Project Details**1. Describe the commodity/service that the agency/institution is seeking to procure:**

The University of Mississippi Medical Center (UMMC) purchased the ADSi MapForce system that provides an interface for the Mississippi Center of Emergency Services (MCES) with the ability to track and recall the path of radio connected to the Mississippi Wireless Information Network (MSWIN). The AVL system specially provides MCES with the ability to track emergency response teams for safety. It allows for inventory tracking of UMMC's radio assets. This system also provides interoperability features that can be enabled and disabled as needed by each agency.

2. Explain why the commodity/service is the only one (1) that can meet the needs of the agency/institution:

This item is unique due to the fact that the Mississippi Highway Patrol (MHP) currently uses the Computer Aided Dispatch (CAD) and AVL product from ADSi. The only way for UMMC to interconnect with the existing system is for UMMC to utilize the common interface known as ADSi MapForce. This allows both agencies to view the vehicle location information shared by UMMC and MHP. This is included in the vehicle tracking system. The ADSi MapForce system has been purchased, installed and is currently running live at MHP and UMMC. Annual support for these systems can only be provided by ADSi.

3. Explain why the source is the only person or entity that can provide the required commodity/service:

All ADSi software is manufactured, maintained, supported, trained, and sold exclusively by ADSi. There are no other distributors or agents authorized to maintain or support this product. See supporting letter from Application Data Systems, Inc. (ADSi), Attachment A.

4. Explain why the amount to be expended for the commodity/service is reasonable:

The estimated amount to be expended for the purchase of Annual Support for ADSi AVL and Multiple Agency Display is \$30,000.00, for three years. Please be advised that UMMC will determine if additional enhancements, upgrades, support, or equipment are within scope during the certification period and may increase the spending authority accordingly. Should Application Data Systems, Inc. change their name during this certification period, then UMMC will determine if a recertification is necessary. This amount is within the expected price range for these products.

5. Describe the efforts that the agency/institution went through to obtain the best possible price for the commodity/service:

Pricing is compared against available market intelligence and identified discounts are pursued where applicable.
