SURVIVAL ARMOR®

LOAD DISTRIBUTING STRAPPING SYSTEM (LDSS)

Through extensive research and field trials, Survival Armor® has created a strapping system like no other! Its patented ergonomically shaped shoulder straps and reversible load distributing shaped side straps give the officer the ultimate choice in comfort.

The unique shape of our reversible load distributing strapping system gives the officer added comfort while holding the vest in its correct position. This also provides the choice of either 2" or 4" attachments to the front of the vest.

This reversible load distributing strapping system, when pulled snug, elongates the REVOLUTIONARY shaped strap to distribute the weight of the vest over the lumbar area.

FEATURES

- ❖ Allows the user the option to adjust the chest and waist separately, so not to have a too loose or too tight due to the single strap option
- ❖ Extremely well thought out regarding the female shape
