GENERAL DESCRIPTION

The Air series consists of storage, work surfaces, electrical accessories and a wide range of miscellaneous items. The work surfaces are supported either by surrounding furniture or by floor supports. Certain storage and base units in this series are therefore essential, as they serve to ground the stations.

A wide variety of floor storage units are offered: the base storage (used to support the surfaces), the mid-height storage, the wardrobes and the pedestals. On the base or mid-height storage unit you can place hutches and and/or top cabinets. The hutches can also be wall mounted.

Air offers new styles of work surfaces with a choice of thickness of either 1" or 2". The 2" thick option is available also on the top of all base units except the pedestals.

An innovative addition to this series is the electrical unit that holds electrical

cabling and can support the surfaces. A Nano mini-panel can be attached onto the electrical unit and several of the Air series accessories can be hung from it.

The Air series is comprised of two collections. DECO is presented with curved shapes, while TECHNO offers more linear details. The DECO collection distinguishes itself with streamlined legs, rounded handles, and metal embossed elements with curved patterns similar to the attachments for the privacy screens. The TECHNO collection offers rectangular legs, straight handles, and linear designs on the embossed metal and rectangular brackets for the privacy screens. The DECO collection offers rounded legs and the handles. The DECO legs and handles, in both collections are in a nickel finish. The rectangular legs in the TECHNO collection have a choice of colors: polar white, silver, charcoal or black.

The cushions in both collections have specific stitching design: linear (TECHNO) and curved (DECO).

DECO WORK STATION

TECHNO WORK STATION

WORK SURFACES

The Air series offers a variety of different styles of work surfaces, in thicknesses of 1" and 2". The 1" work surfaces are made of pressed wood and laminated on both sides then finished with a 2.5mm thick PVC edge in assorted colors that match the surface. They can be specified in thermally fused laminate or high pressure laminate (code L1 or S1). The 2" thick work surfaces are made with a lightweight internal structure of honeycomb cardboard that is very sturdy. This is covered with a sheet of particle board on each side then a high pressure laminate surface finished with 2.5mm PVC edging in assorted colors that match the surface (code S2).

The work surface can be floor supported in three ways:

- Resting on a base storage 19" or 25" high with supports
- Resting on an electrical unit with supports
- Attached to the various available legs

All of these supports are ordered separately, depending on their applications. Here are a few examples.

The work surfaces do not have any inserts or pre-drilled holes. The supports can therefore be attached wherever necessary under the surface. An installation guide is available and includes the specification to position different elements under the surface. It is important to include the

number of supports and junction plates required to assure sufficient stability of the furniture. Examples are available on pages 20 to 24.

We recommend that a stiffener (see p. 116) be installed under the 1" thick work surfaces that are longer than 48". The 2" thick work surfaces have sufficient rigidity so the stiffener is not necessary.

SUPPORTS FOR WORKS SURFACES

When placing a work surface on a base storage unit or an electrical unit, the proper support must be used. There are 5 types of supports, 4 for storage and 1 for the electrical unit (see p. 115). All have been designed for a total height under the surface of 28". The 4 base storage supports have to be chosen to work with the height of the storage (19" to 25"), and with the thickness of the storage surface (1" or 2").

These painted steel supports attach to the underside of the work surface and to the top of the storage unit where desired. They are then screwed in place on the inside of the storage unit, which means that no holes will be showing on the surface. Their position can vary laterally on the length as there are no pre-drilled holes or metal inserts under the surfaces. On an electrical unit, the supports attach to it on the inside and can be positioned anywhere on the length of the unit.

LEGS FOR WORK SURFACES

It is necessary to specify the legs for the extremities of the work surface that is not held up by the storage unit. All of these bases are equipped with adjustable leveling glides and can be positioned wherever under the surface as there are not any pre-drilled holes or metal inserts. Wood screws are included with the legs. There are different styles available to you.

The TECHNO double leg

The double leg is equipped with 2 rectangular steel legs, pre-joined (type U). It is available in 21", 24", 30" or 36" depths, either fixed or adjustable in height. Offered in 4 colors: polar white, silver, charcoal or black.

The TECHNO single leg

The single leg is made of a single rectangular leg that is specific to the TECHNO series. Made of tubular steel, it is offered in 4 colors: polar white, silver, charcoal or black.

These two types of TECHNO legs are also available in adjustable versions where the heights can range from 25" to 31" under the surface (in increments of 1"), helpful, for example, to individuals with limited mobility. Offered in 4 colors: polar white, silver, charcoal or black.

The DECO single leg

The single leg has a diameter of 2 1/2" narrowing down to 1 1/4" and comes with leveling glides. Offered in a nickel finish.

