## PRICE LIST

October 23, 2013
Updated March 31, 2023
800.424.2432

## How to Specify

As a standard procedure, KI applies seating upholstery as swatched by the textile distributor. Reference distributor's website. Upholstery that is required to be applied differently than is swatched, will need a Product Modification Request written specifying the direction the upholstery is to be applied.

Seating uphoistery requiring speciric positioning of intricate patterns or patterns repeats on seats and backrests, will need Product Modification Request written including a sketch noting the specific requirements, as in Diagram A.

When directional or patterned fabrics are used, they often require more yardage than solid colors.
C.O.M. must be supplied in continuous yardage.
C.O.M. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54 " wide nondirectional material. On larger orders, less material is required.

Leather hides must be a minimum of 50 square feet of usable material. The outer edges cannot be calculated as square feet yardage. To determine square footage, multiply unit yardage by 18 square feet to obtain the total square footage required per unit.
For exact production yardage requirements, call 1-800-424 2432, ext. 2707.

Production
Customer's upholstery must be approved prior to acceptance for production.
After approval, a memo swatch of the C.O.M. from the textile distributor must accompany the order. KI assumes no responsibility for wear, defects, or performance of C.O.M. upholstery.
C.O.M. not received into the appropriate facility 3 weeks prior to acknowledged delivery date may go on hold. See KI C O.M Shipping Location listing for the correct facility address by product.

## Testing

When KI requires testing, actual yardage to upholster one chair may be required. The C.O.M. Specialist will confirm model and fabric testing requirements when applicable.

Approved test samples will be applied to the order or will be held for 6 months. After 6 months, the sample will no longer be applied to your order. For all product testing, send fabric applied to your order. For all product testing, send fabric
samples to the manufacturing facility. See KI C.O.M. Shippin Location listing for the correct facility address by product.

All C.O.M. must be labeled with the KI product order number and customer purchase order number.

## Treated Materials

C.O.M. requires processing such as a stain resistance treatment or acrylic backing, it may shrink. To prevent delays in delivery or back ordering due to shrinkage, please have your processor verify measurement after processing and assure adequate yardage shipped.

## Split Orders

If a portion of the shipment which does not require C.O.M. application is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

## Excess Upholstery Material

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

## Cancelled or Changed Orders

Kl assumes no responsibility for extra C.O.M. due to a change of upholstery or cancellation of an order. If it the customer's responsibility to arrange for return of the material.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to request a split order

## TECHNICAL SPECIFICATIONS

## TECHNICAL SPECIFICATIONS

## Worksurfaces

Worksurfaces are constructed of $11 / 8$ " thick, 45 -pound density particleboard core. Adhered on别 bark. Total worksurface thickness is $11 / 4$ " thick. Edges are evenly adhered to the worksurface. Al worksurfaces are pre-drilled for support brackets and support legs.

Worksurfaces are offered in rectangular and extended corner shapes to support multiple configurations. Worksurface overhang will vary by configuration and screen use. 74P and Knife edge styles are available and optional rectilinear shaped grommets may be specified for most worksurfaces. Knife edge use is restricted to the edge facing the occupant.

## Frames

Steel Leg Frames
Frames are constructed of steel with a modular understructure consisting of end legs connected by transverse telescoping center support beam. Longer runs can be achieved by adding intermediate ross section of $19 / 1 "^{\prime \prime} \times 2^{3} / 8^{\prime \prime}$. Glides offer $7 / 8^{\prime \prime}$ " of height adjustment. Frames are offered in a variety of colors with a powder-coat finish.

## 29" Steel Leg - Standard Table Height

frames are offered for single-sided and dual-sided applications. Single-sided frames are offered in $24^{\prime \prime}$ or $30^{\prime \prime}$ depths and support fixed worksurfaces of like depth. Dual-sided frames are offered in $48^{\prime \prime}$ or $60^{\prime \prime}$ depths and support either fixed or sliding worksurfaces in $24^{\prime \prime}$ and $30^{\prime \prime}$ depths.

