# Standard Product Overview

# System 3000® Specifications

All modular panel system components shall originate from ISO 9000, ISO 9001, or ISO 9002 registered facilities. KI SYSTEM 3000 MEETS OR EXCEEDS THE REQUIRED ANSI/BIFMA X5.6-2003 PANEL SYSTEMS TESTS.

## UL Listed

System 3000® panels are Listed to applicable U.S. and Canadian safety standards and requirements by Underwriters Laboratories Inc. Two of the standards used to evaluate System 3000® are UL 1286, Office Furnishings and UL 723, Standard Test for Surface Burning Characteristics of Building Materials.

## PANELS AND ACCESSORIES

### A. Fabric Acoustical Panels

1. Product Offering - The panel shall be offered in heights of 32", 42", 48", 54", 62", 66", 72" and 80". The panel widths offered shall be 12", 18", 24", 30", 36", 42", 48", 54" and 60". The panel shall be offered in a non-powered and powered version. The panel shall be 2-1/2" thick.

#### 2. Panel Construction

a. Fabric Panel Core - The panel core shall consist of a galvanized steel frame made from roll-formed steel "U" channels around the perimeter of the panel, two steel reinforcement gussets on each corner and an expanded steel skin. The "U" channels shall be positioned so the open side is towards the frame perimeter permitting easy cable access. The frame, gussets and skin shall be resistance welded to form a rigid structural unit. On all panels wider than 42", a third vertical support member shall be resistance welded to the frame. The panel shall receive its acoustical properties by the use of two 1" sheets of high density fiberglass separated by an aluminum septum. This fiberglass/aluminum acoustical barrier shall be enclosed within the steel panel frame and 20-gauge expanded metal sides. The fabric panel shall be tackable with the use of "T" pins.

b. Panel Raceway - The raceway shall consist of the following components:

(1) Raceway Pan - A 14-gauge galvanized steel pan shall run the width of the panel and form a third horizontal structural cross member. Two threaded steel nuts shall be attached to the raceway pan for attachment of glides. The raceway pan shall allow for the attachment of the interlocks, glides, support housings and spring clips.

(2) Support Housing - Two fiberglass filled, structural nylon support housings shall be included in each panel. The support housing shall provide rigidity to the panel assembly and support each end of the panel.

(3) Interlock Block - The base of each panel side shall contain an interlock block. The interlock shall be made from either die cast aluminum or die cast zinc. The interlocks of one panel shall mate with interlocks of adjacent panels providing lateral support and uniform height.

(4) Glide - The glides shall provide for 3-1/2" of vertical adjustment. Each panel shall contain a minimum of two glides.

(5) Raceway Covers - The raceway covers shall be offered in a powered and non-powered version. They shall be made of 22-gauge powder-coated steel and shall be 4" high. The powered version shall contain openings for the use of U.S. standard receptacles. These openings shall have an injection-molded bezel to cover the opening when receptacles are not being used. The opening (2.70" x 1.38") in a blank receptacle bezel accepts the industry standard Data Plate. Raceway covers shall be secured with a rooftop latch and spring clips at the bottom.

c. Panel Trim Rails - The panel trim rail shall be made of extruded aluminum. The trim rail shall be secured by sliding the rail onto pre-formed flanges extending the entire length of the vertical ends of the panel and fastened with screws. The trim rail shall be slotted to allow for the placement of hang-on components in 1" vertical increments.

#### d. Trim on Panel

(1) Top Cap - All panels shall have a top trim cap with trim color permeating throughout the entire part with textured surface to hide fingerprints. Paint or surface coatings are not permitted. Installation of the top cap shall be a press fit without the use of tools. The top cap shall extend the full length of the panel top and shall be joined to the adjacent top cap by a top cap sleeve.

(2) Panel-To-Panel Connectors - The panel-to-panel connector must be universal for simplicity in specification and inventory. Panels shall be joined by a full height extruded polypropylene hinge. The hinge shall attach one panel to the next by sliding into pre-formed slots on the panel trim rail. This same hinge shall be used to secure panels to corner posts, "T" posts and wall mount.

e. Upholstery - Fabric shall be held in place by an elastic extruded spline rolled into the welting groove on the panel vertical and horizontal members. The fabric shall be field replaceable.

### Fabric Disclaimer:

"Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Special Cost Request written specifying the direction the fabric is to be applied. The posted standard lead time will apply to the Special Cost Request."

3. Acoustical Properties - The modular office systems acoustical properties will have been tested at independent laboratories using random production samples. The acoustical properties shall be determined by using three different testing procedures.

a. Noise Reduction Coefficient (Test Method ASTM C-423) - The standard acoustical panels shall have an NRC rating of at least .80.

b. Speech Privacy/Noise Isolation Class (NIC) - The modular office system shall have

an NIC barrier ranking of 21 at a distance of 7'. The modular office system shall have an NIC flanking rating of 22 at a distance of 12'.

c. Sound Transmissions Classification (STC) (Test Method ASTM-E-90 and E413) - The modular office system shall have an STC rating of 23 or higher.

4. Cable Management Capabilities of Straight Panels - Each straight panel shall allow cable management access around the entire perimeter of the panel. Separation of communication and power cables into top and bottom raceways shall be accommodated. Capacity shall be up to 40 (25 pair) cables. Complete perimeter cable management must be incorporated as a standard feature of each straight panel.

### B. Curved Fabric Panels

1. Product Offering - The panels shall have a radius of 24" and be available in heights of 32", 42", 48", 54", 62", 66", 72", and 80".

