To Whom It May Concern:

By way of this letter, EVERFI is pleased to provide an overview of our solution in consideration for sole source for the purposes of providing required compliance and prevention education for the UMC student population.

EVERFI confirms that our organization is uniquely qualified and prepared to meet the requirements set forth by UMC's evaluation including that the EVERFI solution can uniquely meet the various education obligations the University has under Title IX, Clery and the EDGAR Act part 86 as well as the University's focus on diversity and inclusion training. EVERFI is the sole-provider of our solution.

#### WHY EVERFI?

For the past 15 years, EVERFI has been the national leader in providing online prevention and compliance training for 1,700 colleges and universities. EVERFI's mission in higher education is to support institutions in driving lasting, large-scale change on critical health and safety issues including sexual assault, high-risk drinking, substance abuse, harassment and discrimination, diversity and inclusion, ethics and conduct and more. Over **5 million** students and employees will participate in EVERFI courses this year alone.

Unique Functionality include:

**In-course Adaptive Pathing:** Ensures that the delivery of the content is unique to each individual's attitudes and experiences.

**Personal Reflection:** Opportunities within course that allow students to reflect upon the lessons learned and apply that to their own behaviors, experiences and relationships.

**Interactive Exercises:** Designed to motivate behavior change by modeling positive behaviors and building student self-efficacy.

**Customization Options:** Available in real-time to tailor the program to participating institutions.

**Data Analysis:** Embedded pre-, post-, and follow-up surveys and assessments provide the institution with a complete data set to use as a foundation for developing additional programs and strategies to address sexual violence. Survey responses are compiled and provided back to the institution a variety of ways including in real time, in a curated report and in a raw data file for additional analysis.

Lastly and most importantly, EVERFI's courses have **results proven efficacy**. No other online prevention courseware have been evaluated to the degree that EVERFI's courses have including a randomized control trial of EVERFI's alcohol prevention course. Most recently, EVERFI's course for sexual assault prevention underwent a peer review analysis, published in the Journal of Interpersonal Violence, demonstrating the desired outcomes of the course.

Respectfully,