42 " Steel Leg - Cafe Height
Frames are offered for single-sided applications in $24^{\prime \prime}$ and 30 " depths. Fixed worksurfaces on $24^{\prime \prime}$ frames are also available with $42^{\prime \prime}$ or $48^{\prime \prime}$ depth teaming tops.

## Wood Leg Frames

Two hardwood end legs bolt to a steel apron which connects to a modular understructure, consisting of a modular transverse telescoping center support beam that connects to the next end wood leg frame apron. Longer dual-sided runs can be achieved by adding intermediate legs and upright. Glides offer $7 / s^{\prime \prime}$ of height adjustment. Frames are offered in a variety of powder-coat finishes for the understructure, and various stains for the wood component.

## 29" Wood Leg

Frames are offered for dual-sided benching applications, desks, and conference tables. Dual-sided benching frames support pairs of either fixed or sliding worksurfaces in $24^{\prime \prime}$ and $30^{\prime \prime}$ depths. Desks feature single-beam frames that support a single top. Desks are offered in depths frame, and support a single top. Conference tables in $48^{\prime \prime}$ and $60^{\prime \prime}$ depths are supported by dual-sided frame, and support a single top.

## Modesty Panels

Modesty panels are offered on single-sided benching, wood leg desks and 42" teaming table configurations. Location and placement of modesty panels vary by model. Panels are constructed of 14 -gauge $\left(.075^{\prime \prime}\right) \times 10^{\prime \prime}$ tall perforated steel.

## Privacy and Divider Screens

Did divider screens are constructed with an aluminum frame that provides superior strength and can be powdercoated in frame matching colors or accent colors. The standard top rail
provides a single slot that allows users to mount a paper management tool or an optional tool rail version containing three slots that allow mounting of addditional accessories Core material ootions version containing three slots that allow mounting of additional acces
 Privacy screens in $60^{\prime \prime}, 72^{\prime \prime}$ and $84^{\prime \prime}$ widths are also available in two equal segments to equally "divide worksurfaces. Privacy screens in $90^{" ~ a n d ~} 96^{\prime \prime}$ widths are available in two or three equal segments. The intersections of privacy screens are designed to attach divider scre
high) can be appropriately matched to the privacy screen height.

Privacy Screens (Non-Supporting)
Privacy screens are located flush with the bottom of the worksurfaces and run parallel with the support beam. For single-sided steel leg applications, mounting brackets for the privacy screens are attached
directly to the bottom of the worksurfaces. For steel and wood leg dual-sided applications, mounting directly to the bottom of the worksurfaces. For steel and wood leg dual-sided applications, mounting
brackets are attached to the support frame legs. Privac screens are not offered on wood leg desks wood leg conference tables. Divider screens can be attached to the ends and intersections of privac screens.
Supporting Privacy Screens
The second type of privacy screens are supporting privacy screens, which are designed to support elevated storage units and are only avaiable on steel and wood leg dual-sided applications. Materia insert options include acryic, acrlic markerboard and upholstered tackable fabric. Only 19 " high
supporting privacy screens are available which also accept 19 " high divider screens. Divider screen supporting privacy screens are avalable which also accept 19 " high divider screens. Divider screens
are attached to the vertical posts of the supporting privacy screen frame. Single frame supporting privacy screens are available from $36^{\prime \prime}$ "through $72^{\circ}$ " widths in $6^{\prime \prime}$ "increments. Double-frame supporting privacy screens are available in $60^{\prime \prime}, 72^{\prime \prime}, 84^{\prime \prime}$ and $96^{\prime \prime}$ widths. The bottom aluminum rail accepts attachment of the 810/6-2-2 or 810/4-4-2 rigid wireway.