#### 2. Construction

a. Panels shall be 2-1/2" thick constructed of a metal and wood frame, aluminum septum and fiberglass sandwiched between radius plywood skins, covered with fiberglass and fabric. The panels shall blend aesthetically with straight panels.

b. Raceway Construction - This assembly shall include a steel raceway pan and include support housings, aluminum die cast interlocks with 3-1/2" adjustable glides, with 4" high steel raceway covers.

### C. Glazed Panels

1. Product Offering - Glazed panels shall be offered in 24", 30", 36", 42" and 48" widths and in 54", 62", 66", 72" and 80" heights and shall be available in a non-powered and powered version.

#### 2. Construction

a. Panel shall consist of 1/4" bronze or clear tempered glazed surrounded by powder-coated aluminum extrusion frame and shall be 2-1/2" thick. The trim of the glazed panel is identical to the acoustical panel.

b. The cable capacity shall be the same as in the fabric panels.

### D. Curved Glazed Panels

1. Product Offering - Curved glazed panels shall be offered in 24" radius and 54", 62", 66", 72" and 80" heights. The panels shall be available in a non-powered version and a powered pass-through version.

2. Construction - Panels shall consist of 1/4" bronze or clear, curved plexiglass surrounded by a powder-coated aluminum extrusion frame. The trim of the glazed panel shall be identical to the acoustical panel.

### E. Half Glazed/Half Fabric Panels

1. Product Offering - Panels are offered in the same sizes as the full glazed panels.

#### 2. Construction

a. The panel shall be a combination of the same materials used to build the glazed

panel and standard acoustical panel.

b. The cable capacity shall be the same as in the fabric panels.

### F. Half Open/Half Fabric Panels

1. Product Offering - Panels will be offered in the same sizes as the glazed panel offering.

#### 2. Construction

a. The construction of the half open frame/half fabric panel shall be identical to the half glazed/half fabric panel with the exception that the glaze is removed and the groove for the glaze is filled.

b. The cable capacity shall be the same as in the fabric panels.

### G. Door

1. Product Offering - Panels doors are available

in 36" and 42" widths and 80" height to provide visual and acoustical privacy.

#### 2. Construction

a. The construction of the door shall be corrugated cardboard honeycomb wrapped by hardwood stiles, MDF rails, faced with hardboard and covered with high-pressure laminate. The frame shall be powder-coated aluminum to match panel frames.

b. The door is available non-locking or locking.

### H. Wall Mounts

1. The panel system shall allow for fastening a panel run to a wall. The wall mounts shall consist of an aluminum extrusion to allow for panels to be attached to the existing building walls. A panel shall be secured to a wall mount with a universal panel hinge. Method of attachment to the existing building depends on the existing wall construction.

### I. Adjustable Wall Mounts

1. The adjustable wall mounts shall consist of an aluminum extrusion along with 1/8" thick cork/rubber washers enclosed in a steel "U" channel to allow panels to be attached to existing building walls. This unit has a total adjustable depth of 5/8" in 1/8" increments. Method of attachment to the existing building depends on the existing wall construction.

### J. 90° Corner Post Trim

1. Product Offering - Trim shall be offered upholstered and unupholstered.

#### 2. Construction

a. The modular office system shall include a 90° corner post trim whenever panels are joined at 90°. This corner post trim shall consist of an inside extrusion offered in the same colors as the panel trim. An outside extrusion shall snap into the inner extrusion and be available unupholstered and upholstered. The 90° corner post trim shall have a molded top available with veneer wrap and molded bottom cap in order to aesthetically connect with the panel top caps and the raceway covers. The corner post shall be attached to adjacent panels with the universal panel hinge.

## K. Variable Height Corner Post Trim

1. Product Offering - Trim shall be offered upholstered and unupholstered.
2. Construction
  - a. The modular office system shall include a variable height corner post whenever two panels of different heights meet in T-conditions. The variable height corner post consists of an inside extrusion offered in the same colors as the panel trim. An outside extrusion shall snap into the inner extrusion. The variable height corner post trim shall have a molded top cap and molded bottom cap in order to aesthetically connect with the panel top caps and the raceway covers. The corner post shall be attached to adjacent panels with the universal panel hinge.

## L. 60° Corner Post Trim

1. Product Offering - Trim shall be offered in upholstered style only.
2. Construction
  - a. The modular office system shall include a 60° corner post trim whenever panels are joined at 60°. Components are identical in concept as the 90° corner post trim and shall be fastened to adjacent panels with the universal panel hinge.

## M. 45° Corner Post Trim

1. Product Offering - Trim shall be offered in upholstered style only.
2. Construction
  - a. The modular office system shall include a 45° corner post trim whenever panels are joined at 45°. Components are identical in concept as the 90° corner post trim and shall be fastened to adjacent panels with the universal panel hinge.

## N. T-Post Trim

1. Product Offering - Trim shall be offered in upholstered and unupholstered.
2. Construction
  - a. The modular office system shall include "T" post panel trim whenever three panels are joined forming a "T" connection. Components are identical in concept as the 90° corner post trim and shall be fastened to adjacent panels with the universal panel hinge.

## O. Variable Height T-Posts

1. Product Offering - Trim shall be offered upholstered and unupholstered.
2. Construction
  - a. The modular office system shall include "T" post panel trim whenever three panels are joined forming a "T" connection or for 4-way conditions. Components are identical in concept as the variable height corner post trim and are fastened to adjacent panels with the universal panel hinge.

