Workplace Versatility

The pace of organizational change, rapid technological innovation, and the ability for people to work how, where, and when they want all impact workplace planning. Dividends Horizon® addresses workplace evolution with easily reconfigurable components that support tailored solutions—straight-forward primary spaces, flexible activity spaces, and dynamic private offices that link architecture, furnishings, and people.

+ Dividends Horizon systems furniture, in combination with the broad range of Knoll products—including seating, textiles, leather, and architectural and acoustical elements—creates custom, cohesive spaces that scale to support transition and growth.

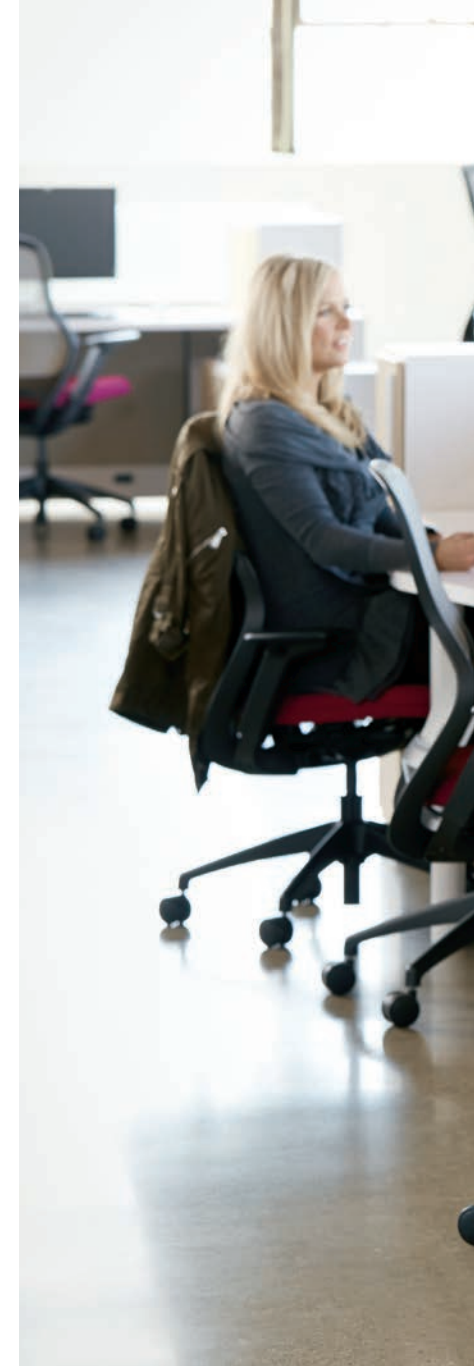

Benefitting Individuals and Teams

The best workplace planning synthesizes the needs of individuals and teams. Distinct spaces for focused work intermix with areas that facilitate conversation, collaboration, and social activity.

Dividends Horizon creates primary “home base” workstations through a combination of panels, storage, worksurfaces, and other elements. A variety of horizons and levels of privacy are achieved through a range of panel heights, screens, and glass options.

- + Today, an increasing number of people utilize unassigned workstations. Dividends Horizon supports mobile workers with free-address workstations designed to provide a temporary office.

Creating Shared Spaces

Today, workspaces that encourage both planned and spontaneous collaboration are essential. Dividends Horizon's shared desktops are the perfect solution when two or three people work together frequently, while storage elements and panels establish the boundaries of shared work areas.

- + Planned as a central spine in a workstation cluster, Fence, integrated with Dividends Horizon panels, delivers unsurpassed power and data management, and accommodates growing technology demands while simultaneously allowing for easy workspace reconfiguration.

Dividends Horizon adapts easily to technological change, supporting mobility and connectivity. Access to power and data can be accommodated at desktop, panel base or anywhere along the vertical side of a panel.

+ Dividends Horizon slatwall allows users to arrange KnollExtra® desktop accessories to suit their needs. Technology support, Tone™ height-adjustable desks, and reconfigurable Anchor™ storage create a truly personalized user experience.

Addressing Personalization and Wellness

With the ability to customize storage and accessories, as well as incorporate height-adjustable tables, Dividends Horizon offers users the freedom to adapt their own work environment. Providing the proper space, tools, and resources offers users an increased sense of expression and well-being.

+ Research indicates that people are healthier and perform better when well-being principles are integrated into their workplace. Dividends Horizon add-up glass above desk height and open weave screens set boundaries while allowing access to natural light—essential to workplace wellness.

Shaping a Variety of Spaces for the Whole Office

A more connected workplace puts people at the center of their work-life experience. The success of common spaces hinges on hospitality and social experience. Dividends Horizon uses reconfigurable components to define a variety of community settings, promoting organizational flexibility, and enabling users to shape their work activities.

+ A wide range of Dividends Horizon table options facilitates planning the entire office—from cafés to conference rooms and impromptu collaboration spaces.

+ Dividends Horizon addresses a variety of aesthetic requirements within private offices. Freestanding elements, such as Tone adjustable-height tables, Series 2™ and Template™ storage, combined with Dividends Horizon, create thoughtful private offices for a range of work styles.

Delivering Dynamic Private Offices

Today's private offices need to support both individual work and collaboration in a smaller footprint. Dividends Horizon delivers refined, high-performing spaces with wall-mounted and freestanding options.

Offering Limitless Flexibility

Dividends Horizon provides adjustability for today's workplace, as well as the freedom to address change. As needs change, components can be reconfigured to meet future workspace requirements.

- + As organizations anticipate and address changes in the workplace, cost is a primary consideration. Shipped as a fully assembled unit, Dividends Horizon panels can be installed and rapidly reconfigured without removing panel skins, minimizing the total cost of ownership.

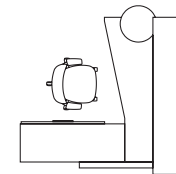

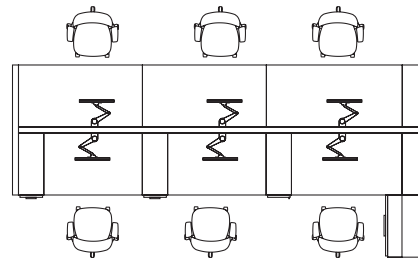

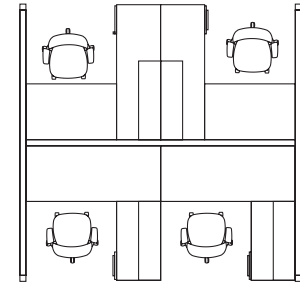

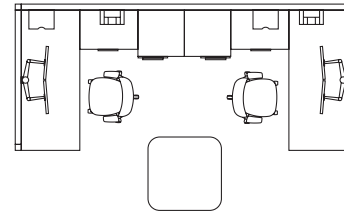

Dividends Horizon®

Organizations today are planning smaller, more efficient workplaces. With as much as half of all tasks being performed outside the primary workspace, creating spaces for collaborative work and group activities has become a necessity. Dividends Horizon offers an unmatched range of options that can be reimagined to meet your company's work environment requirements today, and in the future.