*The additional support plate is included with the DECO leg when the 2" work surface is ordered.

The Telescopic leg

The leg consists of 2 telescopic tubes (4" diam.) and a circular base of 18" in diameter. This leg has a height adjustment from 27" to 30", and is offered in 4 colors: polar white, silver, charcoal or black. This leg can be used with both TECHNO or DECO series. NOT designed to solely support a surface.

The supports that are installed on the storage unit that is 1" thick, are made to be 1 1/16" to accommodate the thicker high pressure surface. A self-sticking strip is installed inside the 1" thick support and must be removed when using the high pressure laminate.

The Adjustable Supports

The 5 types of supports for the work surface are also available in the adjustable version. There are 4 types of adjustable supports available for the base storage units and 1 adjustable support for the electrical unit. In

all of the cases these supports allow for an adjustment height of +1" or -1" in relation to the height of a regular support. They are available in 4 colors: polar white, silver, charcoal or black.

STORAGE – GENERAL INFORMATION

There are different types of storage units in the Air series: base units, (low and mid-height units and wardrobes), pedestals along with top cabinets and hutches.

The storage units are made of an $\frac{11}{16}$ " thick laminate panel consequently the surface (with the exception of the pedestals, top cabinets and hutches) can be specified with a 1" thick surface (T.F.L.: code L1 or HPL: code S1) or 2" (HPL: code S2). In all cases, each panel is finished with 2.5mm PVC edging (2mm for the 2") in an assortment of colors that matches the surface.

The wood grain is in the vertical position on the storage units (unless otherwise specified).

The 4"H. metal legs are installed under the storage units depending on the collection selected and can be replaced with a full base. The handles vary depending on the collection.

Certain fronts can be specified in embossed metal or in a different laminate color; colors available (see p. 16). Refer to the description of the product.

Base Storage Units

- Available heights: 19" and 25"

- Types of fronts: Drawers, hinged doors or sliding doors
- Open or combination
- Allows surface support on both sides
- 1" or 2" top
- Offered with shared access (access on both sides)
- Option of full laminate base
- Maximum width of 72"
- Can be used with cushions (see p. 12).

Mid-height Storage

- Height available: 34" and 40"
- Types of fronts: Drawers, hinged doors or sliding doors
- Open or combination
- 1" or 2" top
- Option of full laminate base
- Maximum width 36"

• 40" and 50"H. Multi-functional Pedestal

Lateral opening pedestal permits access to 2 file drawers (letter format) 20" wide. A shelf and an accessory bar (21" long) are also included. The drawer pulls out on 3 drawer slides and one supporting caster. The 50" H. pedestal has an opening above the drawer.

Available in a left or right version with a full laminate base (adjustable levelers).

Combination Wardrobes

- Available heights: 50" and 66"

- Types of fronts: Drawers, hinged doors and open or closed wardrobes
- Open or combination
- 1" or 2" top
- Option of full laminate base
- Maximum width 24" (except 39" double wardrobe)

*A 50"H or 66"H wardrobe ordered with a 2" thick surface has in reality a total height of 52" or 68" (see chart below).

Storage Unit Height Chart

Height of storage unit	19"		25"		34"		40"		50"		66"	
Thickness of surface	1"	2"	1"	2"	1"	2"	1"	2"	1"	2"	1"	2"
ACTUAL overall height	19"	20"	25"	26"	34"	35"	40"	41"	50"	52"	66"	68"

NOKI Lock

All of the storage units (with the exception of the open storage and the storage with sliding door(s)) are manufactured with an electronic NOKI lock (battery powered), exclusive to Artopex.

STORAGE – GENERAL INFORMATION

Pedestals

Surface-supporting :

- Height 28"
- Depth 18" or 24"

Mobile pedestal :

- Height 22" or 27"
- Depth 18"

- Types of fronts: Drawers, hinged door (recycling pedestal)
- Open (surface-supporting) or combination
- $1\frac{1}{16}$ " top (mobile pedestal)
- Option of full laminate base (surface-supporting)
- Can be used with a cushion (mobile pedestal), see p.12.

• Recycling Pedestal

The recycling pedestal is equipped with a utility drawer and a space for recycling which includes a removable bin. The bin is also sold separately and can be installed in any 12" drawers.

Top Cabinets

- Height 24", 30", 40" and 45"
- Depth 14"
- Types of fronts: Hinged or sliding doors
- Open or combination
- Also available with shared access (access on 2 sides)
- Maximum width 36"

Hutches

- Height 16"
- Depth 14"
- Types of fronts: Hinged or sliding doors
- Open or combination
- Can be installed in a surface supported position or wall mounted
- Surface supported hutch also available with shared access (access on 2 sides)
- Maximum width 72"

Bookcase

- Height 40", 50" et 66".
- Depth 14"
- Top of 1" or 2"
- Adjustable shelves
- Maximum width of 36"

Handles

All of the storage units (except the open units) are equipped with pulls designed to match the series selected.

