
Kick Solutions Specification Guide

Availability

Electronic price list updated with release 184.F (U.S.) and 148.F (Canada), dated June 19, 2017.

Spec News is available on village.steelcase.com. Search Steelcase Marketing Resources (Adstock) and download the current release's Spec News.

Tip: Steelcase Marketing Resources is a new global platform for ordering Steelcase marketing materials that replaces Adstock.

View or download Steelcase Specification Guides at <http://www.steelcase.com/en/resources/design/spec-guides/pages/specguides.aspx>.

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a . Products that are scheduled to be culled are indicated with an , followed by the last order entry date.

Surface Materials

The surface materials team has announced the launch of the Finish Library, found at <http://finishlibrary.steelcase.com>.

► For a list of all trademarks, refer to the last page of this specification guide.
© 2017 Steelcase Inc.

For Canadian Pricing

Canadian factor can be found at steelcase.com/CADpricing.

Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

Ten Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

[illegible]

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 3

Find cross references
by looking for page numbers
flagged with an arrow.

Tip 4

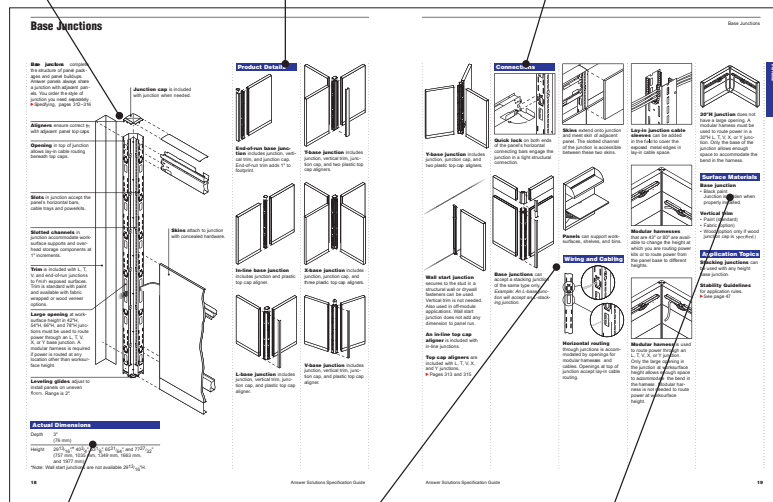

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Product Drawing shows you what the product looks like and points out important features.

Product Details
gives specific information on
the product and how
it is used.

Connections
describes how the product is assembled or how it attaches to another product.

Actual Dimensions
table lists the dimensions
of the product.

Wiring and Cabling details the power and cable-management and cable routing capabilities of the product.

Surface Materials
lists what material is used
for each part of the
product.

Tip 5

Refer to the specifying pages for all the information needed to order a product.

Each product specifying page contains a variety of elements to help you complete a specification:

- Product Drawing
- Standard Includes
- Required to Specify
- Options
- Related Products
- Specification Information
 - Dimensions
 - Style Number
 - Price

Standard Includes

(under the red or dark grey band) provides a list of what comes standard with the product.

Required to Specify

(under the red or dark grey band) itemizes the information that you must provide to order the standard product and the preferred sequence for specification.

Specification Information

(under the teal or light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

Product Drawing shows you what the product looks like.

[illegible]

Options

(under the black band) lists all the options that apply to the product, their price, and what is required to specify.

Related Products

provide specification information for products that are directly related.

Tip 6

Required to Specify

Specify with Customiz Stain

Italic typeface on specifying pages usually identifies wording that you should use in your order.

Tip 7

To determine how many skins are needed to complete a panel, consult the table at the right.

Tip: Remember to order skins for both sides of the panel buildup.

Watch for tips throughout the text that give you explanations and helpful instructions.

Tip 8

Learn what you cannot do by looking for drawings crossed out with an “X.”

Tip 9

Use the surface materials listings in the Surface Materials section of this book to find surface material color numbers.

Tip 10

Style Number	Page
TS7042BL	131
TS7042S	130
TS7048BL	131
TS7048S	130
TS7060BL	131
TS7060S	130
TS7072BL	131

Refer to the style number index when you know a style number and you need to find the page that has more details about the product.

Additional Resources

Kick is supported with an array of informational materials, tools, and software to help you plan and install efficiently.

Product brochures and planning tools can be ordered through your Steelcase area office by calling 1.800.784.0358 or through the Marketing Resources web site at village.steelcase.com.

Surface Materials Reference Manual

This publication provides:

- An explanation of the surface materials program
- "Available on" matrices
- Vertical surface fabric and seating upholstery selection listing
- Technical data for surface materials
- Surface material care and cleaning instructions

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Kick products are created with specification software that uses Kick Electronic Catalog data. Use the data to specify and price style numbers and options for every Kick product. The data is updated bimonthly by Steelcase and provided to software programs like the Hedberg Business System, 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

For more information about these and other software tools to help you plan effective work environments, please email fsl@steelcase.com

Digital Publications

You can access these digital publications at www.steelcase.com or village.steelcase.com.

Kick Product Training

Basic training for the Kick systems products is available as part of the Building Product Muscle (BPM) curriculum on the Steelcase University Web site at village.steelcase.com.

The Kick BPM is an interactive, web-based course, filled with photos, detailed positioning, statement of line, features/advantage, application, and specification information, as well as practice exercises designed to build salespeople's knowledge of the Kick system. The course also contains printable job aids to provide ongoing performance support. The Kick BPM is course SAL188.

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For assistance, please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.800.STEELCASE (1.800.887.6786).

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality concerns or service parts questions.

For warranty information, please go to <http://www.steelcase.com/warranty/>.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

Monolithic Panels

Panels are constructed with a rigid, tubular steel frame and are shipped fully assembled. Remember to order trim separately.

► Specifying, page 178.

Wire separator for the panel base can be ordered through Kick Service Parts to provide a separate, isolated space for routing data and telecommunication cables. It also serves as a second metallic barrier between low-voltage communication wires and 120-volt electricity.

Steel top caps are available in two heights—low is standard and high is available as an option. High top cap will accommodate cable routing at the top of the panel.

Horizontal slots accommodate off-module connections.

Vertical slots in panel accommodate hang-on components, overhead storage bins, shelves, worksurface supports, and connector brackets. Components can be mounted at 1" increments.

Base cavity accepts a factory- or field-installed powerway. Cable routing is also possible.
► See *Powerway Facts*, page 44.

Removable base cover has receptacle knockouts. Base covers have one standard-size opening on the left and an opening for a standard- or larger-size receptacle opening on the right.
Exception: 24"W and 30"W base covers have a standard-size opening on one side of the panel opening and a larger size on the reverse side.

Leveling glides adjust 1 1/2" to install panels on uneven floors.

Actual Dimensions

Height	42", 48", 54", or 66"
Width	24", 30", 36", 42", 48", or 60"
Thickness	2"
Base Raceway Height	3 5/8"
Glides	1 1/2" adjustment

Product Details

Kick panels come in four types.

Tackable acoustical—skin on each side, covered with vertical surface fabric.

Segmented—tackable skins on one or both sides, covered with vertical surface fabric.

Glass—single pane of clear, tempered safety glass on panel centerline, surrounded by painted border. Glass panels can accept glass stackers.

Perforated steel—single pane of painted, perforated steel on panel centerline, surrounded by painted border. Perforated pattern matches large perforated pattern on TS storage.

Wiring & Cabling

Panel frames have hollow interior to allow routing cables from top cap through to base raceway.

Kick is available with an optional high top cap to accommodate additional cable capacity at the top of the panel.

Chicago electrical code requires that all electrical connections be hardwired in the field. Order a non-powered panel and have the electrician obtain conduit and receptacles (Leviton 5325) to make the connections in the field.

Surface Materials

Base cover, top cap, and border

- Paint

Panel surface

- Fabric
- 6500 Clear Glass
- Perforated Steel: Paint

Segmented Panels and Stacker Options

Kick allows a wide variety of panel arrangements to meet specific functional and aesthetic needs. Panels are not dedicated to a specific location and can be used anywhere on the face of the panel. Illustrations show largest sized skin in bottom position.

Stacking Guidelines

Stackers are available in 12"H, 18"H, or 24"H in fabric, glass, or perforated steel.

Maximum height is 78".

Maximum number of stackers is three.

Any height base panel can be used with stackers.

Segmented Panels

42"H Base panels

48"H Base panels

54"H Base panels

66"H Base panels

Stacker Options

42"H Base panels with stacker

48"H Base panels with stacker

54"H Base panels with stacker

66"H Base panels with stacker

Panel Stackers

Stackers are constructed with a rigid, tubular steel frame and are shipped fully assembled.

► Specifying, page 186.

Actual Dimensions

Height	12", 18", or 24"
Width	24", 30", 36", 42", 48", 60", or 72"
Thickness	2"

Product Details

All existing base panels accept stackers.

Stackers do not include vertical trim, must be specified separately.

Up to
78"H

Base panels can accept one, two, or three stackers, up to a total height of 78". All stackers are load bearing, but load cannot be mounted above 66" height.
▶ See page 12.

Two fork connectors are included with every stacker.

Attaching stackers to panels will not cause disruption to existing panel connections.

Spanning stackers are available in 48", 60", or 72".

Stacker can span over an in-line connection between two base panels or two stackers. Width of stacker must equal total width of two base panels.

Two smaller stackers cannot be attached to the top of a larger stacker or panel.

Kick stackers are available in two surface options.

Tackable acoustical—skin on each side, covered with vertical surface fabric.

Glass—single pane of clear, tempered safety glass on panel centerline, surrounded by painted border.

Application Topics

Maximum height with base panel and stackers cannot exceed 78".

Maximum number of stackers is three.

Any base panel can accept stackers.

Bins and shelves can hang from first, second, or third stacker, not above 66" in height.

Surface Materials

Border

- Paint

Panel surface

- Fabric
- 6500 Clear Glass

Panel Frame and Inserts

Panel frames and inserts, specified separately, are used together to divide space while achieving a more open and customized environment. Frame is identical to the frame used for tackable acoustical, segmented, glass, and perforated steel panels.

► Specifying, pages 188-190.

Panel frames are available in three heights and six widths.

Actual Dimensions

Height	42", 54", or 66"
Width	24", 30", 36", 42", 48", or 60"W
Thickness	2"
Base Raceway Height	3 ⁵ / ₈ "
Glides	1 ¹ / ₂ " adjustment

Product Details

Inserts are available in two choices—translucent and laminate—to accommodate user needs.

Translucent insert, frosted acrylic, is 1/4" thick. It is not available for order in Canada.

Laminate insert is 1/4" thick. It is manufactured using a low-pressure laminate process and has a decorative finish on both sides with a color-matched edge. It is not available for order in Canada.

Space between insert and frame (1/2" on each side) is part of the open aesthetic.

Application Topics

Factory-installed power or field installation option replaces the need to order separate powerways.

Remember to order trim packages.

Panel Connectors

Universal connector package joins panels of the same height in a straight line or in L-, T-, or X-configurations. The package, standard with panels, contains two universal connectors—one for the top and one for the bottom connection.

► Specifying, page 196.

Same connector is used at both the top and bottom of panel.

Different slots are used to create in-line, L-, T-, or X-conditions.

Off-Module Connector—Panel Width-Specific

Product Details

Wall start connector package is used to anchor a panel run to a perpendicular wall. Mounting screws that connect the brackets to the panel are included in each package.

Tip: Vertical end-of-run trim is not required at the end of panel that is attached to the wall.

Change-of-height in-line and corner panel connector package is used to join panels at varying heights in a straight line or at 90° angles. Package contains left and right connectors for both in-line and corner configurations.

Tip: Change-of-height in-line and corner panel connectors cannot be used in 120° configurations.

Left and right in-line connectors are required to connect panels in a straight line.

One-handed corner connector is required for connecting panels at 90°.

To connect panels in a 120° application, a 120° panel connector is required. A two-panel connection requires one 120° connector package. A three-panel connection requires three 120° connector packages. *Tip: Change-of-height in-line and corner panel connectors cannot be used in 120° configurations.*

► Page 196

120° connectors are for the same height panels only.

120° and 90° connections can occur within the same workstation.

Surface Materials

Universal and 120° connector

• 0835 Black

Off-Module Connections

Kick offers true off-module capability with the ability to mount a return panel anywhere along the spine in 1" increments.

Product Details

Off-module connectors

connect all types of Kick panels of the same height. Connection locations are at 1" increments and allow the use of standard-size worksurfaces for workstation planning. Stackers can be mounted on either or both of the panels. There is a dead zone at the last 3" of each end of the panel where an off-module connection cannot be made due to lack of horizontal mounting slots.

Off-Module Connector—Universal

Bottom connection requires the use of two self-drilling screws (included) through the skin of the host panel approximately 1/2" above the base cover.

**Off-Module Connector—
Panel-Width Specific**

The panel width-specific off-module connector incorporates a horizontal element that connects to the base feet of the host panel. There is no defacing of either panel.

Panel Trim

Steel top caps are available in two heights—low is standard and high is available as an option. High top cap will accommodate cable routing at the top of the panel.

Actual Dimensions			
	Vertical Corner Trim	End-of-Run Trim	Change-of-Height Trim
Height	42", 48", 54", or 66"	42", 48", 54", 60", 66", 72", or 78"	6", 12", 18", 24", or 36"
Standard Thickness	1/4"	1/4"	1/4"
High Cable Capacity Thickness	2"	2"	2"

Product Details

Vertical corner trim allows cables to be laid in before the cover is snapped into place and can be removed for cable access. Corner trim is required for L-, T-, and X-configurations and includes a low trim end cap. High trim end caps, available as an option, are application specific.

Always specify vertical corner trim the same height as the tallest panel.

L-configurations:

High L end cap
or low universal
end cap

High end-of-run cap
or low universal
end cap

T-configurations:

High T end cap
or low universal
end cap

High end-of-run cap

end cap

High T end cap
or low universal
end cap

End caps:

High T end cap

High end-of-run cap

High in-line cap

High L end cap

High X end cap

Low universal end cap

Vertical corner trim and corner change-of-height trim are required in combination for L-, T-, and X-configurations when stackers are used. All corner trims include a low trim end cap. High trim end caps, available as an option, are application specific.

Always specify vertical corner trim the same height as the tallest base panel. Specify vertical corner change-of-height trim to cover the ends of stackers.

Vertical end-of-run trim covers the exposed end of panels and includes a low trim end cap. High trim end caps, available as an option, are application specific.

Vertical end-of-run trim must match height of base panel.

Vertical end-of-run trim must match combined height of base panel and stacker.

