# CrossRoads® Library Furniture

General Information

## SPECIFICATIONS

### Study Table Top

Tabletop is 1-1/4" thick, particleboard core construction with .05" high pressure laminate facer and .026" backer on the underside. All four edges shall be banded with a 1-1/4" thick and 2" wide solid oak or maple external knife edge laminated to core after application of the facer laminate. The edge is beveled to a .25" radiused bullnose at the top. The edge band has mitered corners. Table tops are offered without grommets, with grommets, or with PowerUp® modules. Grommets and PowerUp® modules fit in the same size top cutout. For grommet and PowerUp® options, placement on table top will either be in the table center or offset to one edge. Offset grommet or PowerUp® locations will be centered on the longest outside edge of the table and 7-3/4" from the table edge to the center of the grommets or PowerUp®. For round and square tables, grommet or PowerUp® placement on the outer edge of the table will be centered on the outer edge between two legs.

### Study Table Legs

The legs are attached to the apron using a heavy gauge metal plate with two heavy-duty anchoring bolts. The legs are 2-1/4" square glued up face to face. All of the edges are eased with a 1/4" radius. For tables with grommets or PowerUp®, cords are managed by the vertical leg wire manager or the wood routed wireway. Leg wireway is scuff-resistant, high-impact rigid Polypropylene plastic and is fastened to the leg with full-length adhesive bond. The solid wood routed wireway is 1" wide and 3/4" deep and runs from the bottom of the leg to just under the intersection with the apron. 1/4" solid wood cap attaches with (6) knurled thumbscrews.

### Study Table Aprons

A 3/4" thick solid oak or maple apron rail is fit between the legs on all four sides of the table. The apron shall be machined to have a full length arch that is 3-7/8" high at the ends and 2" at the center. The apron rails are screwed to the underside of the top. Optional apron has straight bottom with a beveled face.

### Study Table Glides

Each leg has a 2" diameter nylon-based adjustable leveling glide with a 1-1/2" thread stem.

### Study Table Worksurface Height

Standard height is 29". Optional 27" or 32" heights may be specified.

### Study Table Routed Wireway

Solid wood routed wireway, 1" wide x 3/4" deep runs from bottom of leg to just under intersection with apron. 1/4" solid wood cap attaches with (6) knurled thumbscrews.

### Panel End Table Top

Tabletop is 1-1/4" thick, particleboard core construction with .05" high pressure laminate facer and .026" backer on the underside. All four edges shall be banded with a 1-1/4" thick and 2" wide solid oak or maple external knife edge laminated to core after application of the facer laminate. The edge is beveled to a .25" radiused bullnose at the top. The edge band is mitered at all four corners. Table tops are offered without grommets, with grommets, or with PowerUp® modules. Grommets and PowerUp® modules fit in the same size top cutout. For grommet and PowerUp® options, placement on table top will either be in the table center or offset to one edge. Offset grommet or PowerUp® locations will be centered on the longest outside edge of the table and 7-3/4" from the table edge to the center of the grommets or PowerUp®.

### Panel End Table End Panels

The end panels are 1-3/16" thick, particle core construction with select oak or maple veneer on both faces. The verticle edges of the panel are banded with a 1.5mm thick solid oak or maple external band with a 1/32" radius on all edges. The panel base is solid oak or maple with a .13" deep x .38" high reveal groove. The base is glued and screwed to the bottom of the end panel. The end panels are attached to the top using two 21" long, steel "L" brackets with six screws per bracket. The longitudinal stabilizing keel shall be 3/4" thick x 7" wide, particleboard construction with select oak or maple face and back. Bottom edge is banded with 1.5mm solid oak or maple and attached to the end panels and the top using mortise and tenon joinery. For tables with grommets or PowerUp®, cords are managed by the vertical leg wire manager.

### Panel End Table Glides

Each end and intermediate panel has a pair of 1-1/8" diameter steel-based adjustable leveling glide with a 1-1/4" threaded stem.

### Panel End Table Worksurface Height

Standard height is 29".

### Study and Stand-up Carrels Top

The worksurface is 1-1/4" thick x 33-1/2" or 45-1/2" wide x 27-1/2" deep, particleboard core construction with .05" high pressure laminate facer and .026" backer on the underside. Exposed edge shall be banded with a 1-1/4" thick and 2" wide solid oak or maple external knife edge laminated to core after application of the facer laminate. The edge is beveled to a .25" radiused bullnose at the top. The worksurface is attached to the end panels and back with a 21" long, steel "L" bracket screwed into brass inserts in the panel and then screwed into the top of the worksurface.

