To Whom it May Concern

Subject: Sole Source of SeaSonde® System Hardware and Software in United States

CODAR Ocean Sensors, Ltd. is a USA-based company founded in 1986 focused on high frequency (HF) radar technology for oceanographic applications. All of the SeaSonde® oceanographic HF radar system hardware and software are designed, manufactured, distributed, serviced and supported in the United States exclusively by CODAR Ocean Sensors, Ltd.

Each SeaSonde Radar Unit includes CODAR-developed patented technology allowing multiple SeaSondes along a coastal region to be operating simultaneously at same transmit frequency without mutual interference, a critical capability of the SeaSondes operating at same frequency along the U.S. Gulf Coast, and imperative for frequency management within the limited bands allowed by the FCC.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Laura Pederson", is written over a large, faint, light blue wave graphic that spans the bottom half of the page.

Laura Pederson
