
Montage Solutions Specification Guide

Availability

Electronic price list updated with release 200.G (U.S.) and 156.G (Canada), dated June 19, 2023.

All specifications subject to change without notice. Reference the electronic catalog/Hedberg for current pricing.

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a . Products that are scheduled to be culled are indicated with an , followed by the last order entry date.

Surface Materials

The **surface materials team** has announced the launch of the Finish Library, found at <https://finishlibrary.steelcase.com/>.

► For a list of all trademarks, refer to the last page of this specification guide. © 2023 Steelcase Inc.

Specifying Tips

General Tips

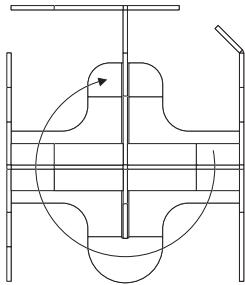

Standard Includes

- Case; paint
- Waterfall or rod pulls
- Dividers in box drawers
- Hanging file folder rail in file
- Lock in top drawer, key ran Polished Chrome
- Leveling glide
- Left- and right-hand filler arm

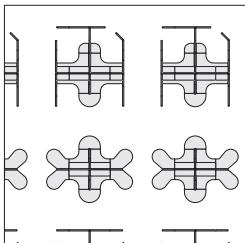

Review the features that are standard for each product before you begin to specify. You only need to include specifications for options, surface materials, and colors when you want a substitute for the standard.

To ensure that you do not overlook anything, approach the specifying process in a consistent order every time. Here are three common methods:

Specify products according to their order on the specifying pages.

Specify all workstations using a formulated pattern, such as starting at the entrance to a workstation and moving clockwise.

Specify each type of workstation in your installation and then determine how many of each type are needed.

Frames

Specify style numbers for all base frames and stack-on frames.

Specify enhanced standard frames, enhanced off-module frames, or a mix of both types of enhanced frames.

Specify enhanced stackers for use on enhanced frames.

Specify standard stackers for use on standard frames.

Specify vertical slot cover to hide vertical slots on platinum and sterling frames.

Specify ZSEAL20DC for slot covers needed on 20"H desk cavity openings.

Choose frames with desk-height cavities factory installed for positions where you want to install desk-height powerways.

Keep track of which frames you want to accommodate power, and you'll have an easy way to cross-check with your specifications for powerkits and base covers. 45"H, 55"H, and 65"H frames accommodate powerways in their bases or at desk-height. 10"H and 20"H frames accommodate cable routing but no other power distribution components.

Plan for 65"H or 86"H frames instead of a 45"H or 65"H frame with a 20"H frame stacked on top when the flexibility of variable heights is not needed. A single 65"H or 86"H frame will cost less than a 45"H or 65"H and a 20"H.

Add base covers and desk-height cavity covers to your list of specifications at the same time you specify frames so they are not overlooked.

Specify junctions by listing their style numbers and surface material.

No junctions are needed for frames that connect in a straight line at the same height or at different heights in off-module connections. But remember to specify end trim to finish the exposed portion of the taller frame.

Junctions are available to join frames in L, T, Y, X, V, and I configurations.

Specify a wall attachment bracket if you want a way to adjust space when installing a wall between two fixed points or when you suspect that the wall you want to connect frames to is not plumb. Remember that the 86"H wall attachment bracket has no top cap.

Specify enhanced frames for new customers and existing customers with new sites.

Specify end-of-frame or mid-frame off-module brackets when doing off-module frame connections.

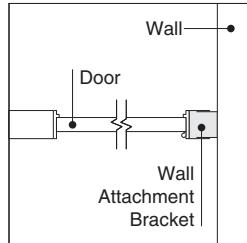

Frameless Glass

Specify frame without top cap on frames utilizing frameless glass stacker.

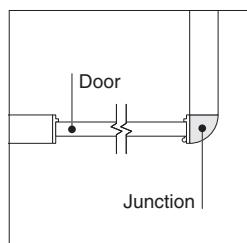

Doors

Remember that door frames are not structural. Use a stack-on frame above a door frame to provide stability. For applications where no frame is going to be installed above the door, a special top cap linked to adjacent frames is required. Contact your Steelcase area office to discuss your application.