Vertical in-line change-of-height trim is available 12"H, 18"H, 24"H, and 36"H in slim profile (standard with a low trim end cap) or with cable-routing capacity (standard with a high trim end cap). Trim covers the exposed section of the taller panel when panels of different heights are joined.

120° vertical corner trim is required for all 120° connections. The same 120° vertical corner trim is used for two- and three-way connections and is available with a low end cap only. Both two- and three-way end caps are included with each 120° vertical corner trim package.

► Page 194

Application Topics

Always specify vertical corner trim the same height as tallest panel.

When specifying a base panel and a stacker, specify corner trim to match base panel and change-of-height trim piece to cover the ends of stacker.

When base panel and stacker are specified in end-of-run trim must match total overall height.

Surface Materials

Trim
• Paint

Sliding Panel Door

Sliding door is handed and can be added to workstations for additional privacy.

Door must be installed on the outside of the workstation.

Receiving panel height must match door height.

Door is attached to the host panel only; therefore, the stability of the door is closely related to the stability of the host panel.

The sliding door infill is standard in ribbed, translucent plastic. Clear tempered glass and white laminated glass are available as options.

Sliding door can be specified with lock option. Specify lock cylinder and key separately.

Sliding door is not freestanding; it must mount to panels.

Height of host panel must match height of door.

Sliding door frame and threshold are constructed from extruded aluminum and painted.

Lock mechanism is on the right-hand side of a left-hand sliding door.

Door handle is integral and is ADA compliant.

Left-hand sliding door closes from right to left.

Door slides along threshold on wheels. Wheels have 1" adjustment for installation on uneven floors. Threshold is ADA compliant.

Right-hand sliding door closes from left to right.

Lock mechanism is on left-hand side of a right-hand sliding door to lock into the host panel.

Actual Dimensions

Height 66" or 78"

Width 36" or 42"

Thickness 1 $\frac{1}{4}$ "

Product Details

Sliding door is handed. Right-handed sliding door or left-handed sliding door must be specified.

Sliding door can be specified with lock option. Specify lock cylinder and key separately.

Door insert is standard in ribbed, translucent plastic. Clear tempered glass and white laminated glass are available as options.

Application Topics

Sliding door is not free-standing. It must mount to panels.

Door is attached to the host panel only. Therefore, the stability of the door is closely related to the stability of the host panel.

Door track is attached to both host panel and opposite panel.

Height of door must match height of host panel - 66"H or 78"H.

Match the width of the host panel to the width of the door.

Sliding panel door cannot attach to a host panel with a double-pane window.

- Pedestal with filler
- 90° panel connection—panel width must match worksurface depth

Tip: Upmount bin brackets cannot be used with 120° panel configurations.

Three-Panel Run—120° Connection

Tip: Same rule applies if using 120° worksurfaces in place of straight worksurfaces.

Tip: Upmount bin brackets cannot be used with 120° panel configurations.

Tackable Acoustical Panels and Panel Frames with Inserts—Three-Way 120° Connection

Three Panel 120° Connection with One Supported Component

Tip: Upmount bin brackets cannot be used with 120° panel configurations.

Three Panel 120° Connection with 120° Worksurface and up to One Additional Component

Tip: Loads must be counterbalanced in this application.

Tip: Worksurface needs to be supported to floor or application needs to be counterbalanced.

Panels and Panel Stackers

Base panels can accept one, two, or three stackers, up to a total height of 78". See below for additional rules and exceptions.

Universal or change-of-height connectors must be used at top of base panel and each stacker wherever possible to increase stability.

Panels and Panel Stackers, continued

All stackers are load bearing, but load cannot be mounted above 66" height.

Circuit Specifications

Detailed Information for the Electrical Engineer

Five wiring schematics are available for Kick—two 3-circuit systems and three 4-circuit systems.

All the components in an electrical distribution network must use the same wiring schematic. The components (power poles, base power-ins, powerways, and receptacles) snap together and are keyed to make it impossible to connect mismatched parts. Color-coded and labeled components make it easy for installers to identify which wiring schematic each component is dedicated to.

Color coding

- 3 circuits shared = Black
- 3 circuits separate = White
- 4 circuits 3+D = Black
- 4 circuit 3I+1 = Tan
- 4 circuit 2+2 = Grey

Overview

Three-circuit electrical components with shared neutrals are standard with 5 wires to provide three circuits that share one oversized neutral and one ground. This is the traditional 3-circuit power alternative that is specified by adding the suffix P3 to the panel style number.

Three-circuit with separate neutrals have 8 wires providing three circuits, each with its own separate neutral. The first two circuits share an isolated ground; the third uses the system ground.

Four-circuit 3+D are standard with 8 wires to provide four circuits. Three of these circuits share an oversized neutral and a system ground while the remaining circuit has its own neutral and isolated ground. This is the traditional 4-circuit power, also known as 3+D, that is specified by adding the suffix P4 to the panel style number.

Four-circuit, 3I+1 again have 8 wires but with three circuits that share an oversized neutral and isolated ground. The fourth circuit has its own neutral and is attached to the system ground. This electrical system is like the standard 3+D, but the grounds are switched, providing three isolated circuits and one general purpose circuit as compared to one isolated circuit and three general purpose circuits.

Four-circuit 2+2 also have 8 wires but provide two circuits that share an oversized neutral and a system ground and an additional two circuits with a second oversized neutral and an isolated ground.

How to Calculate Power Needs

Use This to Determine How Many Power-Ins You'll Need

How to Calculate
Power Needs

When planning a power network, you must calculate the amperage requirements of all your electrical components so you can provide sufficient electricity to power them.

If your usage is not known in advance:

The National Electrical Code (NEC) allows a maximum of 13 receptacles on each 20-amp circuit. This provides up to 30 receptacles for each 3-circuit power-in and 40 receptacles for each 4-circuit power-in.

If your usage is known in advance:

Add up the amperage used by each piece of equipment in the workstation. Whenever you reach 60 amps (20 amps times 3 circuits) or 80 amps (20 amps times 4 circuits) from items that are likely to be used at the same time, you have reached the limit for a single power-in. Specify another power-in and continue until all equipment is powered.

If the circuits will normally be subject to a continuous load (three or more hours of continuous use, such as lights or computers), the NEC requires that circuit capacity be "de-rated" by 20 percent. Therefore, treat circuits used for continuous loads as if they were rated at 16 amps instead of the regular 20 amps.

Try to anticipate future increases in power requirements and build some excess capacity into your plan.

► See table at right for typical and actual amperage usages for components.

To calculate amperage when the wattage of a device is known, divide watts by 120.

Some appliances, such as large copiers, coffee makers, or space heaters require most of the current available on a 20-amp circuit. It is recommended that such devices be supplied with their own receptacle/circuit, directly from the building. This leaves the capacity of the furniture circuits available for the more dynamic requirements of the office equipment.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper planning of electrical circuits in your locale.

Approximate power consumption for common devices

• Device	• Wattage	• Amperage	• Voltage	• Number of Devices Supported on Single 20 Amp Circuit*
Laptop	90	0.8	110	20
CPU/Desktop Computer	120	1.1	110	15
Monitor	60	0.5	110	29
Phone	5	0.0	110	352

Low Power Tablet (e.g. iPad Air)	15	0.1	110	117
Desktop Printer	40	0.4	110	44
42" LCD Screen	210	1.9	110	8
DVD Player	25	0.2	110	70
Projector	175	1.6	110	10
Desktop Lamp	19	0.2	110	93
Large Printer/Copier (high)	1900	17.3	110	1
Large Printer/Copier (low)	850	7.7	110	2
Paper Shredder	360	3.3	110	5
Desktop Fan	20	0.2	110	88
Standing Fan	180	1.6	110	10
Coffee Maker (high)	1200	10.9	110	1
Coffee Maker (low)	600	5.5	110	3
Microwave (high)	400	13.6	110	1
Microwave (low)	150	5.5	110	3
Refrigerator (high)	1500	3.6	110	4
Refrigerator (low)	200	1.4	110	12
Vacuum (high)	1500	13.6	110	1
Vacuum (low)	200	1.8	110	9
Space Heater (high)	1500	13.6	110	1
Space Heater (low)	750	6.8	110	2

*Note: These calculations are estimations and are meant solely for informational purposes. It is important to conduct proper power planning for each installation to prevent overloading a circuit.

Cable Capacities

Test and verify capacities for your individual situation.

We recommend that testing be conducted using your specific cable, as well as the furniture configuration you are considering. Cable capacities in this table are based on actual cable studies performed by an independent contractor following EIA/TIA codes and practices and can be taken as an accurate assessment of maximum practical capacity. Actual cable capacities may vary slightly depending on which manufacturer produced the cable and the specific field conditions.

Cable capacities are based on Category 6 and Category 6a cables at 55% fill capacity.

Tip: Low top cap does not accept any cables.

Cables Tested

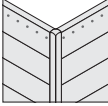

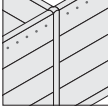

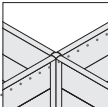

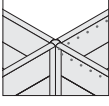

A CommScope Systimax Gigaspeed 1071E Series Category 6 Cable
OD=0.23"

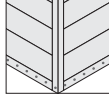

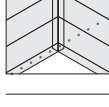

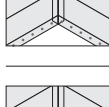

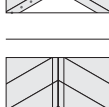

B CommScope Systimax X10D 1091B Series Category 6A Cable
OD=0.285"

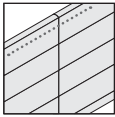

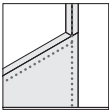

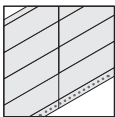

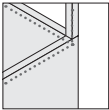

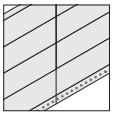

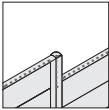

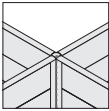

Powerways reduce cable capacity. An average of 10-15 cables will be reduced per powerway used. However, this number varies according to installation practices and the type of cables used.

If glass stacker is used at the top of a panel, top cap lay-in cable capacity is 20 for category 6 cables.

When laying cables vertically behind skins, capacity is dependent on skin width.

		A	B
L, T, X, V, and Y Horizontal Routing			
	Lay-in cable routing at top of panels in L or V configuration	25 Hi	20 Hi
	Lay-in cable routing at top of panels in T configuration	30 Hi	25 Hi
	Lay-in cable routing in top of panels in X or Y configuration	30 Hi	25 Hi
	Lay-in cable routing (around the corner) at the top of a panel in T or X configuration	25 Hi	20 Hi

		A	B
L, T, X, V, and Y Horizontal Routing			
	Lay-in cable routing (corner) at base of panel with power in L, T, or V configuration	12	10
	Lay-in cable routing (corner) at base of panel without power in L, T, or V configuration	32	20
	Lay-in cable routing (straight) at base of panel with power in X or Y configuration	12	10
	Lay-in cable routing (corner) at base of panel with power in X or Y configuration	12	10
	Lay-in cable routing (straight) at base of panel without power, or with powerway routed above in X or Y configuration	32	25
	Lay-in cable routing (corner) at base of panel without power, or with powerway routed above in X or Y configuration	32	20

		A	B			A	B
Straight Horizontal Routing				Straight Vertical Routing			
	Lay-in cable routing at top of panel	30 Hi	25 Hi		Vertical cable routing inside power pole (used on an end, L or T configuration an end)	28 Hi	18 Hi

	Lay-in cable routing at base of panel without power or with powerway routed above	32	25		Change in height (top)	13 Hi	9 Hi
					Through center of X	24	16

Tip: Low top cap does not accept any cables.

Powerway

Powerways that are installed in the panel base cavity allow power to be distributed wherever panels go. They are concealed when properly installed. All five wiring schematics are available.

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

All Steelcase electrical systems are designed in compliance with the National Electrical Code (NEC) and Canadian Electrical Code (CEC) to function as a multi-wire branch circuit. Installations should be made in accordance with the NEC or CEC provisions for multi-wire branch circuits.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of electrical equipment. Chicago, New York City, and Los Angeles have special requirements.

Kick panels that are 24"W use a double whip powerway with one green end and one yellow end connector.

Product Details

Straight connection is formed when a flag connector from one powerway attaches to the second flag terminal on the end of the adjacent powerway.

L-connection is formed when flag connector turns to left or right.

T-connection is formed by two flags that make right turns.

X-connection is formed by three flags that make right turns.

End-of-run is terminated by folding the last flag back and connecting it to its own power block flag terminal.

Panel-to-panel powerway connector can be used with powerways that are 30"W and wider to create a power link where no flag is available. It also can be used to correct planning and installation oversights without having to reconfigure.

► Page 200

Power can be routed through the base of panels in a two- and three-panel, 120° connection.

(inside measurement)

2" x 2" power and cable poles can bring building power and data from the ceiling to a 120° panel application at the end of a run or 90° connection only.

Application Topics

Factory included powerway for field installation replaces need to order separate powerways.

Field-installed powerways can be ordered through Kick service parts.

Wiring and Cabling

Chicago, New York City, and Los Angeles have special requirements.

Chicago electrical code requires that all electrical connections be hardwired in the field. Order a non-powered panel and have the electrician obtain conduit and receptacles (Leviton 5325) to make the connections in the field.

Underwriters Laboratory (UL) listed. These products have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult with a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Receptacle

Receptacles are ordered separately and installed in the field in knockout opening. They plug into terminals on a powerway and are secured with screws. Receptacles are designed to link to a specific circuit.

► Specifying, page 201.

All receptacles are duplex (two outlets) and are available in two sizes—standard and larger—and two versions—15-amp and 20-amp. Specific lines may be limited to and fit only in specific receptacle locations in the base.

Smaller-size openings of the base cover house only standard-size receptacle. Receptacle is located 12" from end of base trim.

Larger-size opening in the base cover in 36"W through 60"W panels house larger-size duplex receptacle with two outlets. The larger opening is always in the right-hand position.

Standard	Larger
3-Circuit, Shared	
3-Circuit, Separate Neutrals	
3+D	
3I+1	
2+2	

Product Details

Numbers printed on the receptacles indicate the line number. Label on receptacle indicates which circuit the receptacle connects to, so the user can control which devices are on specific circuits.

With the 3-circuit separate neutral system, these designations are with letters A, B, or C as compared to 1, 2, 3, or 4 in the other systems.

Specific circuits are accessed through the powerway by installing the appropriate receptacle in the receptacle location. All five wiring schematics are available.

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

Available in 6000 Black plastic only.

Receptacles come in packages of six receptacles.

