CANOPY

Designed by Primo Orpilla

If there is a single direction to the many currents of innovation that have flowed through workplace design in the last few years, it is the search for a workplace that liberates people to work the way they want. Open plan freed the office worker from the confinement and isolation of cubicle farms, but the limitations of open plan are now beginning to surface, and the need for a workstation adaptable to a variety of work styles is apparent.

Canopy meets that need.

Conceived by Primo Orpilla of Studio O+A and developed with the design team at Kimball, Canopy moves beyond conventional open plan benching to give each user a versatile work tool that changes according to the needs of the moment. While this product will fit into any open plan, it may be modified to give the user more acoustical and visual privacy as needed. Canopy's height adjustment capability—a discreet mechanism that allows the user to raise or lower the desk without disturbing colleagues—is both a social and an ergonomic advance.

Variety is a key feature of the concept—the balance between collective and individual needs, collaborative and solitary work, the dictates of the morning and those of the afternoon. Canopy seamlessly combines utility with unexpected materials—exposed plywood edges, colorful work tools, wood truss accents, natural wool felt and a unique bungee display system—to create spaces that not only function, but inspire.

“Canopy’s flexibility, high functionality and malleability was designed to address today’s demanding workplace needs. It is a response to how we work today. With its simple assortment of accessories, it gives users a high degree of customization. Canopy is an incredibly adaptable system that can be configured to meet the ever-changing needs of a wide range of end users.”

—Primo Orpilla

ACTIVATED SPACE

Workspace is typically planned in standard size modules. Canopy fits a range of options within those parameters—heads-down, conference, small-team huddle—and makes them part of a single, customizable system.

A PLAN IN MOTION

Some people like to sit and work. Others like to stand. Some work best in an open team situation. Others need a sense of visual privacy. Everyone works differently at different stages of a project and different times of the day. Canopy accommodates those variations.

ENERGIZED ENVIRONMENT

Canopy's unique offering of materials encourages the use of unexpected texture and color in the workspace. With Canopy, creating an invigorating environment that expresses company culture while allowing personal space choices is simple.

THOUGHT STARTERS

ALL-IN-ONE

Unite workstations and media walls to create a compact destination for solo work, team huddles, and active collaboration.

FOUR-PACK

Symmetrical and space-efficient, this configuration combines work areas and monitors, giving people a balance of autonomy and team connection.

THE LONG RUN

Mixing booths and media walls ties teams together and liberates members to work where they want, when they want.

CLASSIC BENCH

Ideal for active project teams, Canopy thrives in the open setting. It's made to accommodate a wide range of people, postures, and work styles.

SIX-PACK

Create an inward-facing hive, where tables move up and down and people have plenty of privacy while working toward a common goal.

BACK IN FIVE

While encouraging movement, this configuration gives each person a home base, plus a freestanding option for collaborative retreats.