• DECO

The DECO handle has a curved design, with a nickel finish.

• TECHNO

The TECHNO handle has a linear design, with a nickel finish.

Storage Bases (legs)

The metal legs are installed under the storage units depending on the series selected. All of the storage units can be specified with a full laminate base which replaces the legs, without additional charge.

DECO legs

TECHNO legs

Full laminate base (FB)

• DECO Style Leg

The DECO leg consists of a rounded profile leg, with a nickel finish and a leveler ($\frac{3}{4}$ " in diameter) equipped with a rubber base.

• TECHNO Style Leg

The TECHNO leg consists of a double leg (front/back) in tubular steel (rectangular shape) with levelers ($1\frac{1}{2}$ " adjustment) equipped with a nylon base. The finish on this leg matches the finish selected for the NOKI lock. For the open storage units (without NOKI trim), the color has to be specified.

• Optional Laminate Base

This base is equipped with levelers ($1\frac{1}{2}$ " adjustment) in assorted finishes matching the color of the unit.

Shared Access Storage Units

Certain units have dedicated access to the user on either side of the storage unit. This can be found on certain base units, top cabinets and hutches. In all of the cases, the models offered are symmetrical (same type of front on both sides).

STORAGE - GENERAL INFORMATION

C.O.M. orders

It's possible to order Artopex products that can be specified with fabric supplied by the client (C.O.M. order). The base price for C.O.M. orders is equivalent to an Artopex Grade 1 or 2 fabric depending on the product, refer to the price list. The price listed in the second column of the price list (COM/Gr.2), to which the chosen options are added.

The C.O.M. orders must clearly indicate the color, pattern, width of the fabric as well as the manufacturer or distributor using. A form can be obtained from Customer Service for this purpose.

Upon request by Customer Service, a 12"x12" (305 x 305mm) fabric sample must be sent pre-paid to Artopex Customer Service for fabric approval: ARTOPEX, 800 Vadnais, Granby, Qc, Canada, J2J 1A7.

Once the sample and the order are approved, Customer Service will confirm the instructions for shipping the fabric to our plant.

For C.O.M. orders, the order's delivery date is set once the fabric is received by Artopex. Artopex is not responsible for the quality and durability of any fabric not offered on our standard card.

Cushions for Storage Units

It is possible to order cushions that can be installed on the base storage units and the mobile pedestals. DECO and TECHNO each offer a distinct stitching option that can be specified (see below). Refer to the Artopex seating fabric chart for fabric selection.

Cushion with DECO stitching (STD)

Cushion with TECHNO stitching (STT)

Lower Drawer Front

The lower 12" drawer front (at bottom) can be specified either in a different laminate color than the other fronts or in embossed metal with DECO motif (curved) or TECHNO (linear). There is an upcharge for the metal option which is also available for the sliding doors.

Drawer front with DECO embossed metal

Drawer front with TECHNO embossed metal

Drawer Slides

The drawer slides on the storage units are equipped with a progressive slide comprised of ball bearings with a total extension of 16". The load capacity for the 6" and 12" drawers is 100 lbs. All the drawer slides meet BIFMA standards.

Pencil Tray

The storage units with a 6" drawer are equipped with a pencil tray.

Shelves (storage units)

The storage units equipped with shelves have pre-drilled holes so the shelves can be adjusted to different heights. The shelves are 1" thick laminate and are the same color as the storage case. It is possible to order extra shelves (see p.134) on certain units, refer to the product description for more details.

Assembly

The majority of the storage units are delivered assembled (except the sliding doors, the 4" legs and the handles). The assembled products are identified with the  symbol.

Orientation of the Fabric

Nano panel fabrics are all installed in a specific direction. Unless otherwise specified, the fabric is installed with the height of the panel (see drawing). The fabric on panels that are 66" or 72" wide must be RAILROADED at 90°. To keep a consistency with the fabric it is, therefore, recommended to specify that all other panels are manufactured in the same direction. In replacement of the fabric code, write the suffix RRT, followed by the fabric grade number and the name of the fabric with the mention "oriented at 90°".

Codification example :

Standard fabric
AL-P2754-5-0-MD99

Fabric oriented at 90°
AL-P2754-5-0-RR2
fabric MD99oriented 90°

ACCESSORIES AND ATTACHABLE COMPONENTS

Modesty panel and privacy screen

The modesty panel is positioned under the work surface and is available in laminate, metal or acrylic. This panel is 12" high and must always be ordered with a minimum of 6" less than the length of the surface on which it is installed. Note that all of the panels are actually 3/4" less than the length indicated in the price list to allow adjustments.