### Study and Stand-up Carrels End Panels

The end panels are 1-3/16" thick particleboard core construction with Grade A oak or maple veneer on both faces. The vertical

edges of the panel are banded with a 1.5mm thick solid oak or maple external band with a 1/32" radius on all edges. The panels have brass inserts for mounting the worksurface at four different heights (25", 27", 29" and 32" ADA heights). The panel base is select solid oak or maple with a .13" deep x .38" high reveal groove. The base is glued and screwed to the bottom of the end panel. End panels for study and stand-up carrels are machined on one side.

### Study and Stand-up Carrels Shared Panels

The intermediate panels are the same construction as the end panels, however, the worksurface and shelf inserts are on both sides of the panel. Shared panels for study and stand-up carrels are machined on both sides.

### Study and Stand-up Carrels Back Panels

The back panels are 3/4" thick, 5-ply particleboard core construction with Grade A oak or maple veneer on both faces. The top and bottom edges of the panel are banded with a 1.5mm thick solid oak or maple external band with a 1/32" radius on all edges. The top edge is located 6-1/2" down from the top of the end panels and 4" up from the bottom. Back panels are attached to end panels using cam-lock fasteners. Double-faced units share 1-3/4" thick back panel.

### Study and Stand-up Carrels Shelf

The storage shelf shall be 3/4" thick x 33-1/2" or 45-1/2" wide x 10" deep, plywood core construction. Both faces will be covered with select oak or maple veneers and banded on the exposed edge with 1.5mm solid oak or maple. The study carrel shelf is located 15" above the worksurface. The stand-up carrel shelf is located 26" below the worksurface. Shelf is connected to end panels with shoulder screw and insert in panel and cam-lock fasteners in shelf bottom.

### Study and Stand-up Carrels Glides

Each end and intermediate panel has a pair of 1-1/8" diameter steel-based adjustable leveling glides with a 1-1/4" threaded stem.

### Circulation Desk Top

Joints are secured with steel "L" brackets. Desk top is 1-1/4" thick, particleboard core construction with .05" high-pressure laminate facer and .026" thick backer on the underside.

### Circulation Desk Cabinet Construction

The front panels are 3/4" thick, 5-ply plywood with Grade A oak or maple veneer. All exterior faces are matched for color and grain. The side panels are 1-3/16" thick particleboard with Grade A oak or maple veneers and banded on the exposed edge with a 1.5mm solid oak or maple.

### Circulation Desk Adjustable Shelves

Adjustable storage shelves are 3/4" thick, 5-ply plywood construction with select oak or

maple veneer and banded on exposed edge with solid oak or maple. Shelves are adjustable in 1-1/4" increments and are notched at the ends over metal dowel support.

### Circulation Desk Hinged Doors

Doors are 3/4" thick, MDF construction with Grade A oak or maple veneer on both sides. All four edges are banded with solid oak or maple edge. Each door shall be fitted with brushed aluminum or flat black pull and lock.

### Circulation Desk Storage Drawers

All drawer fronts are 3/4" thick, MDF construction with Grade A oak or maple veneer on both sides. All four edges are banded with solid oak or maple edge. Each drawer shall be fitted with brushed aluminum or flat black pull and lock.

### Circulation Desk Heights

Depending on the component, various heights are available. 27", 29", 32" and 39" may be specified.

### Power and Data Management

Study tables, panel leg tables, study carrels, stand-up computer stations and circulation desk modules are available with grommets, PowerUp® system. The PowerUp® module is 6-1/4" long x 3" wide x 2-1/2" high. The module is constructed of textured polycarbonate. The module has one duplex receptacle (110 volts) and two ports for data connectors. The standard module will accommodate most data connectors. The customer purchases the data connectors. The module has a dampened spring-loaded mechanism to allow the unit to open for use and close when not in use. Module comes standard with a 9 ft. cord and 3-prong plug. For both grommets and the PowerUp® system, the underside of the table is provided with a plastic channel (cord management trough, which covers the bottom of the module. This channel, furnished with metal dividers, is provided for the routing of the power supply cords and data lines. For starter and adder carrels with grommets or PowerUp® modules, round cutouts in the end panels allow wires to pass through from one unit to the other. PowerUp® door extrusion and vertical plastic wire manager are standard. Cords are further managed by the vertical leg wire manager, which comes standard with grommets or the PowerUp® system. Leg wireway is scuff-resistant, high-impact rigid Polypropylene plastic, and is fastened to the leg with full-length adhesive bond.

### Shelving End Panel

The end panels are 1-3/16" thick, particle core construction with Grade A oak or maple veneer on both faces. The vertical edges of the panel are banded with a 1.5mm thick solid oak or maple external band with a 1/32" radius on all edges. The panel base has a .13" deep x .25" high vein line 4" from the bottom. Two stainless steel adjustable glides are at the bottom of each panel.