Integrated Power and Communication

Power and communication components can be installed in holes cut onsite in any Kick tackable acoustical panel. Each component can be accessed from one side of the panel only.

► Specifying, pages 202

Product Details

Power receptacle connects to panel powerway at any powerway receptacle access location and accesses line 1 only. Power receptacle can be specified to function with any of the five Kick powerway wiring schematics. Component complies with New York City requirements for a field-installed power unit.

Junction box accommodates customer-supplied voice/data jacks and trim plate. Communication module can be used for power in Chicago, where local electrical code requires that power in the panel base and the harness bringing power to worksurface height must be hardwired in the field.

Two holes must be cut into the panel surface—one for the component and one for the egress of cabling or powerway at panel base.

Powerway connects to panel powerway at receptacle location in base cover. Communication cables enter base cavity underneath base trim.

Power and communication components are field-installed to the inside of the panel tubular frame at any user-specified location.

Power receptacle includes three receptacles, each with trim plate. Communication module includes communication housing. Customer must supply trim plate and voice/data jacks for communication module.

Shroud available in black plastic only.

Remember to specify powerway with panel.

Wiring and Cabling

Chicago, New York City, and Los Angeles have special requirements.

Underwriters Laboratory (UL) listed. These products have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult with a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Power and Cable Pole

► Specifying, pages 203

Junction box, at the top of the power pole, encloses the hardwired connection to the building's electrical service.

Power poles bring building power from the ceiling to the powerways in the base cavity of panels. They can also be used to run cables into the top cap or into the panel base cavity. All five wiring schematics are available.

Trim conceals powerway and cables routed to the base of the panel.

Knockout

Flag connector attaches to either end of the powerway on 30"W to 60"W panels. Flag connector attaches to green end of the powerway on 24"W panels.

Hanger bar secures the top of the pole to the ceiling grid.

Ceiling trim plate

Cable poles provide a space to route cables from the ceiling to the high top cap or base cavity of a panel.

Knockouts allow data distribution in change-of-height conditions.

Retainer attaches to the end of a panel with screws that attach below the top cap. Panel remains undamaged so power and cable pole can be removed and relocated later.

All the components in an electrical distribution network must use the same wiring schematics. Components are color coded and keyed to make it impossible to connect mismatched parts.

Product Details

Height of the pole must correspond with the height of the panel it is attached to so that the pole will connect under the top cap. Adjacent panels can be lower. Ceiling heights up to 10'4" can be accommodated.

Power and cable pole packages ship with one left-hand and one right-hand corner change-of-height connector. A separate change-of-height package may be required in certain X configurations. See assembly direction 93-9504745 for more information.

In T configurations, height of power and cable pole must correspond to the height of the center panel.

120° vertical corner trim is required for all 120° connections. The same 120° vertical corner trim is used for two- and three-way connections and is available with a low end cap only. Both two- and three-way end caps are included with each 120° vertical corner trim package.

► Page 194

Ceiling trim plate

- 4790 Sodium paint

Base Power-In

Base power-ins are field installed and connect the panel electrical system to the building power source. All five wiring schematics are available.

► Specifying, page 205.

Power-ins are UL listed and CSA certified. Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code.

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts. Building power source can come from the floor, wall, or column.

Product Details

Power-in brings power to panel run by connecting to a designated receptacle location on either end of the powerway. Power-ins fit standard-size receptacle openings if the green end of the powerway is located behind the receptacle opening.

Breakaway base power-in is mandated for use in health care occupancies in the State of California by the Office of Statewide Health Planning and Development Organization (OSHDP).

With 50 pounds of pressure, the connection will come apart to separate live electrical current in the event of panel movement. Breakaway power-ins fit duplex- or triplex-size receptacle openings.
Tip: This product is not available in Canada.

Paint color is required for base power-in for use in New York.

Worksurface-Height Power and Communication

Power and communication can be accessed at or near worksurface height by using panel- or worksurface-mounted receptacles, panel- or worksurface-mounted communication modules, or worksurface-mounted power and communication sphere.

► Pages 206 and 222

Panel-mounted receptacle

Panel-mounted communication module

Worksurface-mounted power and communication sphere

Worksurface-mounted receptacle

Worksurface-mounted communication module

Flip grommet

Grommet

Product Details

Panel- and worksurface-mounted receptacles come in packages of three. Each has a duplex receptacle, a nine-foot cord, and a three-prong plug.

Panel- and worksurface-mounted communication modules come in packages of three. Each contains face plates to accommodate customer-supplied voice/data jacks. Comes in package of three.

Worksurface-mounted power and communication sphere contains two simplex electrical outlets, face plates to accommodate customer-supplied data jacks, a six-foot cord, and a three-prong plug.

Grommets are available in packages of 10 to finish exposed edges of field-installed openings in the worksurface for vertical cable routing. Grommets are black plastic.

Flip grommet is an elegant approach to a basic element. The flip grommet is available field installed only and utilizes a standard 3" hole, which is the same hole size for the TSAEGROM grommet that is standard on Kick, Currency and Groupwork tables.

When cords and wires are routed through the grommet, the flip cover can be closed to hide the routing while providing an upscale design.

Flip cover is available in two finishes, black and platinum.

All power and communication products are available in black plastic only.

Wiring and Cabling

Chicago, New York City, and Los Angeles have special requirements.

Underwriters

Laboratory (UL) listed.

These products have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. TS Series Transaction Worksurfaces

TS Series Worksurfaces

Worksurface has a wood core with laminate top and plastic edge band. Low-Pressure Laminates and High-Pressure Laminates are available. Plastic edge band color is selectable.

Full-depth worksurfaces fit flush against panels.

Front (user's) edge is a plastic edge band with a 3 mm radius. Back and side edges are flat.

Grommet is standard on corner worksurfaces only. Field-installed grommet requires a 3" diameter hole in the worksurface.

Worksurface has a wood core with a High-Pressure or Low-Pressure Laminate surface and is 1³/₁₆" thick.

Product Details

3 mm edge profile Knife edge profile

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free. See surface material listing in this book for specific PVC-free availability.

Edge profile finishes are specified separately from laminate color.

Corner bracket is included to connect the back corner of worksurface to panels.

Edge Profiles

Linking

Transaction

30"D straight and transition cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, post leg, side support bracket, or an adjacent return worksurface.

Spanner worksurfaces with 3" notch accommodate Kick panels. Legs and cantilevers or column and cantilevers must be used for support.

Edge Profile is applied to front (user's) edge only.

**120° Worksurface****Peninsula**

Bullet peninsula, angled peninsula, and jetty worksurfaces can be supported two ways:

- With a cantilever, a center support panel, and a column
- With a cantilever, a side support bracket, and two post legs

**Angled Peninsula**

Linking worksurfaces with 3" notch accommodate Kick panels. One leg and two cantilevers must be used to support linking worksurfaces.

Visitor worksurfaces must be supported by a cantilever, a side support bracket, and a post leg.

Connections

Supports are ordered separately and installed in the field. The following supports are available for use with Kick worksurfaces:

- Post leg
- H-leg
- Cantilever with tie plate
- Side support brackets
- Tie plates
- In-line support plate
- Reinforcing channel
- On-module end panel

**Post leg****H-leg with bracket****Cantilever with tie plate****Side support brackets****Tie plates****In-line support plate****Reinforcing channel****End panels—standard height and standing height**

Cantilever with tie plate works in left-hand, right-hand, or shared applications.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.

► Page 259

Wiring & Cabling

Grommet is standard on corner worksurfaces.

Surface Materials

High-Pressure and Low-Pressure Laminate Worksurfaces

- Laminate
- See *Surface Materials Reference Manual*.
- Open Line laminate (option)
- A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- See *Surface Materials Reference Manual*.

Front (user's) edge(s)

- Plastic

Back and side edges

- Plastic color default to match user's edge

Kick is available in a wide variety of worksurface shapes. Directional laminate grain direction is shown.

High-Pressure Laminates, or HPLs, are composed of multiple layers of crafted paper individually soaked in resin. There are 7-15 layers of paper combined to make the final sheet. The top layers are translucent melamine sheet and a decorative layer. The sheets are combined under heat and high pressure to form a single laminate sheet. The resulting sheet is then bonded under heat and high pressure to a wood core. HPLs are generally considered more durable than LPLs due to the extra layers of craft paper (backer) used in their creation. While they cost more, they are more durable. HPLs are generally used in higher traffic areas such as cafeterias and conference rooms. Generally, it is more cost effective to restrict their use to areas needing the added durability HPLs provide.

Low-Pressure Laminates, or LPLs, are created by dipping decorative crafted paper in melamine resin. The melamine dipped paper is then bonded to a wood core under heat and high-pressure. LPLs are generally suitable for use in lower impact areas. LPLs are generally used in vertical applications as well as tops for workstations and private offices. Generally, it is more cost effective to use LPLs when the performance of HPLs are not required.

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 10–20 worksurfaces. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of nine or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible.

TS Series Worksurface Supports

On-module supports can be used to panel support worksurfaces in various configurations.

► Specifying, page 258

Cantilever can be used to panel-support a worksurface at any height.

Side support brackets can be used to support the ends of straight and corner worksurfaces and to support the back corner of any corner worksurface.

End panel can be used to support the end of a worksurface at seated height or standing height.

Product Details

On-module worksurface supports engage the slots in the vertical uprights of Kick panels.

Side support brackets support worksurfaces at any height in 1" increments. Brackets ship as a left- and right-hand pair and are ordered separately.

Side support brackets can be used to support the end of a worksurface that is wrapped by a panel with the same width dimension that matches the worksurface depth.

Single side support bracket can be used to support the rear corner of corner, extended corner, and 120° corner worksurfaces. It is standard with these corner worksurfaces.

Actual Dimensions

	Cantilever	Center support panel	End panel	Post Leg	H-Legs
Height	13"	28½" or 40 ⁷ / ₈ "*	28½" or 40 ⁷ / ₈ "*	28½"	28½"
Depth	16"	11"	23¾" or 29¾"	N.A.	14" or 22¾"
Glide Range	N.A.	1¼"	1¼"	2"	2¾"

*Height dimensions include the thickness of a worksurface.

Cantilevers support worksurfaces at any height in 1" increments. Cantilever is non-handed and can be used to support either end of a worksurface, or shared to support two worksurfaces at the same height simultaneously. One tie plate ships with each cantilever.

30°D straight, tapered, and transition cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, post leg, side support bracket, or an adjacent return worksurface.

End panels can be used to support the end of a worksurface for additional panel stability. Refer to the applicable panel stability guidelines for specific requirements.

End panels are available in seated and standing heights, and cannot be used in freestanding applications.

All panel mounted supports can be removed and repositioned later without any permanent damage to panels or skins.

Pedestals and lateral files with a filler can be used to support the end of a worksurface in place of an end panel.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.

Freestanding Guidelines

For TS Series Worksurfaces with Legs

The following section on freestanding worksurfaces gives some guidelines to be used with common freestanding configurations. Consult your local dealer or Steelcase representative prior to deviating from these guidelines.

Counterweight packages for storage products are required to ensure product stability.

► See page 107 for *Counterweight Requirements for Storage Products*.

There are several ways to support the ends of a freestanding worksurface:

With post legs.

72" max.

72" max.

With a 22"D or 28"D pedestal.

Combined worksurfaces can give each other support when joined with an 11"W H-leg and tie plate.

Corner worksurface attached to adjacent worksurfaces requires 11"W H-leg. Tie plate is recommended to align worksurfaces. This application only good for 48"W corner worksurfaces. The 36"W and 42"W corner worksurfaces do not meet ADA requirements.

72" max. 72" max.

20"W H-leg can support adjacent worksurfaces up to 72"W.

72" max. 72" max.

11"W H-leg can be used to support a corner worksurface and adjacent worksurfaces up to 72"W.

120° worksurface.

11\"W H-leg can be used to support a corner worksurface and adjacent worksurfaces up to 72\"W.

H-leg can be used to support adjacent perpendicular worksurfaces up to 72\"W.

Reinforcing channel (TSATRC39, TSATRC48, TSATRC57, or TSATRC72) is available to add support to worksurfaces that have 60\" or more of unsupported kneespace and that are heavily loaded.

Statement of Line

All worksurface sizes and shapes are available in High-Pressure Laminate with 3 mm edge. Most sizes and shapes are also available in High-Pressure Laminate with P-edge or in wood veneer with square edge. See Specifying pages for details.

Worksurface dimensions shown apply to both wood veneer and High-Pressure Laminate versions of each worksurface.

Universal Systems Worksurfaces

► Specifying Systems
Worksurfaces, page 225

**Systems worksurfaces—
with 1/2" Cord Drop** feature
built-in cable management flex-
ibility, allowing cords to drop
below the worksurface at any
point along the back edge.

**Systems worksurfaces—
Full Depth** feature a tighter fit
to panels for a cleaner
aesthetic.

**Full-depth worksur-
faces** fit flush against
panels. Cords and cables
are routed through cable
scallops.

Front (user's) edge is
available in two edge profiles
on laminate worksurfaces.
Wood veneer worksurfaces
have a square (3 mm) edge
profile only. Back and side
edges are flat.

Cable scallops allow
cords and plugs to pass
behind the worksurface.
Cable scallops can be
omitted as an option.

Worksurface has a wood
core with a High-Pressure
Laminate or wood veneer
surface and is 1 3/16" thick.

Product Details

High-Pressure Laminate Worksurfaces

**Front (user's) edge
profile** is available in two
shapes.

3 mm
edge profile

P-edge
edge profile

Knife
edge profile

**PVC-free, 3 mm edge
profiles** are proprietary
polyolefin blend for all solid
colors and seven woodgrain
finishes. Matching 1 mm
side and back edges are
also PVC-free. See surface
material listing in this book
for specific PVC-free
availability.

P-edge profile rises
slightly above the laminate
surface and curves into a
3/8" radius which optimizes
ergonomic benefit for the
user. Back and side edges
are flat.

**Knife edge with 3 mm
user edge** is available on
straight and tapered sys-
tems worksurfaces and on
round tables.

Edge profile finishes
are specified separately
from laminate color.

Wood Veneer Worksurfaces

**Front (user's) edge pro-
file** is wood veneer with a
square (3 mm) radius. Back
edge and edge that joins
to adjacent worksurfaces
are flat. Wood edge color
matches finish specified for
worksurface.

Edge Profiles

Edge profile is applied to front (user's) edge only.

P-edge profile work surface depths are $\frac{3}{8}$ " deeper than 3 mm edge profile worksurfaces. Both edge profiles provide a flush interface with universal pedestals.

