WHY US? What is Rotationally Molded Vinyl?

Skin	Flexible Polyvinyl Chloride covering is rotationally molded for uniform thickness and strength. No frames, no springs, no seams, no exposed edges and no hard surfaces. Choose from two vinyl grades, 200 mils or 250 mils thickness. Leather texture offers a pleasing appearance and greater comfort. Vinyl covering is seamless, impervious to liquids, stain-resistant, and easily cleaned. Pigmented color is homogeneous throughout the covering thickness making it easy to repair and maintain.
Core	Two part, high-resiliency polyurethane foam offers maximum seating comfort. Pressure molded into one-piece, the foam is dispensed into the interior of the seamless vinyl covering bonding to the vinyl as it cures. Furniture is flame retardant, self-extinguishing and meet State of California Technical Bulletin 133 flammability test requirements.
Where used	450 Series Secluion, 520 Series ModuForm, 528 Series ModuForm, 800 Series ModuBlock, 810 Series ModuEsque, 3000 Series ModuSeat Beam
Springs	None
Seams	None
Base	Rigid pedestal base is fully molded and sealed to the underside to prevent intrusion of liquids. 3/16" corner risers implanted in base to avoid fluid entrapment. Base shall be gasketed and/or inset into underside to form a leak-proof seal, which prevents passage of liquids to the core area.
Chemical Resistance	Chlorine solution, acetone, blood, urine, feces, wine, whiskey, beer, vinegar, salt solution
Cleaning	Vinyl is easily cleaned with damp cloth and mild detergent. Steam cleaning does not harm the product. Can be sanitized with bleach-based cleaners to aid in the control of infections and blood borne pathogens.

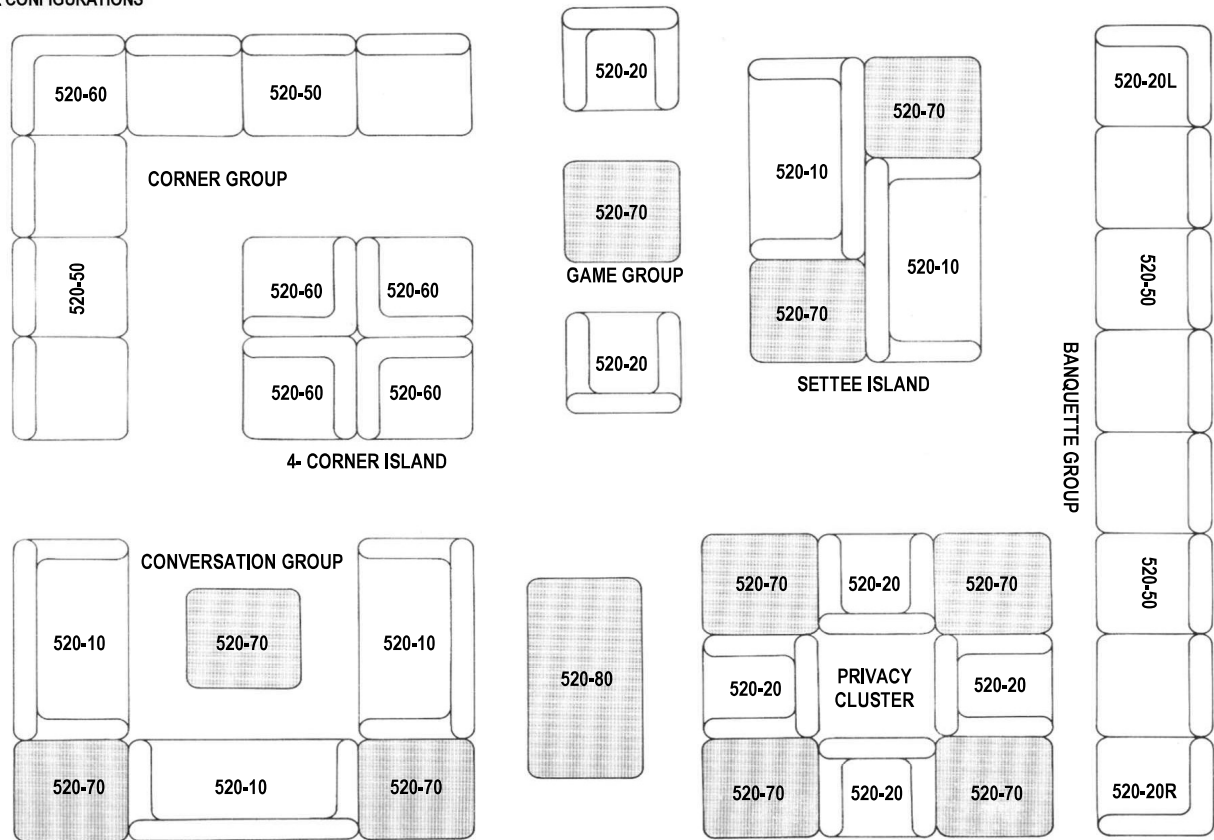

ModuForm's rotational molding process uses molds that are secured to "platforms" that are connected to "arms". Large ovens are utilized to cure a specially formulated pigmented polyvinyl material that is dispensed into the mold. The "arm" performs a constant rotational and tumbling motion so that the PVC compound evenly coats the mold's inner walls.

This calculated program creates seamless furniture and cushion "skins" that are uniform in thickness for durability and comfort. Once the skin is removed from its mold, our unique two-part foam material is dispensed into the skin creating a durable, long-lasting and comfortable seating solution.

MODULAR CONFIGURATIONS

MODUFORM 520 & 528 LOUNGE SEATING OVERVIEW

Standard Features:

Cover: One-Piece, Sealed, and Seamless for Safety and Security
Rotationally Molded Polyvinyl Chloride with Stabilizers
Vinyl Skin is Up To 10X Thicker Than Textiles
No Seams, Springs, or Other Components that can Break Down or Become Detached
Pigmented Color is Homogeneous Throughout Rather Than Just Skin Surface
Clean with Mild Detergents, Steam, or Other Bleach-Based Agents
Vinyl Available in Two Thicknesses: 200mils (Grade 7) or 250mils (Grade 9)
Ships Fully Assembled

Colors:	210	Sky	504	Emerald
	215	Plum	570	Olive
	220	Leaf	702	Terracotta
	225	Splash	704	Cocoa
