How to Specify C.O.M. Upholstery Textile designs often have intricate patterns. Not all individuals will interpret fabric

direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a horizontal fashion as shown in Diagram A at the right. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors. By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

C.O.M., C.O.L. and C.O.V. Testing

KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

> Attn: C.O.M. Specialist 1687 Westminster Drive, Gate 3 Green Bay WI 54302

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M., C.O.L. and C.O.V. must be labeled with the purchase order number.

C.O.M., C.O.L. and C.O.V. Production

Customer's fabrics and leathers must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch of upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics, vinyl or leather. C.O.M., C.O.L. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M., C.O.L. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

KI recommends that leather be ordered in yardage. Leather must be usable. The outer edges ship material to: cannot be calculated as square feet or yardage.

The C.O.M., C.O.L. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M., C.O.L. and C.O.V. Order Processing For products shipped from Green Bay, WI facility, ship upholstery material to:

> Attn: C.O.M. Storage 1687 Westminster Drive, Gate 3 Green Bay, WI 54302

For products shipped from Bonduel, WI facility,

Attn: C.O.M. Storage 204 West South Street Bonduel, WI 54107

For products shipped from Ontario, CA facility, ship material to:

> Avail/Impress/Kismet/Medical & Laboratory Stools/Pilot Attn: C.O.M. Storage 1110 S. Mildred Ave. Ontario, CA 91761

Intricate Patterns

In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests provide a sketch noting M requirements as in Diagram B, along with 1 materials for testing, and with the order.

Diagram B

Please see information below and check the appropriate box.

### Treated Materials

If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

#### Split Orders

If a portion of the shipment which does not require C.O.M., C.O.L. or C.O.M. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

### **Excess Upholstery Material**

KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

### **Cancelled or Changed Orders**

KI assumes no responsibility for extra C.O.M. C.O.L. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of

Test approved. Submitted for production.

### C.O.M., C.O.L and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number

### **SPECIFICATIONS**

Depth of nesting (two chairs)

Depth of each additional chair

The frame is made up of four legs welded to a steel mechanism tube. The legs are 1"diameter, 13-gauge high-strength low alloy steel tubing.

### Leg Finishes

Baked on electrostatically applied 45 sheen epoxy powder coating or bright nickel chrome plating.

### Casters/Glides

Double wheels (60mm) of high-impact thermoplastic. High-impact plastic frame. Carpet and hard floor casters are always black. Bell glide (2" high) made of high-impact plastic also available, black only.

### Seat and Backrest

Seat is two-piece construction of molded plywood upholstery board with a molded compound curved polypropylene shroud with a textured finish. Seat is always upholstered. Foam (1-3/4") is applied to the molded plywood upholstery board. Fabric is then upholstered over the foam. Backrest is

available in either a poly or upholstered version. Backrest frame is molded glass-reinforced nylon. Mesh fabric is 100% polyester. Backrest has an integral "handle."

Seat flips up to allow chairs to nest for storage

Seat and back are field replaceable.

7-1/2"

### **Backrest Supports**

Two welded steel backrest supports attach the backrest to the torsion mechanism.

#### **Torsion Mechanism**

The back flex is achieved by the torsion mechanism. It consists of two flat torsion springs captured at both ends by steel bushings that are welded to the backrest supports. The torsion mechanism creates gradually increasing resistance over the full 12° of back flex.

7-1/2"

Armcaps are made of polypropylene. Armrests rotate with the back. Armcaps are field replace-

7-1/2"

### Flip-Up Tablet

Available on RH or LH side. The tablet arm support structure is 1-inch diameter, 13-gauge tubing, welded to the main chair frame. A formed steel hinge is welded to the top of the support structure and secured with screws to the underside of the writing surface. Writing surface is nominally 9-1/2" x 20-3/4" x 12-1/2" plywood core of 5/8" thick, 11-ply hardwood, surfaced with 0.030" high-pressure laminate top and plain backer undersurface. Edges are lacquered and sealed. When so equipped, and with the tablet flipped up, chairs will nest with other Torsion Air chairs with tablets, or without.

### Piretti Tablet

Available on RH or LH side. The tablet support is 1-3/16"OD x 14-gauge round steel tubing. The support is welded to the chair frame. The tablet mechanism consists of two die cast aluminum

housings and a stamped steel hinge assembly. The main housing is mounted inside the steel support tube and secured with a thread-forming screw. The mechanism has two through-bolted pivot axes with bushing that allow stowing. The mechanism permits 12 degrees of horizontal rotation for ingress/egress without stowing the tablet. With the tablet stowed, the chair will nest with other Torsion Air chairs with or without tablets. The tablet is made from blow-molded high-density polyethylene and is only available in black. The tablet is connected to the mechanism and supported by a 12-gauge steel plate. The tablet has an effective working surface 12" deep by 16" across (overall dimensions are 12" deep by 22" across).

