Dr. Lachel Story  
Dean, College of Nursing & Health Professions  
University of Southern Mississippi

To Dr. Story,

Touch of Life Technologies, Inc. (Toltech) is the creator and developer of the VH Dissector Table – Presenter 65 and VH Dissector software. Unique features of these products include:

1. High-resolution 4K display with a capacitive touch interface providing exceptional clarity along with precise and reliable touch interactions.
2. A full 3D and cross-sectional atlas providing labeled and interactive 3D and multi-planar cross-sectional views that can be freely manipulated into any orientation in 2D or 3D built on data from the Visible Human Project®.
3. The ability to develop and integrate customized web-based curriculum, including from an LMS, with specific text, images, and videos unique to your institution.
4. Licensing availability for running the VH Dissector anatomy software on desktops, laptops and tablets running Windows, macOS and iOS for laboratory, faculty, and student use. This includes access to the same built-in and custom developed curriculum accessible on the VH Dissector Table.

Thank you for your interest in our products and please do not hesitate to contact us if further information is required.

Sincerely,

A handwritten signature in black ink, appearing to read "Greg Spitzer". The signature is fluid and cursive, with a long, sweeping underline that extends to the right.

Greg Spitzer, COO
