Easy Ergonomics

The weight-activated mechanism in O6 seating immediately provides just the right ergonomic support for each user. The additional and minimal adjustability controls enable a precise fine tuning for extended use.

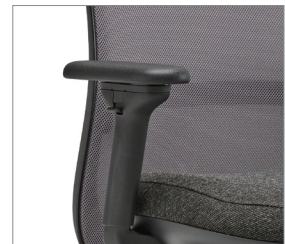

The Spectrum™ mesh offers a versatile palette for specifying an O6 chair that adds vibrancy and style to any setting.

Streamlined and intuitive controls for fine tuning height, depth, and tilt enable ergonomic comfort without complicating the aesthetic.

The optional lumbar support is designed to align with the smooth contours of O6, delivering support and style.

The height-adjustable arms feature pads that move in three directions, accommodating wide-ranging preferences and needs
