

SOFT SEATING COLLECTION

SYMBOL IDENTIFICATION

DURATEK

Lounge seating products with this symbol are produced using OFGO STUDIO’s advanced DURATEK construction.

WHAT IS DURATEK?

DURATEK from OFGO STUDIO is a proven construction method that’s engineered to create a tough, durable frame, resulting in **proven longevity** and superior comfort.

The DURATEK construction method involves utilizing steel as a replacement to traditional hardwood construction.

Steel has the highest strength to weight ratio of any building material, allowing for superior durability. The frame developed for OFGO STUDIO’s DURATEK construction method is inorganic, fire resistant, and **will not rot, split, crack, twist, or warp** over time like a typical hardwood frame would.

Best of all, the DURATEK construction method allows for **true modularity** with easy parts replacement.

Each DURATEK lounge seating product allows for the feet, arms, seat cushion, and back to be attached separately. If a replacement part is required, there is **no need to spend additional resources** on ordering a completely new item; rather, you can simply order a specific part.

The unique modularity of OFGO STUDIO’s DURATEK construction technology offers an optimal solution for high traffic areas, including educational facilities, healthcare facilities, and commercial workplaces.

The DURATEK construction method utilizes 100% recyclable material and is **GREENGUARD Indoor Air Quality certified®** for healthier interiors.