A wall attachment bracket is needed if attaching a pocket door directly to a wall.

Specify a wall attachment bracket to attach one side of a door frame to a building wall.

Use a junction on one side of a door frame to allow adjacent frames to be perpendicular to the door.

Determine if you need a left-hand or right-hand door by picturing yourself standing in the door frame with your back against the side of the frame with the hinges. If the door swings to your left, it's a left-hand door. If the door swings to your right, it's a right-hand door.

Wiring & Cabling

Specify a powerkit to correspond to the width of each frame with power. The frame-to-frame power connector cable that links adjacent powerkits together is included, so you don't need to order it.

Keep track of which surfaces will have desk-height cavity covers so that you can order smaller 13"H tiles for these frames.

Choose a base power-in to carry power from the floor of the building to the base of a frame. To extend power up to desk-height powerkits, you'll need to specify a base-to-desk-height power transfer cable. Remember that a power transfer cable must be routed through a junction.

Choose a top power-in to carry power from the ceiling down to either a powerkit at desk height or a powerkit in the frame base. Remember that a top power-in requires a power and cable pole of the appropriate size and that the power and cable pole must be positioned over a square L, T, or X junction to allow the top power-in cable to be routed.

Order covers. Plain base covers can be used in the bases of frames without powerkits or on the side of a frame where you don't want access to the powerkit's receptacle locations. Specify power base covers where you intend to have receptacles. Specify desk-height cavity covers for both sides of all the frames where you will have desk-height powerkits and want voice/data terminations and access to voice/data receptacles. Specify enhanced desk-height cavity covers for all frames manufactured after June 11, 2001.

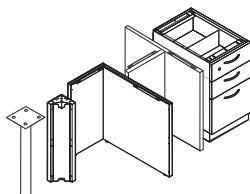

Specify optional data openings below worksurface when extra voice/data plugs are needed.

Specify optional cable tray below the worksurface on a desk-height cavity cover when additional cord management is needed.

Specify power receptacles, voice/data receptacles, and filler plates to fill all the openings in the power base covers and desk-height cavity covers.

► See page 56 for the positions of receptacle openings.

Specify Internode components when routing cable or power frame a spine wall to above or below worksurface mounts.

For Answer
Freestanding desk installations you can use:

- End supports
- Peninsula supports
- Corner support
- Columns and legs
- Modesty panels
- Pedestals
- Lateral files, storage cabinets, and bookcases

► Page 142

Tiles

Specify the style numbers and surface materials of all the tiles.

Draw an elevation view of both sides of each run of frames in the installation to help make sure you're including all the components in your specification and to help guide the installation. See example on next page.

Specify enhanced tiles for all frames manufactured after June 11, 2001.

Code each tile type and size with colors or a simple notation. Remember that 20"H segments with desk-height powerways will require 13"H tiles instead of 20"H tiles to allow space for the desk-height cavity covers.

13"H segments on 38"H frames with desk-height powerways require 6'H tiles instead of 13'H tiles to allow space for the desk-height cavity covers. If you don't want access to the desk-height powerway's receptacle locations, you can use 20'H tiles on that side of the frame.

Storage

Specify storage component style numbers, surface materials, and any specific keying information.

Specify off-module upper storage brackets for upper storage off-module applications.

Lighting

Specify style number and surface materials for all lights.

