ORDERING A WORK SURFACE FOR SIXTY-FIVE

When ordering a work surface for a Sixty-Five workstation, add “65-” to the start of the part number.

Example: If specifying a 30x46 Rectangular Work Surface with standard SKU: WS3046, add “65-” to the start of the SKU for **65-WS3046**.

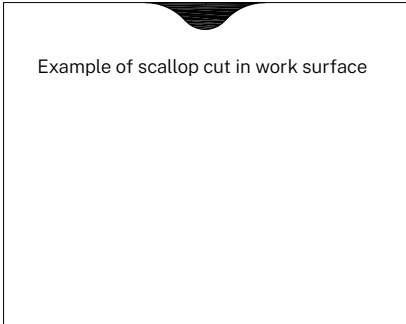

The below surfaces require “65-” to be added to the start of its SKU:

WORK SURFACE TYPE	PAGE
Rectangular	99
Corner	101
Corner Wedge	101
Extended Corner	102
Extended Curvilinear Corner	104
Depth Transition Corner	107
Depth Transition Curvilinear Corner	107
C-Shaped	107
Peninsula	107
Conference Peninsula	108
Extended Corner Peninsula	109
Extended Curved Corner Peninsulas	111
120 Deg	113
120 Deg Corner	114
120 Deg Extended Corner	115
Quarter Round (Inside/Outside)	119

NOTE: If a work surface is not referenced above, “65-” does not have to be added to its SKU.

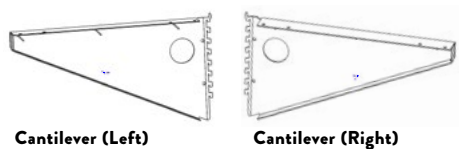

WHY SCALLOPS ARE INCLUDED WITH WORK SURFACES

Due to distance between panel frames and work surfaces in Sixty-Five, scallop cuts are automatically added to work surfaces to provide support for mounting accessories and cable management.

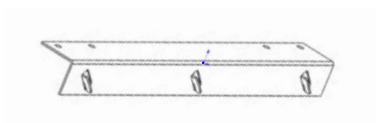

For more information on how scallop cuts are added to work surfaces, view our Specification Guide at www.openplan.com/sixty-five-system.

RAZOR SYSTEM

Our Razor System gets its name from its sleek, sharp edges. With its square connectors, flush base and razor-sharp design, this system is the future of modern offices. See Razor System brochure for details.

SPECIFYING THE RAZOR SYSTEM

DRAWING: Razor Panels can be found in our 20/20 library under the “Razor Panels and Connectors” folder. Razor Tiles can be found in our 20/20 library under the “Razor Tile Panels and Connectors” folder. Razor Panels, Razor Tiles, and unique Razor Connector SKUs are designated w/ a (.T) in our 20/20 Giza and CAP libraries.

PRICING AND QUOTING: Razor Panels, Tiles and Connectors are the same price as our OPS2 Panels, Tiles and Connectors. Razor Panel and Tile SKU’s do not show up w/ a .T in the quote as the TB in the header is what denotes the base style. Only unique Razor connector or power parts show w/ a .T in the quote. See p. 19-23 of our Price Book for Razor Connector SKU’s. Please let your Customer Service Representative know if you are interested in our Razor System to ensure it is specified correctly.

ELECTRICAL

W/ our Razor System, we utilize Version 1 Power and Thin Receptacles.

POWER

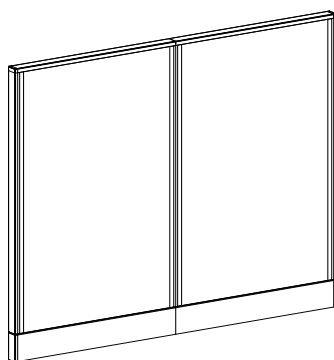

- Version 1 w/ thin receptacles
- Still part of All New Signature Program

FESTOONS (NOT SHOWN)

Three different types of festoons needed:

- 13" Pass-Thru Power Harness For 12"W Monolithic Powered Razor Panels
- 19" Festoons: For Panel to Panel
- 22" Festoons: For Two Way Connectors
- 23" Festoons: For Three or Four Way Connectors

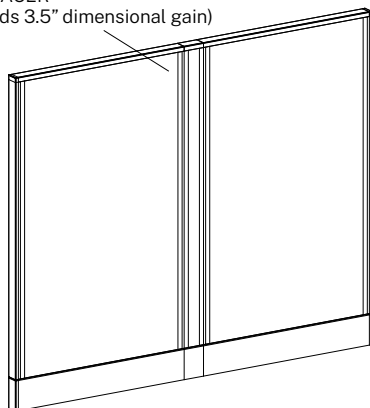

PANEL TO PANEL- PTP (DRAW ROD)

DESCRIPTION

This draw rod connects AO1 or AO2 panels of equal or unequal heights in a straight line. Unequal heights in a straight line also require a Change of Height connector. (COH)

NOTE: PTP connectors are used for a straight panel to panel connection. When unequal height panels are next to each other, use the lower height draw rod and COH for proper connection.