Dual-worksurfaces are two pieces - a large monitor surface with a smaller keyboard surface attached. A dual-arm spring mechanism provides superior stability when compared to the single-arm spring mechanism used in worksurfaces with an adjustable keyboard shelf.

Keyboard surface on dual worksurface can be adjusted to positions up to 6" higher or 5" lower than the monitor worksurface.

Keyboard surface tilts with a range of 25°.

A 1" gap separates the sides of the keyboard surface and adjacent worksurfaces. There is also a $1\frac{1}{2}$ " space between the keyboard and monitor surfaces.

30"D straight, tapered, and transition cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, post leg, side support bracket, or an adjacent return worksurface.

Taper-flat worksurfaces can be supported at the larger end with a side support bracket and a post leg. If the larger end is 30"D, a 24"D end panel can also be used.

3 mm edge bullet peninsula, jetty, and bubble worksurfaces can be supported two ways:

- With a cantilever, a center support panel and a column
- With a cantilever, a side support bracket, and two post legs

In certain applications, a center support panel should not be used because the unfinished top edge of the support panel would be exposed. Use a cantilever, a side support bracket, and two post legs instead. These applications include:

- Bullet peninsula with P-edge
- Jetty with P-edge
- Bubble jetty with P-edge
- Angled peninsula with 3 mm edge and $\frac{1}{2}$ " cord drop

3 mm edge visitor worksurfaces must be supported by either a cantilever and a center support panel, or by a cantilever, a side support bracket, and a leg.

In P-edge profile work surface applications, a side support bracket, a cantilever, and a leg must be used for support. A center support panel should not be used because the unfinished top edge of the support panel would be exposed.

Connections

Worksurfaces can be used freestanding or in panel-supported installations.

Supports are ordered separately and installed in the field.

For panel-supported applications you can use:

- Side support brackets
- Cantilever with tie plate
- End panel
- Standing-height end panel
- Support plate
- Center support panel with tie plate
- Standing-height center support panel with tie plate
- Columns or legs

► See page 96 for *Universal Panel-Mounted Systems Worksurface Supports*.

► See *Storage Specification Guide*.

Tip: Selected worksurfaces with P-edge profile include alignment slots to accept cabby legs for column support:

- Use two legs for panel-mounted spanner, bullet peninsula, jetty, and bubble jetty worksurfaces.
- Use one leg for visitor worksurfaces.

For leg-based applications you can use:

- Post legs
- Double post leg
- Double post C-leg
- Support plate

► See page 98 for *Legs and Columns for Universal Systems Worksurfaces*.

Tip: Pedestal can also be used in leg-based free-standing installations.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.

► Page 259

Knife edge worksurfaces require reinforcement channels for spans greater than 48". Use TS7WKSPT39 for 54"W worksurfaces, TS7WKSPT for 60"W and 66"W worksurfaces, and TS7WKSPT72 for 72" worksurfaces.

Heavy load worksurfaces spanning greater than 60", or all work-surface spans wider than 72", require additional support of a cantilever, pedestal, intermediate support, or leg.

Wiring & Cabling

Worksurface depth is 1/2" less than nominal and allows cords and cables to pass over at any point. Cable scallops provide space for plugs to pass over the back edge of the worksurface.

Cable scallop allows cord plugs to easily pass below the worksurface. Worksurface wire managers are available to convert cable scallops into grommets in freestanding applications. Wire managers are included with wood veneer worksurfaces. Wire managers for use with laminate worksurface must be ordered separately.

Corner worksurfaces have scallops located 12 1/2" from the rear corner of the worksurface to the center of the scallop. Taper-flat worksurfaces have a single scallop located 18 1/2" from the larger end. Scallops are centered on the rear edge of all other worksurfaces that include them.

Cable scallop can be omitted for freestanding applications or panel-supported applications where plugs do not need to pass over the back edge of the worksurface.

Cable management devices are available to help manage conventional and fiber-optic cables beneath the worksurface. ► See *Worksurface Power and Communication*, page 54.

Surface Materials

High-Pressure Laminate Worksurfaces

- Laminate
- See *Surface Materials Reference Manual*.
- Open Line laminate (option)
A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- See *Surface Materials Reference Manual*.

Front (user's) edge(s)

- Plastic

Back and side edges

- Plastic color default to match user's edge

Wood Veneer Worksurfaces

- Wood veneer (standard)
- Customiz stain (option)
- Full-fill finish (option)

Square (3 mm) edge profile

- Wood veneer to match worksurface

Front (user's) edge(s)

- Wood edge band

Application Topics

P-Edge Profile Application Rules

P-edge profiles will produce a valley when installed perpendicular to adjacent worksurfaces. The additional 3/8" depth of P-edge profiles causes an interference fit in on-module panel-mounted applications. For L-configurations using two worksurfaces, the 3 mm edge profile is recommended.

P-edge profile work-surface depth prevents modesty panels from fitting properly in return or bridge U-Free desk applications. Modesty panels cannot be used when a return or bridge worksurface is attached to the front edge of a P-edge worksurface. The 3 mm edge profile is recommended for return or bridge applications.

U-Free peninsula support is not compatible with P-edge bullet peninsula, jetty or bubble jetty worksurfaces. Legs or other alternate supports are recommended.

Full-depth worksurfaces provide an uninterrupted working surface and are designed to allow traditional corner or L-configuration planning without creating uneven gaps.

Plan using worksurfaces actual dimensions when panel-wrapping worksurfaces because work-surface depths and widths vary by type. Straight and transition worksurfaces are full-width to correspond directly with panel width. Corner, ex-tended corner, 120° corner, bullet peninsula, jetty, and visitor worksurfaces are 1/2" less than panel width to allow for a consistent 1/2" cable-management gap when used in combination with straight worksurfaces.

Tip: To avoid uneven gaps in panel-supported applications, use full-depth worksurfaces to create L-configurations.

Do not use a Universal Systems Worksurface

as a top for storage that matches the work-surface width. Universal Systems Worksurfaces are slightly undersized for panel-wrapped applications and will not fit over full-width storage. Use field-installed storage tops for this type of application.

► See *Storage Specification Guide*.

Knife edge worksurfaces have limitations for support options and application restrictions.

► See page 100 for *Knife Edge Worksurface Application Guidelines*.

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5–50 worksurfaces depending on work-surface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized.

Worksurface Support Guidelines

Worksurface spans greater than 54" require a brace or additional support to the floor. Spans greater than 72" wide cannot be supported only by a reinforcing channel, and require additional supports to the floor. Calculate span distance by measuring from edge of one end of worksurface to edge of other end of worksurface.

Exception: When using pedestals or lateral files to support a worksurface, measure from the inside edge of the storage unit.

Worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. A light load application is less than 40 pounds placed on a worksurface. Reinforcing channel must be specified separately.

► Page 221

Exception: Knife edge worksurfaces require support on spans greater than 48"W.

Reinforcing channel is not required on worksurfaces with spans less than 54"W.

Lightly loaded applications typically include a workstation with monitors, lighting, limited organizational tools, and personal items.

Reinforcing channel or additional support is required for worksurfaces with spans greater than 54"W and less than 72"W in light use applications and on worksurfaces with spans greater than 54"W and less than 60"W in heavy load applications.

Worksurface span cannot be supported solely by a reinforcing channel. Additional to the floor supports are required.

Tip: Reinforcing channels add 1"D below the worksurface.

Tip: For maximum effectiveness, place the reinforcing channel in the middle of the worksurface span.

Calculate span distance by measuring from edge of one end of worksurface to edge of other end of worksurface. To determine size of reinforcing channel needed, deduct the amount listed in the matrix below from the measured span. Deduction in inches is based on combination of the left-hand and right-hand supports.

Example: 72"W measured span, with application of cantilever for left-hand support and end panel for right-hand support, has a span deduction of 6" for a reinforcing channel size of 66" ($72" - 6" = 66"$). For this application, use reinforcing channel TS7WKSPT66.

Worksurface Span Deductions for Determining Reinforcing Channel Size		Right-Hand Support						
		End Panel	FrameOne Leg	FrameOne Leg-Table Application	Intermediate Support	DBL Post Leg	Cantilever	All other Legs/Supports
Left- Hand Support	End Panel	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	FrameOne Leg	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	FrameOne Leg-Table Application	-9"	-9"	-12"	-12"	-9"	-9"	-9"
	Intermediate Support	-9"	-9"	-12"	-12"	-9"	-9"	-9"
	DBL Post Leg	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	Cantilever	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	All other Legs/Supports	-6"	-6"	-9"	-9"	-6"	-6"	-6"

Note: Not all supports shown work effectively with this panel system. Please check with your field sales representative for clarification and understanding prior to ordering

Reinforcing Channel Sizes		
Style Number	Nominal	Actual
TS7WKSPT39	39"W	39.231"W
TS7WKSPT48	48"W	47.547"W
TS7WKSPT51	51"W	50.547"W
TS7WKSPT54	54"W	53.547"W
TS7WKSPT	57"W	56.547"W
TS7WKSPT60	60"W	59.547"W
TS7WKSPT63	63"W	62.547"W
TS7WKSPT66	66"W	65.547"W
TS7WKSPT72	72"W	71.547"W

Note: If the deducted span distance falls between two reinforcing channel sizes, select the smaller of the two sizes.

Support Requirements for Peninsula Worksurfaces

Peninsula worksurfaces smaller than 60"W do not require a reinforcing channel. Location of leg or column support, determined by pilot holes, meets the requirements for worksurface support every 54". Sizes 60"W or greater require a reinforcing channel. Determining brace size for peninsula worksurfaces: If worksurface is supported by a single column or legs, subtract 21" from span of worksurface to determine reinforcing channel size.

Example: 72"W measured span has a span deduction of 21" for a reinforcing channel size of 51" ($72" - 21" = 51"$). For this application, use reinforcing channel TS7WKSPT51.

Universal Systems Worksurfaces with Soft Edge, Power and Data Access Door and Tray

Soft edge provides a comfortable user experience reducing strain on wrists and forearms.

► Specifying page 230

Power and data access door and tray provides desk top access and management of cords.

► Specifying page 256

Cutout is optional; power and data access door and tray is ordered separately. 24"W cutout is centered near the back of the worksurface.

Edge is soft to the touch and flexes to conform to the arm.

Power and data access door and tray is available with cord or with modular or hardwire connection.

Soft edge is 36"W centered on the worksurface; balance of front edge is 3 mm radius. Back and side edges are flat.

Soft edge and power and data access door and tray are available on straight and taper Universal Systems Worksurfaces with 1/2" cord drop and full depth.

Tray includes six simplex receptacles and cutout for data access.

Height	N.A.	N.A.	4 3/4"

Product Details

Soft edge profile is polyurethane and is available with Bactiblock™ antimicrobial protection.

High-Pressure Laminate Worksurfaces

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free. See surface material listing in this book for specific PVC-free availability.

3 mm front edge is specifiable. Back and side edges match 3 mm front edge.

Edge profile finish for 3 mm front edge is specified separately from laminate color.

Wood Veneer Worksurfaces

Front (user's) edge profile is wood veneer with a square (3 mm) radius. Back edge and edge that joins to adjacent worksurfaces are flat. Wood edge color matches finish specified for worksurface.

Scallops are omitted on worksurface when door and tray cutout option is selected.

Inner tray provides under the surface power and data connections and access and cord management.

Outer tray provides cover and management for cord, and/or data cables to and from the panel.

Data cutout in tray can accommodate either a single gang or a modular furniture communication faceplate.

Tray includes adapter to accommodate modular faceplate.

Filler packages are available to fill unused data cutout. Order separately in package of 24.

Cord tray includes 10' cord with plug and has an integrated overload circuit breaker. Non-PVC version is available.

Connections

Fixed storage can be used with worksurfaces with soft edge but must not encroach the 36" width of the edge.

Worksurfaces connected perpendicular should not encroach the 36" width of the soft edge.

Soft edge worksurfaces are available with the same support options and follow the same application rules as other Universal Systems worksurfaces. *Exception: 48"W worksurface with soft edge cannot have a post leg at the front edge.*

► See page 88 for Universal Systems Worksurfaces Understanding.

Access holes in tray allow power and data to be routed straight back when worksurface is against the panel or routed to the sides when the worksurface is perpendicular to the panel.

Worksurfaces with power and data access door and tray are available with the same support options and follow the same application rules as other Universal Systems worksurfaces.

► See page 88 for Universal Systems Worksurfaces Understanding.

Tray with cord and plug can be used in a free-standing table application.

Height of tray is 4³/₄" so lower storage height must be accounted for when used adjacent to tray.

Width of outer tray is 27¹/₈" so adjacent lower storage dimensions must be accounted for on each worksurface width.

Tray with cord and plug includes two cord clips to help manage the cord below the worksurface.

Soft edge worksurfaces and power and data access door and tray worksurfaces require reinforcement channel or other support on worksurfaces 60"W or larger.

Worksurfaces greater than 72"W require additional support such as cantilevers, pedestals, or legs beyond the brace.

Surface Materials

High-Pressure Laminate Worksurfaces

- Laminate
 - See *Surface Materials Reference Manual*.
 - Open Line laminate (option)
- A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- See *Surface Materials Reference Manual*.

Inner and outer tray

- 7237 Slate Paint

End caps for outer tray

- 6694 Slate Plastic

Pad

- 6615 Grey V5 Plastic

Universal Panel-Mounted Worksurface Supports

For Kick Panel Applications

On-module supports can be used to panel support worksurfaces in various configurations.

► Specifying, page 258

Worksurface supports feature alignment tab used to set a depth for Universal Systems Worksurfaces—with 1/2" cord drop. This tab is bent down when installing full-depth worksurfaces.

Cantilever can be used to panel-support a worksurface at any height.

Side support brackets can be used to support the ends of straight and corner worksurfaces and to support the back corner of any corner worksurface.

End panel can be used to support the end of a worksurface.

Center support panel can be shared by two worksurfaces and may be required for longer runs of worksurfaces.

Product Details

On-module worksurface supports engage the slots in the vertical uprights of Kick panels.

Side support brackets support worksurfaces at any height in 1" increments. Brackets ship as a left- and right-hand pair and are ordered separately.

Side support brackets can be used to support the end of a worksurface that is wrapped by a panel with the same width dimension that matches the worksurface depth.

Actual Dimensions

	Cantilever	Center support panel	End panel
Height	12 1/4"	28 1/2" or 40 7/8"*	28 1/2" or 40 7/8"*
Depth	15 1/2"	11"	23 3/4" or 29 3/4"
Glide Range	N.A.	1 1/4"	1 1/4"

*Height dimensions include the thickness of a worksurface.