## Shelving Shared Panel

Same construction as the end panels except brass inserts are on both sides of the panel. Shared panels for shelving are machined on both sides. Adder units are attached with 5/16" through bolts and nuts.

## Top Shelf/Cornice Unit

Shelf is 3/4" thick oak or maple construction. The flush-fitting cornice rail at the face sides is 3/4" thick x 2-1/8" high solid oak or maple. Shelf is attached using 1-1/4" x 1-1/4" wood cleats with bolts and metal inserts in the end panels.

## Base

Preassembled box with a finished outer kick rail enables shelving to be assembled in the vertical position. Bottom shelf is set into place and positioned by using steel pegs.

## Adjustable Wood Shelves

Wood shelves are 3/4" thick solid oak or maple construction. The shelf is grooved on the underside to fit over turned and grooved steel pegs, which are inserted into holes in the end panels. Holes are spaced at 1-1/4" space intervals. Peg and groove design prevents accidental removal. The fixed middle shelf is mounted using wood cleats and screws on units 60-1/2" and higher.

## Adjustable Metal Shelves

Metal shelves are 18-gauge steel with notches on the underside to rest on turned and grooved steel pegs. Flat shelf is 1" thick and triple bent front and back edges provide superior strength and eliminate sharp edges. Book stop shelf is bent upward to form 90-degree angle, 1-5/8" high above the shelf surface to function as a book stop. Electrostatically applied powder coat finish. Metal shelves accept spring-type overhead wire book support. Metal shelf units are shipped with a wood base shelf.

## Periodical Shelving

End panels, shared panels, and top and bottom shelf assembly construction are the same as standard shelving. Adjustable shelves include 3/4" solid wood angled bracket supports and a 14-gauge steel shelf pivot bracket. A 3/4" solid wood shelf with a 1/2" x 1-1/2" stop rail is mounted at an angle of approximately 45° so that periodicals can be easily viewed. The shelf pivots and can be flipped up to lay flat for storage access below.

## Media Shelving

End panels and top and bottom self assembly construction are the same as standard shelving. Media metal shelves are 18-gauge steel with notches on the underside to rest on turned and grooved steel pegs. Angled shelves have slots spaced 1-1/4" to accept metal partitions that can be adjusted to provide separation between displays. Electrostatically-applied powder coated finish for long-term durability. Media shelf units are shipped with a wood base shelf.

## Book Truck

Truck sides and bottom are 3/4" plywood with top edge banded. No seams show where side panels adjoin. Descending platform is 3/4" plywood with plastic laminate top surface. Platform is guided on rollers and supported by spring compression. As the platform is loaded, it descends toward the bottom of the truck. The truck is mounted on four swivel casters.

## Dictionary Stand

End panels are constructed of 1-3/16" particle core with oak or maple veneer and 1.5mm thick solid wood edge banding. The top and bottom surfaces are attached to the end panel using cam-lock fasteners. The top surface is constructed of 1-1/4" particle-board core construction with a plastic laminate worksurface (customer-specified). One 3/4" adjustable shelf has a 16" adjustability range using steel pins and drilled holes.

## Atlas Stand

End panels are constructed of 1-3/16" particle core with oak or maple veneer and 1.5mm thick solid wood edge banding. The top and bottom surfaces are attached to the end panel using cam-lock fasteners. The top surface is constructed of particleboard core with a plastic laminate worksurface (customer-specified). Five 1-3/16" particleboard sliding shelves have a 3/4" x 2" stop rail at the edge of each shelf.

## Newspaper Display Unit End Panels/Shared Panels

End panels are constructed of 1-3/16" particle core with oak or maple veneer and 1.5mm thick solid wood edge banding. End panels for newspaper display units are machined on one side. Shared panels for newspaper display units are machined on both sides.

## Newspaper Display Unit Top Shelf/Cornice Unit

Shelf is 3/4" thick oak or maple construction. The flush-fitting cornice rail at the face sides is 3/4" thick x 3-1/4" high solid oak or maple.

## Newspaper Display Unit Base

Pre-assembled box has a finished outer kick rail which enables shelving to be assembled in the vertical position. Two adjustable shelves are 3/4" thick solid oak or maple construction. The shelf is notched at the ends to fit over dowel pins and prevent accidental removal. Two 1" thick rails mounted on the end panels are notched to hold eight newspaper sticks at an angle for easy removal and display.