SPACER
(Adds 3.5" dimensional gain)

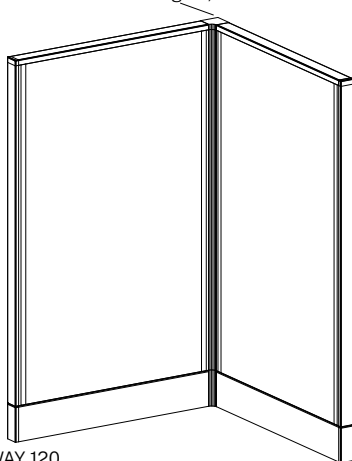

SPACERS W/ THIN BASE

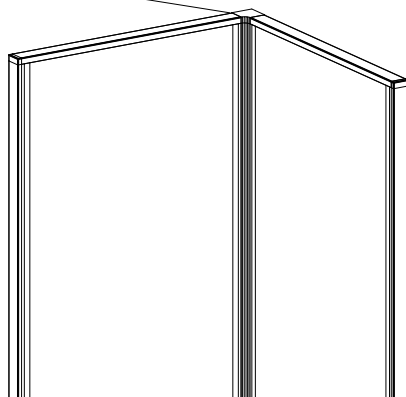

DESCRIPTION

Spacers join two panels of equal or unequal heights in a straight line. They can compensate for dimensional gain in a panel run. If connecting panels of unequal heights, spacer height should equal height of higher panel.

2 WAY 90
(Adds 3.5" dimensional gain)

2 WAY 120

2 WAY 90 CONNECTOR W/ THIN BASE

DESCRIPTION

These connectors join two panels of equal or unequal heights at a 90 degree angle. If connecting panels of unequal heights, connector height should equal height of higher panel.

2 WAY 120 CONNECTOR W/ THIN BASE

DESCRIPTION

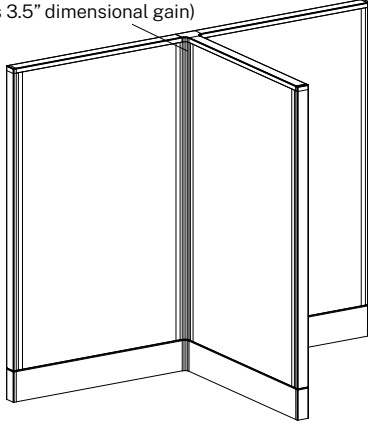

These connectors join two panels w/ base of equal or unequal heights at a 120 degree angle. If connecting panels of unequal heights, connector height should equal height of higher panel.

*VERSION 2 POWER

The 4-circuit power outlets are located in the middle of the base on each panel, allowing for two duplex receptacles on each side of 24"-60"W panels. Attached to the power harness are the jumpers for power continuation from panel to panel and panel through connector. Version 2 Power is utilized in our Signature program.

VERSION 1 POWER

The 4-circuit power outlets are located 10" from the end of the base on each panel, allowing for two duplex receptacles on each side of 30"-60" panels and one on each side of a 24" panel. Separate jumpers are used to connect power from one panel to another. Version 1 Power is utilized w/ all Sustainable options.

DESCRIPTION

Our structural non-powered fabric panels have fabric surfaces, painted top caps and adjustable glides.

NOTES:

- Designed for 6mm tempered glass or plexiglass applications
- Recommended for heights up to 20"H
- Can attach to panels or work surfaces
- Secures to surfaces using double-sided tape, velcro or screws
- Minimal gap (~1/8") from edge of screen to surface
- Bottom and top mounts are required to secure glass
- DM-SE-H is recommended when more stability is required

EXAMPLE USE OF DESK / PANEL SCREEN MOUNTS

NOTE: Tempered glass is not recommended when an end of run is over 24" long and not connected at both top and bottom. If a run is longer than 24", Plexiglass is recommended with PGHM-TC or PGHM-N screen holders for added stability.

See our Desk/Panel Screen Mount Specification guide for more information at www.openplan.com.

Desk Screen Holders

DSH-LU configuration shown. Screens sold separately.

NOTES:

Modesty panels use frosted plexiglass for safety reasons. Attaches beneath work surface via included PGHM screen mounts (Finishes BU, HF, LT, MT, MS, WF).

67"H 18771414 CONFIGURATION

DESCRIPTION

Our 67H non-powered tile frame w/ an 18771414 configuration holds an 18"H bottom tile followed by two 7" tiles and two 14" tiles. Tiles are specified on both sides of the tile frame.

Our OPS2 Tile System is fully compatible w/ our OPS2 Panel System and utilizes the same connectors. Non-powered tiles have Version 2 rails and aluminum top caps.