## P. Panel End Caps

1. All exposed ends of a panel run shall be covered with a vertical trim cap. Panel end caps shall be made with the trim color permeated throughout the entire part and surface textured to hide fingerprints. End caps shall be installed using a snap fit method and require no assembly or disassembly

tools. Panel end cap lengths shall correspond to panel heights. An end of run top cap shall be included with each panel end cap.

## Q. In-Line Variable Height Panel End Caps

1. All exposed ends of a panel run shall be covered with a vertical trim cap when in-line panels are of different heights. Panel end caps shall be made with the trim color permeated throughout the entire part and the surface textured to hide fingerprints. End caps shall be installed using a snap fit method and require no assembly or disassembly tools. Panel end cap lengths shall correspond to the different panel heights. An end of run top cap shall be included with each end cap.

## R. Two-Way Caps

1. Injection-molded two-way top caps shall be available for spanning the gap when panels are assembled requiring a two-way cap. The trim color shall permeate throughout the entire part.

## S. Four-Way Caps

1. Injection-molded four-way caps shall be available to cover the gap that exists when four panels are connected to each other at 90°. The trim color shall permeate throughout the entire part.

## T. Panel Center Mount

1. A panel center mount shall allow a panel to be connected at 90° along an adjoining panel at any point except directly on the panel joint. It shall be available only to join panels of similar height and does not allow for the transfer of power.

## U. In-Line Fabric Spacer

1. The in-line fabric spacer shall be in upholstered plastic and aluminum extrusion that is used to provide a 2-1/2" space along a run of panels. The in-line fabric spacer consists of two extrusions that attach to a rigid aluminum extrusion. The bottom trim plate and top cap are injection-molded with color throughout. The part also includes two polypropylene hinges. The spacer allows panel runs to line up with each other.

## WORKSURFACES AND ACCESSORIES

### A. Rectangular Worksurfaces

1. Product Offering - The standard rectangular worksurface shall be offered in widths of 24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90" and 96". The worksurfaces shall be offered in 24" and 30" depths.
2. Construction - Worksurfaces shall be available in two surface types: high-pressure laminate and reconstituted wood veneer and four edge styles. Surface shall be constructed of a 45 lb. density particleboard core. The laminate worksurface shall consist of a high-pressure laminate face with phenolic backer. Laminate worksurface edges shall be trimmed with either a vinyl edge banding, extruded flat vinyl T-molding, or an elliptical

profile postformed front edge with color-matched vinyl edge banding on all other edges. Wood veneer surfaces shall have veneer faces laminated to the core and finished with an elliptical profile solid reconstituted wood front edge with all other edges being banded with reconstituted veneer.

3. All worksurfaces with a flat vinyl T-edge shall be pre-drilled for cantilever brackets and hanging pedestals. All worksurfaces with other edge treatments shall have threaded inserts. Corner surfaces shall be pre-drilled for keyboards. The 60" wide surfaces shall have an integrated steel reinforcement to allow adequate support for load bearing. Worksurfaces 60" and wider shall include additional left-hand cantilever bracket. The worksurface shall be supported by one piece 14-gauge steel cantilever brackets. These brackets shall prevent dislodgment by the use of an integral top bracket tooth.

### B. Curved Worksurfaces

The following curved worksurfaces shall be available:

1. Piano Peninsula, "P" Top Peninsula, Shoe Peninsula, and "D" Shaped worksurfaces.
2. Construction - The construction shall be identical to that specified for the rectangular worksurfaces, with the exception that there shall be no elliptical postformed edge or flat vinyl T-molding edge available in the laminate series.

### C. Transitional Surface

1. The following transitional worksurfaces shall be available: Conference End, Quarter Round Transitional worksurfaces.
2. Construction - The construction shall be identical to that specified for the rectangular worksurfaces, with the exception that there shall be no elliptical postformed or wood veneer edge.

### D. Mobile Surfaces

1. The following mobile worksurfaces shall be available: Teardrop and Semi-Circle worksurfaces.
2. Construction - The construction shall be identical to that specified for the rectangular worksurfaces, with the exception that there shall be no elliptical postformed or wood veneer edge.

### E. 90° Corner Worksurfaces

1. Product Offering - The 90° worksurfaces shall be available in: Diagonal, Curvilinear, and Dual Curvilinear options in various widths and depths.
2. Construction - Construction of the 90° worksurface shall be identical to that specified for rectangular worksurfaces, with the exception that there is no elliptical postformed edge available in the laminate series when the front edge is curved. The elliptical postformed edge shall be available on straight edged corner surfaces. The 90° diagonal corner worksurface will have a center round grommet as standard with T-mold edge. The curvilinear, dual curvilinear and wing options will have rectangular shaped

grommets as standard.

## F. Variable Height Adjustment Mechanism

1. Product Offering - The variable height adjustment mechanism mounts underneath the dual curvilinear front worksurface and is available in black powder-coated finish only.
2. Construction - The construction shall be steel construction finished in a durable black powder coat and offers front surface height adjustment and tilt. Height adjustment of 5-3/4" below and 7" above worksurface. Tilt adjustment of 9° positive and 15° negative. Mechanism has a 20 lb. capacity spring assist for ease of adjustment.