## Rolling Book Cart

All end panels and shelves are 3/4" plywood with oak or maple veneer laminate and a 1.5mm solid wood edge banding. Shelves are attached to the end panels using cam-lock fasteners and solid wood dowels. Bottom shelf is reinforced with wood cleat screwed into the shelf and end panels. Casters are two swivel and two stationary.

Two cart sizes: 30" wide x 35" high x 15" deep with two shelves and 40" wide x 41" high x 15" deep with two shelves.

## Rolling Book Cart With Slanted Shelves

All end panels and shelves are 3/4" plywood with oak or maple veneer laminate and a 1.5mm solid wood edge banding. Shelves are attached to the end panels using cam-lock fasteners and solid wood dowels. Bottom shelf is reinforced with wood cleat screwed into the shelf and end panels. Casters are two swivel and two stationary. Two cart sizes: 30" wide x 35" high x 16.5" deep with two shelves slanted inward with slanted shelf backs, and 40" wide x 41" high x 16.5" deep with two shelves slanted inward with slanted shelf backs, and 40" wide x 41" high x 16.5" deep with two shelves slanted inward with slanted shelf backs.

- Choice of 2,3, (or without) grommets or PowerUp® modules
- Straight or curved apron

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

## HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

## HOW TO BUILD A MODEL NUMBER

**A** Select basic model.

**B** Select wood type.

- O** - Oak  
**M** - Maple

**C** Select apron detail.

- PCRV** - Curved apron  
**PSTR** - Straight apron

**D** Select height.

- 27** - Junior height - 27"  
**29** - Adult height - 29"  
**32** - ADA wheelchair height - 32"

**E** Select grommet or PowerUp.

- 1G** - 1 Grommet; add \$80  
**1P** - 1 PowerUp module; add \$139  
**NG** - No Grommets/PowerUp

**F** Select grommet/module color.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.

**G** Select wood finish (for table edge & legs).

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.  
Stained finish colors; add \$32.

**H** Select surface finish.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.  
Additional plastic laminate surfaces are available but may require an up-charge and additional leadtime. Please contact KI.

## HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

## HOW TO BUILD A MODEL NUMBER

**A** Select basic model.

**B** Select wood type.

- O** - Oak  
**M** - Maple

**C** Select panel.

- PCRV** - Curved panel  
**PSTR** - Straight panel

**D** Select base.

- BCRV** - Curved base  
**BSTR** - Straight base

**E** Select height (worksurface).

- AH** - Adjustable height  
**AH32** - Adjustable wheelchair height

**F** Select task light

- 1TL** - 1 Task light; add \$167  
**NL** - No task light

**G** Select grommet or PowerUp.

**1G** - 1 Grommet-standard

**1P** - 1 PowerUp module; add \$58

**H** Select grommet or PowerUp module color.

Refer to color addendum at [ki.com](http://ki.com) or KI Fabrics & Finishes binder.

**I** Select wood finish (for table edge & base).

Refer to color addendum at [ki.com](http://ki.com) or KI Fabrics & Finishes binder.  
Stained finish colors \$53.

**J** Select surface finish.

Refer to color addendum at [ki.com](http://ki.com) or KI Fabrics & Finishes binder.  
Additional plastic laminate surfaces are available but may require an upcharge and additional leadtime. Please contact KI.

## HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note: • The ☐ indicates that a choice is required.  
• The absence of the ☐ indicates that no choice is required.  
• Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

## HOW TO BUILD A MODEL NUMBER

- A** Select basic model.  
**B** Select wood type.  
**C** Select end panel.  
**D** Select back panel.  
**E** Select wood finish.
- O** - Oak  
**M** - Maple
- PCR** - Curved panel  
**STR** - Straight panel
- BP** - Back panel; add \$170  
**NP** - No back panel
- Refer to color addendum at [ki.com](http://ki.com) or KI Fabrics & Finishes binder.  
Stained finish colors; add \$77.

## INFORMATION

**Back Panel Weights**  
When ordering shelving with back panels add the following weights:  
42" high add 15#  
54" high add 18#  
60" high add 20#  
72" high add 24#  
82" high add 27#  
96" high add 35#

## FINISH INFORMATION

**Additional Stains**  
Specially stained edges beyond the KI standard offering (as shown under the Edge Color column in color addendum) are also available. Contact KI.

## HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

## HOW TO BUILD A MODEL NUMBER

**A** Select basic model.

**B** Select wood type.

- O** - Oak  
**M** - Maple

**C** Select back panel.

- BP** - Back panel; add \$140  
**NP** - No back panel

**D** Select shelf type.

- B** - Book stop shelf  
**F** - Flat shelf

Book stop shelf is NOT available with Back panel.  
See pricing column for book stop shelf upcharge.

