Product Specifications	310
Product Planning Information	311
Product Options	313
Factory Installed Grommet and Cutout Options	314
Product Pages	316

## PRODUCT SPECIFICATIONS

### DETAILS

- Configured desk models include the base, worksurface and ships ready to assemble
- Component bases include the base frame and ships ready to assemble.  
IMPORTANT: Worksurfaces must be specified separately
- Models with base top ship in two cartons; assembly is required
- Four table base styles:
  - T-leg
  - T-leg L-configuration
  - C-leg
  - Single-column H

### WORKSURFACE

- Table desk worksurface sizes range from a nominal 36" to 72"
- Worksurfaces are available in HPL (high pressure laminate) 1 $\frac{1}{8}$ " T or TFL (thermally fused laminate) 1 $\frac{1}{8}$ " T, and both feature a 3mm vinyl rim
- Grain direction runs left-to-right unless otherwise noted
- Factory installed grommets and cut-outs are available in predetermined locations; upcharge applies. See pages 314-315

### TABLE BASES

- Bases are formed metal with a powder coat finish available in 3 standard finishes, Designer White, Cinder, Platinum Silver
- Optional powder finishes are available at an upcharge
- Bases are standard with 2" diameter black plastic glides with a  $\frac{1}{2}$ " adjustment for unlevel floors
- Castors – Field installed caster kit (set of 4) available; order separately:
  - used only on T-legs base style with rectangular worksurface tops 23"-29"
  - not available on C-base styles
  - low profile black plastic – add 1 $\frac{1}{2}$ " to overall heights
  - weight load for desk is 130 pounds with casters

### HEIGHT ADJUSTABLE TABLE DESK

- Control pad can be moved to right-handed (RH) or left-handed (LH) by the customer
- Height adjustable range (with worksurface):
  - standard height mechanism is 26" to 42 $\frac{1}{4}$ "
  - extended height mechanism is 22 $\frac{1}{2}$ " to 48 $\frac{1}{2}$ "
- Lifting Capacity of base without worksurface:
  - table desks are 265 pounds
  - single column H is 132 pounds
- Adjustment speed is 1.3" per second
- Standard with Up and Down controller
- Two Optional Controller are available; see page 336
- Table desk frame width is expandable in 6" increments
- Standard features:
  - anti-collision
  - overheat protection
  - overload protection

### CORD MANAGEMENT

- Round grommets, racetrack grommets and wire managers are optional on worksurfaces
- Wire managers are available for vertical cable managers, cable carriers and maple cable basket; see page 749
- Refer to page 749 for available grommet/wire manager colors
- Refer to pages 314-315 for complete grommet locations and details

### MONITOR ARMS

Clamp mount monitor arms cannot be used with modesty panel. It is recommended to field install a grommet mount model in a location to clear the modesty.

### CONTROL BOX MECHANISM INFORMATION

- Motor per style:
  - straight line table desk has 1 control box, 2 motors
  - single column H has 1 control box, 1 motor
  - L-configurations desk has 1 control box, 3 motors
- Anti-collision function on control box will engage when a firm obstruction is detected and will stop worksurface travel
- Overheat protection will stop the unit should the motor overheat due to being heavily loaded or if driven continuously. Operation of the desk can resume in approximately 15 minutes
- Overload protection detects if the load is too heavy and will stop the unit. Remove the load and resume use
- Control box includes a 9' power cord with two-prong plug

IMPORTANT: The customer bears the responsibility to verify that the installation of Navyd height adjustable desks complies with all local municipal electrical codes. Some municipalities require the worksurface and base to be sold as an assembly that is listed to UL 962. In these justifications, specify a Navyd configured desk (base sold with a worksurface) model. Navyd height adjustable bases (sold separately) will not bear the ETL mark. Base only models are available for use with specific Navyd worksurfaces (sold separately) which align cut-outs, grommets, and screen brackets with the base understructure.

Navyd height adjustable, base only models can accept other Kimball and National brand worksurfaces in  $\frac{3}{4}$ ",  $\frac{1}{2}$ ", and  $\frac{1}{8}$ " thickness. It is the customer's responsibility to maintain recommended safety clearances to minimize pinch/crush hazards when using other Kimball and National brand worksurfaces.

Field installed grommets and cutouts are recommended where standard locations may interfere with the base understructure. Worksurface size should not exceed the recommended size.

Use of non-Kimball and non-National brand worksurfaces are not recommended and is the sole responsibility of the customer and may void the product warranty.

### DIMENSION KEY

D	Depth
W	Width
H	Height
A	Overhang: Approach Side
KW	Kneespace Width

## PRODUCT PLANNING INFORMATION

### WORKSURFACE CLEARANCE

1" minimum clearance around the sides and back is required when placing height adjustable worksurfaces next to each other to minimize pinch/crush hazards. A clearance of less than  $\frac{3}{16}$ " is acceptable next to a fixed wall or panel where the clearance is maintained through the travel range. Base feet are  $2\frac{3}{16}$ " deep.