Example of Frame Run Elevations with Codes

N30	30" Non-Tackable (painted steel)	N48	48" Non-Tackable

Single and Double Pocket Doors Shipped before 10/18/04						●												

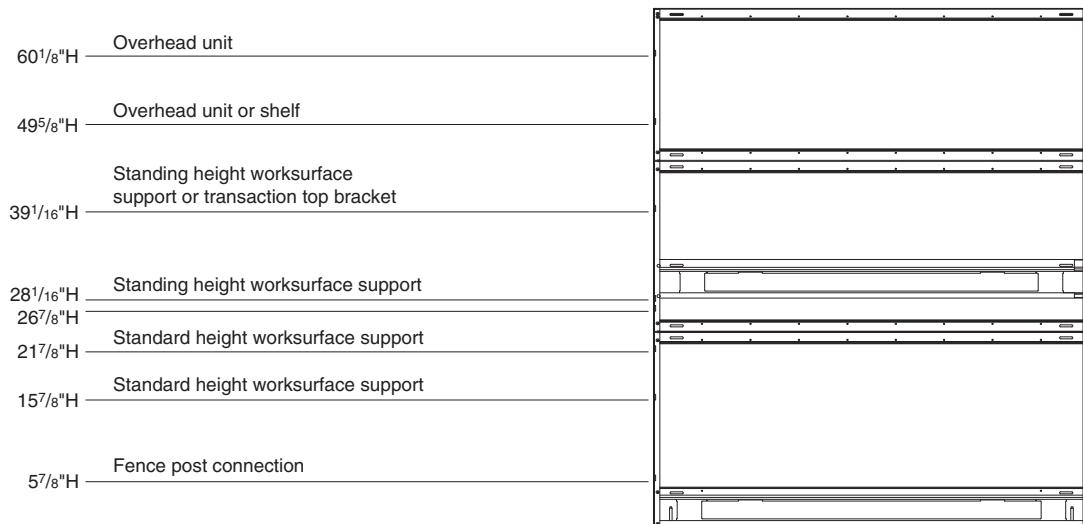

Note: Base covers and desk-height cavity covers for use with the powerway system or retrofit powerkits must be ordered through the Specials Program.

Note: Glass tiles manufactured before 6/1/2010 are visually different than tiles produced after that date.

Note: Pocket doors shipped before October 18, 2004, require a standard tile to be used in the top segment of the pocket frame. Enhanced tiles can be used on the lower segments.

Note: Pocket doors are compatible with all standard tiles, except standard glass tiles.

Connectivity Slots for Montage

Legend

- = Compatible
- * = Tackable acoustical, high-performance acoustical, steel, laminate, and markerboard standard tiles can be modified to work on enhanced standard and enhanced monolithic frames. A transition kit is available through Service Parts.
- = Retrofit powerkit must be used in frames manufactured prior to March 21, 2000. The standard powerkit cannot be used.

Specifying Frames and Junctions

Frames

Enhanced Monolithic Frames	276
Horizontal Filler Strips and Vertical Slot Covers	278
Enhanced Standard Frames	279
Enhanced 10"H and 20"H Single Stack-On Frames	280
Enhanced Off-Module Frames	281
Enhanced Off-Module Frame Attachment Brackets	282
Door Frames	283
Doors and Lever Sets	284
Single Pocket Doors	285
Double Pocket Doors	286

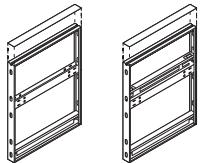

Frame Junction Kits

Square L-Junctions	287
Radius L-Junctions	288
Chamfered L-Junctions	289
T-Junctions	290
X-Junctions	292
Y-Junctions	296
V-Junctions	298
I-Junctions	299

Trims and Brackets

Extended Steel Top Caps	300
Wood Top Caps	301
Vertical End Trims	302
Wall-Attachment Bracket	303
Floor Anchor Bracket	303

Enhanced Monolithic Frames

Tip: Enhanced monolithic frames accommodate enhanced monolithic tiles or enhanced segmented tiles. A horizontal filler strip, ordered separately, must be used at each location where tile segmentation occurs.

Tip: Desk-height cavity can be covered with a 20"H tile. Tile cannot be slatwall, high-performance acoustical, or perforated non-tackable.

Tip: Montage frames do not accept overheads or shelves on any base frame below 65"H.

Tip: Open base frames cannot accept any powerkits or data termination.

Wood Top Caps

Top Cap

Junction Top Cap

Tip: All wood top caps have a square edge profile.

Tip: Wood top cap for junction package includes an aluminum junction bracket for proper alignment.

Tip: Top caps are solid wood and offered in wood finishes that match both composite and open-pore natural veneer finishes.

Tip: Wood junction top cap is already included with wood junction frame kits.

Tip: The fifth digit of the wood junction top cap style number indicates the junction (L, T, or X) to be used in the application.

Enhanced Non-Tackable Tiles

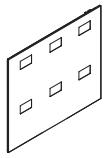

Tip: Enhanced tiles can be used on any enhanced frame, including monolithic frames, and any standard frames manufactured after July 2001.

