Structural view

Clear or tempered glass brings natural light and an open ambience that's acoustically sound.

Enduring Quality

System 3000 has been a workplace solution for decades with good reason. Constructed of fully welded steel frames and purposefully engineered layers, System 3000 has provided quality work space solutions for countless individuals. It's a straightforward, hassle-free solution—easy to order, install, and reconfigure.

Quiet, Please!

In a world of distractions, a quiet place to focus is critical to productivity. System 3000 was designed from the inside-out to reduce ambient noise and minimize interruptions. Tall panels with optional doors provide needed privacy for individual work, while multi-layered acoustic fabric panels absorb sound like no other system.

Simple but Efficient

System 3000 panels arrive fully assembled for quick on-site installation with minimal tools, saving up to thirty percent of installation costs compared to other panel systems. Its thinner profile and minimal joints make the most of small footprints, providing space efficiency as well.

Mobile conference tables can stand alone or may be used to extend end panels, allowing for impromptu meetings and conferences.
