GraphPad Prism – Sole Source Confirmation

To Whom It May Concern:

GraphPad Prism tracks and organizes a scientist's work in a unique way, linking data, graphs, and analyses together. Changes in data automatically update all related analyses and graphs. Prism includes help and teaching information to guide a scientist in choosing a statistical test and creating the appropriate graph. No other product has all of the features of Prism or functions in precisely the same way.

This letter is to confirm that GraphPad Software is the sole source provider of annual subscription and group licensing for GraphPad Prism.

If you have any further questions, please don't hesitate to contact me.

Best wishes,