Exception: Enhanced slat-wall tiles can be used on any standard frame regardless of manufacture dates.

Refer to compatibility tips.

► Page 274

Tip: Data opening option only available on 20"H tiles.

Tip: Patterned options are not available on tiles with data termination option.

Tip: Perforated, indented, and dome tile pattern options are not available on fabric-covered tiles. Pattern options are not available on tiles with cutout and base fiber-in.

Tip: Perforated tiles ship with metal septum, which will block cable and power routing when used back-to-back.

Tip: Dome tiles cannot be used behind off-module bracket connections.

Decoding pattern numbers

P = Perforated

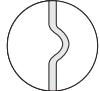

I = Indented

D = Dome

Number indicates the quantity of holes or indentations in a 2"W x 1 3/8"H area.

Cross-section through indented tile

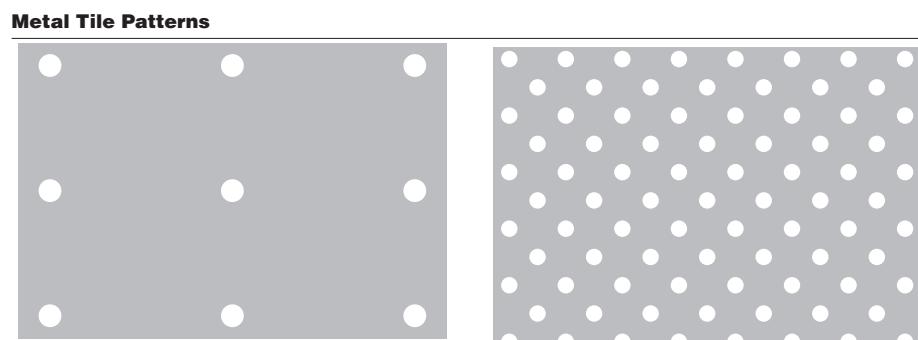

Cross-section through dome tile

Segmented Laminate Tiles

Tip: Tiles can be used on any enhanced frame, including monolithic frames, and any standard frames manufactured after July 2001.

Exception: Slatwall tiles can be used on any standard frame regardless of manufacture dates.

Refer to compatibility tips.

► Page 274

For laminate price group 2 and group 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Particleboard substrate will be used instead of steel substrate on all laminate tiles manufactured on or after 5/30/2016.

Tip: Segmented laminate tiles cannot be installed to cover up a desk cavity or base cavity with Chicago hardware junction boxes installed. Contact Steelcase Specials if segmented laminate tiles are required to cover Chicago hardware

Tiles

Enhanced Glass Tile Packages

Tip: Frames with glass tile packages installed cannot support overhead storage components.

Tip: Glass tiles cannot be used at worksurface height in front of a worksurface.

Tip: The use of glass on the spine wall is limited to one row in an off-modular connection.

Tip: Glass tiles cannot install in bottom segment of open base frame.

Tip: Enhanced tiles can be used on any enhanced frame, including monolithic frames, and any standard frames manufactured after July 2001.

Exception: Enhanced slat-wall tiles can be used on any standard frame regardless of manufacture dates.

Refer to compatibility tips.

► Page 274

Tip: Enhanced glass tile packages do not fit in pocket door frames.

Note: Glass tiles manufactured before 6/1/2010 are visually different than tiles produced after that date.

Straight Worksurfaces

High-Pressure Laminate or Wood Veneer

Tip: Supports for freestanding and panel-mounted applications must be specified separately.

Tip: Long worksurface spans require additional support.

► See understanding section for details, page 131

For wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number. (For example, US1830 becomes US1830SW for wood with square edge profile.)

Tip: Power and data access door and tray is ordered separately to be used with cutout.

► Page 400

► See page 118 for worksurface size availability matrix.

Tip: Scallop will be omitted if you select power access door.

Tip: Power access door option includes the power access door and a cutout for the door in the worksurface.

Tip: Power access door option is only available on straight worksurfaces with ½" cord drop.

Straight Worksurfaces with Soft Edge Profile

High-Pressure Laminate or Wood Veneer

Tip: Supports for freestanding and panel-mounted applications must be specified separately.

For wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Long worksurface spans require additional support.