Frameless Privacy Screens
The third type of privacy scre
The third type of privacy screens are frameless privacy screens, which are designed to span the frame spacing and are only available on steel and wood leg dual-sided applications. Material insert options
include translucent or colored acrylic, and clear or satin etched temper safety glass. Frameless privacy Inclue translucent or colored achyic, and clear or satin etched temper satety plass. Frameless privacy
screens are availale from $36^{\prime \prime}$ through $96^{\prime \prime}$ witths in $6^{\prime \prime}$ increments by $13^{\prime \prime}$ or 19 "heights. Divider

Divider Screens
Divider screens rest on top of the worksurface and run perpendicular to privacy screens. Divider screens attach to the privacy screens on one end and pare supported by worksyurface attachment brackets on the other end. When specified without privacy screens, divider screens attach to the
worksurfaces on both ends. Divider screens are offered in heights of $\mid 3^{\prime \prime}$, $\mid 9^{\prime \prime}$ and $\left.31\right|^{\prime \prime}$. Material worksurfaces on both ends. Divicer screens are offered in heights on
insert options include acrylic, acrylic markerboard and upholstered tackabble fabric. The 31 " high insert options incude acryic, acrylc markerboard and uphoistered tackable fabric.
divider screen is only offered with tackable fabric insert only. All divider screens can be specified for attachment to worksurfaces with 74 P and Knife edge styles.

## Center Steel Cubbies

Center steel cubbies are used on steel leg dual-sided supporting privacy screens. The center steel cubbies are available with or without sliding doors in $36^{\prime \prime}, 42^{\prime \prime}, 48^{\prime \prime}, 54^{\prime \prime}$, $60^{\prime \prime}$ and $72^{\prime \prime}$ widths by $13^{\prime \prime} / \prime \prime \prime$, epth. Cubbies are divided in the center with each haff open to the opposite direction. Center stee the powder-coated shell and door are separate options.

## Laminate Cubbies

Laminate cubbies are used on steel leg dual-sided supporting privacy screens. Laminate cubbies are constructed of $5 / /^{\prime}$ "particleboard core with low pressure laminate and self edges. The laminate cubbies are available in $36^{\prime \prime}, 42^{\prime \prime}, 48^{\prime \prime}, 54^{\prime \prime}, 60^{\prime \prime}$ and $72^{\prime \prime}$ widths by $15^{3} 3^{\prime \prime}$ deptht. Laminate cubbies have a meta divider in the center with each half open to the opposite direction. The color of the shell, edge and metal partition are separate options.

Connection Zone ${ }^{\circledR}$ Benching
Technical Specification

## TECHNICAL SPECIFICATIONS

## Laminate Shelves

-aminate shelves are used on steel leg dual-sided supporting privacy screens. The laminate shelves are constructed of $3 / 4$ " particleboard core with $73 P$ edges. They are available in $36^{\prime \prime} 42^{\prime \prime}, 48^{\prime \prime}, 54^{\prime \prime}, 60^{\prime \prime}$, $72^{\prime \prime}, 84^{\prime \prime}$ and $96^{\prime \prime}$ widths by $15^{3} / 4^{\prime \prime}$ depth. Surface and edge color are separate options.

## Electrical

810 IO-Wire Electrical System
The US standard electrical system available on Connection Zone Benching is an 81010 -wire underside of worksurfaces on steel leg single-sided applications. On steel and wood leg dual-sided applications, the wireway is located between worksurfaces and supported by a formed 14 -gauge steel channel supported on each end by the frame supports. Power is supplied through a $6-2-2$
configuration with six hot wires, two shared oversized neutral wires and two ground wires (one onfiguration with six hot wires, two shared oversized neutral wires and two ground wires (one our neutral and two ground wires (one isolated ground and one building ground). Rigid wireway pass power to 15 -amp receptacles. The 81010 -wire electrical system is ULListed per the UL 183 standard.