Single side support bracket can be used to support the rear corner of corner, extended corner, and 120° corner worksurfaces.

Tip: For off-module fin wall applications, the single side support bracket must be handed appropriately for connection to the fin wall.

Single side support bracket can be used to support the user's side rear corner of bullet peninsula, angled peninsula, visitor, jetty, and bubble jetty worksurfaces.

Cantilevers support worksurfaces at any height in 1" increments. Cantilever is non-handed and can be used to support either end of a worksurface, or shared to support two worksurfaces at the same height simultaneously. One tie plate ships with each cantilever.

30"D straight, tapered, and transition cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, post leg, side support bracket, or an adjacent return worksurface.

Adjacent cantilevered worksurfaces must be the same height in order to connect with a tie plate and provide panel stability.

Center support panel is an alternative to a cantilever in supporting longer runs of worksurfaces for additional panel stability. Refer to the applicable panel stability guidelines for specific requirements.

Center support panels are available in seated and standing heights, and cannot be used in freestanding applications or as a substitute for an end panel. One tie plate ships with each center support panel.

Center support panels should not be installed along the user's edge on P-edge profile jetty and visitor worksurfaces. The unfinished top edge of the center support panel would be exposed. Use single side support bracket and a post or caddy leg.

End panels can be used to support the end of a worksurface for additional panel stability. Refer to the applicable panel stability guidelines for specific requirements.

End panels are available in seated and standing heights, and cannot be used in freestanding applications.

All panel mounted supports can be removed and repositioned later without any permanent damage to panels or skins.

Pedestals and lateral files with a filler can be used to support the end of a worksurface in place of an end panel.

► See *Storage Specification Guide*.

Workspace spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; workspaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.

► Specifying, page 261

Surface Materials

Side support bracket and reinforcing channel

- Black paint only

Cantilever, center support panel, and end panel

- Paint

Legs and Columns for Universal Systems Worksurfaces

Without Alignment Tab

Legs are available to support worksurfaces in free-standing or panel-supported applications.

► Specifying, page 262

Post leg can be used on a single worksurface. Non-locking caster and glide versions are available.

Column is 4" in diameter and can be used as a column support on a single worksurface. Adjustable and non-adjustable versions are available.

Double post leg can be used as a column support on a single worksurface or to support a shared application.

Adjustable-height leg can be used with a single worksurface. Locking caster and glide versions are available.

Double post C-leg can be used on a single worksurface or in a shared application.

Support plate can be used with a double post leg to join and support two worksurfaces. Plate is 14"D or 20"D and 3¹/₁₆"W.

Leveling glide allows worksurface height to be adjusted on uneven floors.

Adjustable-height leg adjusts from 25¹/₂"H to 31¹/₂"H in ³/₄" increments.

Actual Dimensions

	Column	Adjustable column	Double post leg	Post leg	Adjustable-height leg	Double post C-leg	Support plate
Height*	28 ¹ / ₂ "	28 ¹ / ₂ "–31 ⁵ / ₈ "	28 ¹ / ₂ " or 40 ⁷ / ₈ "	26", 28 ¹ / ₂ ", or 40 ⁷ / ₈ "	25 ¹ / ₂ "– 31 ¹ / ₂ "	28 ¹ / ₂ "	N.A.
Glide range, for legs equipped with glides	1 ¹ / ₂ "	3 ¹ / ₈ "	³ / ₄ "	³ / ₄ "	³ / ₄ "	³ / ₄ "	N.A.

*Height dimensions include the thickness of a worksurface.

Product Details

Legs support Systems Worksurfaces at 26"H nesting, 28½"H standard, 40⅞"H standing or 25½"H to 31½"H adjustable heights.

Legs for Systems Worksurfaces do not include alignment tabs. Pilot holes help the installer locate the proper leg position under the worksurface.

Post legs are always installed at a 45° orientation.

26"H nesting height legs allow worksurfaces to nest underneath an adjacent worksurface supported with 28½"H legs or a panel-supported worksurface.

Double post leg can be used in a shared application with a support plate, or it can be used as a column support for spanner, jetty, bubble jetty, bullet peninsula, and angled peninsula worksurfaces in panel-mounted applications.

Post leg, in conjunction with a side support bracket, can be used to support the end of a visitor or taper-flat worksurface.

Two post legs can be used in place of one double post leg as column support for spanner, jetty, bubble jetty, bullet peninsula, and angled peninsula worksurfaces for added stability.

Standing-height post or double post legs can be used as column support in panel-mounted applications only.

Column can be used on spanner, bullet peninsula, angled peninsula, jetty, and bubble jetty worksurfaces in panel supported applications.

For U-Free desk applications, column can be used on bullet peninsula and jetty worksurfaces. Adjustable and non-adjustable versions are available.

Column cannot be used in a shared application.

Bottom View
Column

Bottom View
Post Leg

Column is not recommended for applications that include post legs because it has a round shape, while post legs are more of an elliptical shape. Use single or double post legs as a column support in applications that include other post legs.

Adjustable-height legs adjust from 25½"H to 31½"H in ¾" increments. Legs can be used to support the primary worksurface, or legs can support a worksurface in a nesting application.

P-edge profile worksurfaces include alignment slots to accept cabby legs as an alternative column support for visual consistency in applications that include tables with cabby legs. Panel-mounted spanner, bullet peninsula, jetty, and bubble jetty worksurfaces accept two legs. Visitor worksurfaces accept one leg.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.

► Specifying, page 259

Application Topics

Freestanding Guidelines for TS Series Worksurfaces with Legs

► Page 70

Knife Edge Worksurface Application Guidelines

When planning an L-configuration, two UFB flat brackets should be used to support the worksurfaces. A cantilever is not wide enough to support the gap where the knife edge worksurface comes together.

Freestanding L-configuration should be avoided due to profile on the backside of the worksurface.

25 1/2"H Pedestal
(cantilever supported worksurface)

Boxfile
(cantilever supported worksurface)

Compatible storage includes 25 1/2"H pedestal with freestanding conversion kit, box/file mobile pedestals, and 1-high storage.

Knife Edge with 27"H Lateral
and 27"H Pedestal

Knife Edge with 25 1/2"H Pedestal

Knife edge worksurface over 27"H storage can make files difficult to access. Use a 25 1/2"H pedestal that is flush with the front edge of the worksurface to avoid this issue.

Knife edge worksurfaces require reinforcement channels for unsupported spans greater than 48". Use TS7WKSPT39 for 54"W worksurfaces, TS7WKSPT for 60"W and 66"W worksurfaces, and TS7WKSPT72 for 72" worksurfaces.

Although a 25 1/2"H pedestal looks good when paired with knife edge, keep in mind that it does not align with other storage – drawers and base trim do not align. Use a box/file mobile pedestal instead.

End panels, 27"H standard pedestals, side support brackets and FrameOne legs for Universal do not align properly with knife edge worksurfaces. Instead, use cantilevers as shown.

****Side support brackets will work to support the back end of a worksurface; front end is where they won't align properly.**

Freestanding Guidelines For Universal Systems

Worksurfaces with Legs

Freestanding Guidelines
For Universal Systems
Worksurfaces with Legs

The following section on freestanding worksurfaces gives some guidelines to be used with common freestanding configurations.

Counterweight packages for storage products are required to ensure product stability.

► See page 107 for *Counterweight Requirements for Storage Products*.

Remember to specify "omit scallops" option on worksurfaces intended for use in freestanding applications.

There are several ways to support the ends of a freestanding worksurface:

With post legs. Nesting post legs can also be used.

With a double post C-leg.

With adjustable-height legs.

With a pedestal. Other storage products can also be used.

Double post C-legs can be used on a single worksurface or in a shared application.

Tie plate is recommended to align worksurfaces.

18³/₈"D or 18⁷/₈"D straight worksurfaces must be connected to an adjacent worksurface in an L-configuration for additional support. This also applies to any transition, tapered, taper-flat, or single-tapered worksurface with an 18³/₈"D or 18⁷/₈"D end.

Combined worksurfaces can give each other support when joined with a double post leg and support plate. Use 14"D support plate on worksurfaces 24"D and smaller and 20"D support plate on worksurfaces 29¹/₂"D and larger. Tie plate is recommended to align the worksurfaces.

Double post C-leg can be used to support a corner or extended corner worksurface and adjacent worksurfaces.

Double post C-leg can be used to support an extended corner worksurface and adjacent worksurfaces.

Double post C-leg can be used to support a corner, 120° work surface and adjacent worksurfaces.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.

If a counterweight is not required in any condition for a particular style number, the product specification page will indicate not required.

Requirements for Freestanding Applications

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. Counterweights are not required for lateral files, towers, workstation verticals, cabinets, and bookcases anchored to the floor.

Floor anchor bracket (for TS Series Storage, TS 200 Series Storage, 900 Series Storage, 800 Series Storage and Universal Storage with 3" base) secures lateral files, towers, workstation verticals, cabinets, or bookcases to the floor for stability or to reduce the risk of hazards during earthquakes in seismic zones. Four bracket packages are required for each cabinet.

Note: Local seismic requirements vary. Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Steelcase Specials.

Tip: Anchor bracket cannot be used with pedestals.

Floor anchor brackets for Universal with FrameOne foot secure lateral files and towers to the floor for stability or in seismic zones to reduce the risk of hazards during earthquakes.

Note: Local seismic requirements vary. Compliance with local code requirements is the responsibility of the customer or their authorized agent.

Wall Anchors

2. Counterweights are not required for lateral files, towers, workstation verticals, cabinets, and bookcases anchored to the wall.

For wall anchoring of lateral files, towers, workstation verticals, cabinets and bookcases, consult with the building's designated design professional (architect or engineer) and work with local codes authorities for approvals to ensure adequate support when product is fully loaded.

Ganging Brackets

3. Counterweights are not required for lateral files, towers, workstation verticals, cabinets, and bookcases ganged back-to-back with ganging hardware.

TS Series towers which do not include ganging hardware, order **8425808SR** from Service Parts.

Counterweights

Units ganged side-by-side **require** counterweights.

Requirements for Panel Applications

Panel stability guidelines must be met prior to determining counterweight requirements.

► See *Panel Stability Guidelines* in the appropriate panel specification guide. (Storage may support panel stability)

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. Counterweights are not required for Two Drawer lateral files installed right below a worksurface attached to the panel system when the application is mirrored back-to-back (a two-pack minimum).

TS Series underworksurface lateral files are only intended for use under a panel-mounted worksurface and cannot be used as freestanding.

**1.5-High
Intermediate
Support**

2. Counterweights are not required for One-High and 1.5-High lateral files and cabinets used with an intermediate support, when the application is mirrored back-to-back (a two-pack minimum).

Note: This includes storage either perpendicular or parallel to the panel.

**Storage-to-Panel
Connector**

**1.5-High
Intermediate
Support**

3. Counterweights are not required for One-High, 1.5-High, and Two Drawer lateral files and cabinets used with a storage-to-panel bracket to support the panel run if the application is mirrored back-to-back (a two-pack minimum) and the panel run is equal to or greater than 6'.

**Storage-to-Panel
Connector**

4. Counterweights are not required for towers used with a storage-to-panel connector to support the panel run, if the application is mirrored back-to-back (a two-pack minimum) and the panel is equal to or greater than 5'.

Requirements for c:scape Tethered Applications

c:scape stability guidelines must be met prior to determining counterweight requirements.

► See *c:scape Stability Guidelines* in the *c:scape Specification Guide*.

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. Counterweights are not required for a 1- and 1½-High lateral files and low storage 48"W or smaller tethered to a c:scape beam when the beam width is 6' or larger.

2. Counterweights are not required for 1- and 1½-High lateral files and low storage tethered to a c:scape beam when the beam has mid storage mounted parallel and the beam length is equal to or greater than the combined low storage width.

3. Counterweights are not required for 1- and 1½-High lateral files or low storage tethered to a c:scape beam when the storage is the same size and mirrored back-to-back on both sides of the beam.

Requirements for Answer Freestanding Desk Applications

Answer Freestanding Desk guidelines must be met prior to determining counterweight requirements.

► See *Answer Freestanding Desk Stability Guidelines* in the *Answer Freestanding Specification Guide*.

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. A counterweight is not required for a single Two Drawer lateral file attached to desks connected in an L-configuration.

2. A counterweight is not required for a single Two Drawer lateral file attached to a desk made with corner, extended corner, or 120 degree corner worksurfaces.

L-configurations with two or more lateral files **require** counterweights in each file.

Configurations with two or more lateral files **require** counterweights in each file.

Counterweights are **required** for all lateral files in stand-alone desk or credenza applications.

Hutch kit applications with lateral files always **require** counterweights in the lateral files.

Requirements for Pedestals in Freestanding Applications

Counterweights are required for all freestanding applications.

1. Universal fixed pedestals converted to freestanding pedestals require a counterweight and drawer interlock system.

Universal fixed to freestanding pedestal conversion kit includes $\frac{1}{8}$ "H steel top, counterweight package, and drawer interlock system.

Fixed pedestals, converted to freestanding with a laminate or veneer top, require a counterweight and drawer interlock system. Drawer interlock system is available from service parts.

TS Series fixed pedestals are only intended for use under a panel-mounted worksurface and cannot be converted to freestanding.

Laminate fixed pedestals can never be freestanding.

2. Mobile pedestals include counterweight and drawer interlock system as standard.

Requirements for Pedestals in Panel Applications

Panel stability guidelines must be met prior to determining counterweight requirements.

► See *Panel Stability Guidelines* in the appropriate panel specification guide.

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

Counterweights are not required for fixed pedestals installed below a work-surface attached in a panel spine application. Single workstation applications **require** a counterweight in each pedestal.

Requirements for Pedestals in Answer Freestanding Desk Applications

Answer Freestanding Desk guidelines must be met prior to determining counterweight requirements.

► See *Answer Freestanding Desk Stability Guidelines* in the *Answer Freestanding Specification Guide*.

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. Single pedestal desks less than 48"W require a counterweight and an interlock. Single pedestal desks with 30"D pedestals require a counterweight and interlock.

Tip: Interlock is available as a service part for Universal pedestals, 1043575SR for box/box/file and file/file configurations.

2. Double pedestal desks 60"W and wider only require one pedestal with counterweight.

All other desk applications with multiple pedestals **require** a counterweight for each pedestal.

3. Counterweights are not required for a single fixed pedestal in desk with hutch kit applications. Any additional pedestals within the application **require** counterweights.