► See understanding section for details, page 131

Tip: To specify 3 mm edge profile, no suffix is required.

For all other edge profiles, add a suffix to the style number. (For example, US2448S becomes US2448SWS for wood with square edge profile.)

Tip: Power and data access door and tray is ordered separately to be used with cutout.

► See page 400

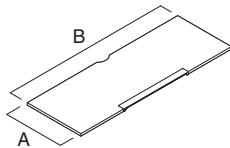

► See page 114 for worksurface size availability matrix.

Parametric Straight Worksurfaces with Soft Edge Profile

High-Pressure Laminate or Wood Veneer

► Need help?
Product details,
page 111

Standard Includes

- Worksurface: High-Pressure Laminate price group 1 or wood group 1 veneer
- Laminate worksurface:
 - Plastic antimicrobial soft edge profile centered on worksurface
 - Plastic 3 mm edge profile on front edge
 - Plastic default flat profile on side and back edges
- Wood worksurface:
 - Plastic antimicrobial soft edge centered on worksurface
 - Wood square edge profile on front edge
 - Matching veneer flat profile on side and back edges
- Depth: 18"D – 36"D
- Width: 18"W – 120"W

Required to Specify

- 1 Style number
 - 2 Worksurface size type (see below under Required Selections)
 - 3 Depth (see below under Required Selections)
 - 4 Width (see below under Required Selections)
 - 5 User edge profile (see below)
 - 6 High-Pressure Laminate or wood color number for worksurface
 - 7 Plastic color number for front edge on laminate worksurface, if selected
 - 8 Options, if selected (see below)
- See Surface Materials, page 542.

Tip: Long worksurface spans require additional support.

► See understanding section for details, page 131

For wood and laminate group 2 and 3 pricing,
please refer to the electronic catalog or SmartTools.

Tip: Short grain laminate is only available on surfaces 60"W or less.

Tip: Soft edge is available with or without 1/2" cord drop.

Tip: When selecting with cord drop, subtract 1/2" from depth.

Tip: Scallop is available in the center location only. If cutout for power and data access door and tray or power access door is selected, scallop will default to omit scallop.

Tip: Power and data access door and tray is ordered separately to be used with cutout.

► See page 400

► See page 114 for worksurface size availability matrix.

Tip: Cutout for power and data access door and tray is available in the center location only. Worksurface depth must be greater than 24".

Tip: Power access door option is only available on straight worksurfaces with ½" cord drop.

Tip: Power access door option includes the power access door and a cutout for the door in the worksurface.

Tip: If cutout for power and data access door and tray or power access door is selected, grommet will default to no grommet.

120° Straight Worksurfaces

High-Pressure Laminate or Wood Veneer

Tip: Supports for freestanding and panel-mounted applications must be specified separately.

For wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Long worksurface spans require additional support.

► See understanding section for details, page 131

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number. (For example, USE2448LH becomes USE2448LHSW for wood with square edge profile.)

Tip: Power and data access door and tray is ordered separately to be used with cutout.

► Page 400

► See page 118 for worksurface size availability matrix.

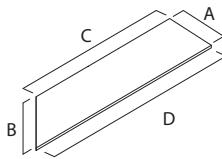

Tip: When facing the user edge, the side the diagonal is on is the handed side.

Tip: Power access door option includes the power access door and a cutout for the door in the worksurface.

Specifying Worksurface Screens

Worksurface
Screens

Divisio Side Screen

448

Divisio Side Screen

Tip: The Divisio side screen can be used on any 3/4"- to 1 1/2"-thick worksurface.

Tip: The Divisio side screen has an overhang of 8". This is important when planning for returns or storage.

Tip: The Divisio side screen weighs approximately 14 1/2 pounds. Take this into consideration when planning for use on height-adjustable worksurfaces.

Tip: The Divisio side screen is intended for use on the front of a worksurface.

Tip: The Divisio side screen does not work on knife edge profiles.

Hutch Kits

For Use with Universal Sliding Door, Universal Over the Case, and Universal In the Case Bins

Tip: A hutch kit cannot support more than one bin.

Tip: Be sure to order the storage bin in the same paint finish as the hutch kit. Storage bin is ordered separately.