### STATIONARY STORAGE PLANNING

Pedestals, overhead storage, or components should not be installed in the path of the height adjustable desks. Underside of desk frame to floor is  $22\frac{3}{16}$ " for standard height and  $18\frac{1}{2}$ " for extended height models with the leveling glide in the lowest position.

### MODESTY PANELS

Modesty panels provide user privacy and conceal electrical components. Modesty panels can extend the full width of the worksurface or be narrower than the surface.

TFL modesty panels are  $\frac{3}{4}$ " thick and are edge banded in the same material and resin modesty panels are  $\frac{1}{4}$ " thick.

When using a narrower modesty panel than the worksurface width, it is recommended to use a center grommet or cut-out, because the left and right locations could sit outside the modesty depending on the width specified.

Modesty panels are not sized to fit 120° curved corner desks or the return side of height adjustable L-configurations. Specify a smaller width, such as 66" wide modesty for a 72" wide worksurface.

To avoid interference, do not place storage, and other objects beneath the desk with modesty panel.

### PRIVACY SCREENS

Textile privacy screens with frame attach to height adjustable desk worksurfaces to provide space division and privacy above and below the worksurface. Privacy screens feature a tackable textile surface (panel textile) with an aluminum frame which is available in all paint colors. Attachment brackets are painted to match the frame. **IMPORTANT:** Privacy screens are prohibited on desks with C-leg bases as they are a tip hazard due to placement of the column being off center.

Privacy screens can be specified to span the full width, or they can be narrower than the desk worksurface. A center cut-out or grommet is recommended on the narrower application to avoid interference with the screen's mounting brackets.

Privacy screens can be mounted with a 1" maximum gap to manage cables and accommodate a clamp-mount monitor arm.

To avoid interference, do not place storage, and other objects beneath the desk with privacy screen.

### CONTROLLERS

Standard up/down switch ships with all height adjustable desk bases. Switch is 2" D x  $2\frac{3}{4}$ " W x  $\frac{3}{4}$ " H. Allows for upper and lower limits to be set to avoid collision with storage elements.

Memory control switch with display screen can be specified separately to replace a standard switch. It operates the same as the standard up/down switch. Memory control switch allows for a low position and a high position to be set to prevent the desk from interfering with obstructions, such as pedestals and overheads.

Programmable control switch with display screen allows up to four preset/saved height settings. Specify separately to replace a standard up/down switch.

All switches can be mounted on the left or right side of the work surface and are field installed.

### BASE AND WORKSURFACE CONFIGURATION

- T-leg bases can be paired or are available configured with rectangular main or 120° curved corner worksurfaces
- T-leg L-configuration bases can be paired or are available configured with:
  - Rectangular main worksurface and a rectangular return (non-handed)
  - Rectangular main worksurface and a rectangular return (non-handed)
  - Extended straight (handed)
  - Extended cove (handed)
- Non-handed L-configuration models can be assembled in the field to accommodate left- or right-handed configurations
- C-leg bases can be paired or are available configured with rectangular worksurfaces only. **IMPORTANT:** C-leg bases are not available with 120° worksurface due to tipping hazard
- Single-column H component bases can be paired with 23" D x 36" W or 23" D x 42" W rectangular main worksurfaces

TOP SHAPE	TOP WIDTH	T-LEG TOP DEPTH	L-CONFIG TOP DEPTH	C-LEG TOP DEPTH	H-LEG TOP DEPTH
Rectangular Main	36" W				23"
	42" W				23"
	48" W	23"/30"		23"/30"	
	54" W	23"/30"		23"/30"	
	60" W	23"/30"	23"/30"	23"/30"	
	66" W	23"/30"	23"/30"	23"/30"	
Rectangular Return	72" W	23"/30"	23"/30"	23"/30"	
	36" W		23"		
	42" W		23"		
120° Curved Corner	48" W		23"		
	83" W	23"/30"			
Extd. Straight/Cove	71" W		23"/30"		

Note: 48" wide returns must be paired with a 23" deep main worksurface for a maximum depth of 72"; cannot be used with a 29" deep main worksurface. L bases support a maximum overall top width and depth of 72", and a minimum width and depth of 60".

## NAVIYD

## PRODUCT SPECIFICATIONS

- Base includes control box, 9' power cord, and standard up/down control switch
- Desk ships ready to assemble with appropriate hardware
- Refer to page 314 for grommet locations and options
- 3mm rim on all sides of worksurface
- U.L. 1286/962 listed
- Grain direction runs with the width of the surface

## TO ORDER, SPECIFY:

1. Model Number
2. Rim Color
3. Grommet/Cutout Option
4. Laminate Color
5. Paint