## Base Power Infeed

The UL 183 electrical system permits power infeed in either of two locations. Power may be brought in at any intermediate leg location, or it may enter at the end of any run, directly into the end of the cable trough. Optional metal panels are available to shroud the infeed in the

Top Power Infeed
Power and data may be brought into Connection Zone Benching through the use of a top power infeed. Top infeed assembly consists of a 10 ' extruded aluminum data and/or power pole, top cap and ceiling trim. The interior of the power pole features a septum for power and data cable

Center Work Rail
The center rail-supported electrical is necessary for dual-sided applications when supporting privac screens or frameless privacy screens are specified. The rigid wireways (which are identical to the
$810 / 6-2-2$ or $810 / 4-4-2$ components) are attached to the bottom aluminum rail on site. Infeeds, jumpers and receptacles are specified the same as with the standard electrical.

10-Wire Table-to-Table Power Jumpers
18 " power iumpers feature flexible metal conduit.

15 -amp receptacles for the modular electrical system feature injection molded components which snap fit into the rigid wireways.
Hardwired Electrical System
Receptacle enclosures are constructed of 18 -gauge galvanized metal in accordance with the National Rectrical Code. Widths are determined by table side height; height equals $2^{\prime} / 2^{\prime \prime}$, width equals $2{ }^{\prime \prime}$. Openings are for decor style receptacles and are located on one side for single-sided steel eg eg box. Base power infeeds are $3 / 4$ " diameter liquid-tight enclosed conduit. Top power infeeds are provided by field electrician and are run down the $10^{\prime}$ aluminum power/data pole.
ardwired electrical components are intended for use in installations where hardwiring is required by ocal code (Chicago).

Hardwired Receptacles
snap fit into the rigid wireways.

## TECHNICAL SPECIFICATION

## Electrical (cont.)

Pattern Electrical System
The Pattern electrical system is ETL Listed, evaluated to safety standard UL. 962A (USA) and CAN/ CSA-C22.2 No. 308 (Canada). It allows for a maximum up to ten distribution blocks and up to 50' of power jumpers from the power infeed (in either direction), whichever comes first. Pattern allows up
o eighteen power modules depending on table width, and connects to one 15 -amp power supply oighteen power modules depending on table width, and connects to one 15 -amp power supply
cord (power infeed). Pattern is a non-sequential system and the infeed is compatible with ground faut cord (Power infeed. Pattern is a non-sequential system and the infeed is compatible with ground
hterrupter (GF//GFCI) outtets. Power modules for Connection Zone are specified separately.

Pattern Power Distribution Blocks
Pattern power distributions blocks are standalone connectors, each containing four port locations. Distribution blocks are included with appropriate power jumper and power infeed kits, so do no need to be ordered separately. Distribution blocks bring the power infeed, power jumpers, and power modules together ant allow power to be efificienty supplied
block types are included with the Pattern system, grey and white.
Pattern Table-to-Table Power Jumper Kits
Patter appropriately sized power jumper. Jumpers are nonsequential and are keyed on each end to
connect between distribution blocks. Table-to-table power jumper kits are ordered separatel
according to layout configuration.

Pattern Power Infeed Kits
The Pattern power infeed kit must be ordered separately. Site configurations vary and will affect the number of power infeeds required. The number and size of tables, as well as the number of receptacles per table and amperage needs in each ganging configuration will determine the number
of power infeed kits required at any given installation. Infeeds can be installed anywhere in the run.
Kit comes with one grey Pattern power distribution block, one 12 " power jumper, one white 15 -amp plug on one end of the $108^{\prime \prime}$ cord and a keyed connector at the opposite end of the cord. A connection quick-release tool is also included to assist with disconnecting connector ends from
distribution blocks.