### INFORMATION

### C.O.M Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 3/4 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

Attn: C.O.M. Specialist 1687 Westminster Drive - Gate 3 Green Bay, WI 54302

### **Fabric Disclaimer**

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.

### **SPECIFICATIONS**

### Seat and Backrest

Seat is a two-piece construction with a molded polypropylene liner with a molded compound curved polypropylene shroud with a textured finish. Seat is always upholsted. Foam (1-1/2") is applied to the molded polypropylene liner. Fabric is then upholstered over the foam. Backrest frame is molded glass-reinforced nylon. Mesh fabric is 100% polyester. Seat and backrest are field-replaceable.

### Back/Arm Supports

Two welded steel backrest supports attach the backrest to the torsion mechanism. If so equipped, optional armrest structure is integral to the backrest support. Armcaps are polypropylene and are field-replaceable.

### Full Sled Base Frame (TAS)

The sled base frame consists of two segments of 3/4" 16-gauge seam welded tubular steel and two steel seat supports.

### Four Leg Frame (TAL)

The four leg frame consists of two U-shaped sections, one front and one rear, welded together with two support brackets to form the four leg chair. The sections are formed of 15/16" 15-gauge seam welded tubular steel.

### Leg Finishes

Baked-on, electrostatically-applied powder-coating, or bright nickel-chrome plating.

### Standard Tablet Arms

5/8" 11-ply plywood tablet with high-pressure laminate surface and lacquered edge. Tablet arm support matches frame color. Seating clearance is 13 1/2". Standard tablet measures 19 1/2" long and 12 3/4" wide.

#### **Torsion Mechanism**

The back flex is achieved by the torsion mechanism. It consists of two flat torsion springs captured at both ends by steel bushings that are welded to the backrest supports. The torsion mechanism creates gradually increasing resistance over the full 12° of back flex.

### Stacking Vinyl Upholstered Chairs

It is recommended that chairs to be stacked be covered in material other than vinyl as an impression in the seat may result. KI does not warrant the effects of stacking on stock or C.O.M. vinyl upholstery.

### Stacking Vinyl, Polyurethane, and **Imitation Leather Upholstered Chairs**

It is recommended that chairs to be stacked be covered in material other than vinyl, polyurethane, or imitation leather as an impression in the seat may result. KI does not warrant the effects of stacking on stock or C.O.M. vinyl, polyurethane, or imitation leather upholstery.

### Transport Dolly

Tubular and plate steel welded together. 5" casters; two fixed, two swivel. Powder coated finish. Two distinct dollies are available; one for full Sled Base, and one for Four Leg.

### **Universal Dolly Handle**

Tubular steel and plate steel construction. Handle is powder coated. Field-assembled to dolly.

### INFORMATION

### **C.O.M Testing and Production** Requirements

Not all materials are suitable for upholstering this product. A 3/4 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

Attn: C.O.M. Specialist 1687 Westminster Drive - Gate 3 Green Bay, WI 54302

### **Fabric Disclaimer**

### **SPECIFICATIONS**

### Seat and Backrest

Seat is a two-piece construction with a molded polypropylene liner with a molded compound curved polypropylene shroud with a textured finish. Seat is always upholsted. Foam (1-1/2") is applied to the molded polypropylene liner. Fabric is then upholstered over the foam. Backrest frame is molded glass-reinforced nylon. Mesh fabric is 100% polyester. Seat and backrest are field-replaceable.

### Torsion Mechanism

The back flex is achieved by the torsion mechanism. It consists of two flat torsion springs captured at both ends by steel bushings that are welded to the backrest supports. The torsion mechanism creates gradually increasing resistance over the full 12° of back flex.

### Back/Arm Supports

Two welded steel backrest supports attach the backrest to the torsion mechanism. If so equipped, optional armrest structure is integral to the backrest support. Arm caps are polypropylene and are field-replaceable.

### Pedestal Casters

Double wheels of high-impact thermoplastic. High-impact plastic frame matches chair color.

### Pedestal Base

26" injection-molded, glass-reinforced nylon 5-blade base. Base and cylinder are available in black. An optional polished die-cast aluminum base is available on both chairs and stools.

### INFORMATION

### C.O.M Testing and Production Requirements

Not all materials are suitable for upholstering this product. A 3/4 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

Attn: C.O.M. Specialist 1687 Westminster Drive - Gate 3 Green Bay, WI 54302

### **Fabric Disclaimer**

Fabric will be applied as swatched by the fabric manufacturer. Fabric that is required to be applied differently than is swatched will need a Product Modification Request written specifying the direction the fabric is to be applied.