The privacy screen is positioned above the work surface and is available in metal or acrylic. Whether it is installed on a 1" or 2" thick surface the screen allows for a 1 1/4" gap between the screen and the surface for electrical wiring if needed. The privacy screen is 10" or 24" high (11" above the surface and 12" below) and can be ordered in lengths of 24" to 72" long in increments of 6". Note that all of the panels are actually 3/4" less than the length indicated in the price list to allow for adjustments.

The brackets for the privacy screens are always attached under the work surface and are included with the screen. These painted steel brackets are shaped to match the style of the collection ordered: DECO, rounded form or TECHNO, rectangular form. The modesty panels attached under the surface have a rectangular bracket. As there are no pre-drilled holes under the surface, the modesties can be positioned flush or recessed under the surface.

DECO screen

TECHNO screen

Concerning the metal privacy and modesties screens, they are similar in design to the other embossed components in the 2 collections. The metal panels in the DECO collection are designed in a curved pattern, whereas the TECHNO is designed in a linear pattern.

ACCESSORIES AND ATTACHABLE COMPONENTS

Nano Screens

A modified Nano panel was designed to be installed on the electrical units. This screen is available in heights of 42" and 50" from the floor, and can be equipped with accessory bars to attach accessories. It is available in lengths from 24" to 72" in increments of 6", depending on the lengths of the electrical units. Different configurations are available; see the product description for more detail. It is possible to attach standard Nano panels to the extremities of these panel.

For more privacy between workplaces, a panel can be installed under the Nano Panel. The semi-opaque panel is a charcoal color and it's flexibility makes it easy to get to the electrical outlets..

Single or Double Accessory Bar

An accessory bar equipped with supports can be installed onto a surface. This bar can also be ordered separately, without brackets, and installed on the inside of a privacy screen of the same length. The accessory bar is offered in 4 colors: polar white, charcoal, black and silver.

Keyboard Tray

To order a keyboard tray please consult the accessory price list.

Divider Screens

The divider screens can be installed on a work surface to act as work station separators. The panels are available in a laminate finish (TFL) or tackboard (rubbery compound), and are attached to a metal bracket offered in several colors (see p.17, Metal 10 column). The bracket is inserted onto the surface and grips the edge. It can be screwed in place or not so as to be movable.

It is important to specify the size of the opening of the bracket so it fits on a 1" or 2" surface and sits securely. The metal supports that install on the 1" surface have a 1 1/16" opening in case high pressure laminate is ordered. A self-sticking tape is always installed on the inside of the bracket and must be removed when installing on high pressure surfaces.

Tackboard

Some tackboards are designed to be installed on the backs of the top cabinets and mid-height (40") storage units. They match the height and the width of these units. The tackboards are attached with strips of Velcro. They are fabric covered (see current Artopex panel fabric charts)

Grommet

- A set of oval grommet kit is available for surfaces of 2" thick.

ELECTRICAL UNIT

The electrical unit is composed of a thermally fused laminate casing equipped with a metal door giving access to the outlets inside (sold separately). Available in lengths from 24" to 72" (increments of 6"), its height is 23" and its width is 8 1/2".

The unit can support one or more work surfaces on each side and/or act as a receptacle for electrical cabling or communication. Equipped with interior brackets used to attach a distribution harness (ordered separately), the electrical unit can hold up to 4 duplexes, depending on the unit's length. It can also be used for the 4 circuit system as well as the 1 circuit system (see next page).

Grommets are located on either side and underneath the unit, along with a shared access door on the top, makes wiring easy and gives you access to the hidden outlets.

In order to support the work surface, the electrical unit requires the positioning of specific supports (see p.115). It is also possible to install a Nano type mini-panel separator on top of the electrical unit (see p.121 to 123). The color of the grommet is made to match as best as possible the color of the unit (white color: white grommet, frost color: frost grommet, other colors: charcoal grommet). The metal door is available in 4 colors (see p.17, Metal 6 column).

Opening to allow for wiring

Pivoting door on 2 axes

ELECTRICITY

Two types of electrical systems are offered in the Air series: a 4 circuit system and a 1 circuit system.

4 Circuit Electrical System

Identical to the one used with the Uni-T series media panels, it consists of a harness, one (or more) duplex, an interconnector cable to connect the harnesses together along with the different cables for the power feed. The 4 circuit system must absolutely be installed inside the electrical unit.

