

Sole vendor statement

To whom it may concern,

MAHI is the developer and sole vendor of MAHI branded autonomous maritime navigation technology products, covering assisted and safe navigation, remote operation and remote supervision solutions for unmanned and manned vessels.

The *MAHI Sense* is a marine-grade, outdoor mountable autonomy computer that is capable of converting vessels into unmanned, remotely-operated vessels in an exceptionally short amount of time.

Product uniques

1. Several functions are integrated within the MAHI Sense hardware unit:
 - a. AIS/VHF receiver
 - b. SSD storage
 - c. GNSS receiver
 - d. IMU
 - e. 4G modem
 - f. Line of sight radio for integration with handheld remote controller
2. MAHI Sense connects and interfaces with many navigation sensors, propulsion, steering and energy systems from several OEM suppliers:
 - a. Garmin
 - b. Raymarine
 - c. Simrad
 - d. Furuno
 - e. Axis
 - f. Sionyx
 - g. FLIR
 - h. Torqeedo
 - i. Panther
 - j. Airmar
 - k. Victron
 - l. Poynting
 - m. Ubiquiti
 - n. Starlink Maritime
3. MAHI Sense is capable of processing and fusing navigation sensors by running AI-based algorithms.

The MAHI Sense system is a unique solution on the market for the situational awareness and control over Unmanned Surface Vessels (USV). The MAHI Sense is accompanied by the *MAHI Bridge* software that is the User Interface (UI) to enable remote operate and remote supervise over the vessel.