Tile frames come in standard heights of 39, 53 and 67. Total height includes a 5" base and 2" for the tile frame. Additional heights of 47, 85 and 103 can be achieved through tile stackers. Tiles are available in widths of 24, 30, 36, 42 and 48.

TILE STACKERS

DESCRIPTION

Tile stackers can be added on to 39, 53 and 67H tile frames to achieve additional heights of 47,

85 and 103. Our standard connectors are utilized when applying tile stackers, totaling the height of the frame plus the stacker.

Tile stacker connectors are only used when adding-on to existing tiles to achieve a new overall height.

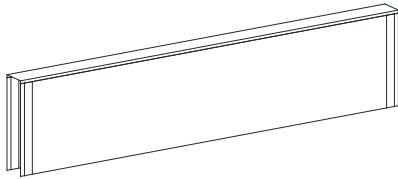

Tile Stacker Width Options: 24, 30, 36, 42, 48
Tile Stacker Height Options: 8, 14, 18

8"H Tile Stackers:

Available in fabric, fabric tackable and painted finishes

14 and 18"H Tile Stackers:

Available in fabric, painted and glass finishes.
Glass is specified w/ a glass tile on the outside and an open frame on the inside.

PANEL TO PANEL-PTP (DRAW ROD)

DESCRIPTION

This draw rod connects AO1 or AO2 panels of equal or unequal heights in a straight line. Unequal heights in a straight line also require a Change of Height connector. (COH)

NOTE: PTP connectors are used for a straight panel to panel connection. When unequal height panels are next to each other, use the lower height draw rod and COH for proper connection.

CEILING POWER DESCRIPTION

Ceiling power entry connects a ceiling's electrical supply to the end of a frame run. It distributes up to 4 20-amp circuits. The power entry has a 12'-high pole that can be field cut to the appropriate length, ceiling trim, connecting hardware, conduit, and a factory-installed electrical harness. The V2 power entry plugs into the end of the harness; V1 plugs into a receptacle location. The power entry is UL listed.

BASE POWER DESCRIPTION

Base power entry connects a building's electrical supply from a wall, floor, or column to the base of a powered frame/panel. It plugs directly into a receptacle location on the frame's base to distribute up to 4 20-amp circuits. The power entry is manufactured in a right or left hand. It is UL listed.

NOTE: Licensed electrician must wire power entry.

NOTE: Festoons are only specified or needed w/ V1 power. Festoons are included when ordering powered panels.

WORK SURFACES

RECTANGULAR

DESCRIPTION

Our rectangular laminate Work Surfaces are available in 24, 30 and 36" depths. They come standard w/ cantilevers and one flat bracket for panel hung applications. They can also be supported w/ wall tracks if panels are not utilized. For free-standing applications, support legs can be used in place of cantilevers.

24" Depth:

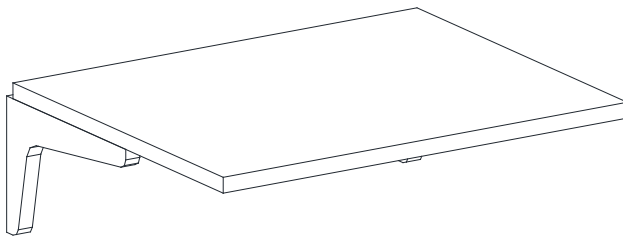

NOTE:

Rectangular Work Surfaces less than 60"W come w/ two cantilevers and one flat bracket. Work Surfaces 60"W or greater come w/ three cantilevers, one flat bracket and one Work Surface support channel. Cantilevers for 24"D Work Surfaces are 16."

EXTENDED CURVILINEAR CORNER WORK SURFACES- LEFT EXTENSION

DESCRIPTION

These extended curvilinear corner laminate Work Surfaces combine a curvilinear corner surface and rectangular return into one surface. They are handed (L or R) and extend from 42 to 72".

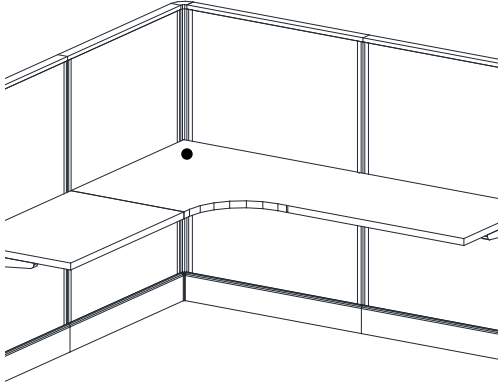

NOTE:

Extended Corner Work Surfaces less than 60"W come w/ two cantilevers, one corner bracket, one grommet and one flat bracket. Extended Corner Work Surfaces 60"W or greater come w/ three cantilevers, one corner bracket, one grommet and one Work Surface support channel. Cantilevers for 24"D Work Surfaces are 16." Cantilevers for 30"D Work Surfaces are 24".
