RE: Software Support Agreement

Brandy,

The proposed Software Support Agreement between NuMedRx and UMMC states the following:
*"Vendor shall provide Purchaser with the use of up to four (4) BioDose® or Pinestar Nuclear Isotope Tracking Systems software (the "Systems") during the term of this Software Support Agreement, contingent upon Purchaser's agreement to at all times comply with: (a) all the terms and conditions of the System License Agreement that is attached hereto as **Exhibit "A"** and (b) the quantity, description, and pricing set forth in this Agreement and reflected on **Exhibit "B"** attached hereto."*

The aforementioned software is a sole source service provided through an agreement between NuMedRx and ec2 Software Solutions. This proprietary software allows departments to keep track of inventory, doses, patient information and billing. For added convenience, customers can easily place and track their orders online. Furthermore, doses can be followed from arrival through disposition, along with a complete digital history that documents every exam and dose that a patient receives.

With Kindest Regards,

A handwritten signature in blue ink, appearing to read 'Bennie K. Bostick', with a long, sweeping horizontal line extending to the right.
