

PRODUCT DATA SHEET

CWT 1200 - COOLING WATER ANTIFOULANT

GENERAL DESCRIPTION:

CWT 1200 is a sodium hypochlorite solution for use in industrial process water systems to provide a chlorine residual in the treated system. CWT 1200 may also be used in conjunction with MBC 440 to control algae, bacteria, and certain fungi.

PRODUCT CHARACTERISTICS:

Form.....Light, Yellow-Green Liquid
pH.....Approximately 13.0
Density.....10.00 lbs./gallon

FEEDING:

CWT 1200 can be slug fed or continuously fed to the process water system or any convenient point of addition that ensures complete system distribution. Consult you service representative for specific recommendations.

PRECAUTIONS AND HANDLING:

Product is an alkaline material. Avoid contact with skin and eyes. Do not take internally. Protective gloves and chemical splash goggles are recommended. Wear impervious apron and boots to minimize potential contact. General ventilation is adequate, however, a NIOSH approved breathing apparatus should be used for exposures above OSHA threshold limit values. Consult material safety data sheet for more information.

PACKAGING:

PORTABLE TANKS
55 GALLON DRUMS
