# Introduction

## A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

### Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

### Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

### The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table.

The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

It utilizes a new method for merging a fabric layer with flexible polymer shell. The TriFlex™ 2 back is 100% polymer, no fabric, with a similar design that offers flexible and continuous support. These options, combined with the new loop spine design and passive PostureFit® sacral support allow for a new level of personal contouring and micro-motion support, with the Butterfly Back offering the highest level of comfort. ### Product Information

#### Description

This stool has a 5-star base and 1 height cylinder with a seat-height range of 23½" to 33½".

The stool has 2 backrest options. The Butterfly Back™ creates an intelligent support structure for the user's entire back. It utilizes a new method for merging a fabric layer with flexible polymer shell. The TriFlex™ 2 back is 100% polymer, no fabric, with a similar design that offers flexible and continuous support. These options, combined with the loop spine design and passive PostureFit® sacral support allow for a new level of personal contouring and micro-motion support, with the Butterfly Back offering the highest level of comfort. The AireWeave™ seat-suspension material is lightweight and breathable and evenly distributes the user's weight over the seat of the stool. The stool's Harmonic™ 2 tilt provides continuous balance and lets the body recline naturally, pivoting at the ankles, knees, and hips.

Tilt options include a tilt limiter, and tilt limiter and seat angle. The tilt limiter allows the user to set the tilt range to limit the amount of recline. The tilt limiter and seat angle allows the user to set the tilt range and select a 5° forward seat angle.

Back support options include a standard fixed lumbar version and a user-adjustable lumbar support version. The adjustable lumbar support adjusts 4½" in height and 1" in depth. Both back options include passive PostureFit at the base of the back, below the beltline, that helps achieve healthier posture and improved lower back comfort.

The stool's Butterfly Back is specified with a Latitude™ fabric color that corresponds to the polymer back shell colors. The applied fabric is on the front side of the backrest and allows flexible support and airflow.

Fabric cannot be applied to the stool's AireWeave seat.

Seat options include a 16¼" fixed seat depth or a FlexFront® seat depth that allows the user to adjust the seat depth from 16¼" to 18".

Arm choices include no arms, fixed arms, or 4-dimensional adjustable arms that adjust the arms 5½" vertically, 1⅛" horizontally, 2" front-to-back, and pivot the arm pads 20° outward and 20° inward.

#### Notes

Stool is tested and warranted for use by persons 350 pounds and under. 20"-diameter footrest adjusts 4½" in height.

Footrest available in trivalent chrome; column and ring support are black.

For information on casters and glides, see Casters and Glides in Appendices.

### Product Information

#### Description

This back replaces an existing Butterfly Back™ on a Mirra® 2 work chair or stool. The back utilizes a new method for merging a fabric layer with flexible polymer shell. The specially bonded back surface allows flexible support and airflow.

#### Notes

Specify Butterfly Back kit frame finish to match Mirra 2 work chair or stool frame finish.

Existing Mirra 2 chair or stool lumbar strap or fixed back loop finish should match molded back finish. To change lumbar strap finish for an existing chair or stool, order adjustable lumbar kit (MRF905A) separately.
