DESCRIPTION: TAAC™ Structural PolyPanel includes fabric covered base stack and 1 painted metal glazed stack and/or 1 fabric stack. TAAC™ is a new construction offering tackable and acoustical properties. Panel has a painted steel top cap and wire management raceway with side covers and adjustable glides. **SPECIFY:** Product Number, Trim Finish, Base Trim Finish, Fabric Name, Glazing Trim Color, and Grade of fabric to be applied onto each stacker. **NOTE:** Panel to panel connectors available in DT (Dark Tone) only and must be ordered separately.

AO2 Fabric Panel & Glazed Stacker
with TAAC™ construction
non-powered base
(Smoked)

Note: Alternative stacker configurations and materials are available.

Note: For alternative pricing consider lower height panel with taco clip and screen design.

Panel has a painted steel top cap and wire management raceway with side covers and adjustable glides. Powered panels include appropriate size electrical distribution assembly (4-circuit/8 wire) and 2 electrical outlet covers. See electrical section for duplex receptacles.

SPECIFY: Product Number, Trim Finish, Base Trim Finish, Glazing Trim Color, Fabric Name, and Grade of fabric to be applied onto each stacker. **NOTE:** Panel to panel connectors available in DT (Dark Tone) only and must be ordered separately.

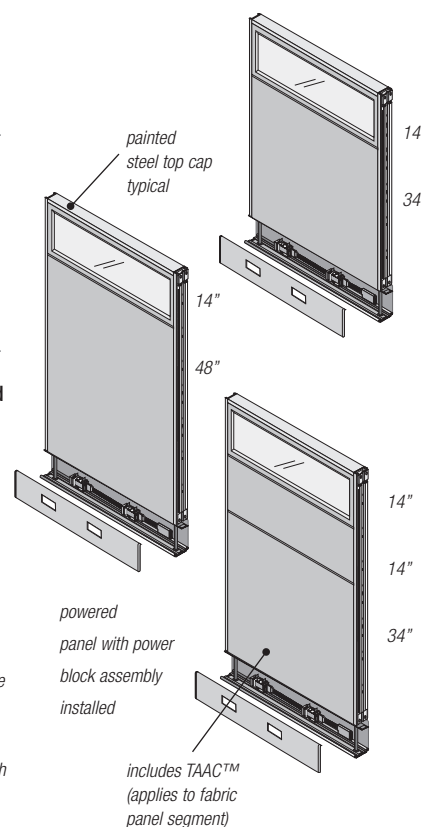

Note: Alternative stacker configurations and materials are available.

Note: For alternative pricing consider lower height panel with taco clip and screen design.

Nylon Toggler	UNP885.0100	\$2.00/ea.		
Toggler Anchor Bolt	UNP886.0300	\$.30/ea.		

DESCRIPTION: Wall hanger strips are used for mounting work surfaces and overhead storage units to walls. The finish standard is brushed aluminum. **DRYWALL INSTALLATION:** Compatico part number UNP885.0100 Nylon Toggler with part number UNP886.0300 Toggler Anchor Bolt or equivalent are recommended. Stud Installation: Use a standard no. 8 screw with flat head. Cement Block, Poured Walls, Brick: Use a minimum no. 8 (1½") sheet metal screw into anchors. **NOTE:** Wall Strips may be field painted without affecting the structural integrity. Walls must be structural and load bearing. For example the composite dry wall must be a minimum of 5/8" thick. Wood or metal studs must be nominal 4" x 2" and no greater than 24" separated and be tied into floor and ceilings. It is recommended to consult a qualified contractor for proper mounting and load limitation to assure all local construction codes/laws are met.