## G. Worksurface Vertical Fillers

1. Product Offering - A worksurface vertical filler shall be available to fill the gap when one worksurface drops from the standard 29" down to an adjacent 26" secretarial typing height worksurface. Worksurface vertical fillers shall be available in 24", and 30" widths. The height of the worksurface vertical filler shall be 3".
2. Construction - The construction of the worksurface vertical filler shall be 16-gauge steel, powder coat painted to the trim colors of the panel. The worksurface vertical filler shall be attached to the worksurface through the use of wood screws.

## H. Fully Adjustable Keyboard Tray

1. Product Offering - The keyboard mechanism shall be fully adjustable front-to-back with tilt adjustment and storability. The tray shall slide in and out on a ball bearing mechanism. The adjustable tray shall rotate 359°, adjust vertically 5-1/2" and tilt 15° down and 15° up. The mechanism that supports the keyboard pad passes all appropriate BIFMA tests.
2. Construction - The construction of the keyboard tray shall be molded plastic with non-skid surface and molded palm rest. The keyboard tray shall measure 22-5/8" wide by 11" deep.

## I. Fully Adjustable Keyboard Tray With Mouse Tray

1. Product Offering - The keyboard mechanism shall be fully adjustable front-to-back with tilt adjustment and storability. The tray shall slide in and out on a ball bearing mechanism. The adjustable tray shall rotate 359°, adjust vertically 5-1/2" and tilt 15° down and 15° up. The mechanism that supports the keyboard pad passes all appropriate BIFMA tests.
2. Construction - The construction of the actual keyboard tray shall be molded plastic with non-handed sliding mouse tray and molded palm rest. Keyboard tray shall measure 21-1/4" wide by 11-1/4" deep. The mouse tray measures 9" wide by 9" deep. The keyboard tray and mouse tray shall be available in black only.

# System 3000® Specifications

## J. Worksurface Grommets

1. Product Offering - Circular worksurface grommets, 2-3/4" I.D. and 3" O.D. shall be standard on T-edge worksurfaces. Trapezoidal shaped worksurface grommets 2-1/2" x 6" shall be standard on 74P edge, elliptical postformed edge laminate and veneer worksurfaces.

2. Construction - The worksurface grommet shall be a two-piece molded component with the ability to remove the top cover to allow full access to the grommet hole.

## K. Worksurface Support Panels

1. Product Offering - The support panels shall be available in the following sizes: 26" and 29" height and 24" and 30" depth.

2. Construction - The worksurface support panel shall be 1-1/4" thick and constructed of 45 lb. density particleboard with high-pressure laminate or veneer on both sides and high-pressure laminate on one side with fabric on the other side. The front edge of the high-pressure laminate panel shall be either a 74P edge or an elliptical profile post-formed edge. Wood veneer surfaces shall have an elliptical profile, solid reconstituted wood edge. The worksurface support panel brackets shall prevent dislodgement from the trim rail of the panel. There shall also be an 18-gauge support bracket that attaches to the side of the support panel and to the underside of the worksurface.

## L. Center Drawers

1. Product Offering - A locking center drawer shall be available with a minimum size of 2-1/2" height, 16-1/2" width and 18-1/4" depth.

2. Construction - The center drawer shall be molded plastic construction with molded component trays. The drawer operates on ball bearing slides.

## M. Countertops

1. Product Offering - The countertops shall be offered in widths of 24", 30", 36", 42", 48", 54", 60", 66", 78", and 84" with a countertop depth of 16". Countertops shall also be available for 90° corner and curved corner applications.

2. Construction - Construction of the countertops shall be identical to the construction for the rectangular worksurfaces with the exception of the curved countertop not offered in postformed laminate. The bracket to support the countertops shall consist of steel brackets and locking clips to prevent dislodgement. The brackets are mounted on the inside of the workstation allowing for a 4" extension over the top of the panel to conform with ADA guidelines. The countertops will also accommodate a task light.

## N. Wall Track

1. Product Offering - Wall track shall be available to allow for hanging of components onto an existing structural wall in the identical method as if the components were hung on System 3000® panels available in either 66" length or 84" length.

2. Construction - The wall track shall consist of a double slotted aluminum extruded

rail with powder coat finish in the panel trim colors.

## O. Coat Hook/Picture Hanger

1. Product Offering - Coat hook shall be available to allow for hanging of coats or pictures.

2. Construction - The coat hook shall consist of injection-molded plastic available in panel trim colors and shall be attached to top edge before top cap is installed.

## STORAGE AND ACCESSORIES

### A. Regular Shelf

1. Product Offering - The product shall be offered in widths of 24", 30", 36", 42", 48", 54" and 60". The overall dimensions of the end panels shall be 16-1/2" high and 14-1/2" deep. The shelf depth shall be 13-1/4".

2. Construction - The end panels shall be constructed of 14-gauge steel with a powder coat finish. The end panels shall have self-locking mounting tabs formed into the back edge. The shelf shall be an 18-gauge steel weldment with a powder coat finish. The front edge of the shelf shall be an extrusion that also provides space for a concealed flush mount task light.

### B. Low Shelf

1. Product Offering - The product shall be offered in widths of 24", 30", 36", 42", 48", 54" and 60". The overall dimensions of the end panels shall be 9-1/2" high and 14-1/2" deep. The shelf depth shall be 13-1/4".

2. Construction - The end panels shall be constructed of 14-gauge steel with a powder coat finish. The end panels shall have self-locking mounting tabs formed into the back edge. The shelf shall be an 18-gauge steel weldment with a powder coat finish. The front edge of the shelf shall be an extrusion that also provides space for a concealed flush mount task light.

