

19 December 2022

Ms. Ellen Swoger
University of Mississippi Healthcare
2500 N. State Street
Jackson MS 39216

Dear Ellen:

As the software vendor we are sending this letter to affirm that Bamboo Health, a Delaware corporation (previously referred to as Appriss Health), is the only qualified vendor to integrate the Mississippi Prescription Monitoring Program to Epic (and by extension, to PMPi, the interstate data sharing platform).

Bamboo Health acknowledges that our Prescription Drug Monitoring solutions (PMP Gateway and NarxCare) are proprietary in nature and can only be licensed from Bamboo Health. Bamboo Health is the industry standard for supporting efficient and secure real-time access to PMP data and analytics directly within clinical workflows. This managed service platform provides authorized health care providers with comprehensive connectivity, clinical decision support, patient support and engagement, and care coordination. With Bamboo Health, PMP data, analytics, tools, and resources are now integrated into physician and pharmacist workflow through EHRs and pharmacy management systems in 43 states, with over 90 million transactions completed each month.

Bamboo Health's PDMP services include the following:

- On-demand, detailed audit trail access
- Verification of user registration with CURES
- Self-service configuration for custom PMP rules/regulations
- Secure and efficient access for practitioners, pharmacists and other PMP users
- 24/7 technical support
- Native integrations with Epic
- *Multi-State integration

We welcome a partnership with the university to save clinicians' time while informing care and encouraging compliance with both state and federal requirements for prescribers and pharmacists.

Please get in touch anytime if I can be helpful.

All the best,

A handwritten signature in black ink, appearing to read "Chuck Creamer", on a light-colored rectangular background.