Requirements for Pedestals in Answer Freestanding Desk Applications, continued

4. A counterweight is not required for a single fixed pedestal attached to a desk attached to another worksurface in an L-configuration. Any additional pedestals within the application require counterweights.

5. A counterweight is not required for a single fixed pedestal attached to desks made with corner, extended corner, or 120 degree corner worksurfaces. Any additional pedestals within the application require counterweights.

TS Series Pedestals

TS Series pedestals provide fixed and mobile storage for personal items and filing of infrequently referenced materials.
► Specifying, page 268

Top of pedestal is open to attach beneath the worksurface.

Finished back and sides are standard.

Leveling glides on pedestals adjust to install furniture on uneven floors. Leveling glide range is 1".

Handle, ledge, and contemporary pulls are available as an option on drawers and doors.

Lock is standard keyed random and controls all of the drawers. Lock cylinders must be specified separately. Consecutive and specific keying options are available. Master-keyed locks are also available. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site.

Ledge pull

Contemporary pull

Pull Choices

Handle, ledge, and contemporary pulls are available as an option on drawers and doors.

Dividers and pencil tray for use with mobile pedestals must be ordered separately. Mobile pedestal accessories are not interchangeable with under-worksurface pedestal accessories.

► Page 273

Tip: Under-worksurface pedestals shipped prior to January 2005 require the use of drawer accessories from the mobile pedestal collection.

To file legal-size or side-to-side letter-size filing in pedestal file drawers, specify optional 15"W file rails.

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Box drawer and file drawer dividers and pencil tray for use with fixed pedestals are available as optional accessories. Mobile pedestals have different dividers that are not interchangeable.

Connections

TS Series fixed pedestals are only intended for use under a panel-mounted worksurface. Attachment hardware is provided.

Pedestal filler, ordered separately, adds structure and fills the gap between the pedestal and panel. TS Series pedestal filler works with Kick panels only.

Application Topics

► For interior dimensions, see *Storage Capacities and Dimensions* in the *Storage Specification Guide*.

Counterweight Requirements for Storage Products

► Pages 107-114.

Shipping

Fixed pedestals are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Mobile pedestals are shipped in corrugated board to minimize damage during transport.

Wiring & Cabling

Fixed pedestals do not accommodate cable-routing. Plan accordingly when installing pedestals underneath worksurfaces with grommets of other cable-routing accessories.

TS Series Bins

TS Series bins can be attached to Answer and Kick with integrated hooks. These storage bins provide overhead storage in the workspace.

► Specifying, page 274

On-module attachment hooks are integral to the end supports and are used to mount bins on panels of the same width as bins.

Safety catch locks overhead storage unit to frame to prevent accidental removal.

Bin is steel and ships assembled.

Backstop prevents notebooks and equipment from damaging the surface of the panels or walls.

Flat-front and radius-front lift-up doors open and close quietly. When up, the doors rest on top of the case to provide more storage space inside.

Locks are standard on bins to secure the door(s). Lock is located underneath the center of the shelf. Locks are standard factory-installed, keyed random. Two-door units are keyed alike.

► Lock and Keying, page 434

Recess beneath unit can accommodate a shelf light.

► Page 390

Product Details

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Two-door units are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► Lock and Keying, page 434

Shelf lights are available for use beneath bins. Lights recess into the bottom of overhead bins.

► Page 390

Dividers are available as an option for use on bins. Dividers ship in a package of four.

► Page 305

Actual Dimensions

Depth 15³/₄"

Width 24", 30", 36", 42", 48", 60", or 72"

Height 16¹/₄"

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

On-module steel support hooks can be used above and adjacent to slat-wall on Kick panels.

Width of overhead bin must match the width of the panel or panels that it is attached to. Bin may span up to two frames.

TS Series bin may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

TS Series bins cannot be attached to upmount brackets.

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced.

► Page 158

Wall channel horizontal brace is required with wall channels to support shelves and bins that are wider than 48".

► Page 158

Wiring & Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.

TS Series bins, Universal bins, and shelves can hang from the first stacked tier only.

TS Series Laminate Common Shelves

► Specifying, page 276

Laminate common shelf has a wood core and is covered with Low-Pressure Laminate and High-Pressure Laminate. Plastic edge band is selectable.

Tip: For anticipated heavy loads on 42" and 48"W laminate common shelves, a field-installed reinforcing channel (TSATRC39) can be used.

Laminate common shelf

Product Details

Laminate common shelf ships with steel support brackets. Support brackets hook into the vertical panel slots or wall channel and lock into place with a safety catch. Support brackets can be used in either orientation.

TS Series shelf may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

Wiring and Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.

Actual Dimensions

Depth	15"
Width	24", 30", 36", 42", or 48"
Height	7¾"

TS Series Under-Worksurface Lateral Files

► Specifying, page 272277

Top of lateral file is open to attach beneath the worksurface.

Finished back and sides are standard.

Leveling glides on lateral files adjust to install furniture on uneven floors. Leveling glide range is 1".

Tip: The actual depth of under-worksurface lateral files is 18 1/4"D, which will not accommodate the use of the 18"D Kick straight worksurfaces.

Lock cylinders are specified separately from the lateral file. Random, consecutive, and specific keying are available. Master-keyed locks are also available. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site. ► Lock and Keying Options, page 434

Lateral file drawers are made of steel with steel ball-bearing suspensions and open their full depth for total access to the contents.

Lateral file drawers are standard with two side-to-side hanging file frames to file letter- or legal- size papers. Clearance is provided for two rows of filing.

Product Details

Pull Choices

Handle, ledge, and contemporary pulls are available as an option on drawers and doors.

Under-worksurface lateral file drawer dividers, front-to-back file rails, and side-to-side hanging file frames, ordered separately, are available for use with under-worksurface lateral files.

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Actual Dimensions

Depth	18 1/4"
Width	31 1/2", or 36"
Height	27"

Connections

TS Series underwork-surface lateral files are only intended for use under a panel-mounted worksurface and cannot be used as freestanding.

Floor anchor bracket (for TS Series Storage, TS 200 Series Storage, 900 Series Storage, 800 Series Storage and Universal Storage with 3" base) secures lateral files, towers, workstation verticals, cabinets, or bookcases to the floor for stability or to reduce the risk of hazards during earthquakes in seismic zones. Four bracket packages are required for each cabinet.

Note: Local seismic requirements vary.

Compliance with local code requirements is the responsibility of the customer or their authorized agent.

For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Steelcase Specials.

Tip: Anchor bracket cannot be used with pedestals.

► Page 342

Ganging hardware is included to provide alignment by joining adjacent components side-by-side, back-to-back, or both.

► See *Counterweight Requirements for Storage Products*, page 107.

Universal Sliding Door Bins

For Use with Kick

Universal sliding door bins attach to panels with an on-module bracket and provide overhead storage in the work space. Door is available in steel or wood.

► Specifying, page 298

Safety catch locks overhead storage unit to frame to prevent accidental removal.

On-module attachment brackets are used to mount bins on panels of the same width as bins and are included with the bin as a standard component.

Steel and wood front doors glide smoothly from one side of the case to the other.

Bin ships assembled.

Metal backstop prevents notebooks and equipment from damaging panel surface.

Lock is standard on bins to secure the door. The door can be locked in the closed position on either the right- or left-hand side of the bin. Lock is located underneath the center of the shelf. Lock is standard factory-installed, keyed random. A no-lock option is available.

► Lock and Keying Options, page 435

Recess beneath unit can accommodate a shelf light.

► Page 390

Product Details

On-module attachment brackets are independent of the storage bin and unique to the panel system they are used on. If the storage bin needs to be attached to a different panel in the future, additional on-module attachment brackets can be purchased through Service Parts.

Vertical off-module brackets, optional, can be used to mount one or two sides of an overhead bin off-module on Answer, Kick, Series 9000, Avenir, and Montage with vertical slot patterned panels. To mount an overhead bin with one side off-module, specify with one vertical off-module bracket. To mount an overhead bin with two sides off-module, specify with two vertical off-module brackets. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin.

Vertical off-module brackets are used with bins up to 12" wider than the panel, allowing them to overhang the panel seam.

Actual Dimensions

Depth	15 ³ / ₄ "
Width	36", 42", 48", 60", 66", and 72"
Height	16 ¹ / ₄ "

Upmount brackets, optional, are for use on Answer, Kick, Series 9000, Avenir, and Montage. Brackets enable overhead storage to be used on lower panel heights. Bins using an upmount bracket must be installed on a panel of the same width. For Montage, upmount brackets attach near the top of a 55"H frame.

Two upmount bin brackets can be hung side-by-side in an in-line, T-, or X- application. Bin can be upmounted on slat-wall skin as long as there is not another bin or another slatwall skin on the adjacent in-line panel.

Omit brackets option must be specified when bin is being used in hutch kit or Series 9000 service module application, or when attaching bin to a horizontal wall attachment bracket. Order hutch kit or Series 9000 service module package separately.

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 435

Shelf lights are available for use beneath bins. Lights recess into the bottom of the overhead storage unit.

► Page 390

Dividers are available as an option for use on bins. Dividers ship in a package of four.

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

When mounting on Answer or Kick panels, top of bin cannot be loaded.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

Universal sliding door bin may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

Horizontal wall attachment brackets are available to attach storage bins to wall of building. Specify as separate style number.

Tip: Select the omit brackets option when ordering the bin.

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced.

► Page 158

Wall channel horizontal brace is required with wall channels to support bins that are wider than 48".

► Page 160

Stability Guidelines

► Page 28

Guidelines for Stackable Components

TS Series bins, Universal bins, and shelves can hang from the first stacked tier only.

Universal Over the Case and In the Case Bins

For Use with Kick

Universal over the case bins can be attached to panels with an on-module bracket and provide overhead storage in the work space.

► Specifying, page 300

Safety catch locks overhead storage unit to frame to prevent accidental removal.

On-module attachment brackets are used to mount bins on panels of the same width as bins and are included with the bin as a standard component.

Backstop prevents notebooks and equipment from damaging the surface of the panels or walls.

Bin is steel and ships assembled.

Universal in the case bins, attach to panels with an on-module bracket and provide overhead storage in the work space. Door is available in steel or wood.

► Specifying, page 302

Flat-front and radius-front lift-up doors open and close quietly. When up, the doors rest on top of the case to provide more storage space inside.

Locks are standard on bins to secure the door(s). Lock is located underneath the center of the shelf. Locks are standard factory-installed, keyed random. Two-door units are keyed alike. A no-lock option is available.

► Lock and Keying, page 435

Recess beneath unit can accommodate a shelf light.

► Page 390

Flat-front lift-up doors (steel or wood) recess into the overhead storage bin.

Product Details

On-module attachment brackets are independent of the storage bins and unique to the panel system they are used on. The following style number suffixes indicate the panels they attach to:

TAK = Answer and Kick
S9 = Series 9000

AVR = Avenir
MON = Montage

If the storage bin needs to be attached to a different panel in the future, additional on-module attachment brackets can be purchased through Service Parts.

Vertical off-module brackets, optional, can be used to mount one or two sides of an overhead bin off-module on Answer, Kick, Series 9000, Avenir, and Montage with vertical slot patterned panels. To mount an overhead bin with one side off-module, specify with one vertical off-module bracket. To mount an overhead bin with two sides off-module, specify with two vertical off-module brackets. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin.

Vertical off-module brackets are used with bins up to 12" wider than the panel, allowing them to overhang the panel seam.

Actual Dimensions

Depth 15³/₄"

Width 24", 30", 36", 42", 48", 60", 66", and 72"

Height 16¹/₄"

Upmount brackets are optional for use on Answer, Kick, Series 9000, Avenir, and Montage. Brackets attach the bin near the top of 54"H panel to enable overhead storage to be used on lower panel heights. Bins using an upmount bracket must be installed on a panel of the same width.

Two upmount bin brackets can be hung side by side in an in-line, T-, or X-application. Bin can be upmounted on slatwall skin as long as there is not another bin or another slatwall skin on the adjacent in-line panel.

Omit brackets option must be specified when bin is being used in hutch kit or Series 9000 service module application, or when attaching bin to a horizontal wall attachment bracket. Order hutch kit or Series 9000 service module package separately.

Picture frame door, optional, is available on Universal over the case and in the case bins with flat steel fronts only, and is an aluminum door frame with acrylic or glass inserts. An omit insert option is also available which allows custom material to be field installed in the aluminum door frame.

The acrylic door insert is a white acrylic. A door assist mechanism is not available as an option on a bin with an acrylic door insert due to the light weight door.

The glass door insert is tempered translucent glass. If a glass door insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin. Due to the weight of the glass door insert, it is recommended to specify the optional door assist mechanism.

The omit insert custom material must be ordered from a material vendor. If an omit insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin. The weight of a custom insert on a Universal over the case bin can not exceed 10½ pounds. An insert for a Universal over the case storage bin door with an assist mechanism must weigh within the range of 7¼ pounds to 10½ pounds or the assist mechanism will not function correctly. Custom materials being installed in a door insert must comply with local building codes. Consult with local authorities to determine compliance requirements. The use of safety glass is required if installing custom glass in a door insert. To install customer provided material in a picture frame door with the insert omitted, make sure the material is cut precisely to the sizes listed on the dimensions matrix. ▶ See *Dimensions for Custom Field-Installed Picture Frame Door Inserts*, page 153

Door assist mechanism, optional, consist of a gas cylinder and spring that provides an assisted open and close of the door. When opening the door, the spring pulls the door to the fully recessed position. When closing the door, the assist mechanism will slowly close the door. Universal bins ship with two assist mechanisms per door when specified.

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Two-door units are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

▶ *Lock and Keying*, page 435

Shelf lights are available for use beneath bins. Lights recess into the bottom of overhead bins.

▶ Page 390

Divider is available as an option on overhead bins. Dividers ship in a package of four.

▶ Page 156

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

When mounting on Answer or Kick panels, top of bin cannot be loaded.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

Universal over the case bin may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

Horizontal wall attachment brackets are available to attach storage bins to wall of building. Specify as a separate style number.
Tip: Select the omit brackets option when ordering the bin.

Tip: A custom insert cannot be factory installed. Custom insert must be ordered from a material vendor and will not be handled like a Steelcase Customer's Own Material. In selecting materials for customer supplied inserts, consider material characteristics, such as effects from thermal changes, humidity changes, aging characteristics, and strength of material. Do not use materials that allow the overall size of the custom insert to deviate by amounts larger than the acceptable tolerances listed in the matrix.