Tip: To price a tackboard with fabrics in two different price groups on opposite sides, add the two prices together and divide by two.

Tip: 66"W and 72"W tackboards accommodate fabric in the horizontal direction only.

Tip: Hutch kits can span an L-shaped desk configuration only when full depth worksurfaces are used.

------------------------	-----

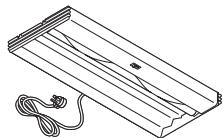

Standard Shelf Lights

Tip: Daisy chaining shelf lights together extends power from one fixture to another within workstations to help keep receptacles clear for other uses.
► See page 267 for more information.

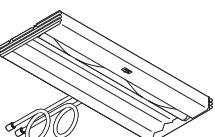

Tip: Daisy chaining is not allowed in Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Tip: Because shelf lights are usually recessed, black is the standard paint color. Paint colors other than black have an upcharge.

Tip: If an optional paint color is selected for the housing, the electrical switches and end caps will remain black plastic.

Tip: When ordering with standard power cord or Chicago cord, daisy chaining is not possible.

Tip: Remember to order a daisy chain starter cord.
► See Related Products on next page.

LED Standard Light

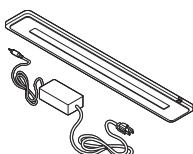

2½" 18" ½" 9.6 watts **LSL18** \$506

Tip: LED standard light comes with a 9' 18 watt power supply.

LED Daisy Chain Starter Light

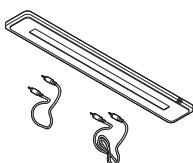

2½" 18" ½" 9.6 watts **LSL18YA** \$545

Tip: Daisy chain starter light comes with a 60 watt power supply that will support up to three lights in series (11' cord; 6' from power supply to power outlet, 5' from power supply to fixture). Does not include daisy chain jumper cords.

LED Daisy Chain Secondary Light

2½" 18" ½" 9.6 watts **LSL18YB** \$498

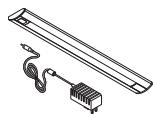

Tip: Daisy chain secondary light does not come with a power supply. Daisy chain cord package (8" and 30") comes standard with each secondary light.

LED Linear Shelf Lights

Tip: The power supply for the 17" stand alone only uses a straight plug with a 9' 18 watt 24 volt wall transformer. The power supply for the 31", 44", 58", or 17" starter light uses a 11' 60 watt compact in-line brick with straight plug.

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surface-materials.

Surface Materials

Binders include:

- Surface Materials Reference Manual
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Paint

► See *Surface Materials Reference Manual* for a listing of available paints for Victor2.

Tip: All products may not be available in all colors listed below.

► See page 550 for an overview of the paint colors available on each component.

Applies to:

- Universal worksurfaces and storage tops

Price Group 3**Solid Laminate**

- 24H1 Satin White
- 24H2 Satin Black
- 24H3 Satin Stone
- 24H4 Satin Mocha

Custom Surfaces**Open Line Laminate (OLL)**

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line Laminate, on Universal worksurfaces, and Universal Storage tops specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Wood

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the woodgrain texture visible to the eye and distinguishable to the touch.

Applies to:

- End trim
- Top caps
- Tiles
- Wood junctions
- Worksurfaces
- Infills for FrameOne legs

► See *Surface Materials Reference Manual* for a listing of available veneers for Victor2.

Wood Group 1**Open-Pore Planked Veneer**

- 3P41 OP Planked Cherry
- 3P51 OP Planked Maple
- 3P61 OP Planked Oak
- 3P71 OP Planked Walnut
- 3VFX OP Unmarked Oak

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

 = Established

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Wood Group 2

Flat-Cut Full-Fill

- 3064 FC/FF Graphite Walnut

Wood Group 3

Flat-Cut Full-Fill, Natural Veneer

- 3084 FC/FF Washed Walnut

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is Wood Group 3 as part of our Select Surfaces program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3

Quarter-Cut Open-Pore

- 3832 QC/OP Figured Anege

Select Surfaces

For information on products within Select Surfaces, including accent paints and fabrics from Designtex, Gabriel, Kvadrat, and Pollack, please refer to the *Surface Materials Reference Manual* or visit steelcase.com/surface-materials under the Select Surfaces section.