This system can be fed either by the floor, the wall or ceiling access (with a power pole). Openings in the electrical unit allows for these types of access. To add more access, it is possible to order the grommet, separately, to be installed on-site where desired, see the price list accessory.

The metal jumper caps are available to camouflage the wiring that is visible in the 90° or 180° configurations.

ELECTRICITY

1 Circuit Electrical System

Composed of two types of surface outlets (built-in and movable), jumpers and a power feed module, the 1 circuit electrical system has everything needed for straightforward installation and an electrician is not needed. The power feed module has a standard 120V plug that inserts into a wall or floor outlet. A maximum of 8 surface outlets (16 individual plug-in outlets) can be attached to this system.

The built-in surface outlet cannot be specified separately, this is offered as an option exclusively for the rectangular work surfaces (factory installed), see p.105. The movable surface outlet is sold separately and does not require any attaching. Refer to the product description for more details and to the accessory price list.

It is recommended to use the 1 circuit electrical system and position it on the inside of the electrical unit in order to hide the wiring. This system can be used without an electrical unit, the user must therefore attach it to the underside of the surface.

Choice of electrical outlet
movable or built-in*
(*The built-in outlet is an option offered
on the rectangular work surfaces ONLY)

*The built-in surface outlet cannot be ordered separately.
Sold ONLY with a rectangular work surface using the EC option (in central position).

COLORS FOR THE STORAGE UNITS

Here are the codes to use in the specific codification fields of the price list that refer to the colors. The text at the bottom of each page always refer to this list.

CODIFICATION

• The Codification

Located under each product code is the code "specifier" that explains what information needs to be inserted to complete the order. The code specifier includes a section where you must complete all of the information (series, product code, colors, etc.). For certain products, an "option" zone gives the opportunity to add on extra items. The chart below supplies information of the list requirements that may show up in the code specifier. All of the fields referring to colors can be found on p.16 & 17.

REQUIRED Fields :

- 1 Series**
Identify your choice of Air series, 2 choices available: AD (DECO) or AT (TECHNO). Information on these series is available on page 11.
- 2 Product Code**
Identify the product code selected. The code is comprised of numbers/letters describing the product (identification, dimensions).
- 3 L1/S1/S2**
For products with a top surface, offered in a selection of colors and thicknesses, specify thermally fused 1" (L1), high pressure 1" (S1) or high pressure 2" (S2).
- 4 Laminate**
Identify the color of the work surface (or other components). Choices available in either thermally fused laminate or high pressure laminate (work surfaces). The edge band is in a variety of colors that will match the surface color selected in this field. Refer to [page 17](#) for more details and to the "Nature" laminate chart to see the colors available.
- 5 Top**
Identify the color of the surface of the unit. Choices available in either thermally fused laminate or high pressure laminate, the edge band is in a variety of colors that will match the surface color selected in this field. Refer to page 16 for more details and to the "Nature" laminate chart to see the colors available.
- 6 Case**
Identify the color for the case of the unit (storage). Choice available only in thermally fused laminate. Refer to page 16 for more details and to the "Nature" laminate chart to see the colors available.
- 7 Drawer**
Identify the color of the front of the drawer(s). Certain storage units offer different colors for the drawer fronts (ex: Drawer A). Choices available in thermally fused laminate or metal (on certain units). Refer to page 16 for more details, to the "Nature" laminate chart to see the laminate colors available and the Metal color charts for the metal colors offered.
- 8 Door**
Identify the color for the sliding door(s). Choices available in thermally fused laminate, metal or acrylic (on certain units). Refer to page 16 for more details, to the "Nature" laminate chart to see the laminate colors available and the Metal color charts for the metal colors offered.
- 9 Trim**
Identify the color of the NOKI trim. The choice selected will also define the color of the legs in the TECHNO series. Refer to page 16 for more details and the Metal color charts for the metal colors offered.

REQUIRED Fields :

- 10 Metal**
Identify the color for the metal component. Refer to page 17 for more details and the Metal color charts for the metal colors offered.
- 11 Bracket**
Identify the color for the metal bracket on screens. Refer to page 17 for more details and the Metal color charts for the metal colors offered.
- 12 Fabric**
Identify the choice of fabric (tackboard and cushion) offered in different grades. Refer to the Artopex Seating or Panel fabric color charts to see the spectrum of fabrics available.
- 13 Sect. 42 (Nano panel)**
Identify the color of the Nano panel for electrical unit. These sections can be specified in thermally fused laminate, panel fabric, acrylic, markerboard or tackboard. Refer to page 17 for more details, to the "Nature" laminate chart to see the laminate colors available and the Panel Fabric color charts for the fabric colors offered.
- 14 Panel**
Identify the color for the modesty panel or the privacy screen. Refer to page 17 for more details, to the "Nature" laminate chart to see the laminate colors available and the Metal color charts for the metal colors offered.
- 15 AT Leg**
Identify the color of the metal leg for the TECHNO series storage units when this unit does not have a NOKI trim. Refer to page 17 for more details and the Metal color charts for the metal colors offered.