### C. Overhead Cabinet

1. Product Offering - The product shall be offered in widths of 24", 30", 36", 42", 48", 54" and 60". The overall dimensions of the end panels shall be 16-1/2" high and 14-1/2" deep. The shelf depth shall be 13-1/4".

2. Construction - The construction of the end panels and shelves of the overhead cabinet shall be identical to the low/regular shelf. Door fronts shall be offered in steel, fabric, laminate, and veneer versions with a dual durometer extruded handle. The door front will operate on a rack and pinion gear system and will utilize a center lock mechanism. The door front will store recessed inside the cabinet with the handle exposed. The steel door front shall be of honeycomb core construction with a powder coat finish. The construction of the fabric door front shall be identical to the steel door front except that the outer surface of the door front is covered with fabric. The laminate door front shall be high-pressure laminate covering a particleboard core. The veneer door front shall be veneer laminated to particleboard core.

## F. Shelf Dividers

1. Product Offering - Shelf dividers shall be offered in the same color trim as the panels.

2. Construction - The shelf dividers shall be powder-coated steel. Installation or removal shall be accomplished without the use of tools or fasteners.

## G. Tackboards

1. Product Offering - Tackboards shall be available in 12", 16", 30" and 48" heights and in 24", 30", 36", 42", 48", 54" and 60" widths.

2. Construction - The tackboard shall be constructed of 3/4" industrial insulation board covered with fabric. The mounted brackets shall be steel powder-coated and attached to the coreboard with T-nuts and machine screws. Fabric shall be attached to the coreboard with staples.

## ELECTRICAL COMPONENTS

The factory-installed U.S. standard electrical system supplied for the modular office system shall be an 10-wire design. This design consists of either a 622 6 hot wires, 2 neutral and 2 ground wires which provide 6 separate circuits or 442 4 hot wires, 4 neutral and 2 ground wires which provide 4 separate circuits, each having a rated capacity of 20 amps.

### A. Panel Rigid Wireway

A rigid one-piece wireway shall be attached to the raceway pan by four machine screws. The wireway design shall allow for the snap connection of the rigid wireway of one panel to another through the use of flexible jumpers.

### B. Base Infeeds

The electrical system shall permit power infeed along the base raceway of the panel. Base feed power shall feed into the rigid wireway of the panel raceway through the use of a slip connection and locking tabs. The base feed shall be constructed of a 6" long, 1/2" liquid-tight flexible metal conduit that contains 10 wires with a receptacle type design allowing for quick installation and removal. The infeed shall be available with a universal (left/right) field determined configuration.

### C. Top Infeeds

The electrical system shall permit power infeed through the top of the panel. The top feed assembly shall consist of a 7" extruded aluminum power pole, top cap and ceiling trim plate and 12" flexible conduit containing 10 wires to span the ceiling with a snap fit attachment for connection to the rigid wireway. The interior of the power pole shall be divided for power and communication management.

### D. Data Top Feed

The data top feed consist of an aluminum extruded power pole, top cap and ceiling trim pieces but does not include power infeed wiring.

## E. Power Pass-Through

The electrical system shall provide for a method of passing power from one powered panel through the raceway of a non-powered panel and connected to the powered rigid wireway of the next panel. This power pass through shall attach from the one powered panel to the next with a snap fit connection that requires no tools for assembly.

## F. Receptacles

The receptacles for the modular electrical system shall be made of steel and injection-molded components which slip fit into the rigid wireways of the panels and fasten securely with the use of snap fit tabs. The rated capacity of the receptacles shall be 20 amps.

## J. Worksurface Wire Manager

Constructed to high-quality black velcro 7.5" wide by 2" deep. The harness is fastened to the underside of the worksurface with pressure sensitive adhesive. This manager supports cords and communication cables under the worksurface.

## K. Electrical System Test Requirements

The panel system, including the modular U.S. electrical components, shall be listed to applicable UL standards and requirements by Underwriters Laboratories, Inc.

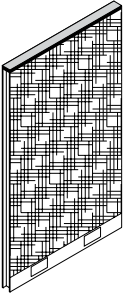

## **K. Electrical System Test**

### **Requirements**

The panel system, including the modular U.S. electrical components, shall be listed to applicable UL standards and requirements by Underwriters Laboratories, Inc.

## HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.

• Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

## HOW TO BUILD A MODEL NUMBER

**A** Select basic model.

**B** Select base power.  
TN - No Power

**C** Select trim color.  
Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**

**D** Select fabric side 1.  
Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.

**E** Select fabric side 2.  
Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.

## Fabric Mixing

Example:  
Grade 2 Fabric  
-Grade1 Fabric

$$\text{Upcharge}/2 = \text{Cost for one side}$$

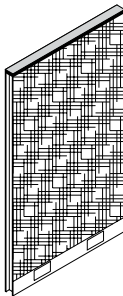

Grade 1 Fabric  
+Cost for one side

## HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

## HOW TO BUILD A MODEL NUMBER

- A** Select basic model.

- B** Select base power.

<b>TN</b>	- No Power
<b>T4</b>	- 442 - 10 Wire Power
<b>T6</b>	- 622 - 10 Wire Power

Refer to upcharge column "Base Power add to list price" for pricing of T4 and T6, when selecting a powered panel.

- C** Select trim color.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**

- D** Select fabric side 1.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.

- E** Select fabric side 2.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.

