool

Foam is 2" thick single piece of polyurethane injection molded over a curved metal structure, then upholstered using heat activated glue.

Frames

Swivel Frame (with glides or casters)

Swivel frame bases are made of cast aluminum. A formed steel plate attaches to the underside of the seat using four fasteners. A metal support column connects the seat plate and the aluminum base, allowing for free rotation, utilizing a plastic bushing at the support column and base. Swivel frame with casters includes an additional black, plastic cap covering the support column. Swivel frames with glides and swivel frames with casters are geometrically different and not interchangeable without additional parts. Casters cannot be interchanged with felt glides and glides cannot be interchanged with casters on swivel frames.

Swivel Frame Finishes

Cast aluminum frames are either polished or finished with baked-on powder-coat paint in select KI standard finishes.

Wood Leg Frame

Plywood frame legs are made of 1<sup>3</sup>/<sub>16</sub>" Birch plywood and are clear coated or stained Black. A steel plate connects to the chair and is welded to curved metal wire, which is then inserted, glued and fastened to the plywood legs.

Sled Base Frame

Frame is formed from a <sup>5</sup>/<sub>8</sub>" square steel tubing and welded. Frames are finished with baked-on electrostatically-applied 30-degree gloss epoxy powder-coat black paint. Sled bases come equipped with plastic glides. Sled base chairs do not stack.

4-Leg Stool Frame

4-Leg Stool frames are available in 4-leg frames, and in 24" and 30" seat heights. Frames are made from 25 mm thick tubular steel with a reinforcing footring made of 12 mm steel wire welded to the tubular frame. Frames are finished with baked-on electrostatically-applied 30-degree gloss epoxy powder-coat black paint. Stool frames come equipped with either plastic or felt glides. Stools do not stack.

Glides

Swivel frame option is available with white felt glides. Wood frame option includes black plastic glides. Stool is available with either black plastic or black felt glides. Sled base frame option includes black plastic glides.

Casters

Swivel frame option is available with 50 mm hooded casters. Casters are always soft-wheeled (for hard floors), are field-replaceable and only available in Black.

Table Frame

Plywood frame legs are made of 1<sup>3</sup>/<sub>16</sub>" Birch plywood and are clear-coated or stained black. A steel plate connects to the table underside and is welded to curved metal wire, which is then inserted, glued and fastened to the plywood legs.

Table Surface

Tables are offered in <sup>3</sup>/<sub>4</sub>" thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. Total thickness of top is <sup>7</sup>/<sub>8</sub>". Tops are available with a 2 mm (73P) edge.

Compliance

Seating passes BIFMA X5.4-2012 and KI's internal standard testing for 300-pound capacity.