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as Wood Group 1 pricing as part of our Select Surfaces program.

Wood Group 1

Flat-Cut Open-Pore

- 3JDX FC/OP Oak Composite
- 3JJX FC/OP Walnut Composite

Quarter-Cut Open-Pore

- 3GGX QC/OP Zebrano Composite
- 3HGX QC/OP Oak Composite
- 3HVX QC/OP Walnut Composite
- 3ZNX QC/OP Night Cerused Oak Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Specification Guidelines for Directional Fabrics

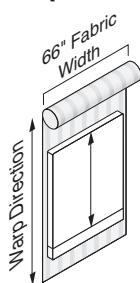

Steelcase is not responsible for charges associated with replacement or re-upholstery of panel surfaces due to incorrect specifications.

Warp Horizontal

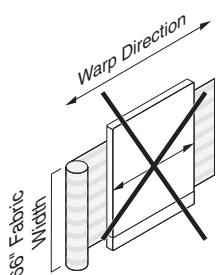

The standard application direction of fabric on Montage tiles 60"H or less is warp horizontal. Standard Steelcase fabrics were designed for this application direction.

Warp Vertical

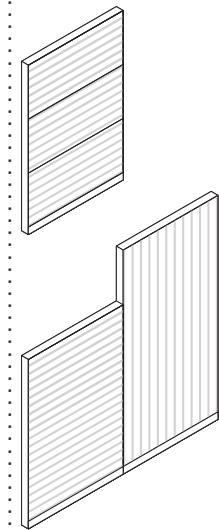

Warp vertical is applied to all 81"H tiles. It also is an option on shorter tiles to accommodate fabrics designed for vertical application—most commonly COMs—or for shorter tiles being used with 81"H tiles.

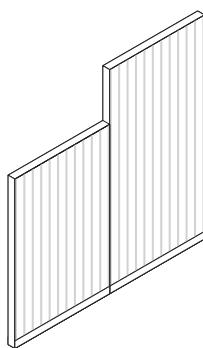

Warp Horizontal

Fabric on 81"H tiles cannot be applied warp horizontal because the height of the product is greater than the width of the fabric.

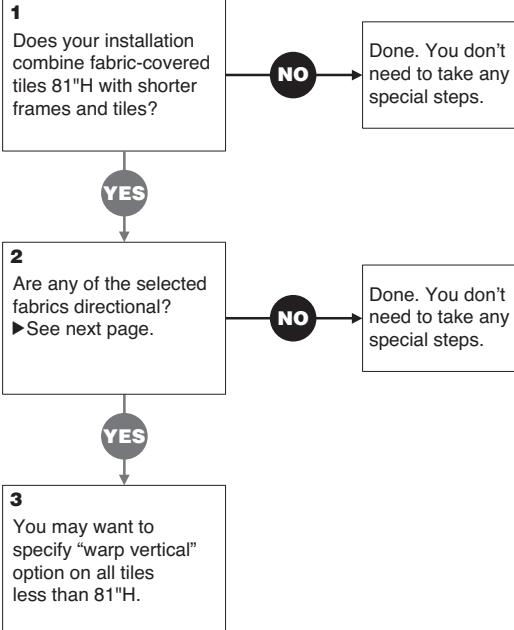

The combination of tall tiles (81"H with warp vertical) with short tiles (60"H or less with warp horizontal) will result in the fabric patterns running in opposite directions.

Warp direction on short panels can be specified vertical to match tall panels, or select a non-directional fabric.

Fabric Direction Decision Process

Tip: Not every installation requires that all panels have the same fabric direction.

You may not have to specify matching fabric directions on tall and short panels,

- if they are not going to be used together, or
- if you like the appearance of contrasting fabric directions.

Tip: You may want to specify fabric direction if you are trying to match existing panels.

Fabric-covered tiles ordered before October 16, 1995

were fabricated with warp horizontal or warp vertical depending on the fabric. Now all tiles will be warp horizontal.

Tip: If you're ordering tiles to match those in an existing installation, you may want to specify the fabric with warp vertical.

► See table at right.

Steelcase is not responsible for charges associated with replacement or re-upholstery of tile surfaces due to incorrect specifications.