Universal Shelves and Universal Personal Shelves

For Use with Kick

Universal shelves—supported by Answer, Kick, Series 9000, Avenir, and Montage— provide overhead storage in the work space.
► Specifying, page 304

Universal personal shelves provide a wall-supported surface that attaches to Answer, Kick, Series 9000, and Avenir.
► See *Storage Specification Guide*.

Metal backstop on Universal shelves prevents notebooks and equipment from damaging panel surface. Universal personal shelves do not have a backstop.

On-module attachment hooks are integral to the end supports and are used to mount shelves on panels of the same width as bins.

Safety catch locks shelf units to frame to prevent accidental removal.

Shelves are steel and ship ready to assemble.

Actual Dimensions

	Universal shelves	Universal personal shelves
Depth	14 ³ / ₄ "	13 ¹¹ / ₁₆ "
Width	24", 30", 36", 42", 48", 60", and 72"	24", 30", 36", 42", and 48"
Height	7 ¹ / ₂ " (Kick, Answer, Series 9000, and Avenir) 1 ¹¹ / ₁₆ " (thickness of shelf)	

Product Details

Shelf lights are available for use beneath shelves. Lights recess into the bottom of the overhead storage unit.
► Page 390

Dividers are available field installed for use on Universal shelves. Dividers ship in a package of four. Dividers cannot attach to Universal personal shelves.

A 1¹/₂" gap exists between the personal shelf and the panel to allow for cable routing.

The height dimension of the bracket (from top of personal shelf to the bottom of the bracket) is 6¹/₂" H.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Universal shelf may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

On-module attachment hooks cannot be attached to upmount brackets.

Width of shelf must match the width of the panel or panels that it is attached to with the on-module brackets. Shelves may span up to two frames.

Wall channels are available to attach shelves to concrete or block walls. Wall channels can be used to attach shelves to wood, dry wall, or plaster walls, if wall is reinforced.

TS Series bins, Universal bins, and shelves can hang from the first stacked tier only.

Dividers

Horizontal Wall Attachment Brackets

For Use with Universal Sliding Door, Universal Over the Case, and Universal In the Case Bins

Horizontal Wall
Attachment Brackets

Horizontal wall attachment brackets can attach to wall of building to accept Universal sliding door, Universal Over the Case, and Universal In the Case storage bins. Brackets will not accept bins introduced prior to March 2007 or TS Series bins.

► Specifying, page 305

Tip: Specify as a separate style number.

Product Details

Horizontal wall attachment brackets must match the width of the storage bin.

Tip: Select the omit brackets option when ordering the bin.

Horizontal wall attachment brackets include brackets and a steel back to enclose the storage bin.

Horizontal wall attachment brackets can be positioned on wall at height needed.

Connections

Horizontal wall attachment brackets can be used to attach Universal sliding door, Universal over the case, and Universal in the case bins to a building wall. TS Series bins cannot attach to horizontal wall attachment brackets.

Shelves cannot hang off horizontal wall attachment brackets.

Mounting of horizontal wall attachment brackets must include attachment to at least two wall studs, but it is recommended to attach to all studs in wall behind the storage bin. Storage bins that are 24"W or 25"W can only be mounted with horizontal wall attachment brackets if wall is constructed with 16" stud centers.

Field install:

- Concrete walls with Hilti type anchors.
- Drywall or plywood with $\frac{5}{8}$ " thick Toggler R-type $\frac{3}{16}$ " wall anchors with countersunk flat head screw.
- Wood studs with #10 wood screws of appropriate length with countersunk flat head screw.
- Steel studs with #10 sheet metal screws of appropriate length with countersunk flat head screw.

Limit of one bin for each horizontal wall attachment bracket.

Attaching worksurfaces to horizontal wall attachment brackets is not possible.

Horizontal wall attachment brackets allow overhead storage bin to fit flush to wall.

Actual Dimensions

Width 24", 30", 36", 42", 48", 60", and 72".

Surface Materials

Wall Hang Channels and Horizontal Braces

For Use with Overhead Storage Bins and Shelves

Slotted steel channel can attach to wall of building to accept shelves, overhead storage bins, worksurfaces, or tackboards. Channel will accept all universal bins and shelves, TS Series bins and bins and shelves introduced prior to March 2007.

► Specifying, page 307
Tip: Must specify bin or shelf with Answer, Kick, Avenir, or Series 9000 bracket to hang on wall channel.

Screw hole positions
 $64\frac{3}{8}"H$

Actual Dimensions

Wall hang channels and horizontal braces

Depth	$1\frac{1}{8}"$ (28 mm)
Width	$1\frac{5}{16}"$ (24 mm)
Height	66" (1676 mm)

Product Details

Wall channel can be positioned on wall at height needed.

Connections

Wall channels can be used to support shelves, overhead storage bins, worksurfaces, and tackboards. Wall channels can be shared.

Field install:

- Concrete walls with Hilti type anchors.
- Drywall or plywood with $\frac{5}{8}"$ thick Toggle R-type $\frac{3}{16}"$ wall anchors with countersunk flat head screw.
- Steel or wood studs with #10 sheet metal or wood screws of appropriate length with countersunk flat head screw.

Anchors must be used in each screw hole location on the wall channel.

Components attach at 1" increments, but screws block some slot locations.

Component limits for each pair of wall channels are as follows:

- Two bins or shelves
- One worksurface and two shelves
- One worksurface and one bin

Horizontal brace is available to reinforce vertical wall channels that support storage bins, shelves, or worksurfaces that are attached to walls. Bins and shelves that are 48"W or less do not require a horizontal brace. All worksurfaces require horizontal braces.

Wall channel horizontal brace is required for EACH storage bin or shelf that is wider than 48". The brace should be placed at the position along the vertical wall channel where the top of the bin or shelf will be placed.

Width of horizontal brace must match width of shelf or storage bin.

Wall channel horizontal brace is also available in 42" and 48" widths and can be used in applications where there is concern regarding the strength of the wall. These braces must also be used with wall-mounted worksurfaces.

Wall hang channels for shelves, overhead storage bins, or tackboards cannot be used with a wall start junction.

Worksurfaces may be attached to wall channels with cantilevers, subject to the following application guidelines:

- All worksurfaces must be 24"D or less.
- Worksurfaces must be supported by a cantilever or legs every 42" or 48". Cantilevers can be shared when worksurfaces are adjacent.
- Wall channel horizontal braces must be installed directly behind all wall-mounted worksurfaces, and also at the top of the wall channels.
- Worksurface-supported pedestals cannot be hung from a wall-mounted worksurface.

Application Topics

Reinforce wall by positioning studs where wall channels will be attached. See dimensions below.

Distance between center lines of reinforced wall channels matches width of overhead storage unit.

Tip: Wall channels can be shared.

Horizontal brace

- Paint

Slim Shelves

Slim shelves provide a panel-supported surface that attaches to Kick with panel-specific brackets.

► Specifying, page 309

Slim shelf is an extruded aluminum shelf that provides storage for small items.

Product Details

Slim shelves attach to Kick with panel-specific brackets.

Gap at back of slim shelf allows routing of shelf light cord.

Slim shelves can be mounted off-module. No more than 12" overhang on either side of panel is recommended. Brackets attach on vertical seams of panel, while the shelf adjusts off-module on the brackets.

Two attachment brackets are included with shelves less than or equal to 48"W. Two attachment brackets and a mid-span support are included with shelves wider than 48"W

Kick will not support two shelves installed end to end.

Surface Materials

Slim shelves

- Paint

Attachment brackets

- Painted to match shelf

Actual Dimensions

Depth	6 ³ / ₈ "
Width	24", 30", 36", 42", 48", 60", 72", or 96"

Bracket Application Rules for Bins and Shelves

For TS Series Bins, Universal Sliding Door Bins, Universal Over the Case Bins, Universal In the Case Bins, and Universal Shelves

Bracket Application Matrix

Panels	TS Series Bins, Universal Bins, and Universal Shelves— On-Module	Universal Bins— Single Side Vertical Off- Module	Universal Bins— Two Sided Vertical Off- Module	Universal Bins— Horizontal Off- Module (for use with and Montage only)	Universal Bins— Upmount
Answer	•	•	•		•
Kick	•	•	•		•
Series 9000	•	•	•		•
Avenir	•	•	•		•
Montage	•	•	•	•	•

On-Module Brackets and Hooks

On-module brackets and hooks are used to mount overhead bins and Universal shelves to panels with vertical slot patterns. Answer, Kick, Series 9000, Avenir, and Montage panels can support on-module attachment brackets.

Universal personal shelves can attach on-module to all panels except Montage.

Width of overhead storage unit must match the width of the panel or panels that it is attached to. Storage bins or shelves may span up to two panels.

Additional support for stability may be required when shelves and overhead storage bins are attached to panels. Counterbalancing loads on the opposite sides of the panels increases stability.

Tip: See Stability Guidelines in each corresponding specification guide.

On-module attachment brackets install in panel seams.

On-module brackets can be used above and adjacent to slatwall on Answer and Montage Panels.

On-module brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Off-module brackets are used with bins up to 12" larger than the panel, allowing them to overhang the panel seam.

Off-Module Brackets

Vertical off-module brackets, optional, can be used to mount one or two sides of the overhead bin off-module on Answer, Kick, Series 9000, Avenir, and Montage panels with vertical-slot-patterned panels. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin. Vertical off-module brackets allow bins to be installed a maximum of 12" off-module. Vertical off-module brackets can be used with 30"W to 60"W Montage bins only.

Vertical off-module brackets can be used above and adjacent to slatwall on Answer and Montage panels.

Vertical off-module brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Horizontal off-module brackets, optional, accommodate off-module installations of overhead storage bins on panels with horizontal slot patterns. Enhanced off-module Montage frames can support horizontal off-module brackets. Horizontal off-module brackets can be used with 24"W to 48"W Montage bins only.

Horizontal off-module brackets can be used above and adjacent to slatwall on Montage panels.

Horizontal off-module brackets can be used with a panel stacker on Montage panels. Follow standard panel stacker guidelines for each panel.

Enhanced off-module Montage frames have horizontal slot patterns and must be specified for horizontal off-module Montage configurations.

Horizontal off-module brackets push bin out from panel 5/8" on enhanced off-module Montage panels.

Horizontal off-module brackets cannot span a vertical or joint where two frames come together on enhanced off-module Montage panels. Shift the bin to avoid the joint.

Only two pairs of off-module brackets and associated storage can be mounted per frame.

Upmount brackets, optional, can be used with Universal sliding door, Universal over the case, and Universal in the case bins. Brackets attach bins near the top of 54"H panels. TS Series bins and Universal shelves cannot be attached to upmount brackets.

Upmount bin width must match the width of the panel or panels that it attaches to. Upmounted bins and shelves cannot be supported off-module.

Upmount brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Omit Brackets

Omit brackets option must be specified when bin is used in hutch kit or Series 9000 service module application, or when attaching bin to a horizontal wall attachment bracket. Order hutch kit or Series 9000 service module package separately. Hutch kit supports bin at 66" height. Service module package supports bin at 65" height on Series 9000.

Application Rules for Overhead Storage on Answer and Kick Panels

Tip: For complete panel specific stability guidelines, see the corresponding panel specification guide.

Answer Panel

Guidelines for Universal Bins. Applies to universal sliding door bin or universal in the case bin on Answer and Kick panels.

The following application restrictions must be complied with when hanging universal overhead bins on Answer and Kick panels. Otherwise, standard Answer and Kick application guidelines apply.

- Universal sliding door bin or universal in the case bins cannot hang on an Answer or Kick panel above the 66"H connection point.
- Universal sliding door bin and universal in the case bins or shelves cannot hang on a stacked segment of an Answer panel.
- The maximum panel run length when using a universal overhead bin on Answer or Kick panels is 12'.
- Top of bins and shelves are not designed to support the weight of a seated person. Bins and shelves may be mounted at 38"H or lower only if another panel-mounted component prevents it from being seated upon.
- When ganging binder bins, the use of a tie plate is required.

⚠ WARNING

Failure to comply to these guidelines may result in personal injury.

66"H Segmented Panels

► Need help?
Product details,
page 12

Standard Includes

- Panel with segmented, fabric surfaces:
- Kick standard fabric price group A
- Base covers with receptacle knockouts:
- paint price group 1
- Top cap (low height): paint price group 1
- Top cap aligner: black plastic
- Universal connector package
- Frame: 0835 Black only

Required to Specify

- 1 Style number
 - 2 Fabric color number for base skin; surface 1
 - 3 Fabric color number for accent skin; surface 1
 - 4 Fabric color number for base skin; surface 2
 - 5 Fabric color number for accent skin; surface 2
 - 6 Paint color number for top cap and base covers
 - 7 Options, if selected (see below)
- See *Surface Materials*, page 420.

Tip: To price a panel with two base skin surfaces in different fabric price groups, add the two fabric price group option prices together and divide by two; then add the result to the panel base price.

	Options	U.S. Price	Required to Specify
Surface Materials	Top cap and base covers		
	• Paint price group 1	No cost	Specify paint color number.
	• Paint price group 2	+\$ 11	Specify paint color number.
	• Paint price group 3	+\$ 23	Specify paint color number.
	Panel surface		
	• Kick standard fabric price group A	No cost	Specify fabric color number.
	• Fabric price group 1	+\$ 10	Specify fabric color number.
	• Fabric price group 2	+\$ 44	Specify fabric color number.
	• Fabric price group 3	+\$ 66	Specify fabric color number.
	• Fabric price group 4	+\$166	Specify fabric color number.
	• Fabric price group 5	+\$240	Specify fabric color number.
	• Fabric price group COM	+\$ 84	Specify fabric color number.
	▶ See Understanding Customer's Own Material (COM), page 424.		
	Accent skin surface		
	• Kick standard fabric price group A	No cost	Specify fabric color number.
	• Fabric price group 1	+\$ 3	Specify fabric color number.
	• Fabric price group 2	+\$ 9	Specify fabric color number.
	• Fabric price group 3	+\$ 14	Specify fabric color number.
	• Fabric price group 4	+\$ 42	Specify fabric color number.
• Fabric price group COM	+\$ 23	Specify fabric color number.	
▶ See Understanding Customer's Own Material (COM), page 424.			
Top Cap	• High top cap with knockouts to accommodate cable routing (increases panel height by 1¾")	+\$ 30	Specify with high top cap.
Electrical	Factory-installed powerway at base		
	• 3-circuit powerway with shared neutral	+\$136	Specify with 3-circuit power; shared neutrals.
	• 3-circuit powerway with separate neutrals	+\$168	Specify with 3-circuit power; separate neutrals.
	• 4-circuit (3+D) powerway	+\$160	Specify with 4-circuit power; 3+D wiring.
	• 4-circuit (3I+1) powerway	+\$199	Specify with 4-circuit power; 3I+1 wiring.
	• 4-circuit (2+2) powerway	+\$199	Specify with 4-circuit power; 2+2 wiring.
	Factory-included powerway for field installation for use in New York City		
	• 3-circuit powerway with shared neutral	+\$136	Specify with 3-circuit power; shared neutrals; not installed.
	• 3-circuit powerway with separate neutrals	+\$168	Specify with 3-circuit power; separate neutrals; not installed.
	• 4-circuit (3+D) powerway	+\$160	Specify with 4-circuit power; 3+D wiring; not installed.
	• 4-circuit (3I+1) powerway	+\$199	Specify with 4-circuit power; 3I+1 wiring; not installed.
	• 4-circuit (2+2) powerway	+\$199	Specify with 4-circuit power; 2+2 wiring; 2+2 wiring; not installed.