## Fabric Mixing

Example:  
Grade 2 Fabric  
-Grade1 Fabric

$$\text{Upcharge}/2 = \text{Cost for one side}$$

## SPECIAL SERVICES

### Special Carton Marking

## HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

## HOW TO BUILD A MODEL NUMBER

**A** Select basic model.

**B** Select base power.

**T4** - 442 - 10 Wire Power  
**T6** - 622 - 10 Wire Power  
**TN** - No Power

Refer to upcharge column "Base Power add to list price" for pricing of T4 and T6, when selecting a powered panel.

**C** Select trim color.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**

**D** Select glass color.

**GLA** - Clear  
**BRZ** - Tinted/Bronze

**E** Select fabric side 1.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.

**F** Select fabric side 2.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.

### HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

### HOW TO BUILD A MODEL NUMBER

- A** Select basic model.
- B** Select trim color.  
Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**

## HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

## HOW TO BUILD A MODEL NUMBER

**A** Select basic model.

**B** Select edge style.

<b>BN</b>	- Flat vinyl T-edge
<b>74P</b>	- 74P edge
<b>PL</b>	- Postformed edge
<b>WV</b>	- Wood edge, veneer surface

**C** Select surface finish.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.  
Surface finish offerings are based on edge style selections.

**D** Select trim color for painted surfaces.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**

**E** Grommet position on T-edge (BN) only.

<b>N</b>	- Grommet : none - no up-charge
<b>L</b>	- Grommet : left; add \$44
<b>C</b>	- Grommet : center; add \$44

<b>R</b>	- Grommet : right; add \$44
<b>LR</b>	- Grommet : left/right; add \$87
<b>LC</b>	- Grommet : left/center; add \$87
<b>CR</b>	- Grommet : center/right; add \$87
<b>LCR</b>	- Grommet : left/center/right; add \$131

**F** Select edge color.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.

**G** Select grommet color on T-edge (BN) only.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.

## FINISH INFORMATION

### Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code  
Nevamar - LN/supplier's color pattern code  
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

### HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

### HOW TO BUILD A MODEL NUMBER

**A** Select basic model.

**B** Select edge style.

**BN** - Flat vinyl T-edge  
**74P** - 74P edge

**C** Select surface finish.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.  
Surface finish offerings are based on edge style selections.

**D** Select trim color for painted surfaces.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**

**E** Grommet position on T-edge (BN) only.

**N** - Grommet : none - no upcharge  
**L** - Grommet : left; add \$44  
**C** - Grommet : center; add \$44

**R** - Grommet : right; add \$44  
**LR** - Grommet : left/right; add \$87  
**LC** - Grommet : left/center; add \$87  
**CR** - Grommet : center/right; add \$87  
**LCR** - Grommet : left/center/right; add \$131

**F** Select edge color.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.

**G** Select grommet color.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.

### FINISH INFORMATION

#### Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code  
Nevamar - LN/supplier's color pattern code  
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

### HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

### HOW TO BUILD A MODEL NUMBER

**A** Select basic model.

**B** Select edge style.

**BN** - Flat vinyl T-edge

**74P** - 74P edge

**PL** - Postformed edge

**WV** - Wood edge, veneer surface

**C** Select surface finish.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.

Surface finish offerings are based on edge style selections.

**D** Select trim color for painted surfaces.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**

**E** Select edge color.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.

### FINISH INFORMATION

#### Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code  
 Nevamar - LN/supplier's color pattern code  
 Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

## HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How To Build a Model Number".
- Any special service required.

Note: • The ☐ indicates that a choice is required.

- The absence of the ☐ indicates that no choice is required.
- Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

## HOW TO BUILD A MODEL NUMBER

**A** Select basic model.

**B** Select mounting style.

**PM** - On module

**C** Select assembly.

**F** - Fully Assembled; add \$131

**U** - Unassembled

**D** Select paint color.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**

**E** Select laminate color.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.

**F** Select veneer and edge color.

Refer to the **KI Color Addendum** or **KI Fabrics & Finishes binder**.

**G** Select key-key alike.

**KA** - Key alike  
**KS** - Key standard  
**NLC** - No lock core

## INFORMATION

### Lock

Units may be specified with a lock (KA or KS). With key standard (KS), keying is random. With key alike (KA), key numbers can be specified by entering the four character key designation from "L101 through L150".

## FINISH INFORMATION

### Additional Laminate Offering

Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code  
Nevamar - LN/supplier's color pattern code  
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

# Budget Typicals

## Receptionist Station

Workspace 48 sq. ft.

Approx. Budget List Price \$15,200

### Workstation Features:

- Fabric acoustical panels, 66" high with electrical capabilities
- ADA laminate countertop on 42" high panels
- Laminate surfaces with flat vinyl T-edge
- Fabric overhead units with task lights
- Fully adjustable keyboard arm with non-skid pad
- Two drawer lateral and box/box/file pedestal
- Paper management accessories

## Assistant Station

Workspace 36 sq. ft.

Approx. Budget List Price \$12,100

### Workstation Features:

- Fabric acoustical panels, 66" high with electrical capabilities
- Laminate surfaces with flat vinyl T-edge
- Fabric overhead units with task lights
- File/file and box/box/file pedestals
- Paper management accessories and tackboard
- Fully adjustable keyboard arm with non-skid pad

## Clerk Station

Workspace 36 sq. ft.

Approx. Budget List Price \$12,300

### Workstation Features:

- Fabric acoustical panels, 66" high with electrical capabilities
- Laminate surfaces with flat vinyl T-edge
- Fabric overhead units with task lights
- File/file and box/box/file pedestals
- Paper management accessories and tackboard
- Fully adjustable keyboard arm with non-skid pad

## Shared Station

Workspace 87 sq. ft.

