To Whom it May Concern:

In reference to the enquiry for ExamSoft product suite, please note that ExamSoft is a unique computer-based testing (CBT) and assessment management solution with no comparable equivalent in the marketplace. Distinct capabilities include an end-to-end platform with secure, hosted item banking, unified objective and subjective assessments via rubrics, and extensive scoring and reporting capabilities.

ExamSoft is the only CBT platform that can administer secure, offline exams on Windows, Mac, and tablet devices, including iPads and Surface Pros. This capability eliminates exam interruptions due to server or WiFi connectivity issues. Security features also include complete device control preventing access to third party applications during exam sessions.

Specific business objectives ExamSoft helps achieve include secure and stable delivery of exams via the Exemplify application and extensive reporting capabilities on individual item, exam, and student performance. ExamSoft's reporting tools empower institutions to measure student performance against learning objectives, competencies and internal subject areas to identify at-risk students early and provide actionable, customizable student reports post-exam.

The ExamSoft product suite is not available through resellers and can only be purchased directly from the vendor.

For additional information, please see ExamSoft's Sole Source document.