Fields to identify AS OPTION:

- 16 BASE option**
If desired, identify the replacement base for the storage unit when requesting a full laminate base using (code FB). This will be the same color as the one selected for "Case".
- 17 BUILT-IN OUTLET Option**
If desired, identify the addition of a surface electrical outlet (rectangular surfaces only, code EC). Details found on pages 15 & 99.

CODIFICATION EXAMPLES

- Combination Credenza 25" H.
- TECHNO Series
- 1" L.P.L. top, Moka color
- Case : Moka
- Drawer A : Moka
- Drawer B : White
- Noki trim : Polar White
- Full base option

Series Product Code L1 / S1 / S2 Top Case Drawer A Drawer B Trim Base
 AT - 25BFO1860 - L1 - PM - PM - PM - BW - 3002 - FB

Order codification : AT - 25BFO1860 - L1 - PM - PM - PM - BW - 3002 - FB

- Combination Storage, 50" H.
- DECO series
- 2" H.P.L. top, Chestnut color
- Case : Chestnut
- Door/Drawer A : White
- Drawer B : Silver (metal)
- Noki trim : Silver

Series Product Code L1 / S1 / S2 Top Case Door Drawer A Drawer B Trim Base
 AD - 50COUF1824 - S2 - CG - CG - BW - 3090 - 3090 -

Order codification : AD - 50COUF1824 - S2 - CG - CG - BW - 3090 - 3090

- Open Storage, 40" H.
- TECHNO series
- 1" laminate top, Maritime Maple color
- Case : Maritime Maple
- AT leg : Polar White

Series Product Code L1 / S1 / S2 Top Case AT Leg Base
 AT - 40O1830 - L1 - EM - EM - 3002 -

Order codification : AT - 40O1830 - L1 - EM - EM - 3002

- Top cabinet with 1 sliding door, 30" H.
- TECHNO series
- Case : Tigerwood
- Door : Frosted acrylic

Series Product Code Case Door
 AT - HTCOS3030 - TW - Gi

Order codification : AT - HTCOS3030 - TW - Gi

- Rectangular work surface 30"x 60"
- 1" laminate surface, Douglas Pine color
- Built-in surface outlet option

Product Code L1 / S1 / S2 Laminate Surface Outlet
 AL - SSi3060 - L1 - DP - EC

Order codification : AL - SSi3060 - L1 - DP - EC

- Privacy panel 10"H. x 48"
- DECO series
- Panel color : Silver
- Bracket color : Polar White

Series Product Code Panel Bracket
 AD - PPOVM1048 - 3090 - 3002

Order codification : AD - PPOVM1048 - 3090 - 3002

AL - -

Product Code: Specify the code identifying the product, consult the list above.

Case: Specify the color of the case: Sides, back and top (Case finish), see p.16.

work surfaces

price list

rectangular

Description

Rectangular work surface. Assorted matching finishes for edges and surfaces.

It is recommended to install a stiffener on 1" surfaces 48" and longer, see p.116.

It is possible to add a central (option EC) built-in multi outlet module (1 circuit), factory installed, see p.15.

Electrical connections sold separately, see p.113.

Grommets can be ordered separately and installed in desired position on-site (diameter 2¾"), see p.126.

« annex » surface

Description

"Annex" surface, can be added to the "Cockpit", "D" or Extended Rounded Corner surface or in a cluster of 3 surfaces.

Installs with 2 legs if attached to an adjoining surface (+ 2 junction plates). When joining 3 "Annex" surfaces together, 4 legs are enough (+6 junction plates).

Due to its small size, it is not recommended to use the work surface on its own with 4 legs.

Assorted matching finishes for edges and surfaces.

legs and support

price list

bases

Description

LE2T : Fixed double leg - 1" x 3" tube, levellers included (TECHNO series).

LA2T : Adjustable double leg - 1" x 3" tube, manual adjustment from 25" to 31" under the surface, levellers included (TECHNO series).

LE1T : Fixed single leg - 1" x 3" tube, levellers included (TECHNO series), to be used with electrical unit or base storage unit.

LA1T : Adjustable single leg - 1" x 3" tube, adjustment from 26" to 32" under the surface, levellers included (TECHNO series).

To be used with an adjustable support, see p.115.

LE1D : DECO single leg, levellers included, nickel finish.

*It is recommended to specify the conical DECO leg (2") if it is used with a 2" thick surface, a reinforcement plate would also be included.