Approx. Budget List Price \$19,700

### Workstation Features:

- Fabric acoustical panels, 32" high, 42" high, 54" high and 66" high with electrical capabilities
- Laminate surfaces with flat vinyl T-edge including peninsula top
- Fabric overhead units and open shelf with task lights
- File/file pedestals
- Paper management accessories and tackboard
- Fully adjustable keyboard arm with non-skid pad

# Budget Typicals

## Engineer's Station

Workspace 64 sq. ft.

Approx. Budget List Price \$18,800

### Workstation Features:

- Fabric acoustical panels, 66" high with electrical capabilities
- Laminate surfaces with flat vinyl T-edge
- Fabric overhead units and open shelves with task lights
- File/file and box/box/file pedestals
- Tackboard and shelf dividers
- Fully adjustable keyboard arm with non-skid pad

## Manager's Station

Workspace 92 sq. ft.

Approx. Budget List Price \$21,400

### Workstation Features:

- Fabric acoustical panels, 66" high with electrical capabilities
- Clear or bronze glazed panels, 66" high
- Laminate surfaces with flat vinyl T-edge including peninsula top
- Fabric overhead units with task lights
- File/file and box/box/file pedestals
- Paper management accessories and tackboard
- Fully adjustable keyboard arm with non-skid pad

# Specification Guide

## Panel Applications

### Unloaded Panel Runs Starting With Wall Mounts

**Note:** Return panel must be equal to, or within 18" of the height of the main panel run.

**Note:** Return panels can be any height when they return in opposite directions as shown at left.

**Note:** The curved panel and the return panel can be any height.

### Unloaded Freestanding Runs With Returns At Both Ends

**Note:** Return panel(s) must be equal to, or within 18" of the height of the main panel run, UNLESS the main panel run is tight against a building wall. If the main run is tight against the building wall, the return panels can be any height.

**Note:** Return panels can be any height when they return in opposite directions as shown at left.

## Worksurface Loaded Panels Starting With Wall Mounts

**Note:** Return panel must be equal to, or within 18" of the height of the main panel run.

**Note:** Return panels can be any height when they return in opposite directions as shown at left.

**Note:** The curved panel and the return panel must be equal in height to the main panel run.

## Worksurface Loaded Freestanding Runs With Returns At Both Ends

**Note:** When loading freestanding panels with worksurfaces, return panels must be used on both ends. An option on one end is to use worksurface support panels (WSSP'S) in some situations.

**Note:** Return panel(s) must be equal to, or within 18" of the height of the main panel run, UNLESS the main panel run is tight against a building wall. If the main run is tight against the building wall, the return panels can be any height.

**Note:** Return panels can be any height when they return in opposite directions as shown at left.

**Note:** Return and curved panels must be equal to, or within 18" of the height of the main panel run, UNLESS the main panel run is tight against a building wall. If the main run is tight against the building wall, the return and curved panels can be any height.

# Specification Guide

Panel Applications/Storage Units

## Storage Unit Loaded Panel Runs Starting With Wall Mounts - One or Two Units Per Panel

**Note:** Return panel must be equal to, or within 12" of the height of the main panel run, and must be on the same side as the storage units. All adjacent overhead units must have overhead ganger plates attached between them.

**Note:** Return panels must be equal to, or within 12" of the height of the main panel run when they return in opposite directions as shown at left. All adjacent overhead units must have overhead ganger plates attached between them.

## Unloaded Freestanding Runs With Returns At Both Ends - One or Two Units Per Panel

**Note:** Return panels must be equal to, or within 12" of the height of the main panel run. Return panels must be specified at each end of the storage unit panel run, and must be on the same side as the storage units. All adjacent overhead units must have overhead ganger plates attached between them.

**Note:** Return panels must be equal to, or within 12" of the height of the main panel run. Return panels must be specified at each end of the storage unit panel run. All adjacent overhead units must have overhead ganger plates attached between them.

**Note:** Return panels and curved panels must be equal to, or within 12" of the height of the main panel run. Return panels must be specified at each end of the storage unit panel run, and must be on the same side as the storage units. All adjacent overhead units must have overhead ganger plates attached between them.

## Storage Unit Loaded Panel Runs With Three Or More Storage Units Per Panel

The following number of storage units will fit on the specified height panels.

Panel Height	Low Shelves Stacked Tight 10" Req'd	Low Shelves with Folders 14" Req'd	Regular Shelves or Receding Door Cabinets 17" Req'd
48"	4	3	2
54"	4	3	3
62"	5	4	3
66"	5	4	3
72"	6	4	4
80"	6	5	4

When three or more storage units are mounted on one side of a panel, storage units must be panel wrapped with return panels at least 30" wide and equal to or within 12" of the height of the panel the storage units are mounted on.

**Note:** Return panel(s) must be equal to, or within 12" of the height of the main panel run.

An overhead with receding door located in a corner must be adjacent to a perpendicular panel of no less than 30 inches wide if the open door is to clear a second overhead positioned at 90° from the first (see below).

# Specification Guide

## Panel Door

Panel Doors are available in 36" and 42" widths. The actual door openings are 30" and 36" respectively. Unless a customer specifies the smaller door, the larger size (42) should be used to allow for handicap accessibility.

Panel Doors come in right hand (R), and left hand (L) versions (see below).

An easy way to remember the difference is: which hand would you have on the door knob as you walk into the room and open the door away from you.

A 36" door occupies the same amount of room as a standard 36" panel. The same is true of 42" doors.