## Cable Management

Dual-sided applications: The cable tray is secured with a variable support bracket onto the understructure of the beam rails. The cable tray is evenly shared between the worksurfaces and is accessible from the top when specified with sliding worksurfaces. The cable tray is accessible from the

## Power Modules

Dean ${ }^{\otimes}$ In-Surface Power Module
Dean In-Surface power module consists of two simplex receptacle ports (rated at $15 \mathrm{amps} / 125$ volts $)$ one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be modified to fit various brand jacks. Data tree ships with Dean in-surface power modules. Data connectors are not supplied with the module and are purchased by the customer. The Dean
 module has a molded plastic faceplate with steel trim and an aluminum housing. Modules come tandard with either 9 ' or $15^{\prime}$ cord with a 3 -prong plug, or a $40^{\prime \prime}$ cord with a Pattern"' connecto Dean power module is rated at $15 \mathrm{amps} / 120$ volts and is ULL listed.

Dean Undersurface Power Module
Dean undersurface mounted power module consists of two simplex receptacles (rated at
5 amps $/ 25$ volts), one USB-A port and one USB-C port, 2 amps per port. The Dean undersurface power module is $5.50^{\prime \prime}$ long by $3.06^{\prime \prime}$ wide by $1.75^{\prime \prime}$ tall by $5.25^{\prime \prime}$ "deep. The module has a smooth
nolded plastic faceplate with an anodized aluminum housing and secures under the worksurface with wo $5 / 16 \times 22^{\prime \prime}$ Phillips round-head screws. Modules come standard with either 3 ', $9^{\prime}$ or $15^{\prime}$ ' cord with 3 -prong plug, or a 40 " cord with a Pattern connector. Dean undersurface power module is rated at
5 amps $/ 20$ volts and is ULL listed.

## TECHNICAL SPECIFICATIONS

## Power Modules (cont.)

Nacre ${ }^{\circledR}$ Pop-Up In-Surface Power Module
Nacre Pop-Up In-Surface power module consists of two simplex receptacle ports (rated at $15 \mathrm{amps} / 125$ volts), one USB-A port and one USB-C port, 2 amps per port, and one data jack opening. The module can be modified to fit various brand jacks. Data tree ships with Nacre power nodules. Data connectors are not supplied with the module and are purchased by the customer.
Nacre is $7.25^{\prime \prime}$ Iong by $3.31^{\prime \prime}$ wide by 2.92 " high and fits securely into a $6.94^{\prime \prime} \times 3^{\prime \prime}$ cutout with $.38^{\prime \prime}$ adius corners. The module is made of molded plastic and is a pop-up design with a dampened spring-loaded mechanism to allow the unit to smoothly open for use and close smoothly when not
n use. Modules come standard with either 9 ' or $15^{\prime}$ ' cord with a 3 -prong plug, or a $40^{\prime \prime}$ cord with a Tattern connector. Nacre power module is rated at $15 \mathrm{amps} / \mathrm{I} 20$ volts and is UL listed.

Snap-In RPT Power Module with RPT Bracket
Snap-In RPT module is only available for use with
Snap-In RPT module is only available for use with Pattern Tw electrical system. Snap-in module consists . wo simplex receptacle ports (rated at $15 \mathrm{amps} / 125$ volts). Snap-in RPT fits securely in user facing with a $40^{\prime \prime}$ cord with pattern connector, rated at $15 \mathrm{amps} / 120$ volts and is UL listed.

Grommets
Flip-Top Grommets for Dean \& Nacre Power Modules
ip-top grommets are surface-mounted covers, constructed of 18 -gauge steel. Grommets have a Fiip-top grommets are surface-mounted covers, constructed of 18 -gauge stee. Grommets have a
flip-up reeeding door and are identical in cutout size to the Nacre or Dean in-surface power module on the pervious page, which allows retrofiting corresponding power modules at a later date.
Grommets are finished with powder-coat paint available in al KI paint colors. The fili-up doo Grommets are finished with powder-coat paint available in all KI paint colors. The flip-up door is
designed to allow cords to remian routed through the opening while it is closed and allows for mor cord routing space when the flip-up door is open. Field installed.

## Compliance

s is a UL Listed Office Furnishing per standard UL I 286 and Powered
furniture per standard UL 962 .