LETEL : Telescopic leg (diam. 4") with 18" diameter circular base, height adjustable from 27" to 30" under the surface. Base to be assembled to the leg.

Wooden screws included with all the legs.

stiffener, junction plates and surface brace

▲ Description - Stiffener

Suggested for work surfaces (with 1" thickness) of 48" and longer.

The stiffener measures 8" less than the length of the surface that it is being installed upon.

Charcoal color.

Description - Junction Plate

Junction plates used to join 2 surfaces side-to-side. Pack of 2, black color.

Description - Surface Brace

The Surface Brace (metal) adds rigidity to a surface + electrical unit assembly when positioned in a perpendicular configuration with no other support.

Available in 4 colors.

electrical unit – electricity

price list

stiffener, junction plates and surface brace

■ Description - Electrical Unit

Unit designed to allow for electrical and communication cabling.

Access to the outlets via the top door. This door pivots both ways (for access on both sides) and can be removed by lifting it.

Access to the wiring from the ends or the bottom. A power feed pole is also available.

Can hold work surfaces equipped with supports type SEU (see p. 115) on both sides of the unit.

Can hold the NANO privacy screen for electrical unit (see p.121 to 124). The electrical components are sold separately (see p.118 to 120).

Description - Junction Brackets for Electrical Unit

Used to join a low storage (19" or 25"H.) and the electrical unit when the storage unit is supporting the surface (see "B" example below).

Sold in pairs, wood screws included.

Description - Jumper Cap

Metal cap used to hide cabling running between 2 or more electrical units placed in a 90° or 180° position.

Available in 4 colors.

electrical components – 4 circuit system

Description - 4 Circuit System (details and features see p.14)

Harness

Electrical Unit harnesses from 24" to 72" in length (24" : 1 duplex / 30" and 36" : 2 duplexes / 42" to 72" : 4 duplexes).

Requires jumpers to link adjacent Electrical Units.

1 jumper entry at each end of the harness. For 2 entries use the iE-Y coupling (see next page).

Jumper Interconnector

Carries power between two Electrical Units when jumping a third Electrical Unit (without harness) placed in between them.

The iE-i coupling (female-female) must be used to connect 2 jumpers (male-male) end-to-end.

1 jumper entry at each end of the harness. For 2 entries use the iE-Y coupling (see next page).

*The conduit panel jumper iE-H12 is used in a configuration of 90° ("L" or "T").

In-Line Interconnector

Carries power between two Electrical Units when placed side-by-side (in line).

price list

electrical components – 4 circuit system

Description - 4 Circuit System (details and features see p.14)

Power Connectors

"I" coupling to connect 2 jumpers end-to-end.

"Y" coupling connects a single harness to 2 jumpers.

Duplex

Attaches to a power feed in the cable channel and gives access to one of the circuits.

Duplexes 1, 2 and 3 give access to general use circuits.

Duplex 4 is used for an isolated circuit.

E2-USB outlet gives access to 2 USB rechargeable outlets

Bracket for Communication Outlet

Metal support used to hold several communication outlets.

Installs on or under the electrical unit harness with double-faced tape (see illustration at right).

Black finish.

The communication outlet and its components are not included but are available at your local distributor.

Ceiling Connectors (AC-EC15 & AC-EC18)

The ceiling connector is a shielded flexible cable.

The AC-EC15 connector must be installed by a certified electrician in accordance with local building codes.

Connects at the end of a harness.

The AC-EC18 connector can be attached to the power feed connector during re-organization by the user.

Ceiling Power Feed (E2-ECWD)

Ceiling power feed iE-EC18 allows easy connection/disconnection inside of a junction box.

The electrical box (not included) can be installed to the wall (at a height of 20" approx.) or to the ceiling, close to the outside of the power pole.

Has to be installed by a certified electrician according to local building codes. Afterwards, it is possible to connect it to the ceiling power feed AC-EC18.

Product Code: Specify the code identifying the product, consult the list above.

Laminate : Specify shelf color (Laminate 1 finish), see p.17.

Prices and Payment

All prices shown in this price list are suggested retail prices and are subject to change without notice. Prices do not include installation and shipping costs. Taxes are extra. These prices are guaranteed for 30 days from the date of quotation and are firm and final after acceptance of the order. Orders are invoiced at the time of shipment. Terms of payment are net 30 days from date of invoice. Any products sold by Artopex shall remain its property until fully paid in cash. In the event that the purchaser defaults in the payment of any sum due to Artopex, or in the event the purchaser's financial condition becomes unsatisfactory to Artopex, Artopex reserves the right upon notice to the purchaser, to differ or discontinue shipment of any goods or, to refuse any order until time as the default is corrected or the purchaser provides assurance of payment to Artopex.