Application Topics

Surface materials

consultants are available to answer your questions and to provide clarification about COM availability, testing, yardage requirements, etc. Call 616.246.9822.

Price

No additional cost to specify warp direction.

Wood Veneer Grain Directions

Natural wood veneers, unlike composite veneers, do not have mitered corner surfaces.

The appearance of wood veneer may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90-degree angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

How to Care for Laminate and Wood Surfaces

Laminate

Cleaning

Wiping with a damp cloth will remove general soiling and water-borne stains. If needed, use a hard-surface, all-purpose cleaner such as Formula 409, Fantastik, Top Job, Mr. Clean, etc. Some oil-borne stains may require the use of a dry-cleaning fluid. To fill scratches in woodgrain laminate tops, use an oak, walnut, or mahogany putty stick (available at paint supply and hardware stores).

Wood

Protection

Use desk pads and coasters to help protect the finish against dents, scratches, moisture and hot and cold liquids. Do not use desk pads that have plastic backing.

Use felt or leather pads on the bottoms of office equipment and accessories.

Lift objects when you move them, instead of pulling or pushing them across the surface, to avoid scratching the surface.

Periodically move desk accessories and other objects kept on the worksurface to ensure even aging.

Avoid leaving vinyl binders on worksurface for long periods.

If you use a protective glass top, insert felt pads between the glass and the worksurface, to create an air space and allow the wood to breathe.

Keep your furniture away from direct sunlight.

Avoid extreme temperatures and humidity. Maintain temperatures between 60 and 80 degrees Fahrenheit and humidity levels between 30 and 50 percent.

Cleaning

Keep a supply of soft, clean, absorbent cloths handy for wiping up spills and regular dusting.

Dusting

Clean with a slightly damp, soft cloth, using another soft cloth to dry. Always wipe the surface in the direction of the woodgrain.

Cleaning

Use a quality cleaner or flax soap formulated especially for use on wood surfaces. Do not use oils or ammonia. Dilute the cleaner as directed by the manufacturer. Dampen but do not saturate a soft cloth with the diluted cleaning solution. Wipe the surface in the direction of the woodgrain to remove dirt and fingerprints. Wipe the surface clean with a soft, dry cloth.

Waxing

Quality spray wax may be applied sparingly twice a year. Excessive waxing may result in a wax build-up which feels sticky and attracts an unusual amount of dirt. For information about how to remove this wax, contact your facilities department or Steelcase dealer.

Hardware

Clean metal finishes with a non-abrasive cleaner. Apply the cleaner sparingly, making sure that it does not come into contact with the wood. Wipe the hardware dry with a clean, soft cloth.

Help with Repair and Maintenance

Wood is a "forgiving" material which usually can be repaired. If your worksurface is damaged, call your facilities department or Steelcase dealer.

Many Steelcase dealers offer maintenance contracts for your convenience. Contact your dealer for more information.

Lock and Keying Options

Universal Steel Storage

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options. *Exception: Pkt doors are available keyed random only.* *Exceptions: Individual locking drawers are available only with field-installed locks.*

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available—the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders. ▶ See below.

Key Random

- ◀ FR305
 - ◀ FR421
 - ◀ FR305
- or
- ◀ XF1011
 - ◀ XF1042
 - ◀ XF1011

Required to Specify

Master key random	+\$36	Specify with master key random.
--------------------------	-------	---------------------------------

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Tip: For products with optional lock colors, make sure to specify the color for both the lock and lock face ring.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.

Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders. ▶ See example at right.

Key Random

- ◀ FR305
 - ◀ FR421
 - ◀ FR305
- or
- ◀ XF1011
 - ◀ XF1042
 - ◀ XF1011

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.

Tip: Designate the quantity per key number in your specification.

▶ See example at right.

Key Specific

- ◀ FR350
 - ◀ FR350
 - ◀ FR350
- or
- ◀ XF1020
 - ◀ XF1020
 - ◀ XF1020

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

▶ See example at right.

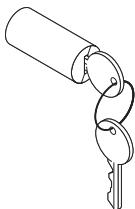

Example of a typical lock cylinder specification is shown below:

10	LOCK9201FR	FR320
5	LOCK9201FR	FR350
