About Palette

A classic wood media center is always a great option, but sometimes you need a more modern, collaborative space. Russwood has developed the Palette™ line with the same level of quality materials and construction that you have come to expect from our products. You can feel confident in knowing that your learning environment will not only look great, but will also stand the test of time.

The collaborative furniture of the Palette™ line encourages students to work together in a fun and positive way. Tables, shelving, and lounge areas can all be arranged in many different configurations to create the perfect space for school projects and brainstorm sessions.

We provide the palette so that you can be the artist of your learning environment! With the wide range of laminates, edge bands, and fabrics available, the possibilities are endless. Use a spectrum of fun colorful laminates, or make it a refined neutral area with whites, grays, and wood grain laminates.

Specifications

- 1 Table top cores are 1" T particleboard with a .05" thick, horizontal grade high pressure laminate top surface and a balancing backer sheet to finish.
- 2 All edges are 3mm PVC edge band with machine application (Not hand applied). PVC is eased to a 1/8" radius to remove sharp edges.
- 3 Metal legs are 2" in diameter with a durable powder coat finish.
- 4 Leg levelers, adjustable by 1-1/4"
- 5 3" diameter swivel and locking contemporary caster.
- 6 Dry erase marker board laminate tops are an optional add-on for the engage tables.
- 7 All legs are attached to the bottom side of the work surface with bolts that pass through the leg plate and into threaded metal inserts in the work surface core (No screw attachment). This allows for a very strong metal to metal hardware connection.

ENGAGE TABLES

Palette™ tables are designed to allow students and instructors to collaborate in an interactive learning environment. These fun and creative table top shapes can be arranged in a variety of different ways. Whether it's for your classroom, media center, or learning commons area, the Palette™ series tables by Russwood are sure to inspire creativity and student engagement.

Specifications

- 1 Top panels are external (not captured by upright panels) and are constructed of 1" thick veneer core plywood with .05" thick, horizontal grade, High Pressure Laminates. Through bolts will pass through machined holes in the tops and bottoms and into threaded inserts in the upright panels, for a metal to metal hardware connection.
- 2 Shelves and upright panels are constructed of 1" thick veneer cores with .05" thick, horizontal grade, high pressure laminates.
- 3 Mobile shelving includes 5" overall height, swivel and locking casters that are mounted to the bottom panel with through bolts that pass through the caster plate and into threaded T-nuts. This allows for a very strong metal to metal hardware connection.
- 4 Non-mobile shelving includes 4" aluminum post legs that are mounted to the bottom panel with through bolts that bolt into threaded T-nuts in the bottom panel.
- 5 Exposed edges are banded using 3 mm PVC edging. PVC edges are eased to a 1/8" radius to remove sharp edges.
- 6 Optional dry erase marker board add-on. This option is only available for single sided units that are not wall shelving.

Envision Series Shelving

The Envision Series offers a more modern approach to your shelving needs with sleek aluminum legs and contemporary casters. Single sided radius units can be combined with tables and lounge seating to create multipurpose collaborative areas. Dry Erase marker boards can also be added to single sided floor shelving, perfect for study groups and school project areas.

Specifications

- 1 Top panels are internal (captured by upright panels). These panels are constructed of 1" thick veneer cores with .05" thick, horizontal grade, high pressure laminates.
- 2 Shelves and upright panels are constructed of 1" thick veneer cores with .05" thick, horizontal grade, high pressure laminates.
- 3 Mobile shelving uses the Titan Mobile Cart. The Titan Mobile Cart is made from 1/8" welded steel on four (4), 3" heavy duty ball bearing stem casters which are designed to bear the entire load of the shelving unit. All casters and metal parts are hidden by a veneer core laminated toe board.
- 4 Non mobile shelving has a bottom frame constructed of 3/4" thick veneer core panels, with a laminated 4"H toe kick face. Hex head bolts pass through holes in the bottom frame and into threaded inserts in the upright panels, for a metal to metal hardware connection.
- 5 Exposed edges are banded using 3 mm PVC edging. PVC edges are eased to a 1/8" radius to remove sharp edges.
- 6 Top frames are connected to the shelving uprights with metal cleats. Connector bolts pass through holes in the metal cleats and into threaded inserts in the uprights and top panels, for a metal to metal hardware connection.

Inspire Series Shelving

The Inspire Series shelving also offers all of the colorful options, while keeping in line with the standard shelving sizes and starter / adder arrangements that are typical in most media centers. This shelving also features a more concealed mobile option with the Titan Mobile Cart. The precision welded steel of the Titan Cart makes this mobile shelving the strongest in the Industry.