Tip: Factory-included powerway for field installation option replaces need to order separate powerways.

Tip: Field-installed powerways can be ordered through Kick Service Parts.

Sliding Panel Doors

For Use with Kick

Sliding Panel Doors

Tip: The sliding door is located outside of the panel system when installed in the standard position.

Tip: The standard door is handed and non-locking. When a lock option is specified the lock will be on the trail end of the door. The illustration above shows a left-handed sliding door. If a lock option is specified, the lock will be on the right (trail) side of the door.

Tip: Width of host panel should always be equal to the width of sliding door.

Tip: Height of host and receiving panels must match height of door.

Tip: Remember to specify lock cylinder and key separately.

► Lock Cylinders, page 434

Tip: When attaching the sliding door to an Answer panel, a junction stabilizer bracket is available for added rigidity to the host panel. If a host and/or receiving panel run exceeds 4', a junction stabilizer bracket must be applied to the door end of the host and/or receiving panel run. On long runs, apply a junction stabilizer bracket or perpendicular panel every 8'.

Standard Includes	Required to Specify
<ul style="list-style-type: none"> ► Need help? TS Series Laminate Common Shelves

Tip: For anticipated heavy loads on 42" and 48"W laminate common shelves, a field-installed reinforcing channel (TSATRC39) can be used.

Tip: Standard worksurfaces are 1 1/8" thick. However, the actual thickness between Low-Pressure Laminate (LPL) and High-Pressure Laminate (HPL) worksurfaces is slightly different. It is recommended that only worksurfaces of the same type are specified in a given application. In addition, there may be sheen or texture differences when using LPL and HPL in adjacent applications. Please use caution when mixing and matching different worksurface types.

Standard Includes	Required to Specify
<ul style="list-style-type: none"> ▶ Need help? Wood Veneer Grain Directions	432

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/ EMEA – Europe, Middle East, and Africa/APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the Surface Materials Reference Manual. Additional details, like product approvals by geography and finish number conversions, can also be found in the Surface Materials Reference Manual or see steelcase.com/surface-materials.

Surface Materials

Binders include:

- Surface Materials Reference Manual
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Paint

Tip: All products may not be available in all colors listed below.

► See page 426 for an overview of the paint colors available on each component.

Steelcase Surfaces

Price Group 1

7246 Midnight Metallic

Select Surfaces

Price Group 3

Accent paint

Accent paints allow you to choose from a pre-matched color palette of trend driven colors that are available without the PerfectMatch registration fee. Refer to the *Surface Materials Reference Manual* for more information about this program.

Custom Surfaces

Price Group 3

PerfectMatch

PerfectMatch is a service that allows you to create your own paint color. Refer to the *Surface Materials Reference Manual* for more information about this program.

Tip: Not all Price Group 3 paints are available on adjustable-height worksurface bases.

Laminate

Steelcase Surfaces

Applies to:

- Duo Storage boxes

Solid Laminate

2722 Cream **E**
2730 Arctic White
2746 Black
2759 Warm White **E**
2811 Mist **E**
2883 Seagull
2884 Milk
2885 Dune
2HMG Merle

Applies to:

- Universal worksurfaces—High-Pressure Laminate
- TS Series common shelves
- Kick freestanding worksurfaces
- TS Series worksurfaces

High-Pressure Laminate

Fiber Laminate

2850 Vanadium Fiber
2851 Rhyme Fiber **E**
2852 Tungsten Fiber
2854 Vellum Fiber
2859 Novell Fiber
2860 Granite Fiber
2861 Coconut Fiber
2862 Stucco Fiber

Micro Laminate

2920 Marl Micro
2921 Gypsum Micro
2922 Clay Micro
2923 Shadow Micro **E**

Patina Laminate

2870 Blonde Bronze Patina
2871 Blackened Bronze Patina
2873 Instant Iron Patina

Solid Laminate

2722 Cream **E**
2730 Arctic White
2746 Black
2759 Warm White **E**
2811 Mist **E**
2883 Seagull
2884 Milk
2885 Dune
2HMG Merle

Speckle Laminate

2820 Coffee Speckle
2822 Woodrose Speckle **E**
2823 Driftwood Speckle
2824 Smoke Speckle
2825 Vanadium Speckle

Tip: Some wood veneer finishes and woodgrain laminates share the same name. Because of the difference in materials, veneers and laminates of the same name are not an exact match but do coordinate with each other.

Woodgrain Laminate

2406 Clear Cherry
2409 Clear Maple
2410 Graphite Walnut
2412 Natural Cherry
2422 Medium Cherry
2511 Winter on Maple
2535 Virginia Walnut
2536 Blackwood
2538 Clear Walnut
2539 Warm Oak **E**
2592 Blonde on Maple
2714 Natural Walnut
2772 Medium Mahogany on Walnut **E**
2HAK Clear Oak
2HAN Ash Noce
2HAT Acacia
2HAW Ash Wenge
2HBN Bisque Noce
2HBW Bisque Wenge
2HCN Clay Noce
2HCW Clay Wenge
2HCS Storm Noce
2HSW Storm Wenge

Tip: Woodgrain Laminates and the turnstone Laminate Collection are not available as matched sets. The grain patterns will not align. These are not recommended for fully segmented skin applications.

turnstone Laminate Collection

A selection of laminates and edge bands in this collection are available on Steelcase brand products. This collection is available with standard leadtimes and supported like standard laminates to help make ordering easy. Please see the turnstone section of village.steelcase.com for swatching information.

2535 Virginia Walnut
2536 Blackwood
2612 Marbled Maple
2614 Chocolate Walnut
2615 Marbled Cherry

Tip: turnstone Laminate Collection available on doors or bullnose laminate storage tops.

Select Surfaces

Textured Woodgrain Laminate

2TH2 Fawn Cypress
2TH3 Weathered Char
2TH4 Saddle Oak
2TH5 Veranda Teak
2TH6 Persian Cherry
2TH7 Walnut Heights

Custom Surfaces

Open Line

Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$69 U.S. per worksurface or top, plus the cost of the laminate.

When processing orders for Open Line laminate on Universal worksurfaces and Universal Storage tops, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

E = Established

- Overhead storage
- TS 200 Series tops

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneer

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

► See *Surface Materials Reference Manual* for a listing of available veneers for Victor2.

Flat-cut open-pore finish choices

3062	FC/OP Graphite Walnut
3402	FC/OP Clear Cherry (Aged)
3412	FC/OP Natural Cherry E
3422	FC/OP Medium Cherry
3522	FC/OP Clear Maple*
3572	FC/OP Amber on Maple E
3592	FC/OP Blonde on Maple
3702	FC/OP Clear Walnut
3712	FC/OP Natural Walnut
3722	FC/OP Dark Mahogany on Walnut
3752	FC/OP Medium Walnut
3762	FC/OP Dark Walnut
3772	FC/OP Medium Mahogany on Walnut

Quarter-cut open-pore finish choices

3042	QC/OP Ash*
3222	QC/OP Clear Maple*
3272	QC/OP Amber on Maple E
3292	QC/OP Blonde on Maple
3302	QC/OP Clear Walnut
3312	QC/OP Natural Walnut
3322	QC/OP Dark Mahogany on Walnut
3352	QC/OP Medium Walnut
3362	QC/OP Dark Walnut
3372	QC/OP Medium Mahogany on Walnut
3382	QC/OP Graphite Walnut

Rift-cut open-pore finish choices

3602	RC/OP Desert Oak
3612	RC/OP Warm Oak
3692	RC/OP Espresso Oak

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Flat-cut full-fill finish choices

3064	FC/FF Graphite Walnut
3404	FC/FF Clear Cherry (Aged)
3414	FC/FF Natural Cherry E

3384	QC/FF Graphite Walnut

Rift-cut full-fill finish choices

3604	RC/FF Desert Oak
3614	RC/FF Warm Oak
3694	RC/FF Espresso Oak

*Because no stain is used in the clear-coat process, a sign-off will be required prior to orders being accepted for this finish. The sign-off sheet is available through Steelcase advertising stock. Please use form number 09-0000756 for 3042, form number 05-0001370 for 3222 and 3224.

Steelcase Surfaces

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are Graded-In as Wood Group 1 pricing.

Flat-cut open-pore finish choices

3JDX	FC/OP Oak Composite
3JFX	FC/OP Maple Composite
3JHX	FC/OP Cherry Composite
3JJX	FC/OP Walnut composite

3JGX	QC/OP Cherry Composite

Select Surfaces

For information on products within Select Surfaces, including accent paints and fabrics from Designtex, Gabriel, Kvadrat, and Pollack, please refer to the *Surface Materials Reference Manual* or visit steelcase.com/surface-materials under the Select Surfaces section.

Natural Veneer

Natural veneer is available in the Select Surfaces offering. Natural veneer may have extended lead-times. Place your order as you normally would for any other finish, calling out the appropriate finish code.

The following finishes are available through the natural veneer offering:

Wood Group 1

- 35A2 FC/OP Blanch Maple
- 37A2 FC/OP Thunder Walnut

Wood Group 2

- 32A2 QC/OP Blanch Maple
- 33A2 QC/OP Thunder Walnut

Wood Group 3

- 36A2 RC/OP Volcanic Oak

Planked Veneer

Planked veneer is available in the Select Surfaces offering. Planked veneer may have extended lead-times. Place your order as you normally would for any other finish, calling out the appropriate finish code.

The following finishes are available through the planked veneer offering:

Wood Group 1

- 3P61 OP Planked Oak
- 3P71 OP Planked Walnut

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Steelcase Surfaces

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is Graded-In as Wood Group 2 and Wood Group 3, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Ⓔ = Established

Quarter-cut open-pore finish choices Wood Group 2

- 3032 QC/OP Dark Thin Line Bamboo
- 3052 QC/OP Ribbon Sapele

Wood Group 3

- 3832 QC/OP Figured Anegre
- 3842 QC/OP Figured Makore

Note: Full-fill finish is not available on Premium veneers as a standard. To ensure an understanding of the color ranges and characteristic variations of natural veneer, a sign-off sheet is required prior to orders being accepted for this clear-coat finish. The sign-off sheet is available through Steelcase advertising stock. Please use form number 09-0000755 for 3032, form number 09-0000757 for 3052, form number 09-0000758 for 3832, and form number 09-0000759 for 3842.

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Plastic

Steelcase Surfaces

Note: The following two plastics are available for existing customers only. The matching paints have moved to the *Surface Materials Reference Manual*.

The standard application direction of fabric on Kick panels, skins, and Hutch kit tackboard is warp horizontal. Standard Steelcase fabrics were designed for this application direction.

The optional application direction of fabrics on Kick panels, skins, and Hutch kit tackboard is warp vertical. This is most commonly used on COMs designed for warp vertical application.

For more information about the warp direction of fabrics, see the *Surface Materials Reference Manual*.

Directional laminates are standard with the grain directions shown.

Universal Systems Worksurfaces—High-Pressure Laminate

Wood Veneer Grain Directions

The appearance of wood veneer may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90-degree angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

Lock and Keying

For Kick Freestanding and TS Series Storage

► See page 435 for TS 200 Series Lateral File Keying options.

Front-removable lock cylinders can be installed or removed in the field with a special tool. This feature allows you to field install lock cylinders after the furniture is installed.

All locks are designated with key numbers. You can specify a key number; however, if you don't specify a key number, the locks in your order will be keyed random.

Two types of locks are available — the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Standard Keying

All products are standard keyed random.

Step 1

Furniture will be shipped with a plastic shipping plug. Specify lock cylinder and keying options separately. Only products with factory-installed lock mechanisms can accept lock cylinders in the field.

Tip: Be sure to specify a lock color number (9201 Polished Chrome or 9250 Ember Chrome) for the lock face ring.

Step 2

Order enough lock cylinders to fill each lock location. You must also order a lock tool.

Tip: Lock tools are reusable. You don't need to order additional lock tools with every furniture order. Lock cylinders and the installation tool will be shipped separately so that you can install the locks when you are ready.

To specify lock cylinders, list the total number of lock cylinders that you want with the appropriate style number. If you are specifying key numbers, list the breakdown of the quantity of each key number.

An example of how your order should look is shown below:

Example:

10 LOCK9201FR FR320
5 LOCK9201FR FR350
15 LOCK9201XF XF1100

30 Total

1 877102003SR standard lock tool
1 877102002SR master lock tool

Keying Options

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key numbers for all locks.

Key specific means that you can specify any key number from FR305 to FR454. This option can be used to key all the furniture units in a workstation or department the same.

Tip: Designate the quantity per key number in your specification when ordering more than one product with the same style number.

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454.

Master key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from XF1001 to XF1150. All the locks in the XF series can be opened with a master key.

Master key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from XF1001 to XF1150. All XF locks can be opened with a master key.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key numbers for all locks.

Master key specific means that you can specify any key number from XF1001 to XF1150. All the locks in the XF series can be opened with a master key.

Tip: Designate the quantity per key number in your specification when ordering more than one product with the same style number.

Lock and Keying

For Universal Steel Storage Products and TS 200 Series Lateral Files

Lock and Keying

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.
Exception: Individual locking drawers are only available with field-installed locks.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available — the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.
Tip: Random keying can mean that different furniture

units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.
► See below.

Key Random

Required to Specify

Master key random +\$24 Specify with master key random.

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.
Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).
Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key Random

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.
Tip: Designate the quantity per key number in your specification.
► See example at right.

Key Specific

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Key Consecutive

Example of a typical lock cylinder specification is shown below:

10	LOCK9201FR FR320
5	LOCK9201FR FR350
15	LOCK9201XF XF1100
30	Total
1	877102003SR standard lock tool
1	877102002SR master lock tool