Orders

Artopex requires that all orders be submitted in writing to avoid errors and/or duplication. The purchaser is responsible to submit complete orders. Incomplete or incorrect orders (finish colors missing...) will be processed upon reception of the complete information and normal production lead-time will be applied from the date that the complete information is received.

Acknowledgments

Orders will be acknowledged with Artopex acknowledgement forms governing the transaction. The details appearing on this acknowledgment will describe the items to be shipped to the purchaser and the ready to ship date (not the actual shipping date). It is the purchaser's responsibility to verify that the acknowledgment information is correct. If not, the purchaser must notify Artopex within 48 hours in writing. Failure to provide corrections within 48 hours could be subject to extra charges (see Changes and Cancellation).

Changes and Cancellations

Order cancellations or changes are subject to acceptance by Artopex. Special order items and fabric-covered items (standard or C.O.M. fabrics) already in production are not subject to change or cancellation under any circumstances.

- A) Changes: Standard product already in production will be subject to a 25% modification surcharge. Changes to the shipping date must be taken into consideration.
- B) Cancellations: Artopex reserves the right to invoice the purchaser for any items already in production at the cancellation date and for lost profit on the remaining items.

Storage

Artopex reserves the right to invoice the purchaser for storage charges in specific cases.

Shipping

- A) Prices are F.O.B. factory, collect.
- B) Artopex will choose the carrier unless otherwise specified by the purchaser. Goods will be handed over to the common carrier in good condition; Artopex liability ceases at this point. Shipping will be done at the purchaser's unloading dock. The purchaser should have an unloading dock able to accommodate 53' trailers and must supply the unloading personnel.
- C) Claims: Artopex is not responsible for damage that occurs in transit or in storage. It is the purchaser's responsibility to examine goods upon receipt and to file any claims with the carrier. Failure to provide an adequate description of the lost items or damages to the carrier could result in the carrier refusal to honor the charges. It is the purchaser's responsibility to obtain information on the carrier's claim policies and to send any claims to the carrier. For other policies, contact Customer Service.
- D) It is the purchaser's responsibility to file any claims even if the order has been shipped directly to the client.

Return of Goods

- A) No merchandise may be returned without Artopex written consent and shipping instructions. If this procedure is not followed, the merchandise will not be accepted by the factory and will be reshipped collect without further notice.
- B) Goods must be returned properly packaged and all boxes must be clearly marked with the authorization number.
- C) Returns of items authorized by Artopex are subject to a charge of 25% plus freight (and customs, if applicable) and repair costs.

Product Specifications

Artopex reserves the right to modify the specifications of products, materials, design or accessories without notice.

Artopex also reserves the right to cease production of any product at any time. The products, accessories, materials and finishes as described in the price list prevail over the content of brochures or flyers. The weights and volumes shown on the price lists include packaging and are approximations.

Noki Lock

Mechanism and parts under warranty for 5 years, and 1 year warranty on labor.

Artopex Lifetime Warranty

Artopex warrants its products are free of defects in design, material and workmanship for as long as the original purchaser owns them.

If written notice of the defect is given to Artopex within the applicable warranty period, Artopex will repair or replace with comparable product, at Artopex's choice, without charge to the original purchaser, any part or product shipped after July 1st, 2001, which fails under normal use as a result of such defect.

This warranty provides limits on the following products :

- electrical components, which are warranted for (10) ten years from date of delivery,
- seating mechanisms, which are warranted for (5) five years of single shift usage from date of delivery,
- Artopex fabrics which are warranted for (5) five years from date of delivery,
- moving and high wear parts such as covering materials/finishes, arm rests, chair bases, foam, wood framed seating products, stacking chairs, glides, slides, casters, user-adjustable worksurface mechanisms, which are warranted for (5) five years of single shift usage from date of delivery,
- non-standard specials, which are warranted for (1) one year from date of delivery.

This warranty does not extend to :

- Customer's Own Material (C.O.M.) or finishes applied to Artopex products,
- ballast and light bulbs,
- products that have been modified or have not been installed or used according to Artopex application and installation guidelines.

On products warranted for a specified number of years of single shift usage, the warranty period will be reduced in a pro-rata manner when the products are used in a manner that exceeds the equivalent of a single shift forty (40) hour work week.

This warranty is the Customer's sole recourse for product defect. This warranty does not cover damage by a carrier in transit. Artopex makes no warranties, including the implied warranties of market value or utility for a particular purpose, other than the express warranties contained herein. There are no other warranties expressed or implied. Artopex shall not be liable for consequential or incidental damages arising from any product defect.
