ANSI/BIFMA e3-2012 Furniture Sustainability Standard level® I

HBF's production facilities, organizational policies and component materials of the products have met all of the necessary qualifications to comply with the industry's most comprehensive furniture sustainability standard.

level® is the multi-attribute, sustainability standard and third-party certification program for the furniture industry. It has been created to deliver the most open and transparent means of evaluating and communicating the environmental and social impacts of furniture products in the built environment.

Taking into account a company's social actions, energy usage, material selection and human and ecosystem health impacts, level® addresses how a product is sustainable from multiple perspectives. With level®, customers can make informed choices about commercial furniture that exceed single attribute eco-certifications. The level® brand identifies that a product has been vetted by an independent third party certifier and its numeric marking 1, 2 or 3 which indicates the threshold of certification it has achieved.

HBF's seating, occasional tables, casegoods and conference lines are level® certified. Please download the certificates from our product pages for the complete details.

For more information about the ANSI/BIFMA level® standard, visit www.levelcertified.org

SCS Indoor Advantage™

HBF occasional table products are SCS Indoor Advantage™ Gold Certified.

SCS Global Services (SCS), a reputable third-party certification and assessment body of environmental, sustainability and safety claims since 1984, has developed internationally recognized standards and certification programs to assist businesses with improving their environmental efforts, social accountability and product performance.

Veneer and Finishes

Wood owes its inherent beauty to variations in color, grain, and texture; therefore, these variations are not considered defects. Due to the natural color and grain variances of wood the final finish color, texture and grain may vary from one furniture piece to another even though they are finished at the same time. Exposure to light and the aging process will cause changes in surface color of natural wood products. Light finishes on wood products do not mask the natural characteristics of wood. HBF does not guarantee the exact matching of grain, pattern and color.

An upcharge of **5% Net** per unit for occasional tables, with a minimum upcharge of **\$500 Net** per order, will apply for any custom wood finish.

Refer to the following page for product material options.
