Evolve Systems™

Evolve Systems

Designed for the way people work, Evolve meets the challenges of today's rapidly changing workplace. Featuring simple, crisp and clean aesthetics, Evolve's adaptability provides limitless planning possibilities for a greater return on your investment.

The Evolve System is Greenguard certified to rigorous indoor air quality standards for low-emitting interior products.

Paper stock used in printing this brochure contains post consumer recycled content.

Below: Worksurfaces and trim shown in True White (S645LP) with storage and panel trim in Designer White (DWT) trim and Nevada (NEV) paint finish. Panels shown in Ramble Amazon (RM13). Seating shown is Global Priority in Replay Coal (RP34).

Pedestal cushion is Replay Autumn (RP30) and monitor arm is Tungsten (TUN).

Evolve is furniture that fits your work style and your budget.

Furniture for today, flexibility for tomorrow. Evolve's Light Panel System creates a sense of openness without sacrificing individual space or storage capabilities. Shared workstations promote collaboration and reduce the overall footprint.

Open frame legs provide more space under the surface, while the tool rails keep the worksurface clear when combined with hanging accessories. Open frame glass screens create seated privacy while retaining a sense of light and openness.

eSTOR cabinets contribute to space definition and privacy. A variety of cabinet configurations offer multiple solutions to storage requirements. Cables can also be routed through the base of the cabinets, minimizing the need for power feeds.

Worksurfaces in True White (S645LP) and Designer White (DWT) trim with storage and panel trim in Tungsten (TUN) paint finish. Panels shown in Frost Earth (FR31) and Ramble Amazon (RM13). Seating shown is Global Priority in Replay Coal (RP34).

Create privacy anywhere.

Evolve's panels are stackable in 6", 12" & 24" modules from 30 inches up to 25 feet and allow private offices to be constructed without relying on existing walls. Interchangeable fabric, laminate and glass finish options can be used to achieve varying privacy, acoustical and aesthetic needs without needing to disassemble panels offsite.

Add-on as needed. Evolve can easily grow and reconfigure as your needs change. Start with a basic 6'x6' station and add as needed, using shared components for cost savings.

Promote collaboration, while retaining a sense of individual space.

The Evolve Panel System can be stacked and switched for maximum flexibility and effortless reconfiguration. Panels also integrate plug and play connectivity at the worksurface and offer proven wire management to meet your power and data needs. Cost-effective planning is made easy with Evolve's range of ergonomic worksurfaces and practical storage options.

Evolve panels provide the planning flexibility to create open collaborative workspaces, while maintaining storage options required for effective organization. The addition of a technology slat wall, when combined with hanging accessories, keeps frequently used items readily available while freeing up valuable worksurface space.

Lower height panels and 120 degree worksurfaces provide spacious work areas, as well as open communication with other team members.

Seating shown is Global Proietto in Dani Leather Costa Rica Winter White (CO59) and Global Zooey Guest in Replay Pistachio (RP26).

A new interpretation of the private office.

Integrate freestanding components for maximum flexibility and customization. A combination of freestanding and panel mounted components can be used to add privacy, divide space and create a unique work space environment.

Achieve an impressive range of planning applications. The flexibility of Evolve components allows you to create a range of planning applications – from reception to private office – while maintaining a consistent look throughout the office environment.

A complete office landscape.

Rising real estate costs, multi-generational workforces, and new styles of working are a few of the challenges today's office must overcome. The simplicity and flexibility of Evolve's design enables reconfiguration of a space utilizing existing components to keep long-term costs low. Evolve's comprehensive product offering creates complete office landscapes that can adapt to change.

Enhance office environments with Graphic Panels. Virtually any image can be printed on fabric and upholstered on Evolve panels to create corporate identity, team environments or collaboration areas. Graphics can be easily replaced as needs change.

Encourage collaboration & communication through workstation clusters. Evolve's extensive range of worksurface shapes enable a variety of planning options. A combination of worksurface types support a simple, yet contemporary look, while maximizing desk surface area. Low height panels provide privacy without impeding teamwork essential to call center and training environments.

A. Evolve offers fabrics that are made from 100% recycled polyester, which means less waste going to landfills, reduced demand for petroleum products, and fewer environmental impacts from the processing of petroleum products into polyester.

B. Evolve has developed a panel interior made from 100% recycled wood and polypropylene. Through innovative design and technology, Evolve utilizes waste that would have normally been sent to landfill.

C. Evolve Panels are insulated with a mineral fiber insulation made from slag (an inert steel by-product) and basalt rock. This material's high density provides maximum sound absorption to reduce noise in the work environment. Mineral fiber insulation is fire resistant, water repellent and will not support the growth of fungi or mildew.

D. Evolve's epoxy powder coating process involves no liquids and is solvent free. It does not contain any harmful VOC's or lead. Up to 99% of over sprayed powder is reclaimed, mixed with virgin powder and reused. All powder that doesn't get re-circulated is recycled and used to paint non-exposed parts.

Furniture for a sustainable world.

Our environmental success story began with the challenge to create an office system that would meet today's business requirements while maintaining a firm commitment to save and protect the environment. Sustainability became a part of the creative focus and development of Evolve that incorporates the latest technology and design features to provide excellent performance at a competitive price. Evolve sets a standard for reducing waste and recycling materials in its manufacturing.

Evolve panels make extensive use of recycled plastic and wood waste from other Global factories — panels are comprised of up to 82% recycled content and are 100% recyclable.
