FUN COLLABORATIVE FLEXIBLE

Discover is furniture for a new generation of classroom. According to current research, classroom design really does make a difference: students whose classrooms offer visual stimulation and lots of furniture choices tend to retain more information and score higher on tests than students in traditional classrooms! With that in mind, our designers created a line of chairs, tables, and desks in an inspiring range of colors and shapes. Using high-performance construction and materials, the Discover line works together to create a playful, durable, and flexible environment for today's students and tomorrow's.

REIMAGINE THE CLASSROOM

Life in the classroom changes by the hour and our interactive tables are designed to move with the class. From individual study to group projects to a full-class discussion, these durable, lightweight and playful tables support any activity and teaching style. With furniture that's this easy to move, teachers and students can create the classroom they want, whenever they want.

DISCOVER TABLES

Three collections designed to move

SPACE

Space tables work individually or combine with other shapes to create endless configurations

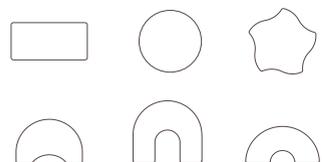

NEO

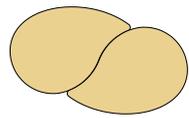

Neo tables work alone or combine to create engaging formations for group activities.

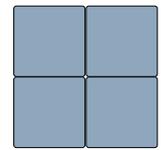

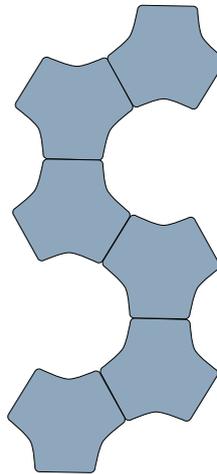

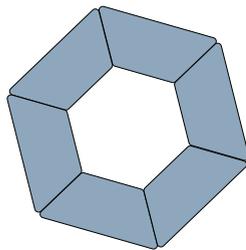

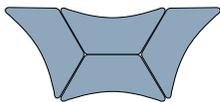

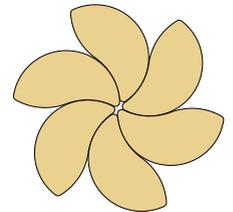

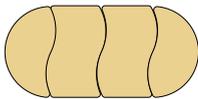

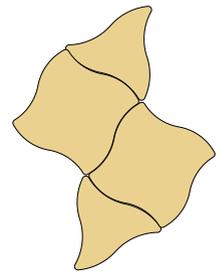

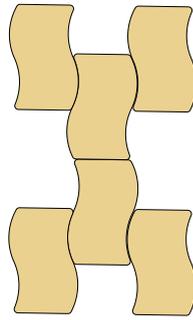

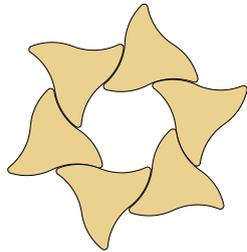

LEGACY

Legacy tables work individually to create a collaborative learning environment.

BUILT FOR MOVEMENT

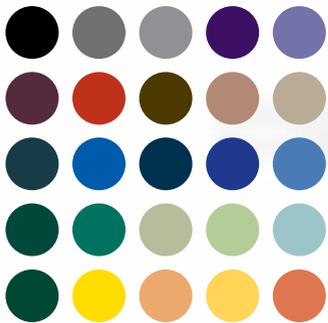

It used to be that students were told to quit wiggling. Now we know there's a direct connection between learning and movement. Children who are allowed to move in class—and even to chew gum—absorb more information and do better on tests than children who sit still. With this in mind, our chairs are designed with a durable polypropylene shell that provides a balance of flex and support for a range of movement and seating positions—even when class goes on forever. Gum may still be a no-no, but go ahead and wiggle!

COLOR THEIR WORLD

No more boring classrooms! Visual stimulation, including color, flexible configuration and natural light, gives students a big boost in performance compared to students in traditional school environments. The Discover line goes beyond neutrals and primaries to offer a range of sophisticated colors and combinations to engage and inspire a new generation of students.

AVAILABLE IN TWENTY-FIVE
POLYPROPYLENE COLORS:

PART OF A TEAM

From classroom to cafeteria, science lab to music room, Discover furniture outfits the entire school. Each individual piece is designed for maximum performance, while the contemporary design and color options work together to create a unified visual environment.

SIZED FOR EVERYONE

Pre-K to high school, ballerinas to football players: students come in all shapes and sizes. Discover seating is available in five different sizes to provide the right fit for every student.

A NEW
GENERATION
OF A
TRADITIONAL CLASSIC

STRUCTURE

Nesting scallops allow clean and secure stacking and the underside ribbed structure with rubber bumpers ensure cantilever frame chairs can rest on desks without damaging the top surface. One piece seat and back shell is held together on a robust metal frame structure with securely fastened rivets.