**E** Select end panel

- PCRV** - Curved panel  
**PSTR** - Straight panel

**F** Select wood finish.

Refer to color addendum at [ki.com](http://ki.com) or KI Fabrics & Finishes binder.  
Stained finish colors; add \$49.

**G** Select shelf paint color.

- SA** - Sand  
Refer to color addendum at [ki.com](http://ki.com) or KI Fabrics & Finishes binder.

## INFORMATION

## HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

## HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select wood type.
- ☐ - Oak
- ☐ - Maple
- C** Select end panel.
- ☐ - Curved panel
- ☐ - Straight panel
- D** Select wood finish (for edge & sides). Refer to color addendum at [ki.com](http://ki.com) or KI Fabrics & Finishes binder. Stained finish colors; add \$84.

## FINISH INFORMATION

### Additional Stains

Specially stained edges beyond the KI standard offering (as shown under the Edge Color column in color addendum) are also available. Contact KI.

## HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

## HOW TO BUILD A MODEL NUMBER

**A** Select basic model.

**B** Select wood type.

**O** - Oak  
**M** - Maple

**C** Select end panel.

**PCRV** - Curved panel  
**PSTR** - Straight panel

**D** Select wood finish.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.  
Stained finish colors add \$80.

**E** Select surface finish.

Refer to color addendum at ki.com or KI Fabrics & Finishes binder.  
Additional plastic laminate surfaces are available but may require an upcharge and additional leadtime. Please contact KI.

## FINISH INFORMATION

### Additional Stains

Specially stained edges beyond the KI standard offering (as shown under the Edge Color column in color addendum) are also available. Contact KI.

## General Information

### SPECIFICATIONS

#### Chair Back Posts

Back posts shall be made of 5/4" stock, steam bent to shape and finished to 1" thickness.

#### Chair Front Posts

Front posts shall be made of 8/4" stock and tapered on two inside faces. The front outside corners are shaped to a 3/4" radius. Finished size is 1-3/4" x 1-3/4" at the top and 1-1/4" x 1-1/4" at the bottom.

#### Chair Side Rails

Side rails shall be made of 4/4" stock, finished to 13/16" thickness x 2" wide and double doweled to the front and back posts using 5/8" x 2" dowels.

#### Chair Side Stretchers

Side stretchers shall be made of 4/4" stock, finished to 13/16" x 13/16". The stretchers shall be fastened to the front and back posts using 9/16" chucks with each joint pinned to further reinforce the joint.

#### Chair Top Slat

The top slat shall be made of 4/4" stock finished to 13/16" thickness and steam bent to a 24" radius. The top slat shall be shaped to form and double doweled to the back posts using 3/8" x 1-1/2" dowels.

#### Chair Bottom Slat

The bottom slat shall be made of 4/4" stock, steam bent to a 24" radius, finished to 13/16" thickness x 3-3/8" wide and double doweled to the back posts using 3/8" x 1-1/2" dowels.

#### Chair Banisters

Banisters shall be made of 6/4" stock finished 3/8" x 1" wide, steam bent to shape and mortised into the top and bottom slats.

#### Chair Front Rail

The front rail shall be made of 4/4" stock, finished to 13/16" x 2" wide and double doweled to the front posts using 3/8" x 2" dowels.

#### Chair Cross Stretchers

Cross stretchers shall be made of 4/4" stock, finished to 13/16" x 13/16" and fastened to the side stretchers using 9/16" chucks with each joint pinned to further reinforce the joint.

#### Chair Wood Seat

Seats shall be made of 5/4" stock, surfaced to 13/16" prior to being defect ripped on a straight-line ripsaw. Individual seat pieces shall not exceed 3-1/2". Seat stock will be mechanically glued to ensure uniform coating of polyvinyl acetate emulsion glue prior to being clamped using a pneumatic torque drive to insure proper pressure on glue joints. Seat blanks will be double surfaced prior to shaping to form and saddling. Seat shall be gained into bottom slat and fastened to each back post by one 12 x 2-1/4" tapping screw concealed by a wood button. Two 12 x 2" tapping screws secure the seat to

the front rail and one 12 x 2" tapping screw shall secure the seat to teach side rail.

#### Chair Corner Blocks

Corner blocks shall further reinforce the frame and are glued and screwed in place. Two 10 x 1-1/4" twin fast screws and one 12 x 2-1/4" tapping screw shall secure each block to the frame.

#### Chair Glue

The glue used in final chair assembly shall be polyvinyl alcohol ester blend with polyvinyl acetate.

#### Chair Glides

7/8" diameter rubber cushion chrome-plated glides are standard.

#### Fabric

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request.
