

Experience the Power— One Pac is all you need

Sustainability & Savings

Every PortionPac product, not just a special line of environmental cleaners, delivers effective cleaning, cost savings and environmentally responsible formulations.

Minimal packaging reduces disposal cost and landfill space. Maximum concentrates save energy. Portion control improves performance and reduces waste.

Standardization

PortionPac helps you standardize and simplify procedures to increase productivity.

Versatile formulations have multiple applications that reduce labor time and aid education, compliance and inventory needs. Solutions are prepared at the worksite.

There is no need to install metering machines or waste time returning to supply closets to refill buckets, bottles or tanks.

Safety

Because PortionPac products are easy to distribute, control and use, they help prevent accidents and save on insurance.

Safety and multilingual use posters, audio/visual aids to facilitate inservice education programs, visible product color identity and permanently screened, color matched bottles help ensure the right product is used for the right application in the right way.

ENERGY

the *right* solution for your cleaning needs

PortionPac is the leading provider of Sustainable Cleaning Systems with a more than 46 year history of teaching how to clean better, safer and with less detergents. Our Sustainable Solutions® for cleaning are built on a foundation of environmentally responsible, maximum concentrate, pre-measured cleaning products. This color-coded system with reusable bottles helps minimize waste, and with our education programs in place, helps you manage safety, promote education and improve morale.

PortionPac has been recognized by the City of Chicago, the State of Illinois and the Chicago Manufacturing Center for our sustainability leadership.
