MODULAR ELECTRIC SYSTEMS

How To Order:

1. Determine the configurations that need powered and electrical load requirements.
2. Choose **Base Feed**.**
3. Establish placement of **Power Blocks**.
4. Identify **Receptacles** per power block.
5. To figure harness length, take the center of the item, where the power blocks are to be placed, plus the length of any items the harness needs to pass under. Subtract 7" and use the next larger size harness, unless measurement is exactly the size of a harness.

For Example:

Sample #1- The power blocks are centered in the 42" returns, so half the return size is 21" for each return (21" + 21") plus 30" depth of the peninsula, minus 7".

$$(21" + 21" + 30" - 7" = 65" \text{ harness length})$$

6. Determine needed accessories.

MOBILE SCREENFLEX CLEAR ACRYLIC / FROSTED DIVIDERS

There are times when a clear partition provides a distinct advantage over traditional fabric-covered partitions. Use Clear Room Dividers when you need to control or contain an area but still need to have an unobstructed view of what's happening on the other side of the barrier. See-through walls are great for a number of settings, from hospitals to schools to science labs. Screenflex uses $\frac{3}{16}$ -inch crystal-clear OPTIX® acrylic to create these versatile clear panels. OPTIX® acrylic is non-yellowing, lightweight, and highly impact-resistant. Our plexiglass room dividers are three times as strong as double-strength window glass. For added durability, our translucent wall panels are affixed to the custom anodized extruded aluminum channels with a silicone adhesive.