Always try to place the hinge side of the panel door so it is part of a "T" or "Corner" configuration (see below).

The panel that the door opens against, must be an 80" tall panel, and either be at least as wide as the panel door width, or be part of a panel run that is larger than the panel door width. The panel that adjoins the door on the latch side should be 80" tall to allow the use of the stiffener kit that comes with the door.

If a panel door is requested in the middle of a straight panel run, an 80" tall panel equal to or greater then the width of the panel door, should be placed on the hinge side so the door opens against it (see below).

- Use worksurface support brackets or worksurface support panels whenever a worksurface adjoins or hangs on a run of panels containing a door.

- Door Panels can be used with Wall Mounts at right angles to a wall or square columns. They may also be parallel to a column or end of a wall.

- A Panel Door cannot be used with a Center Panel Mount unless an Acoustical Panel is used between the door and the panel being mounted to.

- Never reduce panel heights at a 90° intersection a door panel (example: a corner office with windows). Always round a corner with an 80" panel equal or greater in width than the door. At that point a lower panel could be used.

# Specification Guide

## Accessories

### Notes About Hang-On Components

All System 3000 hang-on components include a specially designed hanger bracket to prevent accidental dislodgement from the panel or wall track.

All System 3000 components meet or exceed the BIFMA ( Business and Institutional Furniture Manufacturers Association) standards for hang-on components.

BIFMA has two load tests for hang-on components :

- 1. **Functional Load** - At this load, the test furniture must still be useable with no deformation or breakage.
- 2. **Proof Load** - At this load, the test furniture must still be safely usable, but deformation is allowed.

The following are the BIFMA test loads for two categories of hang-on components, worksurfaces and overhead storage units.

### Worksurfaces:

Functional Load: 4.5 lbs/linear inch for 60 minutes  
Proof Load: 7.0 lbs/linear inch for 15 minutes  
300 lbs minimum

Worksurface Length	Functional Load	Proof Load
24"	108 lbs	300 lbs
30"	135 lbs	300 lbs
36"	162 lbs	300 lbs
42"	189 lbs	300 lbs
48"	216 lbs	336 lbs
54"	243 lbs	378 lbs
60"	270 lbs	420 lbs
66"	297 lbs	462 lbs
72"	324 lbs	504 lbs
84"	378 lbs	588 lbs
90"	405 lbs	630 lbs
96"	432 lbs	672 lbs

### Paper Management System

The chart below shows the various length mounting rails and the number of each type of paper management storage units that the mounting rails will hold side by side. Use the sizes below the chart to determine the mounting rail capacity when mixing different types of storage units on a mounting rail.

Mounting Rail Width	Letter Tray Unit 13-1/8" Width	Legal Tray Unit 16-1/8" Width	Vertical Storage 5" Width	Diagonal Storage 9" Width
18"	1	1	3	1
24"	1	1	4	2
30"	2	1	5	3
36"	2	2	7	3
42"	3	2	8	4
48"	3	2	9	5
54"	4	3	10	5

### Individual Unit Sizes

Letter Trays 13-1/8" wide (maximum – 3 stacked units high)  
Legal Trays 16-1/8" wide (maximum – 3 stacked units high)  
Vertical Storage 5" wide  
Diagonal Storage 9" wide (plus 2" overhang for dividers)

When letter/legal trays are stacked together and hung off either a mounting rail, or overhead hanging rails, the maximum number of units that should be stacked is 3. If the units are stacked freestanding on a worksurface, the maximum number of units is 6. The maximum number of stacked storage units that will fit inside an overhead is 4.

### Panel Wrapping Lateral Files

When panel wrapping one lateral file, the panel behind the file can be the same size as the width of the file (30", 36", or 42"). The return panels on each side of the lateral file will stay in place when carpet grippers are used.

When panel wrapping more than one lateral file that have been placed side by side, use panels behind the files that are at least 6" wider than the file.

EXAMPLE: Two 30" lateral files = 60" wide  
Use a panel combination that equals at least 66" behind the files.

The reason for the 6" difference is that no matter how tight the files are ganged together, the small air space between the files adds up, and the return panels on each side will not stay in position.

# System 3000® C.O.M. Yardage Requirements

**How to Specify C.O.M. Upholstery**

Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

**C.O.M. Testing**

KI will require six yards of actual fabric to be submitted for testing. The test will be completed on panels, tackboards, and overheads. For products shipped from Manitowoc, WI facility, ship upholstery material to:

**KI Manitowoc**  
**1400 South 41st Street**  
**Manitowoc, WI 54220**  
**Attn: Fabric Testing**

**C.O.M. Production**

Customer's fabrics must be approved prior to acceptance for production. KI assumes no responsibility for wear, defects, or performance of customer's own materials. C.O.M. orders are available on a deferred delivery basis.

Orders for production of C.O.M. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

**Diagram A**

**Excess Upholstery Material**

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

**Cancelled or Changed Orders**

KI assumes no responsibility for extra C.O.M. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

**Yardage Specification**

The chart on the following page details the yardage requirements for each upholstered item in the price list. To accommodate flaws, wrinkles, and other imperfections, calculate the total yardage and add the appropriate percentage shown below:

- 1 to 25 yards — Add 5 yards**
- 25 + yards — Add 10% over requirements (5 yard minimum)**

**C.O.M. Information Form**

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

In all instances, send this form to the C.O.M. Specialist.

☐ **A** Selvage Top to Bottom

☐ **B** Selvage Side to Side
